Introduction

Lemmesay Ltd is a dynamic and forward-thinking software development company committed to empowering businesses and individuals through innovative digital solutions. We specialize in **custom software development, mobile application development, and professional IT training services**. Our mission is to drive technological transformation by delivering scalable, secure, and user-centric products that meet the evolving demands of the digital world.

With a team of highly skilled engineers, designers, and trainers, Lemmesay Ltd offers end-to-end technology solutions tailored to the unique needs of startups, SMEs, and large enterprises. Our commitment to quality, creativity, and customer satisfaction is what sets us apart in a highly competitive industry.

We also have special expertise in custom software development – providing specialized products, IT services and custom end to end solutions to our enterprise customers. We gain competitive advantage from these distinctive capabilities and have developed the ability to implement and manage complex IT systems in changing times with greater effectiveness than many competitors. In the last 10 years Lemmesay Ltd worked on more than 100 projects and has a large customer base of more than 50 customers all over Europe and USA, offering considerably lower priced services than EU Industry norm.

Additionally, Lemmesay is experienced in delivery, installation and support of large computer systems and networks and maintains a local Spare Part Consignment Store, providing back-up for customer systems in order to minimize the effects of possible faults. Its qualified staff is performing full servicing and repair of the equipment all over Bangladesh. Beside the normal working standard equipment, Lemmesay Ltd has equipment for testing, installation and technical validation of end user solutions.

Furthermore, we offer reasonable Service Level Agreements (SLA) covering most of the additional maintenance services. With our 24/7/365 days per year support, we are making troubleshooting as easy as possible.

As a privately owned company, we are extremely committed to delivering quality advice, sales and support to assist our clients to achieve the maximum from their I.T. investment.

Our key skill areas are:

- Total site I.T. management
- Web & Application Development
- Internet services/site hosting
- Network/Server Installation
- On-site Service

About Us

Who We Are: **Lemmesay Ltd.** is the leading information technology consulting, services, and business process outsourcing organization that envisioned and instigated the adoption of the flexible business practices that today enable our client companies to operate more efficiently and produce more value. Lemmesay's strength lies in perceiving the client's business processes, culture, vision and goals across the industry segments and offering client oriented solutions, which are highly reliable.

With a rare mix of domain, technology & project management experts, we bring the most complete team to bear on every project we take on. Business & technology experts, from some of the best universities in the country, bring invaluable insights and expertise into their areas of expertise. Industry veterans, who laid the foundation of the offshore services business, form the backbone of our leadership team. In a business model where people are the growth drivers, we are endowed with one of the most enviable pool of talent from across the country. With a presence in 3 countries, we have presence in regions such as America, Asia, Europe & the Middle East. While our strong sales & marketing presence across the globe gives us the ability to strengthen existing relationships, build new ones & enter new markets. We are developing software with teams consisting of engineers with various expertise that meet all requirements to succeed the projects, and giving support service to those projects and also to the other projects of our customers. We are an active member of Bangladesh Association of Software & Information Services (BASIS).

Lemmesay is dedicated for creating a dynamic platform for the well being of People in the field of information technology. We plays an important role in field of country's economy by creating employment opportunities through Free-launching .In the era of globalization we are able to create an international relations. Thus we are able to increase in country's GDP.

What We Do: **Lemmesay BD** is a renowned software company in Bangladesh, USA & Malaysia. Over the year we have developed hundred of project in various platforms. We have successfully served several companies since 2010. Within a very short period of time we were able to make some corporate legend as our customer. Lemmesay has its own style to bring theme and ideas to the lead generation. We are also active in outsourcing. We are expert on-

- Android, iPhone, PHP, ASP and related CMS/frameworks
- Garments ERP
- Garments ERP (General)

- Time Attendance Device(finger Print)
- Time Attendance Bar code Scanner
- ERP for General Office management
- ERP for Multipurpose Co-Operative Bank/Society
- NGO Management Software
- School Management Software
- Retailer management software
- Real Estate Development software
- Broiler Feed Company Management
- Hospital Automation

Quite simply we write code. However, unlike most software companies, we realize that's only part of the job. We don't just write code. We develop professional software. This is why our clients choose **Lemmesay**. Many companies can find programmers to generate code. However, few have the experience to produce professional quality software. Our ability to develop code is only the beginning of our capabilities. Being a “custom” firm, **Lemmesay** is able to provide our clients with a variety of services. A few of the services available from **Lemmesay** include:

- System Architecture and Design
- Development
- Project Management
- IT Support and Network Administration
- Complete Turnkey Systems
- Testing and Quality Assurance
- Technical Documentation and Training Services
- Placement and Recruiting Services

And we are also expertise on game development and graphic design!

