ABOUT US

OMEGA Tech Ltd. is a world-class, full life-cycle software development company that has been providing cutting-edge IT solutions to clients since 2023. The company is recognized as a leading one-stop IT solution provider, leveraging the latest technologies to drive real business results for clients. With a focus on developing ERP, POS, e-Commerce, News Portal, Website, and customized solutions for both local and international markets, OMEGA Tech Ltd. is committed to simplifying your success.

OMEGA Tech Ltd. offers a range of services, including software development, web development, cloud & cyber security, and IT management. Its portfolio of products includes Enterprise ERP, Distribution ERP, Trading ERP, HR & Payroll, Purchase, Sales, Commercial, Assets Management, Financial Accounting, Production, Inventory Management, CRM, Online E-Commerce, Hospital Management, Online Doctor Booking, Pharmacy Management, Diagnostic Management, and Customer Service.

With our overseas educational backgrounds and professional work experiences, and with local and global renowned organizations, we are capable of delivering quality solutions successfully better than anyone else in the market, be it a small or large project.

VISION AND MISSION

VISION

Omega Exim Ltd. vision is to develop quality software solutions through innovation and continual improvement. Our products, services and commitment for customers' satisfaction and success will make Omega Exim Ltd. a well-recognized and reputable organization developing and providing branded software solutions locally in Bangladesh as well as globally.

MISSION

We strive to be acknowledged for a home of talented and satisfied employees who bring out solutions that enable people and organizations to be best efficient in their activities.

Keeping our vision and mission in mind, the followings are the key activities in brief:

- To comprehend the existing and potential activities of government and non-governmental sectors for assessing the feasibility to design and develop solutions.
- To provide solutions that provide easy access, time saving, spontaneous information, hi-speed internal and external communications, cost effectiveness, effective security, useful statistical analyses and smooth operation.
- To provide infrastructure solution, including designing, implementing, installing and maintaining network for client(s).
- To train IT resources for the respective client(s).
- To provide best customer service by offering technical and non-technical support regarding software and hardware.

We are committed to maintain world class services to make sure effective & efficient solutions for client's unique business need.

WHY US?

Unlike many providers who are rigid, inflexible, and unhelpful and believe in instant gain, leaving their customers in the dark, we are different. We are proud of our reputation, offering a friendly and flexible approach, which ensures long-term partnerships with our clients.

- Committed to client benefits
- Approach to build long-term relationships
- Low risk delivery model
- Dedication to meet deadline
- Deep Technology Expertise
- Experienced Software Outsourcing Partner
- Excellent quality works at affordable rates.
- Every issue/email is addressed within 12 hour of receipt
- Online demo of the project in the development phase
- Update the client of regular progress through a daily status report
- Unconditional warranty for any bug reported in the code we develop

We believe that any solution will be effective only when it perfectly complements existing business strategies, practices, structures and vision. Each project is unique in its requirements and our approach subsequently differs apart from our evident knowledge, expertise and sheer devotion to our work, is the fact that our solutions go beyond being a mere means to an end.

We are committed towards achieving high levels of customer satisfaction by ensuring quality, cost effective and timely solutions. It would be our endeavor to achieve this with technical, financial, business and moral excellence.

We are committed to world standard services to make sure effective and efficient solutions for your unique business need. Our expertise and cost effective solutions will eliminate processing overhead of your organization and will help you to concentrate in core business operation.

