

Playnoob was founded in early 2021 with a vision to develop and publish high quality mobile games worldwide. Since the beginning of our journey, we have partnered with different publishers worldwide to pursue our vision.

Our Team

Although the company is a year and half old, we have a very experienced team behind the scene. Some of our employees have experience in game designing, development and production for over 5 years. Currently we are operating with 10 members, of them 5 game programmers, 2 3D artists and animators, 1 concept artist and 1 office assistant. Everybody here believes in the common vision that is to bring in the next big hit game.

Services

We make mobile hyper casual games for international mobile game publishers including game design, asset development, animations and concept art. Sometimes we also publish our own games to Google Play and App Stores.

Our Achievements

Through our collaboration with international partners/publishers we were able to publish hit games such as Home Flip (10 Million+ downloads) and Store Manager (1 Million+ downloads), available both in Google Play and App Store. We are continuously working to bring in more hit games in the hyper casual genre and we believe in becoming one of the most aspiring mobile game developers and publishers in upcoming years.