What Makes Us Different

Our exceptionally deep technical expertise allows us to take on projects often perceived as too complex or difficult by other developers. We believe in working in partnership with our clients to understand their unique needs and working methods.

In our experience, working together consistently results in creating intelligent solutions to meet our client's evolving business demands. This collaborative style of working has resulted in the development of award-winning software.

Mission

Lemmesay Ltd mission is to enhance the business operation of its clients by developing and/or implementing premium IT products and services. To produce excellent services in the field of IT Services and Consultancy with maximum efforts driven towards customer satisfaction.

Lemmesay's mission includes:

1. Providing high quality software development services, professional consulting and development outsourcing that would improve our customers' operations;
2. Making access to information easier and securer (Enterprise Business);
3. Improving communication and data exchange (Business to Business);
4. Providing our customers with a Value for Money and
5. Providing our employees with meaningful work and advancement opportunities

Vision

To build upon a reputation of being one of the most innovative IT Solution and Service provider. Through our customer-centric approach, we aim to improve the application of technology investments of our clients, by developing integrated solutions that maximize their return on investment. We believe in doing our work in the most efficient way with robust and structured methodology, with gradual evolution from hard-work to smart- work culture, at client's end also.

Financial Strategy

The operational structure has been built in such a manner that it lets each unit operate individually and tap the business generated by other unit as well. The interdependence of each unit is minimal with maximum support to each one. This renders four prime operational verticals to **Lemmesay Group**. The entire group is able to churn out substantial benefit upon investment made within 3-5 years cycle. The complete business has been structured with a vision to achieve revenue targets. The primary business set up was done with the help of Bank loans. With gradual spiraling up business, the amount earned was re-invested to create more opportunities. With long terms government contracts and substantial annual income from long standing potential clients, Lemmesay was able to reach break even in due time.

5

We expect to look up to a complete new standard of operations, project management due to the new competitive and long projects under progress.

Note: The financial growth for the current year is expected to double the company's financial revenue generation. This has come about due to major government projects being undertaken, that are in process of development.

Company Structure

Management Team

Lemmesay's management team consists of experts and innovators from in field of Technology, Business and visionaries that lay the founding stone of the business. The team has made it from initial phase to today's business stance, with full-fledged, completely owned set of variety of operations. The presence of Lemmesay is global and it is known and recognized by a talented team, who put in their hard work and efforts to help Lemmesay attain great heights of success. With a mix of domain, technology & project management experts, we bring the complete team to every project we take on. Our people work with enthusiasm, and a drive to be the best. Their innovative spirit and ambition to be the best encourages them to voice new ideas without any fear as ours is a company of minimal hierarchy and makes Lemmesay a congenial place to work.

Partners

Lemmesay's partners include varied range solution providers. With expertise in IT Solution domain to high end marketing service providers, we have strategic alliances with companies who have taken technology driven solutions to a completely new level of experience for clients. Based on the type of solutions, Lemmesay along with its partner, share processes to deliver the best and the most suitable solutions to clients. Lemmesay's services and business solutions are strengthened by alliances with leading solution partners. This amalgamation of business solution processes has given an advantage to Lemmesay's and its partners a leading edge in providing business solution with a global orientation.

Our Services

Project Management

Introduction

The aim of Lemmesay's Project Management Service is to meet all contractual commitments and thereby meet and possibly exceed the customer's expectations. Lemmesay's Project Management Service covers all phases from project preparation and execution through transfer to the care phase, and closure of the project. The deliverable of Lemmesay's Project Management Service is:

- Upfront investment and professionally managed project start-up.
- Highest caliber technical management.
- Accurate and transparent project control and reporting.
- Solid service supplier management.
- Systematic project and quality management.
- Project communication management with regular meetings and collaborative tools.
- Health and safety management matching Lemmesay's guidelines and local legislation.

Project preparation and start-up

The conditions for successful project are created prior to actual deployment. Therefore Lemmesay invests extra resources in the project preparation and start-up phases. The Lemmesay's project preparation phase includes the following activities:

- Project manager nomination and a detailed project plan for the customer project, including complementary plans (if any).
- Planning and implementation guidelines.
- Lemmesay's resource evaluation and planning.

- Contract preparation with subcontractors.
- Risk management.

Handover and acceptance coordination: This includes the interface with the customer and coordinating final deliverable handover meetings, information and document transfers. It covers the software installation and commissioning and acceptance from the customer.

