Company Profile:

FCBL started its journey in 2016 in a small office consisting of 4 staff members. It ran operations as a proprietorship business for 3 years, learned about the global BPO market, established relationships with local and foreign clients and business associates. It was a group of enthusiastic Information Technology professionals with an ultimate goal to exceed the local market and explore the global demand of Information Technology enabled services. Therefore, it started the journey to serve North American businesses and individual entrepreneurs.

In a very short time of period FCBL has become a trustworthy service provider to the customers because of the hard work, dedication and extraordinary customer service. FCBL believes in fully customized solutions, intensive care and innovation. Future Cloud Bangladesh Limited differentiates itself from other BPO providers across the country and overseas competitors with strong core values and professionalism. In the year of 2019, it became a limited company by registering itself in RJSC (Registrar of Joint Stock Companies And Firms).

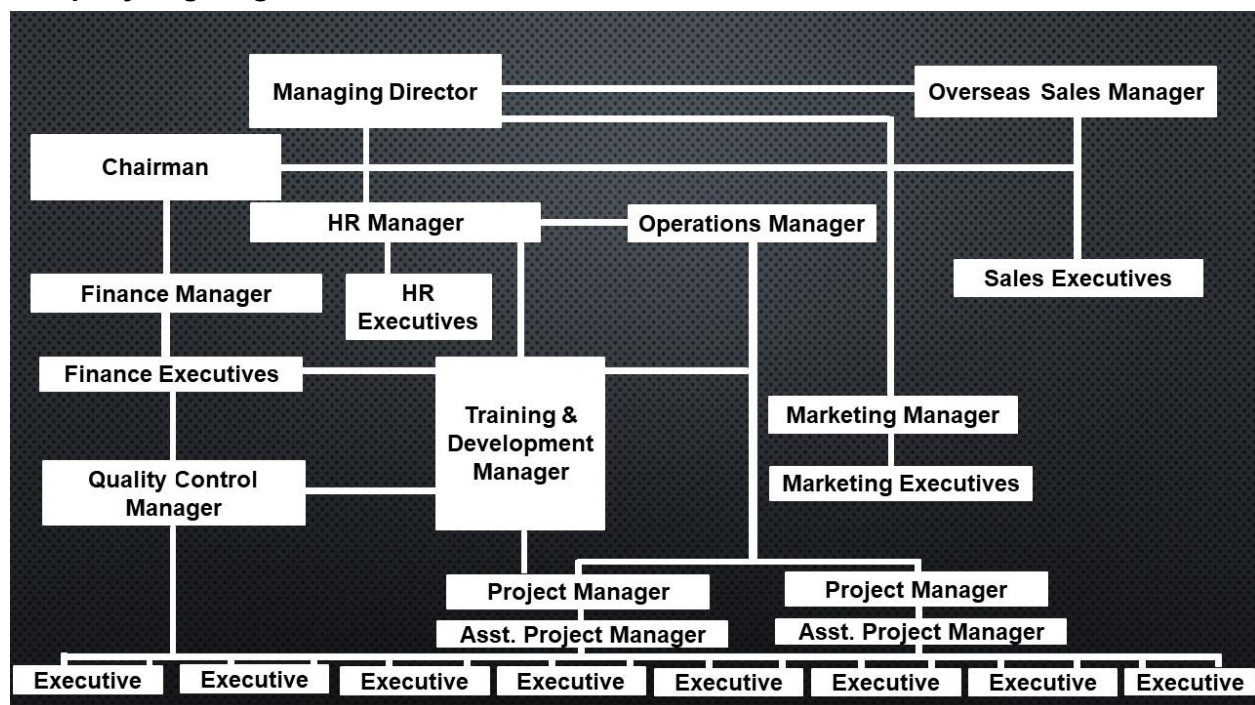

Company Structure:

FCBL is also renowned through the local corporate market for valuing its employees. FCBL is an unique example of an ideal ITES company where each individual employee is valued equally and always appreciates the employee contribution.

The company is formed with a board of directors. Kazi Himel is the managing director with 6 years of corporate experience in the same sector, with an engineering background and a go-getter attitude, he managed to develop an innovative culture to contribute to the company growth. Sonia Sultana, on the other hand is the chairman with an impressive background in many international NGOs that focus on women empowerment ensured that FCBL creates equal leadership and opportunity for women in this 4th industrial revolution.

FCBL encourages constant skill development through information technology. Today's market demand is beyond traditional academic education. Therefore, we must maintain a stable ecosystem where all information technology companies will stand together to empower the potential youth to level up the skills and take them to the global standard.

Company Organogram

Company Vision & Mission:

Future Cloud Bangladesh Ltd. always has a vision to grow and cross all borders to enrich the national economy with its tremendous efforts to develop youth and create quality employment

for them. The company has a large mission to open overseas branch offices in the United States, Canada, Philippines and Singapore within the next 10 years. This is to ensure that it has a consistent consumer base for its BPO services and generate a high volume of work orders for its head office in Bangladesh. As a side effect it shall also generate millions of dollars of foreign remittance for its home country Bangladesh. FCBL has always emphasized its training and development section to ensure consistent improvement of its quality of service. Being a BPO company it is not possible to survive in the rapidly changing global market with international competitors.

We thank the government. initiatives of branding the ICT across the country, developing the infrastructure and tax holidays. There is still a big portion of our fresh graduates stay unemployed every year. With the practical knowledge and training of English communication skills, we can easily convert them into assets for bringing foreign remittance to the country. FCBL is committed to grow as a business and continue to contribute to the national economy. Beside that it is always open for collaboration with similar organizations to build a strong ECOSystem of IT companies with the national vision of developing ICT across the country.
