arknetics.com

About Us

Arknetics is committed to leverage technology to enhance peoples lives.

It is amazing how technologies unite people and transcend borders. You can rest assured that you'll get an agile & efficient solutions for your tasks from Arknetics Ltd. We are focused on solution rather then the problem and that's why our tagline is "*Think Solution*".

Core Values

- We belive in the devine connection with Allah Rabbul Alameen.
- We always belive in love, respect towards each other & people.
- We also belive in the word "Empathy" and act acordingly.
- We belive if we can follow above core values we will also obtain values like customer centricity, dedication, openness & initiative, integrity and teamwork.

Management Philosophy

- Living Together, to coexists harmoniously with our society, our community, nature and business will grow alongside.

We will continue to work together with people around the world to solve issues critical to society leveraging all of the technologies and management capabilities, we have accumulated during our more than 15 years of expertise.

Solutions & Services we ensure

Cyber Security

Cyber security is the application of technologies, processes and controls to protect systems, networks, programs, devices and data from cyber attacks. It aims to reduce the risk of cyber attacks and protect against the unauthorised exploitation of systems, networks and technologies.

AI based Surveillance

Artificial intelligence for video surveillance utilizes computer software programs that analyze the audio and images from video surveillance cameras in order to recognize humans, vehicles, objects, attributes, and events.

Connectivity

SD-WAN stands for software-defined wide area network (or networking). Only SD-WAN with packet level aggregation of multi ISP lines. VoIP, video, data optimized. Ideal for reduced latency for inter branch and cloud access.

Cloud & IoT

An IoT cloud is a massive network that supports IoT devices and applications. This includes the underlying infrastructure, servers and storage, needed for real-time operations and processing. IoT Core is a fully managed service that allows you to easily and securely connect global devices.

Consulting

Consulting includes a broad range of activities, such as competitive analysis, corporate strategy, operations management, or human resources. We ensure the core objective is met accordingly and clients may enjoy the full potential of their business goal.

Systems Integrator of International Brands

We are comitted to impliment best in class solutions from all around the world.