Project reporting and meetings: Lemmesay's project team will facilitate bi-weekly (or as agreed) project meetings with the customer, where the project progress, quality, risks, changes and so on are reported to the customer.

Technical Management

Introduction

Lemmesay's approach to the successful integration and launch of complex software utilities is based on a stable pool of highly trained software engineers and a dedicated technical manager. This team is equipped with all the key core skills and the support to see to it that agreed objectives are met in a punctual, effective, and co-operative manner.

Technical Management Responsibility Areas

Implementation management

- The technical manager is responsible for planning and managing the application implementation.
- The technical manager leads the implementation planning, plus the commissioning and integration work to obtain customer acceptance of the application elements.

System acceptance testing

- Definition of all acceptance processes, procedures, criteria, and system acceptance test plans that are in line with the terms and conditions of the contract with the customer.
- Tracking and monitoring of acceptance progress, clarification of any open issues, and the definition of action plans needed to have a pro-active approach to avoid delays in acceptance.
- Monitoring of key performance metrics and fault resolution with the customer to make sure that business needs are met and that quality of service is maintained as agreed.

Fault management

- Support for application modules integration. If problems are encountered at integration, the technical management team takes the lead in troubleshooting and fault resolution activities until all faults are identified and the module is successfully integrated.
Impact analysis to determine the extent of the fault. In some cases the outcome of a failure report may be a software correction.
Fault management is supported by Lemmesay's customer care organization.
-

Configuration management

Management of customer software release upgrades and updates, as well as maintaining a reference list with required software/hardware levels and parameters as agreed with customer.

Project Planning:

During a kick-off and consequent planning meetings with the customer following topics are agreed:

- Non-disclosure agreements (NDA)
- Technical scope
- Processes and documentation
- Share of responsibilities
- Schedule
- Reporting

Test Execution and reporting:

The test is coordinated effort of the customer and Lemmesay, in order to complete the tests, identify problems, and propose solutions for them. Test execution of the test cases is done at the Lemmesay's testing center. Results for every test case are agreed between the parties as successful, not successful, failed or blocked in accordance to rules and recommendations. Possible faults will be reported through the fault report procedure. If a solution is available, re-testing will take place to complete the testing session. If compatibility problems are found, they will be addressed to a technical workgroup composed of R&D experts, specification experts and testers. After the test plan is executed, a final verification test report with an action plan and recommendations will be prepared summarizing the test results and identified faults.

Consultancy

Consulting is the integrated part of our services with expertise in custom programming, client-server database design and implementation, and web development. We specialize in designing and implementing cost-effective, creative information solutions to complex business problems. We have provided are services to finance institutions, health care sector, government sector and manufacturing environment. We pay full attention to customers, doesn't matter theirs is Five page web site or fully fledged ERP to be designed. And we take proud in the fact that

customers right from the inception have continuously added to our friends list. Most of our customers are brought to us through our satisfied users. Our vast pool of technically qualified and managerial manpower is well supported by excellent infrastructure and knowledge management facilities to deliver the client time bound, qualitative and cost effective solution meeting the global standards.

Outsourcing

When your business is running twenty-four seven to come up with innovative means to maximize its potential, outsourcing isn't just an option it is a necessity. Today, efficient business process outsourcing has become the lever to unload your organization of resource-consuming procedures and controllable costs. Everyone works towards allowing your organization a stronger focus on core business areas. Lemmesay not only provides industry-specific solutions but also deputes personnel to organizations with technical skills to manage back office transaction processing. Viewing it from clients' perspective this cuts off cost on acquiring and maintaining technical staff and enables them focus on their core competencies. The key element of services delivery is an integrated approach towards providing increasing value over the entire course of our client relationships.

Corporate Training consultation

In our corporate training programs we emphasis on a course schedule that achieves following objective for the corporate:

- Training should align with the business plan and address the core competencies of your business
- It is necessary that training outcomes strengthen the job environment and organizational practices but vice-versa is obligatory as well.
- Knowledge management and self-directed learning should be integral part of the training/learning processes
- We ensure that Training process is effective, efficient and is properly staffed, organized, and managed.
- We have feedback systems to monitor business plans, performance problems and training results.

AREAS OF EXPERTISE

Our strength lies in our ability to blend current management practice and IT expertise into cost-effective Computer Aided Management Solutions, Products and Services.

