

About Our Company

Shahjalal Software Pvt. Ltd. is a business concern of Gulf State Software LLC. Management team. For over 12 years, Gulf State Software has been creating high-end custom software and web application solutions for small and medium-sized businesses in Houston, Texas. Most of these solutions were developed in Bangladesh and outsourced to the U.S.A. for implementation.

As Bangladesh transforms digitally, the demand for high-quality custom software and web solutions has increased exponentially. Shahjalal Software was founded to participate in and provide ongoing support for this transformation era. Our primary focus is to build a good reputation as a reliable software and web development company worldwide.

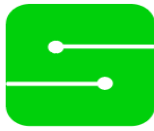

Transforming your ideas into reality through our innovation is our passion. With the rapid technological progress, we are working tirelessly to upgrade our team to develop our client's existing business processes with the most advanced functionalities.

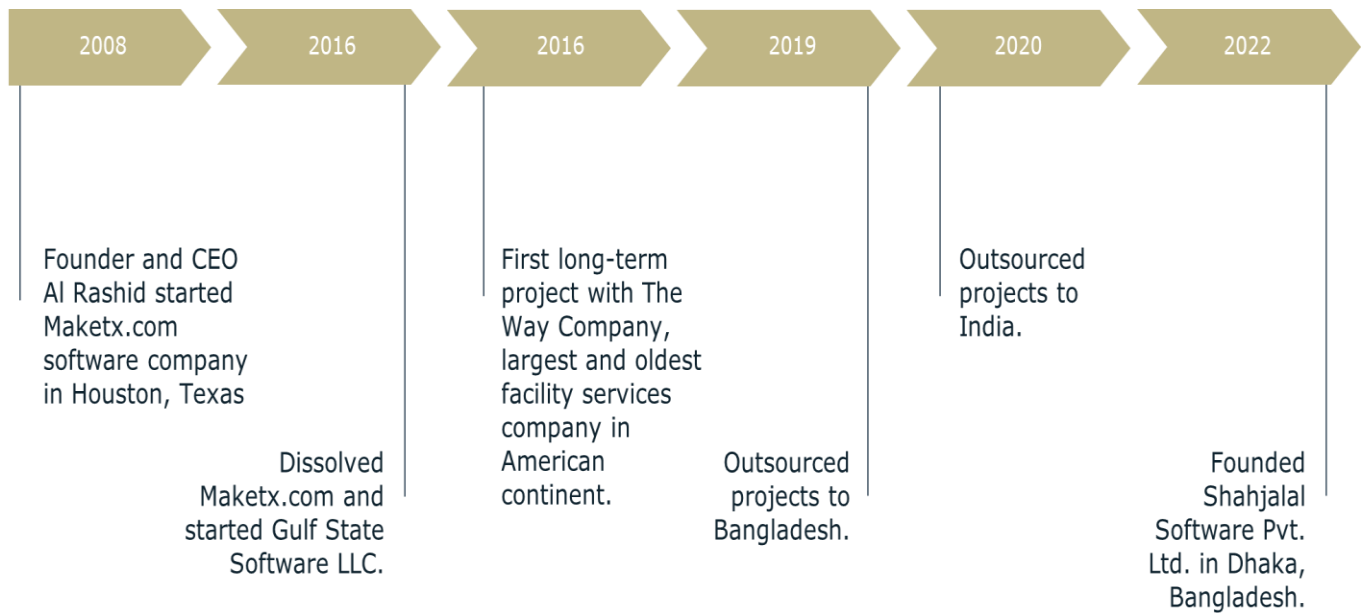

We believe in continuous improvement and adopting the right ethical practices to build mutual trust with our clients and to guide our relationships with all the stakeholders in the long term.

Over the last decade, we have grown extensive expertise in building dynamic projects for diverse businesses. Now our solutions transform business processes in retail, energy, apparel, printing, facility services, and compliance industries.
