ABOUT US

WHO WE ARE

Techforing delivers best-in-class cybersecurity monitoring and management solution to corporate, government agencies and individuals. US-based, and established in since 2014, we are independent Cybersecurity Experts with a sole focus on risk assessment, incident response, security compliance, and data protection.

We have served security solutions to 54+ countries and 1400+ clients all over the world. Being in this business for a long period of time, we have gathered enough expertise and experience to be able to provide industry-grade security solutions to all types of data-driven businesses.

MISSION

With a team of talented and exciting individuals, our mission is to protect digital assets for corporations and individuals and provide safer cyberspace for everyone.

VISION

We aim to be no. 1 among cybersecurity companies in terms of high quality IT security, customer service, and work ethics. Regardless of size and affordability, we are working towards hack proofing every business and individual throughout the entire world.

OUR SERVICES

BUSINESS CYBERSECURITY

Businesses, these days, are highly reliant on technology that is used for storing client or customer data, receiving orders, financial transactions, etc. From email to professional networking and data documents, businesses depend on technology for 24/7 connectivity and carry out work efficiently. When these lines of communication are threatened or compromised, it can have a devastating impact on the business. Hence, every business regardless of its size and capacity, needs to have cybersecurity at all times for uninterrupted operations.

1. RISK ASSESSMENT

Systematically locate and quantify the risks and potential threats associated with the organization's assets and expose security control vulnerabilities on each layer.

OUR SERVICES

Our Approach in Risk Assessment

2. INCIDENT RESPONSE

A structured methodology to effectively identify, mitigate the damage, and bring down the cost of a security breach incident while locating and securing the weak spots to avoid future attacks.

HACK RECOVERY

Recover and restore control of the organization's hacked server, network, cloud infrastructure, data center, or website, etc.

MALWARE REMOVAL

Remove virus, adware, spyware, ransomware, and malware from office server, network, cloud infrastructure, data center, or website.

CRIME AND DIGITAL FORENSIC INVESTIGATION

Forensic experts structurally investigate to track down and reveal hackers' whereabouts in state-sponsored or financial crime incidents.

OUR SERVICES

3. SECURITY COMPLIANCE

We provide security consulting to ensure organizations' data privacy and security controls are compliant with the ever-evolving standards enforced by the regulatory bodies to the respective industries.

4. SMB SOLUTION

A customizable all-in-one set of cybersecurity services for SMBs empowered by the fundamentals of system safety measures at an affordable rate.

1 MANAGED CYBERSECURITY SERVICES

Putting custom-developed next-generation algorithms to practice, our engineers detect, prevent, and secure industry-specific critical information, infrastructure, and endpoints of small and medium-sized businesses on a monthly or quarterly basis.

2 PLUG AND PLAY PROGRAM

A fully packaged and ready-made cybersecurity action plan for the company we serve regardless of the industry. It's a unique solution for financial, educational, e-commerce, or law firms, any SMBs looking for an easy to deploy service.

OUR SERVICES

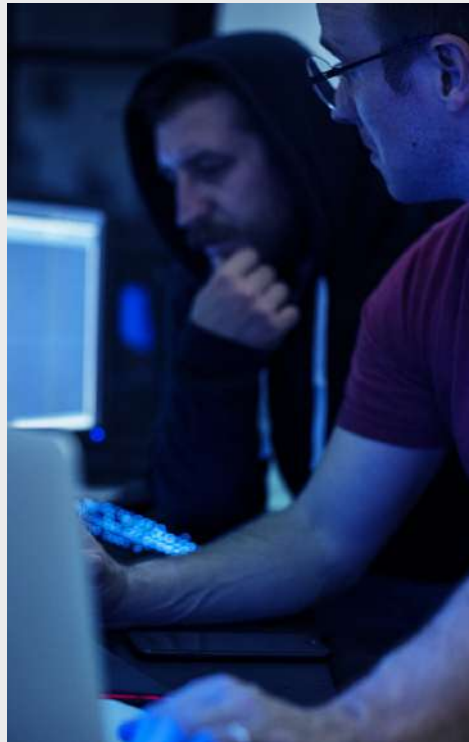

PERSONAL CYBERSECURITY

We identify, secure, and enlighten the most influential people in society on potential threats to digital devices, social media, email, and private data.

