

COMPANY PROFILE

SRS IDEA LIMITED

ABOUT US

The world we live in today is increasingly dependent on digital technology, from small, hand-held devices to giant processors used in research. Invented only 60 years ago, it has become impossible to imagine life without computers, from home PCs to small businesses to multinational companies with whole networks of computers.

The digital age has made it possible to faster flow of information and easier forms of communication and this has made e-business increasingly preferred over traditional business practices.

SRS Idea Ltd Solutions aims to develop programs specifically designed to meet the needs of the increasingly fast-paced world of business today as well as providing an Outsourcing, advanced training and Mobile apps.

Incepted in 2022, Currently SRS Idea Ltd. has been working together over the last few years by a group of highly talented, aspiring and innovative professionals in high tech, banking, and e-commerce and network security. The pillar of our success rests on the ethics of our group combined with the zeal to produce simply the best.

OUR PHILOSOPHY

Placing an importance on human values but more importantly that anything is achievable today; the company's motto is 'Technology has no limits.' Emphasis is placed on communication, transparency and personal interactions and these form the basis of the corporate culture at SRS Idea Ltd.

Teamwork is an integral part of any success and believing strongly in this, we encourage our team to experiment, believing that the best ideas occur unexpectedly. Each day the quest for acquiring new innovative solutions continues, forever searching, experimenting, the learning curve never ends. We strive to challenge ourselves and to discover new opportunities and ideas.

- Customer Support: 6
- Network Planning & Hardware Management: 4

Pricing Strategy

We know the most successful innovators start by understanding their customers' needs and developing products around what they are willing to pay to address those needs. But a key component of the monetization process is not just determining *how much* to charge, but *how* to charge.

“How you charge is often much more important than *how much* you charge.”

The rapid evolution of technology has opened up many new possibilities to different industries in how they can charge for products or services. But no matter which model is selected, we can't stress enough how important it is to choose the right monetization approach early on in the product development process.

OUR PRODUCTS:

Human Resource & Payroll Management System

Modules

- **Authentication Module:** User can login to the system by using username and password. User will get different menu according to his/her privileges. Administrator can change user privileges from admin panel.
- **Security Module:** User access permission based on role.
- Pages can be encrypted using SSL and Sales-Inventory can be configured to only display pages using SSL to ensure that all information passing over the internet is encrypted.
- Users can be defined to see only certain modules on the main menu - so menu options that they will not have access to be not even displayed on screen.
- HTTP security can be configured over the top of the inbuilt security to provide two levels of security - the first to access the web-server at all and the second to actually get into the Sales-Inventory.
- An audit trail of which users did what is retained and is automatically maintained based on how long the information is required to be kept.
- All inputs are sanitized to prevent SQL injections and cross site scripting.