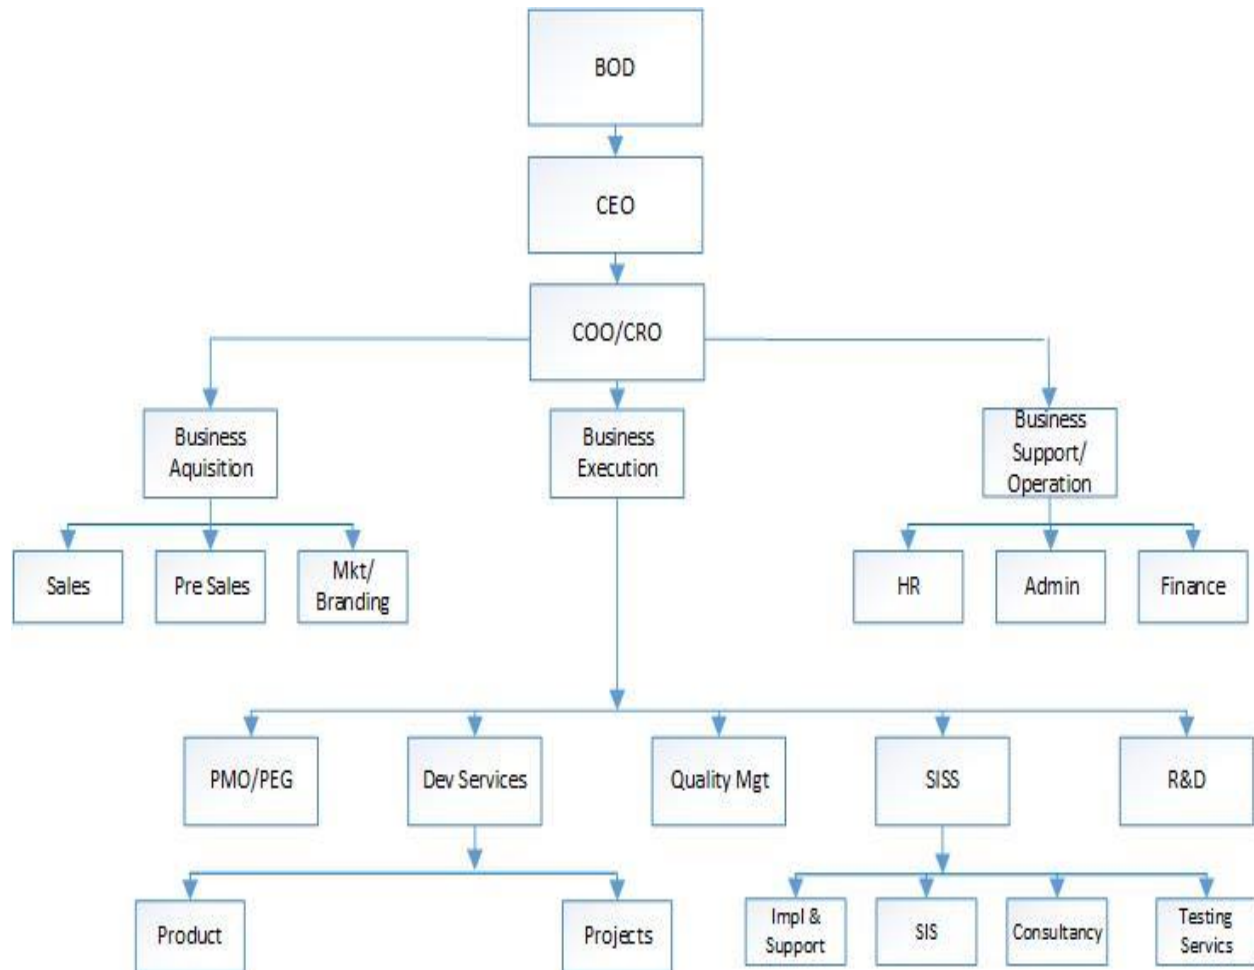

EXPERTISE

Creativity and originality are our keywords we live by. And our professionalism gives it a definite shape in the form of our products & solutions. Our company is staffed by a large team of extremely talented professionals with a strong background in Information Technology having extensive experience in various modules to meet the rigid standards of quality as demanded in this sector.

An assurance of quality - our skill sets and tools are the invaluable assets that help us deliver high quality, project realization solutions to our clients. Our technical and design infrastructure give us the advantage to provide cost-effective, robust and scalable solutions.