1. CONCIERGE CYBERSECURITY

- Protect email, financial and social media accounts
- Secure electronic devices, cloud accounts, and storages
- Digital data security

2. CYBER INVESTIGATION

We serve individuals in extracting publicly available data from the web either to solve a cybercrime or for personal purposes.

A. Cyber Crime Investigation

Our forensic investigators extract and analyze data from the client's operating system, device, and applications while uncovering the motive and the perpetrator. The following cases are the ones that fall under our radar:

- Cyber Bullying, Harassment, Scamming
- Privacy invasion
- Phishing scams
- Hack Incident
- Identity Theft

B. Open Source Intelligence

Our Osint analysts manually detect and collect relevant data from a sea of information to solve the following cases for individuals:

- Background Check
- Personal Information Audit
- Identifying security gaps
- Surveillance and Private Monitoring
- Expose the intruders and their motive

OUR SERVICES

3. INCIDENT RESPONSE

We respond to client's cybercrime incidents with damage control and regaining access to the compromised accounts or devices; also help clients' data removal from big data broker sites.

HACK RECOVERY

Recover and restore control of your hacked social media, email and financial accounts, personal cloud storage, etc.

VIRUS REMOVAL

Remove virus, adware, spyware, ransomware, and malware from your device.

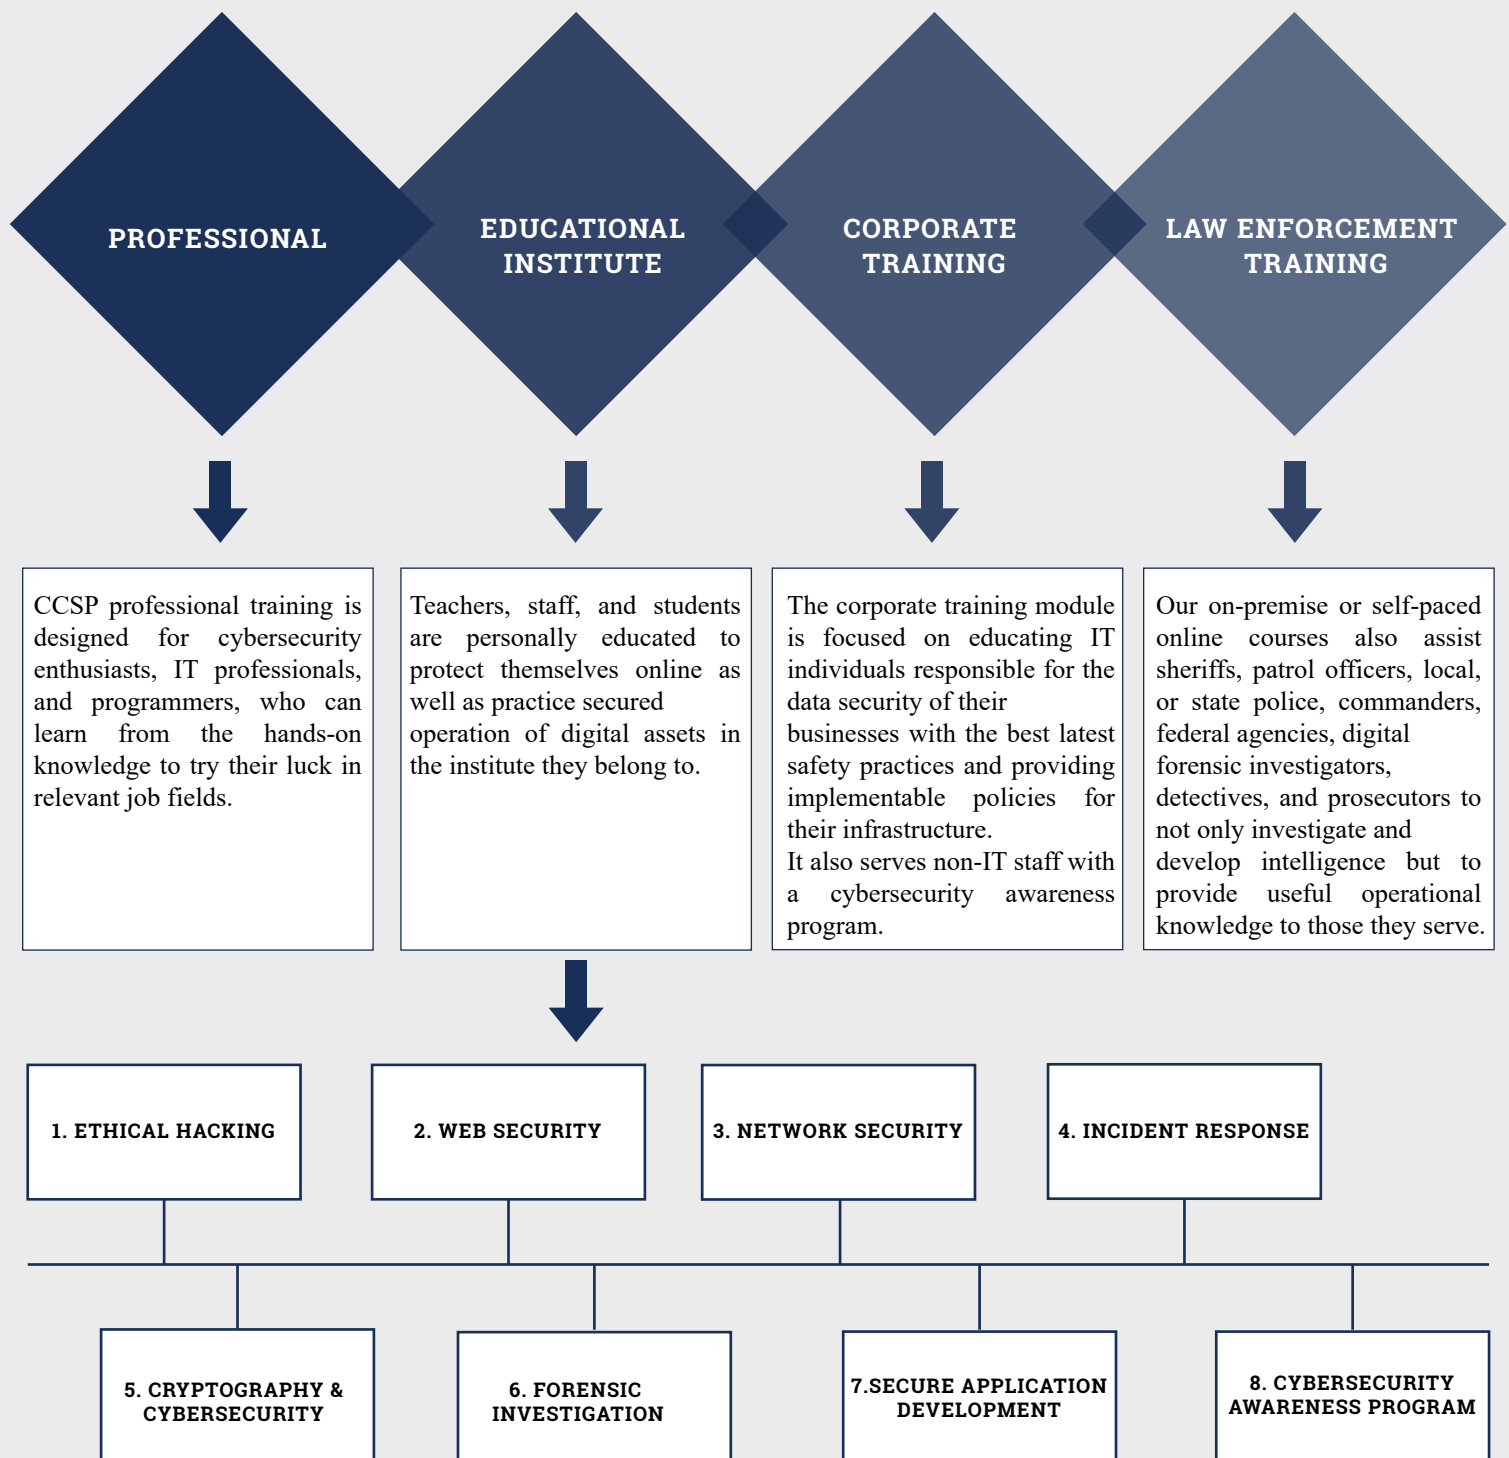

DATA REMOVAL

Remove unwanted data and links from the internet i.e. Scandalous Photos or Videos, Fake Dating Profiles, exposed financial and personal information, etc

OUR SERVICES

TECHFORING ACADEMY

