Our Policy

Local Presence Global Reach

One-Stop Support for Global Expansion

Attrabit is a one-stop solution canvas that supports global expansion from various fields. It is a global company with development centers in India, Bangladesh and Myanmar, and marketing hubs in Japan and the United States. As a professional in IT system outsourcing, consulting, and system development, we provide solutions that meet the needs of our customers quickly and at a reasonable cost. By strongly supporting our global strategy, we are contributing to improving our customers' business performance and reducing costs.

Based on our extensive knowledge and technical experience, Attrabit has provided global companies with solutions that enable significant cost savings and quality improvements. We solve the problem of expanding into South Asia that many companies have under the business policy of "Opening the infinite possibilities of global business to all people in the world". Our unique, fast and accurate one-stop support has been highly evaluated by many customers through many successful cases in the past.

Supporting Overseas Expansion with a Perfect System

Please leave IT problems to us to set up a business or establish a company.

Cooperation with local governments and government agencies is indispensable for overseas expansion operations. Attrabit develops services centered on expansion into South Asia, Myanmar, etc., where future economic development is expected, aiming to become an IT nation as a national strategy through cooperation with JETRO / JICA of Japan as well as government agencies. We support the planning of feasible business plans, coordination with the government, and support for agency of administrative procedures, including advance marketing research on the local market. In addition, we have received high praise from many customers for providing detailed support for providing information on daily life, such as housing, security, and educational information, which is important for our local staff.

Global Network and Target Era

With marketing centers in Japan and the United States, and development centers in India, Bangladesh, and Myanmar, we meet the needs of customers all over the world in an ideal environment.

Major Trading Partners

As an IT system professional, we meet the needs of a wide range of customers and provide optimal solutions quickly and flexibly at a reasonable cost. We provide the highest quality IT solutions at an accurate price to many companies such as Rakuten, UNIQLO, Grameen UNIQLO, NTT Communication, TSTech, Nomura Securities, and Gazprom. We have earned a great deal of trust for a long time.

Global Partner

It is always possible to procure worldwide via a partner company. We are building a complete service system through maintenance contracts with the Japanese subsidiaries of each company.

IT infrastructure Design & Construction

Introduction of Cloud Construction

AWS, Google Cloud, Cloud Design / introduction / operation support by Microsoft Azure fully verify the purpose of your project in advance. By clarifying the purpose of the project with the customer, we provide the best solution that takes advantage of the functions of the cloud. Furthermore, your business and application needs are scrutinized by our unique precise mapping analysis, and you can maximize the original strengths of the cloud. In order to avoid any risk on the system, all applications are thoroughly verified by us before moving to the cloud environment to ensure high security. With our unique and advanced strategic analysis methods in various fields, systems and applications can stably operate their high potential by introducing the cloud.

Network Construction

Not only system construction such as LAN, WAN, VPN, video, voice and firewall, but also the latest Arista, Cisco, F5, Fortinet, Juniper and other advanced network equipment are supported, and a wealth of know-how accumulated over many years. Based on this, we will provide the optimum network construction for our customers.

(1) Data Network: Cisco Systems, F5, HP, Juniper can provide cost-effective switching and routing solutions, and introduce a highly secure wireless network.

(2) Voice / Video Solutions: We provide advanced voice and video solutions that utilize our wealth of know-how. Cisco: IP Telephony, Jabber: Telepresence, Avaya: IP Telephony, Polycom: Video System.

Security Implementation

Firewall design, installation and operation support by CISCO, JUNIPER, FORTINET, PALO ALTO Firewalls IPs to protect your important business data from all risks, Encryption and SPAM. Efficiently introducing operating spyware, content and filtering will contribute to the stable operation of your business.

Server & Storage

Hard Dell, EM required for server and storage system construction. You can freely coordinate NetApp etc and OS such as Solaris, Linux, Windows, and Arcserve on it. A hypervisor that supports customers' system installation based on services such as KVM IDM. Utilizing virtual technologies such as Veeam and VMware, backup, DR.

Database

We have strengths in the development and maintenance of Database Management Systems (DBMS) that run behind various business applications such as CRM, ERP, SFA etc. And have many achievements in various database systems Commercial: DB2, Microsoft SQL Server, Oracle Open source: Firebird, MongoDB, MySQL, PostgreSQL.