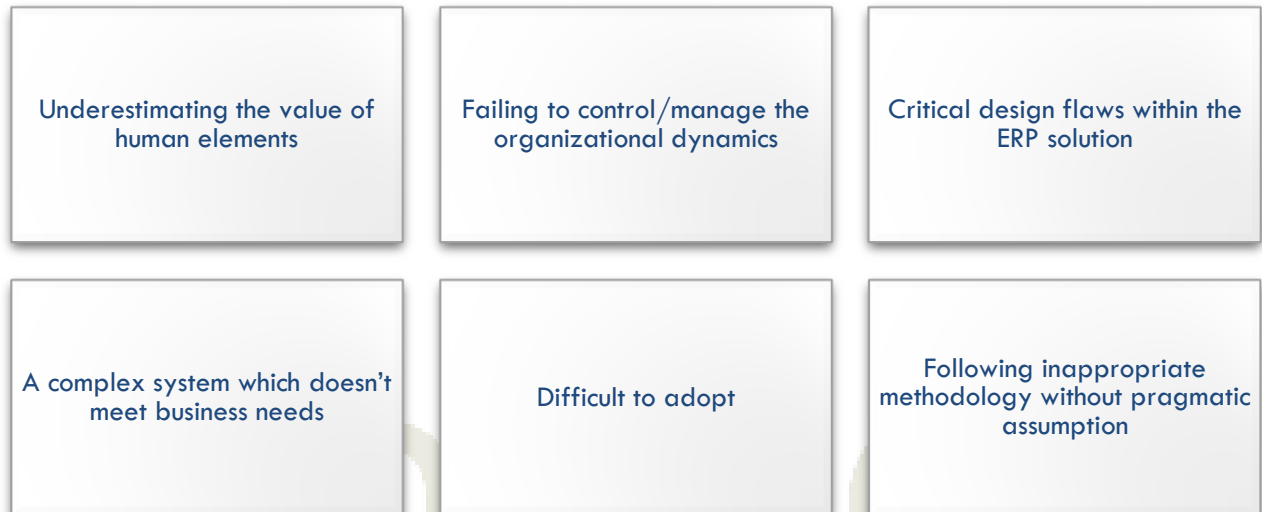

Our team consists of highly experienced project managers, developers, strategists, software analysts and designers who have received impressive feedback for effective execution of projects within their deadlines. Our dynamic team environment has been servicing and providing solutions for large international and national clients as well as medium to small business enterprises. This coupled with state-of-the-art communication facilities and infrastructure makes our development center a virtual extension of your business. It is with this pride that we build long lasting and strong client relationships, which lead to creating truly dynamic and effective solutions that have been proven time and time again.

COMPANY ORGANOGRAM

OELERP™ BUSINESS SOLUTION™

OELERP™ is a robust web based integrated ERP system for all business sectors. Prior to the design and development of the OELERP™ and Business Solutions™ packages, Omega Exim Ltd.™ addresses the primary reasons, for those ERP projects fail majority of the time. Reasons of the high rate of ERP projects failure are myriad. However, the endless reasons are due to the flaws or mismanagement of these three broad areas:

For any successful ERP software development and implementation, the above factors need to be addressed, and without identifying/incorporating solutions to each of these, the risk of failure will remain. OELERP™ has addresses each of these issues from the very beginning of the development of the OELERP™ Business Solutions™. And Omega Exim Ltd.™ will address these issues while implementing the OELERP™ Business Solutions™. While the organizational dynamics and human elements issues are handled and addressed in BPR and Change Management solutions, OELERP™'s architectural design and capabilities and the Software Development Methodology that Omega Exim Ltd.™ leverages. The next sub-sections will describe the OELERP™ Business Solutions™ and its capabilities. From the system's vast capability, Omega Exim Ltd.™ will configure and customize as necessary to align with the "To-Be" business processes once identified and designed.

OELERP™ BUSINESS SOLUTIONS™ ENTERPRISE ARCHITECTURE

As stated earlier, design flaws within the ERP software make it impossible to adapt complex business processes when changes are mandatory. As a result, the ERP project may fail before its completion or the software becomes useless after a while. This is the main reason as to why many companies are forced to scrap implemented systems and are required to develop a new system from scratch. To address this and avoid failure or scrap of systems, any ERP architecture needs to be very carefully designed to allow flexibility to keep the future modifications in mind. It also needs to be reliable and scalable. The architectural design, therefore, is the foundation of the ERP software. And sufficient time allocation is necessary to understand the overall business processes

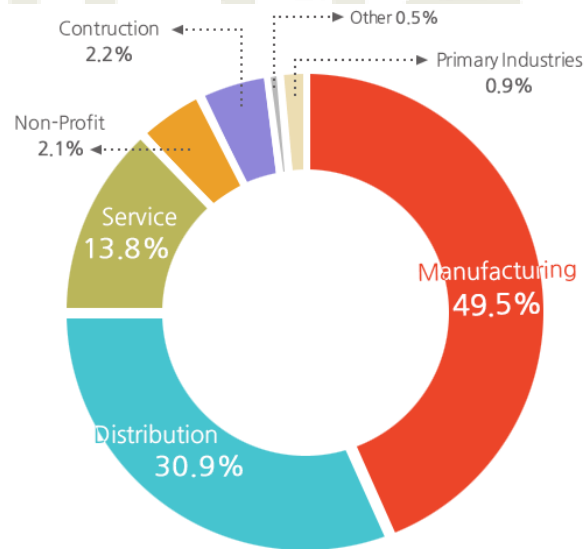

and the associated business data before the design and development of the architectural or foundation framework for the ERP solution. This fundamental understanding leads more advanced ERP solution Omega Exim Ltd.s to design and develop an enterprise architecture for the ERP solution.

