

CIPHER ANALYTICA

Story

Founded by industry professionals in Artificial Intelligence, Finance and IT, Cipher Analytica was formed to bridge knowledge to products and promote a culture that adheres closely to excellence in the field of technology.

Mission

Dedicated to ITES initiative of Bangladesh's digital age, Cipher Analytica Limited strive to minimise gaps in efficiency and enhance quality of products and services for Bangladesh's needs. Our strategy is to source global products and services that offers a right tune to build Bangladesh's digital future.

Vision

We envisage that a lot can come out of introducing the right cutting edge industry path to the leading technical universities of Bangladesh to develop an ecosystem for Bangladesh's pioneering youth. Taking pages from the book of India's advancement in the field, the focus is always about what technology would lead and bring about a better future.

Services

The following are the priority services that will be on the main focus.

1. ITES services (essentially : Cyber Security Services; Website Services; Digital Graphics Design; Digital Data Analytics & Cloud Services).
2. Product Distributor/Reseller.
3. Software Development.

As per the trade licence Cipher Analytica would also provide consultancy and project work on contract basis. Cipher Analytica host partnership with international companies from the UK, UAE, Uzbekistan and USA to facilitate ongoing needs. Below is the current organisation structure that is surely to grow with time.
