The Benefits of Working with Us

Our goal is to make sure you're getting everything you can from your outsourcing relationship. We've got what it takes to help you increase speed, control costs, achieve solid alignment and realize long-term impact from your software development.

The Perfect-Fit Software Development Outsourcing Team for Your Needs

KATS clients benefit from a rigorous, systematic approach to partner selection. First, we work to understand your skills and capability needs. Then we identify the best partner for you from our global network offering comprehensive capabilities in custom software solutions, technologies and platforms. Through strong insight into our partners, we have the knowledge to make your precision match on key factors such as time-zone compatibility, English proficiency, technical skills and even cultural fit. The result is an outsourced development team aligned exactly to your needs – and delivered at a fraction of the time, cost and risk of outsourcing on your own.

Kawaii to the World's Deepest Bench of Technical Talent

We are the quick, quality solution to technical skills and capacity issues. **KATS** opens up a world of top-tier development options for you, with hundreds of nearshore and offshore partners covering 100+ technologies across 60+ industry specialties. Our network offers the broadest choice of both nearshore and offshore partners with the largest assembled talent pool of 25,000+ developers. It's what sets us apart from our non-networked outsourcing competitors, who are limited to their specific time zone location and at most hundreds of in-house resources. Our easily scalable teams give you control and flexibility as your technical needs evolve.

On-Demand Management Expertise for Long-lasting Results

Our professional advisory and consulting services are ready to help you achieve desired business results through proper alignment with your internal team and through software development,outsourcing management best practices. Our team of experts is available with the right level of support from planning your engagement to standing up teams to getting your project off to the right start. We can provide coaching or consulting on a fractional or full-time basis. We build and transition new skills in-house, creating added capabilities for you.

Global Network

With Over More Than 20 Software Development Companies Reviewed And World wide Travel To Verify Our Findings ,No One Knows More About Software Development Outsourcing Than **KATS**.

Offshore Software Development in Bangladesh

Just east of India, The Small Country Of Bangladesh Sits in the Shadow of software Out Sourcing Giants In South Asia. But can't be underestimated as an Option For Your Offshore Development .Bangladesh Is developing in a faster speed - gaining Recognition as an Emerging Software Outsourcing Destination.

KATS investigates Software development outsourcing companies Around The World To Determine Their OutSourcing Readiness Across More Than 500 Business and Technology Due to Diligence factors. Your Software Development Companies Have Our Attention.

Why You Choose Bangladesh?

Using our proprietary scoring system for global software outsourcing regions, **KATS** rates Bangladesh as a ‘medium’ for outsourcing readiness. Here’s how we see Bangladesh as a destination for outsourcing software.

KATS considers a number of factors to determine software outsourcing readiness. We look into the economy, politics, education, technology infrastructure, proven experience in the outsourcing industry and the presences of large global companies in the region. Here’s a few quick facts about Bangladesh:

- The Bangladesh Economy is Strong and is Expected To Grow At 7% annually Through 2020.
- Stable Politics and Corporation with the US State Department On National Security Issue.
- Bangladesh Offers Over 1100 Tech Companies and More Than 80,000 IT Professionals .
- Over 100 Companies In Bangladesh Are Providing IT Outsourcing To Over 30 Countries.
- Companies That Use Outsourcing in Bangladesh Includes IBM, Fujitsu, Sony and others.

Digital Bangladesh

The government of Bangladesh is banking on technology as the future for their country. This commitment to technology led to the [“Digital Bangladesh”](#) program (part of the country’s “Vision 2021” initiative. Bangladesh is making multiple investments in technology - in part to make Bangladesh a go-to-location for outsourcing. Government

agencies, businesses, and the general population are the focus of targeted initiatives. Because of incentives to businesses - expansion projects already being planned includes:

- 28 hi- tech Park In Process With The Stated Goal Of Converting Bangladesh Into an IT Hubs spot.
- Increased Access To The Key in hi- tech Parks Via Commercial Airlines :45+ Daily Flights From 8 Airports (Including 3 International Airports)
- Data Centers Including A- Tier 4 National Data Center
- Internet Bandwidth Improvements by Leveraging 1,700 Gbps Backbone Via SEA ME –WE 5 Fiber Optic Cable.
- Power Plant Capacity Growth Targets Of 230% Over 7 Years.

Technology Watchdogs are taking notice of Bangladesh's emergence as a next-generation leader in outsourcing. A recent [Everest Group Report](#) had this to say about Bangladesh..."though significantly smaller than offshoring giants such as India and the Philippines, (Bangladesh) has demonstrated one of the highest growth rates globally indicating a huge untapped potential and increasing interest by investors. The industry is expected to generate revenue of US\$1.0-1.3 billion in 2017 and grow five-fold to reach US\$5.4-5.7 billion by 2025...This is remarkably higher than the growth forecast for either an established peer location such as India or an emerging peer location such as Vietnam.

Top Technologies and Expertise

Bangladesh software development companies are generally strong in the Microsoft tech stack (ASP.Net, SharePoint, SQL, etc.), Python, Java, JavaScript, PHP, Oracle technologies, and more.

Subject-matter expertise can be found in Industrial IOT, Block Chain technologies, and general E commerce, to name a few. **KATS'** partners can refer clients in banking, healthcare, manufacturing, and technology sectors.

Talent Pool & Education

65% of Bangladeshi residents are under 25 years of age and the government is committed in building a technological workforce. Education in Bangladesh is largely subsidized by the government. There are more than 30 public and 60 private universities in Bangladesh, and eight of them are science and technology focused universities. Each year, over 10,000 students graduate from programs in Computer Science.

Hourly Rates

Our investigation shows that typical partner rates for outsourcing in Bangladesh is between \$26 and \$37 per hour, which is attractive for **KATS'** clients who are comparing these to other global rates for software development, including India and even other emerging outsourcing countries like the Philippines and Vietnam.

Language

In the education system of Bangladesh, there's a push to make English a second-language. This will continue to increase the likelihood of fluent English-speaking outsourcing teams. However, be careful to confirm language skills. Make sure you and your outsourcing partner have a plan to ensure collaboration, so doesn't suffer due to limited English skills on the offshore team.