The primary reason for developing enterprise architecture is to support the business by providing the fundamental technology and process structure for an IT strategy. This in turn makes IT a responsive asset for a successful modern business strategy.

Today's CEOs know that the effective management and exploitation of information through IT is the key to business success, and the indispensable means to achieving competitive advantage. Enterprise architecture addresses this need, by providing a strategic context for the evolution of the IT system in response to the constantly changing needs of the business environment.

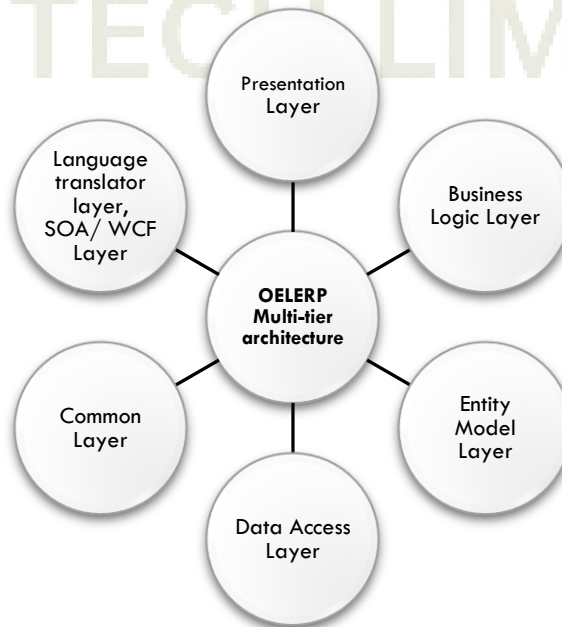

Furthermore, a good enterprise architecture enables you to achieve the right balance between IT efficiency and business innovation. It allows individual business units to innovate safely in their pursuit of competitive advantage. At the same time, it assures the needs of the organization for an integrated IT strategy, permitting the closest possible synergy across the extended enterprise. Unfortunately, many software developers or Omega Exim Ltd.s simply either do not understand the need of the enterprise architecture or they lack in expertise to develop one or they may intentionally avoid addressing it as it requires significant investment. Thus, without an effective and structured enterprise architecture solution, it may be faster to develop the loosely coupled or even integrated ERP modules, but the solution may not be a lasting one.

