- **How we work**

Integrated Solutions

Eon Infosys Technology

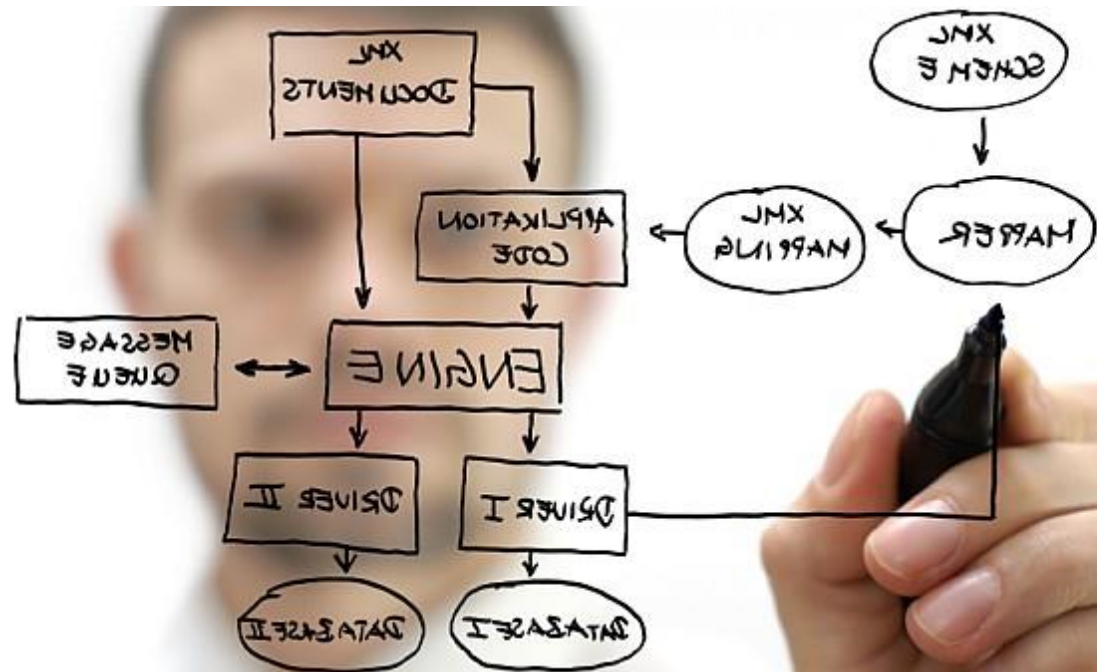

- ERP solution
- Customized integrated solution
- Web based ERP

Web development

Eon Infosys Technology

- UI interfaces, databases
- Server–web site interaction
- Web applications & RIAs
- Web-stores and e-commerce sites

Mobile web & mobile app development

Eon Infosys Technology

- iOS apps
- Android apps
- Cross-platform development

- Mobile web apps
- HTML5 web apps

Application porting

Eon Infosys Technology

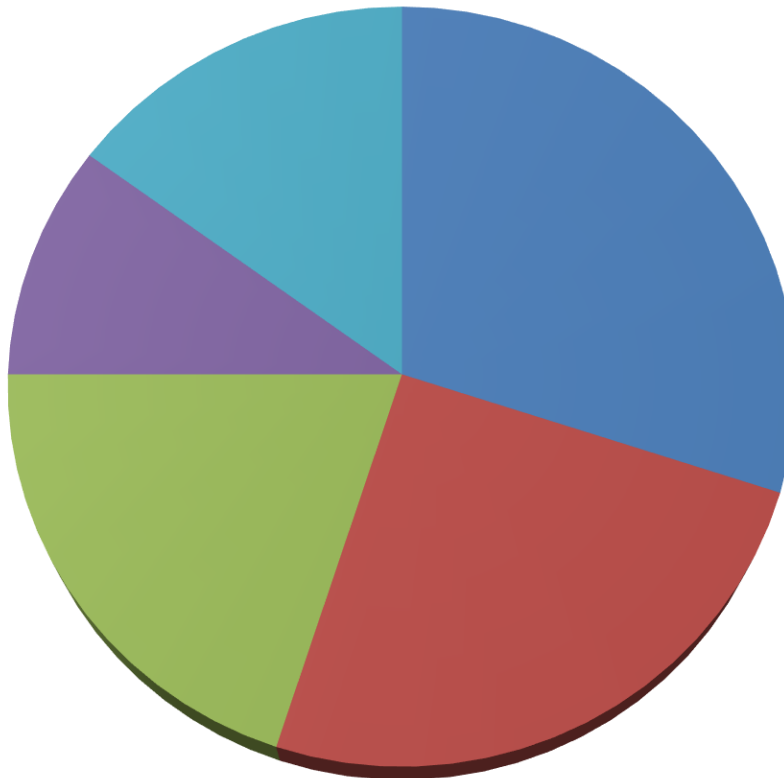

- Migration of existing applications from one platform to another
- Migrating old legacy platform application to the newer Software

