Creativitix
Software Ltd.

We are a team of thinkers, makers, and doers who love to solve problems.

About us

We are a software development agency that helps different companies and start-ups at any stage of the product software development cycle, from R&D or building MVP from scratch, to scaling, UX analyzing and improving.

We started with passion

We strive to fully understand our customers and their businesses, allowing us to propose the best solution — one that works. Our solutions take as many forms as they serve functions, increasing sales or reaching new markets. Whatever form our solutions take – optimization of an existing process, launching a start-up or the development of a completely new set of services – they turn into clear, tangible benefits. And what's more, they turn into profits

Solutions we provide

Business Process Automation

Automation always saves time and reduce cost. So enhance your business process for maximum profit.

Product Research & Design

Solve real business problems with design, let us know your business problem and we will represent best solution to you.

Web & Mobile Applications

Custom softwares that can help you achieve you goal. We will provide you solution from every angle.

Legacy Software Modernization

Update your software with latest technology and trend. Take benefit form all the latest technology.

Third Party Software Integration

When prebuild automation tool is not enough and gets complex. We will integrate those tools and help you achive your business goal.

Scaling Product Delivery

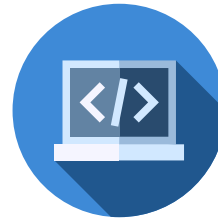

When it comes to agile software development, we break it into multiple phase and deliver on time.
