

Who we are

The story of Brainify Bangladesh

Brainify Bangladesh was founded in 2022 and wants to start working with foreign companies with a vast experience of software developers.

Our dedication is to serve Norwegian and other foreign clients with great development teams in Dhaka. We are dedicated to make Brainify Bangladesh the greatest workplace in all of Bangladesh.

Our goal

Is to make a company where we all follow the same mission: To create great software solutions for our clients. And on our way there: Let's get to know each other and each other's culture.

All our employees in Dhaka are working "Collaborative" and "Agile" way.

Where Everyone get a say

In Brainify you are an equal part of the team. We will listen to your expertise and your feedback in every project and in the work place. This also means that we want you to speak your mind. If we could solve something in a smarter way; let your co-workers know.

The Collaborative" and "Agile" way also means a flat structure hierarchy, and no bosses. We have a few leaders, of course, but they are there to help you, not boss you around.

100% dedication

We say, "Love your job, and be the best you can be". In Brainify we expect to: join every meeting on time which means on the minute. We are honest about anything blocking your performance or if any situations are making us to miss our deadline.

We never say yes if you mean no, makes life as easy as possible for our co-workers. Create solutions that lasts a life time, and always add your documentation in Git.

We care about our free time

A happy developer is a great developer. And a great life after working hours and in weekends gives us all happiness. That is why we work 8 hours per day, 5 days per week. No more, no less.

We also make sure you have time with your friends and family in the public holidays, and of course if your kids are sick. We make sure our family is first.

Trial period and on-boarding

All our teams go through a comprehensive on-boarding process, where we make sure they understand what is expected of them. In this process, you will also understand what is expected of you who order. We adapt the team's workflow to your company, and place no restrictions on work tools and methodology.

In addition, we have a trial period for all new agreements, so that both you and we have the certainty that we have the right developers in the right place.

Working time

You have your development team available five days a week, Monday–Friday, from 8–16 to work with STD time. Despite the time difference, our colleagues in Dhaka enjoy working in Hybrid model and enjoys yearly given Government holidays.

- ✓ Our country

Our developers have experience with, among other things

Our client speaks for us

Johannes Holmedahl (johannes@brainify.no)

I have some Bengali colleagues who allow themselves to be fascinated by us Norwegians from time to time. We are a curiosity here at home. These days, they smile a little disappointed that the whole of

Norway is closed for a whole month. Smallest. Few Norwegian customers are possible to get in touch with, and when their Norwegian colleagues are away for four weeks straight, both they and we understand how well we have it in Norway.

Sure, our Bengali colleagues have about 20 days off during the year, but often clustered around Eid and some public holidays. This means that July is an efficient month for us who have good developers in Bangladesh. And you and your project can benefit from the opportunity you have with us.

With your own external development team via Brainify, you can prepare tasks in June, and come back in August to a team that has taken extra steps for your digital project.

We also have project managers at work in both Norway and Bangladesh throughout July, who will make sure to follow up your team while you are lying on a sunbed. So your project is in good hands.