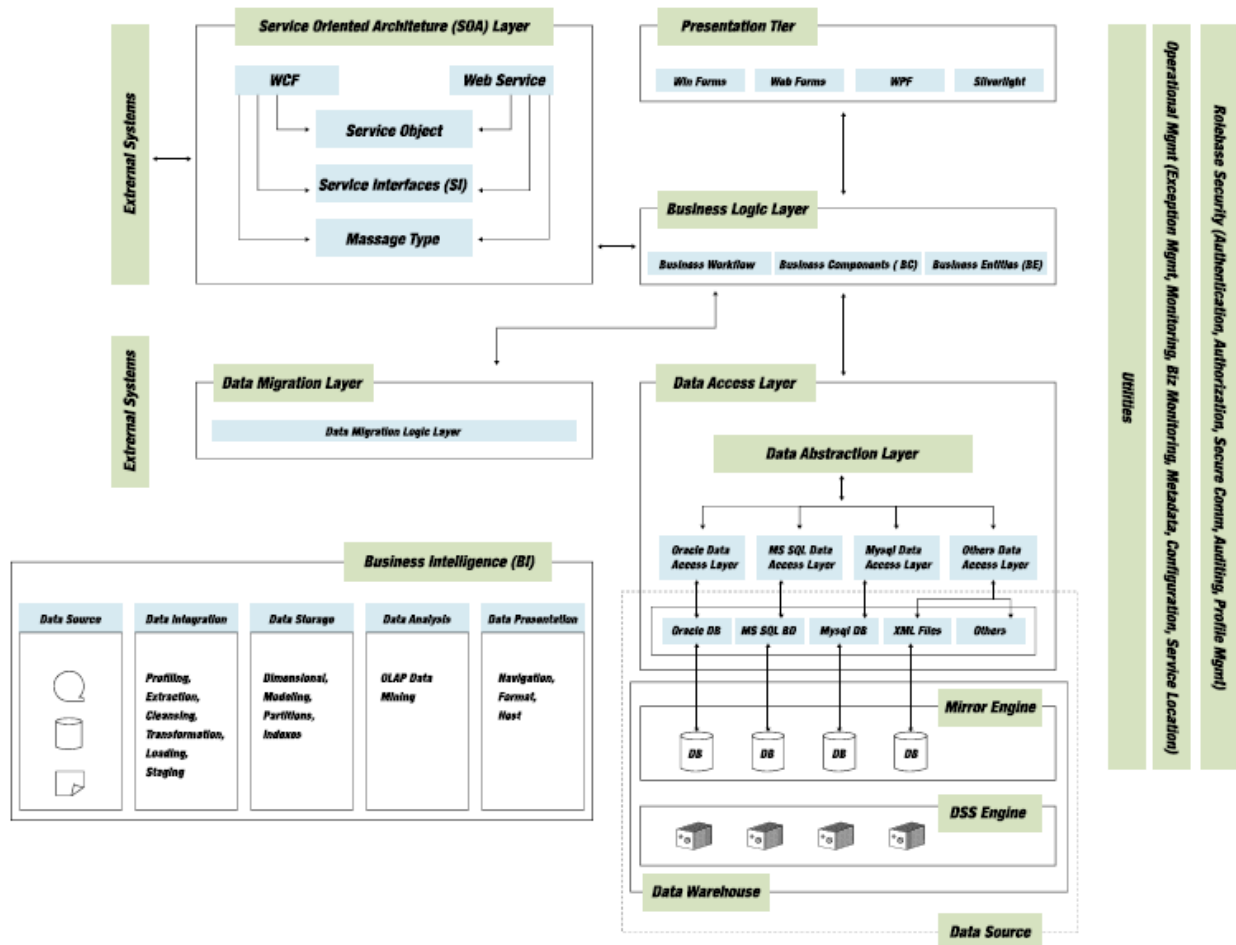

Keeping the above views in mind, over the years, Omega Exim Ltd.™ has developed an enterprise architectural framework, which is the foundation of the OELERP™. It is a general ERP suitable for any industry. The architecture is seamlessly superior to other existing enterprise architectures. To some extent the OELERP™ Enterprise Architecture has followed TOGAF framework. However, in general, it is developed by following global general business needs and enterprise practices. The hierarchy of the OELERP™ Enterprise Architecture is as follows:

The OELERP™ Enterprise Architecture is a multi-tier architecture, having different layers classified as:

OEERP™ BUSINESS SOLUTIONS™ MODULES

1. Purchase & Logistic Module
2. Warehouse & Inventory Management Module
3. Production Management Module
4. Job Costing Module
5. Sales & Distribution Management Module
6. Retail Sales Management (POS) Module
7. Commercial Management Module
8. Human Resource Management Module
9. Payroll & Fund Management Module
10. Financial Accounting Management Module
11. Financial Budgeting Module
12. Enterprise Asset Management Module
13. Customer Relationship Management (CRM) Module
14. Customer Service Management Module
15. Billing & Collections Management Module
16. MIS and BI Module
17. Mobile Apps

OEERP™ FOR TRADING INDUSTRY

PURCHASE & LOGISTICS MODULE

1. Purchase Plan	6. Purchase Quotation CS	11. Purchase Pro-Forma Invoice
2. Purchase Requisition	7. Purchase Order	12. Purchase LC
3. Reorder Level Basis Requisition	8. Purchase Invoice	13. Purchase Commercial Invoice
4. Request for Quotation	9. Purchase Credit-Note	14. Item Cost Settings
5. Supplier Quotation	10. Purchase Debit-Note	15. Item Cost Analysis

JOB COSTING MODULE

1. Pre-Defined Templates	4. Price Books	6. Bulk Proformas
2. Multiple Customers	5. Minimum Margin %	7. Plant Charges
3. Project Jobs		

WAREHOUSE & INVENTORY MANAGEMENT MODULE

1. Item Requisition	7. Bulk Conversion MRR	13. Purchase Return
2. Purchase MRR	8. Item QC	14. Physical Inventory
3. Production Receive	9. Sales Delivery	15. Item Shortage
4. Sales Return MRR	10. Inter Branch Delivery	16. Item Over
5. Combination GRN	11. Damage Goods Receive	17. Stock View
6. Inter Branch-MRR	12. Production Return	

