

Company **Profile** of

DBL Digital Limited

(A Concern of DBL Group)

Message from CCO

Our strengths are derived from our proven ability to leverage our most valuable assets — our people, our technology, our capabilities and our unrelenting focus on creating value for our customers.

We work to solve digital transformation related challenges, is what we aspire to do in a broad, enduring sense. This purpose has been evident since the establishment of DBL Digital Ltd. when our founders set out to build a premium quality service company.

As an information technology company, we are responsible for driving our business forward to the benefit of all our stakeholders and providing our stockholders with a return on their investment. This will only be accomplished by our continued focus on quality, reliability, durability, vocational value and customer service.

While our constant desire to improve will change some of the things we do as a company, we will always continue to exercise ethical business practices, maintain a respect for the individual and run our organization in ways that earn us the trust of those whom we encounter.

Throughout our history, we have been a wellspring of innovation, creativity and technological advances. And I am proud to say, DBL Digital Ltd plans to continue its heritage of leadership in the markets we serve and in the communities where we live and work.

The values we share are embodied in what goes on from day to day. Team members must exhibit ethical and honest behavior, and DBL Digital Ltd must offer fair, equal conduct in a safe, healthy workplace. We believe that in such an environment, sound decision making and effective strategies flow naturally from the give-and-take of daily business engagements among all team members.

We also make corporate responsibility a top priority. Our reputation for corporate integrity attracts great team members, great customers, and even greater opportunities. It is a key to our long-term success.

However, our team is committed to maximizing client satisfaction through innovative and value-added project delivery. We take pride in selecting the right teams to meet the demanding and ever-changing needs of our clients. Our leadership in this industry is directly attributable to our talented staff's dedicated attention to our clients' needs and executing effective solutions to achieve success.
