

YOUR OFFSHORE SOFTWARE DEVELOPMENT PARTNER

COMPANY PROFILE

22 February 2022

Company Profile

JustGo Technologies Limited is a fully export-oriented software company in Dhaka and has been exporting software services to the UK, USA, Australia and Europe for the past decade.

The JustGo software allows businesses of all shapes and sizes to create and tailor solutions to meet their own business needs. The powerful features enable users to build a solution that is easy to manage and provides a simple browser based user experience.

All Data and forms are presented to the target audience in workbenches, which are designed and controlled by the administrative user.

Our Story

JustGo Technologies Ltd started its journey as “Azolve Technologies Ltd” in 2005 with an ambition to provide market leading software services using cutting edge technologies that would ensure quality and reliability with administration.

Having started out with our main focus on customized solutions and invoicing as Azolve we swiftly developed into a determined membership platform. Through the initial success as GoMembership we were able to diversify into so much more than just membership.

We reached wider markets and began to expand our software to include a wider range of features until our software became fully configurable and evolved into JustGo.

What we do

Our development team consists of experienced and qualified system analysts, application developers, solution developers, database administrators, programmers and testers.

In each step of development, we use creative ideas, cutting-edge technologies and proven methodologies.

You can rest assured that the software will be top quality and user friendly.

Here are some of our services.

1

Software
Development

2

Web Application
Development

3

Database Development

4

Exporting Software
