About us

IT'S GLOBAL BANGLA LTD. is a leading, highly innovative software house, systems integrator and technology provider, established to provide leading edge intelligent technical solutions and consulting services to businesses, organizations and government in order to allow the efficient and effective secure access and communication with various heterogeneous information resources and services, anytime and anywhere.

Our Vision and Corporate Motto

Established to deliver leading edge ubiquitous secure technologies, intelligent technical solutions and consulting services to businesses, organizations and governmental bodies, IT'S GLOBAL BANGLA LTD. was founded with the vision to enable “**secure access to any service, data and**

information anytime, anywhere“, providing its customers and business partners with robust, extensible and customizable security-enhanced solutions for information sharing, data exchange, services invocation and communication.

Management Hierarchy

Activities on Global Platform

IT'S GLOBAL BANGLA LTD. works for global clients and fulfill the activities and professional services can be summarized in the following categories:

e-Commerce Automation

The following tasks, we do as our part of automation for the clients:

- **Best sellers:** Re-add out-of-stock products to the online store when they're back in stock
- **Customer loyalty:** Automatically tag high-value customers for segmentation and notify customer service to send a personalized thank you message, or apply discounts or specialized shipping rules to customers with email addresses or tags like "Loyalty Member".
- **High-risk orders:** Instantly flag and notify internal security teams of high-risk orders, like if a bot quickly buys out all stock.

- **Manage donations:** Keep track of dollars donated via Slack and a spreadsheet.
- **Order tagging:** Tag restricted shipping zones and hold payment from customers trying to ship to those locations. Alert staff to offer customers store credit to spend on their next purchase or a refund.
- **Customer preferences:** Show and hide payment options relative to customer criteria like order history, location, and device.
- **Channel preferences:** Identify, tag, and segment customers who buy from specific sales channels, such as Amazon, Facebook, Pinterest, and more.
- **Scheduled sales:** Price changes and promotions for predetermined time periods
- **Discounts:** Adjust prices at checkout based on product combinations, quantity, or customer location.
- **Scheduled product releases:** Preload new products and publish them to your store, social media, apps, and sales channels simultaneously. Rollout and rollback entire theme changes for seasonal promotions or product drops.

System Integration and Custom Software Development

- Design and development of Integrated IT Solutions and Tailor-made Software, utilizing custom software development frameworks and including training, helpdesk and software engineering outsourcing activities.
- Design, development, customization, deployment and support of enterprise-driven custom software applications and solutions, e-business (B2B) and e-commerce (B2C) solutions, e-government (G2G, G2B and G2C) and e-health solutions, as well as brand new software products and services.

e-Services and e-Processes

- Design and development of (transactional) portals exposing workflow-based e-services for customers, citizens, and businesses.
- Target Organizations: Public Administration and Central Government, Regional and Local Government, and Private Sector.

Technology Provision and IT Consulting

- Combining emerging technologies (like Cloud Computing, Software-as-a-Service, Social Networks, Mobility, Semantic Web, Linked Open Data, and Big Data Management) to help organizations to meet their business strategy goals and benefit from the power of technology innovation.
- Definition of the IT Strategy, Infrastructure and overall Enterprise Architecture required for organizations and enterprises to support the efficient and effective achievement of their business objectives, ensuring the end-to-end IT security across the organization.
- Increase of the R&D capacity of business partners, staffing their project teams with the highly qualified and experienced research engineers of IT'S GLOBAL BANGLA LTD. who add value and ensure the robustness and success of the research and technological development process.