SALES & DISTRIBUTION MANAGEMENT MODULE

1. Sales Forecasting	7. Sales Invoice	13. Sales Monitoring Board
2. Sales Plan	8. Dr Notes	14. Sales Target Settings
3. Sales Quotation	9. Cr Notes	15. Discount Settings
4. Price Declaration	10. Dealer Management	16. Customer Entry
5. Sales Item Price Settings	11. Distributor Management	17. Sales Tracking
6. General Sales Order	12. Warranty Management	

OEELRP RETAIL SALES AND DISTRIBUTION MANAGEMENT MODULE

1. Bulk Item Conversion BoM	13. POS-Sales Transaction	21. POS Pending Sales Monitoring Board
2. Combining Item Conversion BOM	14. POS Cash Monitoring Board	22. POS-Sales Record Process-For Data Archiving
3. Bulk Item Conversion Entry	15. POS Cash Transfer Entry	23. Sales Force Performance Report
4. Combining Item Entry	16. POS Sales Statement- Detail & Summary	24. POS Sales Price & Discount setting integration with e-Commerce
5. Club Member Card Settings	17. POS Shift Close Statement- Detail & Summary	25. POS & Sales Accounting Integration
6. Sales Warranty Settings	18. POS-Sales Record Process-For Accounts Journal	26. POS & Sale MIS Reports-Detail & Summary
7. POS Cash Ceiling Settings	19. POS Cancelled Sales Report-Detail & Summary	
8. Club Member Card Management	20. POS Pending Sales Report-Detail & Summary	
9. POS Shift Open		
10. POS Cash Open		
11. POS Cash Close		
12. POS Shift Close		

FINANCIAL ACCOUNTING MANAGEMENT MODULE

1. Chart of Accounts	9. Cheque Monitoring panel	15. All types of transaction report
2. Cash Receive Vouching	10. Post Dated Cheque management	<u>Analytical Reports:</u>
3. Cash Payment Vouching	11. Year Closing Process	a. Trial Balance
4. Bank Receive Vouching	12. Module transaction data process	b. Income Statement
5. Bank Payment Vouching	13. Fixed Assets Schedule Management	c. Balance Sheet
6. General Journal Vouching	14. Bank Reconciliation	d. Cash Flow Statement
7. Conveyance Bill Vouching		e. General Ledger
8. Cheque Book Receive and Print		f. Party Ledger

ENTERPRISE ASSETS MANAGEMENT MODULE

1. Item Configuration	5. MRR (Fixed Asset Internal Transfer)	8. Asset Utility Consumption
2. Fixed Assets Depreciation	6. MRR (Fixed Asset External Transfer)	9. Fixed Asset Disposal
3. Fixed Asset Purchase Receive	7. Spare-Parts Consumption	10. Damage Goods Receive
4. Fixed Asset Opening Entry		11. Warranty Management

HUMAN RESOURCE MANAGEMENT MODULE

1. ATTENDANCE MANAGEMENT a. Attendance Settings b. Attendance Entry c. OT Assignment d. OT Entry e. OT Process f. Delay in Application g. Early Out Application h. Attendance Data Process from Device i. Attendance Monitoring Dashboard	2. LEAVE MANAGEMENT a. Job Contract and Position wise leave eligibility b. Employee Leave Allocation Process c. Leave Application d. Leave Monitoring Board e. Leave Encashment f. Leave Forwarding Process	3. SETTLEMENT MANAGEMENT a. Application- Retired b. Application- Resignation c. Application- Termination d. Settlement Application Process e. Settlement Journal
4. TRAINING MANAGEMENT a. Training Planning/Schedule b. Training Record Entry c. Training Reports: Detail & Summary d. Training Dashboard	5. EMPLOYEE SELF SERVICES a. To-Do List Record Entry with Status Update b. To-Do List Record Monitoring c. Document Upload d. Document Tracking Board	6. VISITOR MANAGEMENT a. Visitor Entry b. Visitor Reports-Detail and Summary 7. Notice Board a. Office Notice Entry b. Office Notice Dashboard c. Office Notice Report- Detail & Summary