Software Development

Development Achievements

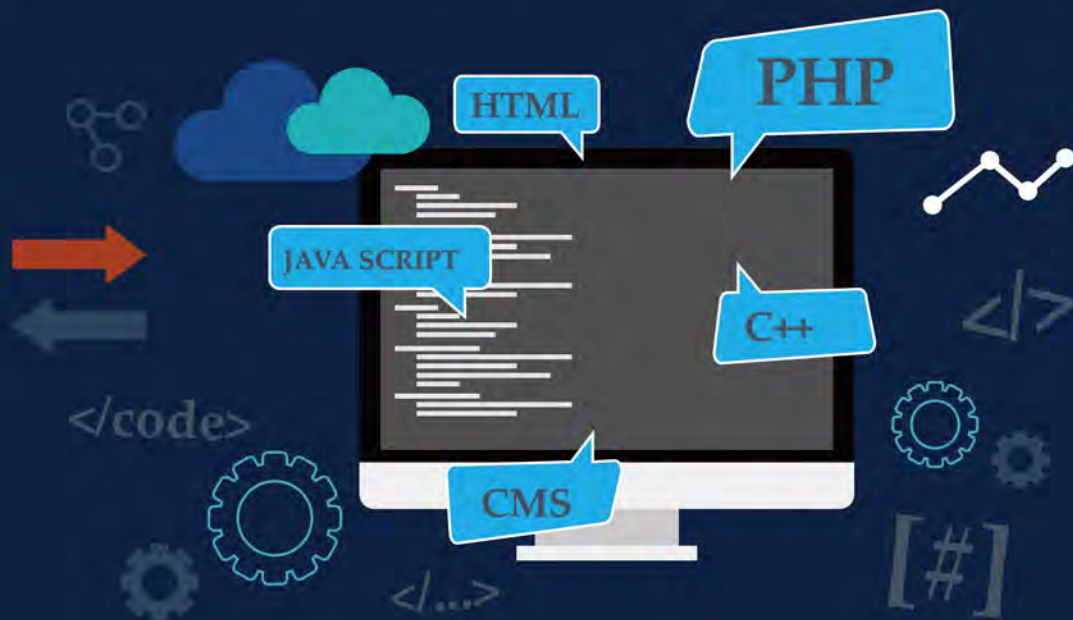

Our development software and WEB applications developed using the latest programming languages (C, C#, .Net, Java, PHP, Python) according to customer needs have already been highly evaluated by many customers. In addition, we have a lot of development results such as A IOT related software development that is indispensable for robot development, AI cooperation with Web services and utilization support.

Focus on FinTech-Related Application Development

The blockchain technology that supports the reliability of virtual currencies has made it possible to develop highly reliable software that eliminates access concentration and equipment failures. We are also focusing on developing fintech-related applications such as blockchain, which is a hot topic, and are building a development system that can respond to all customer requests.

Application Development for Smartphones / Tablets

We have a lot of realities in developing the latest applications such as iPhone and Android. A variety of development is possible regardless of genre, from public applications for the general public to business application development. We have a good reputation for the wide range of know-how accumulated in system development, and we can always provide the optimum technology and services based on the needs of our customers.

Highly Skilled Technical Team

We directly hire excellent students in the Department of Information Processing in collaboration with governments in India, Bangladesh, Myanmar etc, where we have development bases, and famous universities. Furthermore, all employees are trained not only in Japanese language education but also in thorough Japanese business etiquette and by sending them to Japanese companies, development engineers with advanced skills as follows are the needs of Japanese customers. We have realized a solution that matches the above.

* CISCO certification exam CCNA, CCDA, CICD, CCNP, CCDP acquisition Network engineers: 14 people

* Red Hat certification exam Red Hat, OpenStack, Hybrid, Cloud Storage, RHCVA, RHCE, RHCSA acquisition Server system engineer: 9 people

* Embedded software engineer Software that is built into industrial equipment and home appliances and realizes specific functions. Software engineers who have begun to pay attention in recent years: 12 people

IT Outsourcing Management

There is no end to the “improvement” of Attrabit. Attrabit has introduced its own management cycle “Global Outsourcing Management” from the beginning of operation. By continuing to run this cycle, we will be able to quickly detect customer needs and changes in the environment and respond flexibly to any problems. This management cycle is adapted to all network construction and software development projects, leading to the success of any project quickly and efficiently. As a result, our Attrabit project has achieved high-cost performance, and many customers have realized the benefits and profit.

IT Outsourcing Management

Government-Coordination With Government

A company and coordinate negotiations with government agencies.

Support and Agency For Administrative Procedures

We will assist and support local administrative procedures such as application, registration, and customs clearance.

Business Office Arrangement Sales activity support

Introducing local financial institutions that support local office arrangements and sales activities.

IT Service and Support Provision

We provide life information and support such as local housing, security, and educational information.

Local subsidiary IT & IT Infrastructure Development

We support the network construction infrastructure development of companies expanding from Japan.

A Bridge Between South Asia and Japan Through IT Technology

Attrabit is a truly global company based in Bangladesh, which is expected to develop its economy in the future with the aim of becoming an IT nation. Attrabit will spare no effort to become a bridge between South Asia and Japan through IT technology. This is also my belief as a manager. Attrabit is a Japanese listed company consisting of "IT engineers" and "MBA holders" who have graduated from Indian Institute of Technology, University of Dhaka, University of Yangon, etc. and have experience of studying abroad in Japan and working at Japanese companies. It is operated with Japanese people who have a lot of experience in marketing and business management. As a team of cloud contribution experts, we provide cloud contribution professional services and software to our customers around the world. Rather than simply keeping up with the times, we have always received high praise from our customers by appropriately evaluating the goals and objectives of your business and proposing plans that maximize the strength of the cloud.

Thick Connection With Government and Local Government

We will continue to provide the infinite possibilities of global business to all customers around the world through IT solutions, and we have fully understood the ideas and methods of Japanese companies. We will support all customers who are expanding overseas through IT, making use of the strong connections with the government and local governments that Attrabit has cultivated independently.