An online or on-premise course with hands-on training on ethical hacking, cybersecurity awareness for Non-IT professionals, is conducted by our certified cybersecurity professionals to train any individual with or without an IT background. To educational institutes, we provide Cryptography, Web Security, Forensic Investigation, Incident Response, Secure Application Development, etc. After successful completion, they are provided with a certificate as a boost to advance their career in this highly lucrative and contemporary field.

OUR SERVICES

WHY CHOOSE TECHFORING ACADEMY

- Classes led by top-class instructors with C|EH, CHFI, CISA, CISSP certifications.
- Learn the latest cybersecurity tools and techniques; assess any IT infrastructure.
- Practice real-world hack cases through virtual labs and assignments.
- Gain Industry Recognition and exposure by collaborating with the best in this profession.

OUR PRODUCTS

THIRDEYE

AI and MI powered next generation web vulnerability scanner. It scans websites or web applications and searches for all kinds of vulnerabilities including OWASP Top 10, Zero Day, and so on. Authenticated users enjoy custom scans along with monitoring their web applications and know about the threats before it's too late. Managed monthly and yearly subscription is available for unlimited scan per site.

CLOUD SECURITY SOLUTION

Cloud security refers to the technologies, policies, controls, and services that protect cloud data, applications, and infrastructure from threats. We, TechForing, streamline your operations, synchronize your device data loss prevention with the cloud to use in any cloud service and provide application security across your entire multi-cloud environment.

SIEM

Security Information and Event Management (SIEM) is a software solution that aggregates and analyzes activity from various resources across the entire IT infrastructure of a business. It works by collecting log and event data generated by company applications, security systems, and host devices and bringing it together into a single centralized platform.

We have this complete solution that operates the total security operations of the organization's system and provides the actual benefits to the incident response team to handle any threat issue as fast as possible.

Personal Cybersecurity We Serve to

HIGH-NET-WORTH INDIVIDUALS

High Net Worth individuals and families or family offices are always a lucrative target for cybercriminals because of the lack of attention or time they can give into data security. We have a VIP cyber defense package, that serves the high profile personas of the society the necessary support they need in terms of data and wealth security management.

C-LEVEL EXECUTIVES

Corporate executives often confront security challenges like insider threats, mobile data hacks, BEC scams, and social media attacks, that not only harm them, it also sips into their workplace and families. Our executive protection service shields their financial assets and data usage and strengthens the safety net to avoid cyber disasters.

POLITICAL LEADERS

Cybersecurity for government is of national importance as it not only is a matter of reputation but also a vital factor in balancing the public image of an individual. But over the years, there have been cases where individuals are getting cyber defamed via website or social media account hacks. We have a concierge service to protect and prevent them from becoming a cyber victim.

MEDIA PERSONALITIES

Celebrities are as vulnerable to cyber threats as any normal people are due to their precious fame and public image. It not only embarrasses them, but their hiring agencies become vulnerable to future threats as well.