- **Company Overview**
- **Software and development services**
- **Portfolio**
- **How we work**

Business domain expertise

Eon Infosys Technology

■ Manufacture Based Businesses

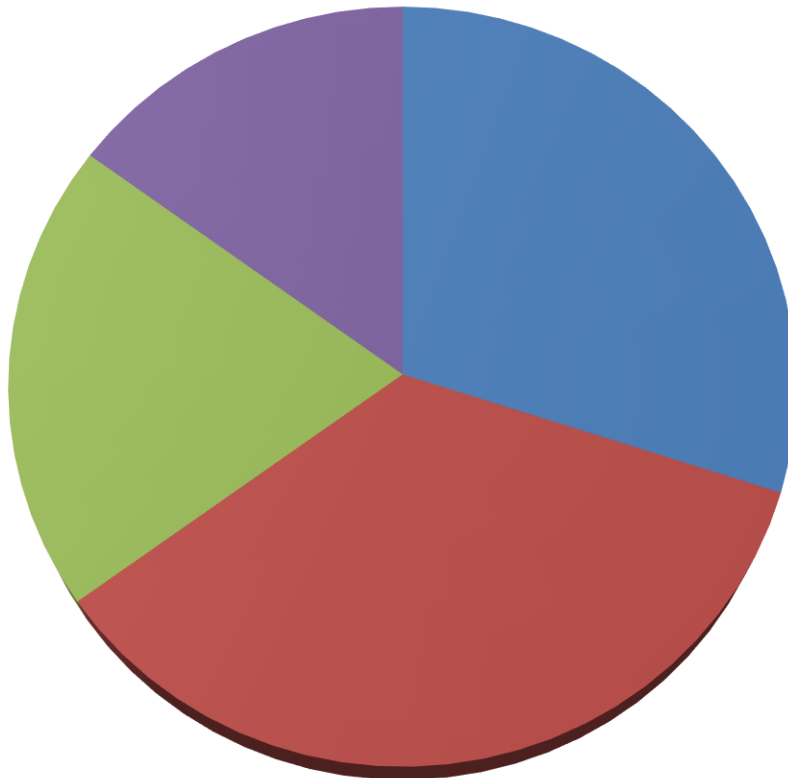

■ Retail Businesses

■ Ecommerce

■ Restaurant Automation

■ Logistic

Platform expertise

■ Web Applications

■ Integrated Solutions

■ IOS

■ Android

Solution types

- Customized Integrated Solution
- ERP Solution
- Web programing
- Mobile app development
- Ecommerce website development
- Server/database installment and remote control
- Web and application servers administration
- Application UI/UX

Featured projects

Biznet

Biznet is a complete ERP solution for manufacture based company. This software will control purchase, inventory, LC, Accounting, Sales and Manufacture. This will provide real time account status and live transactions.

Challenges:

Internet is not fully available in all rural areas of Bangladesh. Even some places the connectivity is bellow 56kbps. So our main challenge was to run this software with this bandwidth. And real time transaction was new practice too.

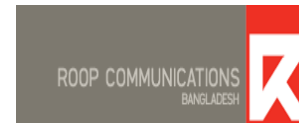

Featured projects

Restaurant Automation

Our restaurant automation software can automate restaurant from head office to kitchen. It control the inventory strictly and flow the process point to point strictly, which makes the operation smooth.

Challenges:

In restaurant business the bom and materials consumption in kitchen is too much variable. To keep this variance in an acceptable standard and run the operation without blocking was the biggest challenge.

Testimonials

Eon Infosys Technology

“They are extremely client-focused so we felt them more like partners than service providers. Applying industry cutting edge- practices and knowledge of restaurant business domain they have managed to deliver the project on time and of the highest quality.”

Brigadier General Manzur Qader

Managing Director,
bbq Bangladesh

“We are enormously satisfied with EIT as contractor. Highly responsive team with profound understanding of subject matter and really very, very fast code delivery that is particularly important for our agro business.”