PAYROLL & FUND MANAGEMENT MODULE

1. AIT Settings 2. Create Payroll- General 3. Create Payroll- Production Based 4. Process Payroll- General 5. Process Payroll- Production Based	6. Salary Advice 7. Pay slip 8. Increment & Promotion Management 9. KPI Evaluation 10. Performance Appraisal-Report: Detail & Summary	11. Increment Process 12. Increment Entry 13. Increment Application 14. Promotion Process 15. Promotion Entry 16. Promotion Application
Provident Fund		
1. Provident Fund Contribution Ratio 2. Death Compensation 3. Death Benefit Policy 4. Administrative Cost Responsibility 5. Audit Record 6. Deduction in Payroll 7. Accrued Interest Calculation 8. Opening Contribution	9. Settlement Time Limit 10. Delay Penalty Against Company Contribution 11. Fund Settlement 12. PF Withdrawal 13. Return or Early Settlement of Investment 14. MOBILE APP DEVELOPMENT

We create mobile applications, mainly for business, for the most popular platforms, iOS, Android or Windows Phone. We have started developing innovative mobile applications that are the most polished, smart sleek, speedy & efficient.

Omega Exim Ltd. has been working on several mobile applications which are integrated for life insurance companies, different business organization's Sales order placement, inventory tracking, warranty activation management, sales representatives field visit tracking and many more.

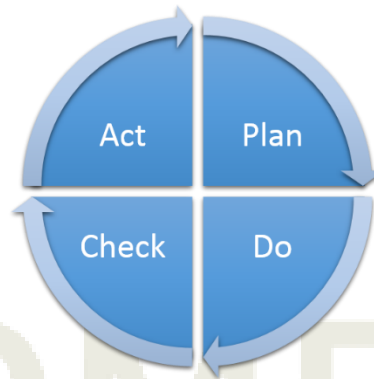

With Omega Exim Ltd. Mobile App Development training curriculum, you can learn to build responsive and robust mobile applications using the most in-demand programming languages for Android and IOS including Java and C#. Gain skills in responsive web design, enterprise integration, and learn to implement mobile data security best practices.

KEY ADVANTAGES OF THE SOLUTIONS

SOFTWARE DEVELOPMENT METHODOLOGY OF OMEGA EXIM LTD.™

For the development, customization, configuration and implementation, it is important to leverage software development methodology very effectively, be it the waterfall or any agile methodology. While some organizations are familiar with the waterfall and others may be using an agile method, it becomes important to utilize a method that can suit the all customers' familiarities. To keep this view in mind, Omega Exim Ltd. utilizes Dr. Walter Shewhart's Continual Improvement of Plan-Do-Check-Act (PDCA) life-cycle for its software development and OELERP implementations for its clients. Our customized PDCA methodology can conform to both the values of waterfall and agile methodologies:

Continuous Improvement Process Flow

GUARANTEE OF SUCCESS FROM OMEGA EXIM LTD.™

No company provides guarantee for successful ERP implementations especially since the ERP implementation failure rates are extremely high locally and globally. However, with its solid structured company, Omega Exim Ltd.™, behind it, its seasoned, professional, proven and effective OELERP™ Team, OELERP™' flexible and robust architecture and design, and the software development and implementation methodology of Dr. Walter Shewhart's Continual Improvement of Plan-Do-Check-Act (PDCA) life-cycle that is leveraged in the OELERP™ implementations, our organization confidently and rightfully can assure the guarantee of successful OELERP™ implementations for the following reasons, by eliminating the causes of failure's:

1. The leaders of the OELERP™ Team are seasoned, professional and experienced enough to understand the human elements and organizational dynamics to control/ manage of changes and requirements of all business sectors regardless of the business sizes.
2. The flexibility and robustness of the OELERP™ Architectural Design will allow the adoption of the necessary business process changes very smoothly. In most cases, configuration changes in the system, without any or little changes to the software code, will be sufficient to adopt the process changes/ enhancements/ customizations.
3. The leveraged proven PDCA life-cycle will help the OELERP™ implementations to be equally effective in organizations that are using either "classical" or "waterfall" or any agile methodology.
4. With the proven track record and the fact that it has been in the business for more than sixteen years, Omega Exim Ltd.™ is confident to remain in the business and take a leading role in the software sector in Bangladesh. This assures companies with any required post-implementation and maintenance services of the Omega Exim Ltd.™ and its OELERP™ Support Team that will make any company's OELERP™ implementation a lasting success.