TechForing VIP service has all the right tips and techniques to safeguard them and help them go about their daily job headache-free. knowledge to those they serve.

OUR BUSINESS CLIENTS

We have served security solutions to 1400+ clients across 54+ countries

ENDORSEMENTS

SOUHEIL THABTI

Ethics Manager,
KT Bank

They provided plenty of avenues for our Security team to improve and tighten the controls. In commercial banks, data security is the main priority. Without them providing us with the latest policies and compliances, we'd remain in the dark about a lot of things. They have lots of promise and potential. Give them a try. Their skills might save you from lots of unnecessary financial hassles.

NICK NAMIKAS

Chief Technology Officer,
Incentify

We were concerned about our infrastructure and cloud security as we store vast amounts of sensitive customer data. TechForing did a thorough audit and made excellent recommendations. They went above and beyond. I will definitely work with them again as they pointed security holes no other tech had pointed out before. Thank you team!

SAIF QAZI

Managing Director,
Urban point

They are extremely knowledgeable, committed and the best thing you can find on the internet. This company is a one-stop-shop for cybersecurity and server stability. You can entrust them with critical projects and sensitive information and be assured that they will go above and beyond to help you as a person or business. I have now worked with them on several projects for 6 years. Do yourself a favor and hire them!

JENNIFER FAZZOLARI

Manager, Deal Advisory,
KPMG

They are quite good. Gave us proper directions on every issue we faced. Cybersecurity has been a vague idea to me before I took their service. The Engineers are good in communication and transparent in consulting. Would surely hire them again for risk assessment.

KHURRAM SUHRWARDY

Director Creative ,
SB Productions

I couldn't access My Joomla site as it was probably blocked by hosts due to a hack. Techforing was a big help then. They were always available and helped me understand every bit of it.

They did some malware removal and quickly resolved the issues. Good experience overall.

ENDORSEMENTS

ESTHER ESCOBAR

Project Manager,
Defense IT Solutions Inc

They are some of the experts in the Nessus tool. There are very few like them who are easy to work with and also affordable. Surely, work with them again in any other security issues we come across!
Recommended!

ENRICO GARZOTTO

CEO & Founder,
Forex Nation

They are fast. They are very precise and competent. They work very well and make you understand what the problems are and make sure to solve them fast and with precision. Our website was totally off-limit before they laid hands on it. They secured and brought it back from a dead state.

AMBER LEPAGE

Finance Manager,
GURUS Solutions

Hired them for Vulnerability assessment. They used manual testing techniques to validate all automated results, then uncovered vulnerabilities and security weaknesses. We are still following their submitted report. So far so good! I think they did a swell job!

MARCUS LUN

Director,
SSH Capital Sdn Bhd

Our regional staffs were unable to send outbound emails. So we hired this company. They were Efficient with an Impeccable work rate. Highly recommend. Would hire Them for further tasks in the future.

OUR PARTNERS

WHY CHOOSE TECHFORING AS A CYBERSECURITY PARTNER

- Our partnership-oriented service allows you to build on your security insights and mitigate potential cyber threats.
- We provide you with data security, resources, and expertise in exchange for strategic support.
- We infuse cybersecurity into your IT professionals and help you generate a new revenue stream and achieve informational growth with adaptive strategies and security.
- Partnership with us enables you to have the tools and expertise required to bring integrated and unified solutions. We provide innovative cybersecurity services customized to the customers' needs.
- We manage our strategic partners' entire security operations as our partnership stays on in mutually beneficial collaboration.
- We provide you with data security, resources, and expertise in exchange for strategic support.
- We provide dedicated training sessions and certification programs alongside customized support to be able to respond to clients in the time of their need.
- Trust is foundational to our company and how we engage with our partners as we strictly maintain the key principles of transparency and accountability, reliable third parties, information integrity and control, client and customer benefit.
- We are determined to safeguard the world's digital assets and deliver revolutionary cybersecurity that can translate our core values of reliability and innovation into top-notch solutions and services.
