

BONGTECH LIMITED PROFILE

The Covid 19 pandemic has successfully reversed the traditional outsourcing trend in the service sector and given rise to destination hiring as a widespread practice. With this knowledge, a group of young professionals initiated Bongtech Limited in 2021 to provide the best management solutions using online platforms and web-enabled services in the international market. The company has initially started providing services to manage real estate properties in the international market. Since its inception, Bongtech has implemented a couple of hundreds of projects in different states in the United States of America.

OBJECTIVE

The main objective of BongTech Limited is to be a strong ITES industry that contributes to the creation of, or lobbies for, an enabling environment and developing the capacity of the sector and building partnerships that position Bangladesh's IT & Outsourcing business opportunities.

MISSION

To create a space for our clients and employees to share technological excellence in the name of service while creating high growth opportunity of fulfilling the employment.

Our Services:

IT enabled services

We are working with banks & national clients through ITES. Specialized in working with foreclosure properties & REO properties. Starting from eviction to ready for sale, processing & damage estimation. With our large & skilled human resource, we are conducting our operation efficiently in the US banking sector and real estate industry.

Consultation

Our business and IT consultancy service serve as professional advisors to help companies achieve their goals or streamline operations in a particular area of business. Our services include digital marketing, website designing, asset management, legal services, administrative duties, ecommerce integration, reporting and research.

Customer service

We have an in-house training facility regarding customer service. We are specialized in recruitment of vendors throughout the 52 states of USA. We maintain communication & recruit people in a regular basis.

SAAS

Our software as a service is aimed at installing and maintaining software, we simply access it via the internet, freeing ourselves from complex software and hardware management.