Our offers cover the following major areas:

1. Software Solutions

2. Web Solutions
3. Graphic & Multimedia Solutions
4. Networking Solutions
5. Quality Assurance & Testing
6. Application Maintenance & Support
7. Turnkey Solutions
8. Offshore development

Software Solutions

Lemmesay Ltd has developed a number of products and MIS applications for its clients in this service. Our mature software development processes, combined with excellent infrastructure have significantly increased the “on-time and on-budget” delivery of software in the offshore mode. We use a highly effective IMPACT Methodology for offshore and distributed software development. Our services begin from analysis, moving through designing, development, testing and implementation to maintenance. Our applications come in all sizes, be it a one-table database, or a massive client-server application. The creation of complete database applications is yet another field that we specialize in. We offer:

1. Application Development

- o Interactive Application Development
- o Custom Application Development/ Maintenance
- o MIS and ERP Solutions & Support

2. Re-engineering

1. Application Development

Interactive Application Development Interactive Application Development (iAD) is about harmonizing art with technology. This business division of Lemmesay Ltd complements the client's requirement of online and desktop applications - be it a workgroup solution or mailing platform. It adds a further arc to the circle of 'Net Totality'.

A strong team of software professionals empowers the application development capability at iAD, Lemmesay Ltd Software Solutions. The applications developed range from Web-stores, online service retailing to enterprise information systems. Our competencies in .Net technologies, ASP, XML, PHP and C/C++ are demonstrated in various network-based applications. SQL/ Oracle database engines support most of these applications.

Custom Application Development/ Maintenance

It is a well known fact that some of the ready-made, packaged applications have failed to meet the requirements of the customers because of their unique needs and differing business practices and processes. In addition, prohibitive cost of implementing a packaged application and the maintenance thereafter becomes an unwelcome perspective.

We have experienced I.T. Consultants for Project analysis, formulation and concept planning, right up to project management and installation. We develop customized Software that is completely based on user's requirement with GUI (graphical user- friendly interface) on any of the mentioned platform / languages.

MIS and ERP Solutions & Support

We offer customized low cost solutions to industries based on open standards, contemporary technologies and maintenance support. While incorporating the best of business practices, we do take special care of the customer requirements.

ERP Solutions include the development of software in a distributed model, with some phases of the project being conducted onsite and others being conducted offshore. Each phase is uniquely defined and executed. After unit, and system testing the product is then sent to the client for acceptance testing. We have satisfied customers find the solutions user-friendly, flexible, and comprehensive

2. Reengineering

Reengineering Business Reengineering is on the agenda of many companies in different industries. Striving to improve business processes to better meet customer requirements, Business Reengineering initiatives aim at revolutionizing key performance criteria, such as cost, delivery, and quality. As this is a top management issue we ensure that the structure, the work-place contents, the information technology in use and the culture of the organization will successfully assimilate the improved processes. To tackle with hard and soft barriers and make the reengineering process a

Success we make sure that following steps are taken in each project:

- Diagnosing resistance to change
- Managing individual change
- Coaching tools and techniques for helping employees navigate the change process
- Implement work teams and case managers extensively throughout the organization.
- We believe creative thinking cannot be replaced with software tools and stay away from over-sophistication
- Build learning, renewal, and short feedback loops into business processes.

Web Solutions

LemmesayLtd provides web solutions & services to help customer reach to a wider customerbase. The web is a new and different medium for communication and requires a differentviewpoint and skill set to use it in the most effective way. You need web consulting to get morereturn on your investment in your web site. We can help you get the most effective solutionthrough:

- Website Development
- Web Multimedia
- Intranet Development
- Web Promotion
- Web hosting
- E-commerce

WebsiteDevelopment

Websites can enhance awareness of your brand, leading to more sales. Build relationships with customers, vendors, and shareholders through your online identity get more traffic from the search engines Get more traffic from the search engines, fast loading web pages with excellent navigation and designing, communicate more effectively. Either you are looking for Dynamic site or a static site is your solution we can help you acquire both. We offer web sites on flash, asp, php which are tailor made to target your customers and make your presence live on web. Web Multimedia Add video on your web site or have a complete flash web site and see your popularity ranking high. Web Promotion We can promote your site to acquire more traffic, more enquiries, more leads, and more value. Web Promotion is a three phase process and we are

your companion to see you through all the phases and that too very well. get your site listed at the most popular Internet directories because they can send you substantial amounts of traffic and affect you're ranking in various search engines. Email marketing is a great way to promote your electronic Shop to buyers-including those who are interested in your shop but have not purchased items from you in the past. Search Engine Optimization- your website doesn't mean anything to anyone unless it can be found by your customers. Phase two in Web Promotion is optimizing your site so it appears high in the search engines and uses them to bring even more people to your pages. Our Web development and Promotion methodology, caters to the best of breed processes which help sin a successful on-time and above expected delivery. Phase three ensures that your site attracts even more traffic for which our experts go over techniques like reciprocal links, email signatures, news letter articles and more.