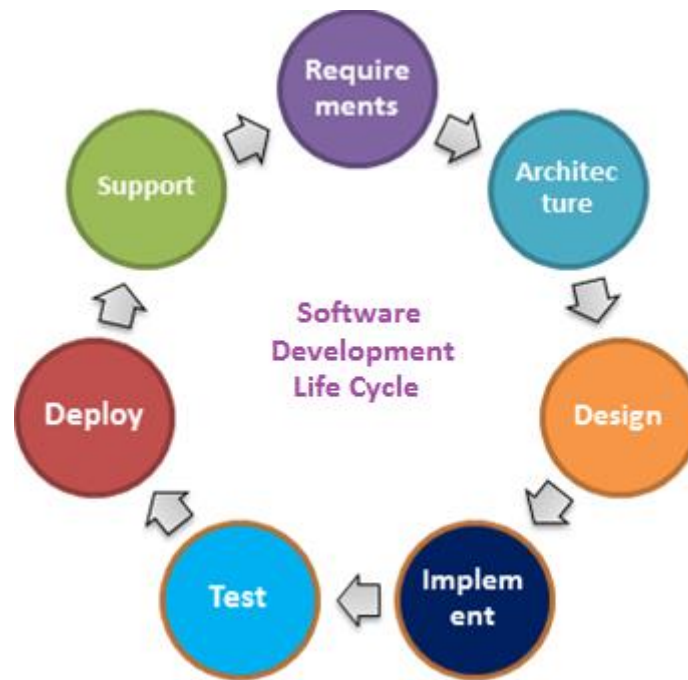

Tuhin Mollah

Sales Manager
Solver Agro Pharma

Project lifecycle

Eon Infosys Technology

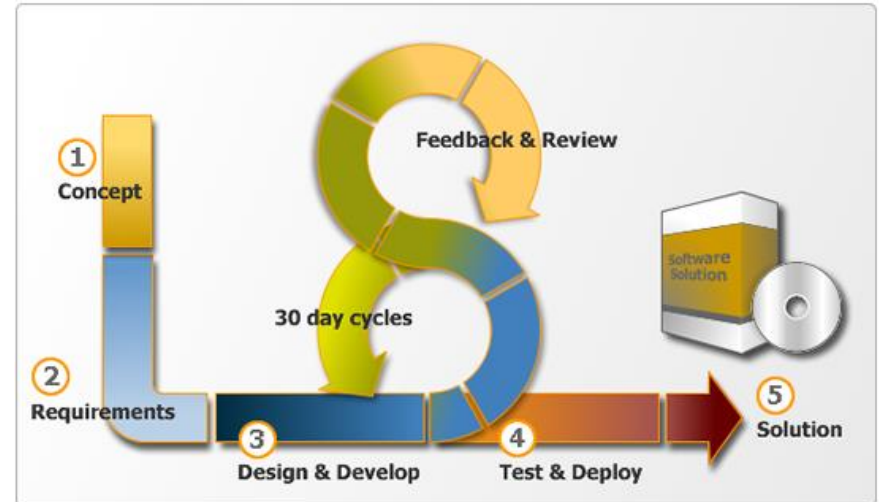

Methodologies

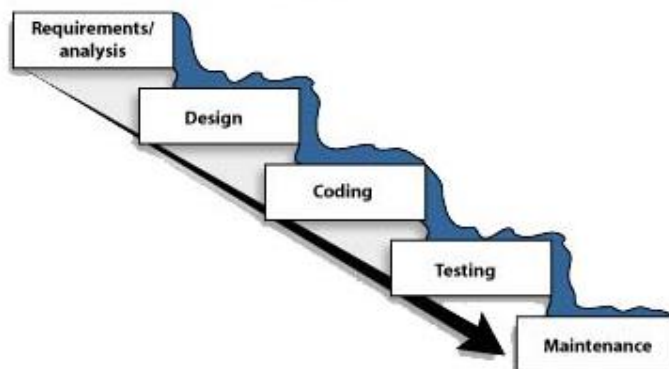

Eon Infosys Technology

AGILE

Based on continuous iterations each having its own Design, Development, and Testing Cycle, our Agile process enables to deliver you solutions faster, with less need for detailed documentation, i.e. for less investment costs and with shorter time-to-market.

The classic waterfall development model

WATERFALL

We drive you all the way through Conception, Initiation, Analysis, Design, Coding, Testing, Implementation and Maintenance stages that ensure you have the robust software meeting your goals and initial requirements.

Pricing models

TIME & MATERIAL

Enormous flexibility and control over your budget, enabling to manage and change the development process on the go. Good for: projects with few or many unknowns and having flexible project scope or for the projects in their maintenance phases.

DEDICATED TEAM

Extension of your own team, it gives maximum control but requires more involvement into project management from the customer's part.

Good for: projects which are constantly innovating and developing and having own project management staff.

Development tools

Task Management & Bug Tracking

- Jira Confluence
- FishEye
- Bugzilla

Continuous Integration

- Git
- GitHub
- Mercurial
- Crucible

Value proposition

CONFIDENCE

We use only cutting-edge technologies to develop best-in-class solutions for our customers. The use, for instance, of the wide-spread and efficient Java, Groove and Grail enables us to create scalable solutions which can be easily adapted to customers' emerging needs.

RESPONSIBILITY

Driven by the passion our software developers deliver the enormous volume of code, yet producing it of the highest quality and on time.

REASONABLE PRICING

We neither overestimate nor underestimate our skills and experience, our customers always get quality-proven software development services valued for the money they invested.

NO BUREAUCRACY

Our compact well-balanced team applies best efforts to eradicate bureaucracy to the ground concentrating all the attention on efficient and productive customer-oriented solutions instead.