Web hosting

We provide service to host your own website, and users with online systems for storing information, images, video, or other content accessible via the World Wide Web. We offer 10 MB, 50 MB, 200 MB web hosting. We also offer custom web hosting as per your requirements. File Hosting Service: Host your static content, typically large files that are not web pages.

E-commerce

We offer e-commerce services in custom-built solutions as well as packaged software customizations and implementations. This helps customers to heave their business from point of sale implementation and go global. Our competent management team, good post-sales services, well-organized business structure, network infrastructure and a secured, well-designed website will ensure ripe results on your investment. Graphic & Multimedia Solutions Each Client is different with his own ideology and vision, so should be his designs. Having done more than 200 design solutions, we lend our services for:

Logos, Brochures, Advertisements, Corporate Profile Presentation, Product Catalogue, Training/ Tutorials Presentation, 2D-3D Animation and Walkthrough.

Networking Solutions

Lemmesay Ltd can network your computers together by peer-to-peer or using a server-based network and connect you to the Internet. We will help you secure a domain name, locate an Internet service provider, and configure your network for T1-T3, Dialup, DSL, Cable or connection sharing. We can establish remote access setups, which will help an employee, stay in touch with the workplace, irrespective of the geographical location.

We offer following networking services:

- Preparation of Network Architecture (Network protocol, Backbone at twisted wire, cable or optical fiber, Net topology, Hub/Switches, Conceptual Diagram etc).
- LAN/ WAN set-up.
- Corporate Intranets
- Network Administration.
- Windows NT/Novell Network/ UNIX/ Linux Server support.
- IIS Support and ORACLE/ SQL Server administration.

Quality Assurance & Testing

All the software solutions developed undergo following cycle of testing:

Requirements Analysis:

Testing begins in the requirements phase of the software development life cycle.

Design Analysis:

During the design phase, testers work with developers in determining what aspects of a design are testable and under what parameter those tests work.

Test Planning:

Test Strategy, Test Plan(s), and Test Bed creation.

Test Development:

Test Procedures, Test Scenarios, and Test Cases & Test Scripts to use in testing software.

Test Execution:

Testers execute the software based on the plans and tests and report any errors found to the development team.

Test Reporting:

Once testing is completed, testers generate metrics and make final reports on their test effort and whether or not the software tested is ready for release.

Retesting the Defects

In this cycle applications are passed through following levels of testing:

Component testing tests the minimal software item that can be tested.

- Component integration testing exposes defects in the interfaces and interaction between integrated components.

- System testing tests an integrated system to verify that it meets its requirements.
- Acceptance testing allows the end-user or customer to decide whether or not to accept the product.
- After modifying software, either for a change in functionality or to fix defects, a regression test re-runs previously passed tests on the modified software to ensure that the modifications haven't unintentionally caused a regression of previous functionality.

Application Maintenance & Support

We have years of experience in executing maintenance projects. Our team of experienced consultants has been successfully managing maintenance projects of local clients as well as offshore ones. The quality of product deployment, training and support has everything to do with customer success and satisfaction. We offer annual maintenance plans which are tailor-made as per the client's requirement. If required we depute technical team which works at the client site for the system execution or support as per requirement. Our clientele includes Government organizations as well. We ensure maximum return on investment to the customer as we provide complete off-site telephone support in the form of consultations, assistance and advice on the use and maintenance of the Licensed Software. Our experts' providing technical assistance and advice for problem diagnosis and resolution, have gained us admirer world over. We also offer on-site service calls to Customer's facility. In such cases, our consulting charges are subject to service hour charge, plus reasonable travel and out-of-pocket expenses.

Turnkey Solutions

Lemmesay Ltd takes up projects under this service for a fixed price and takes all responsibility of execution and project management. These solutions are ideally suited for projects that are fairly well specified and require well-defined interfacing with the client. We have developed a number of products and MIS applications for its clients in this service. Lemmesay Ltd mature software development processes, combined with excellent infrastructure have significantly increased the "on-time and on-budget" delivery of software in the offshore mode. We use a highly effective IMPACT Methodology for offshore and distributed software development. Offshore Development To get the best IT solutions, you don't need to be geographically near us. That's because we offer quality offshore development centers.

Our offshore

software solutions in application development and web site development guarantee cost savings without the need to compromise on either speed or quality. Our 100% customer retention rates speaks for our quality, swift response and cost effectiveness that has fetched us a large number of clients from all parts of the world. These all feathers to our work make us a preferred offshore development house
