Company Summary

Better Things Through Listening, Speaking & Coding

Codeshaper is a creative and interactive web solution company based in Bangladesh. We're a dedicated, highly skilled group of professionals who have been working for the last 5 years to establish your brand identity with creative work. We're constantly working on solving business problems with the support of technologies. We provide various services such as UI & UX Design, Ecommerce Solutions, Web Development, Mobile Apps Development, etc. that help to scale your business.

First, The Dream and plan of establishing Codeshaper have been started in January 2017. Then we start the activity as a web design development agency with some enthusiastic web design and development concepts. We worked with clients from Bangladesh as well as other countries like the USA, UK, Netherlands, Canada, Denmark, Norway, Sweden, Germany, Canada, Switzerland, Turkey, and the Middle East.

Improving the User Experience on your eCommerce Site

Photos and Graphics

- » People like to see what they are shopping for
- » People prefer simple, uncluttered design
- » Avoid using too many words

Filter Down

- » Include subcategories
- » Include filters for colour, style, size, price, etc. depending on what items you sell
- » Make filters clear and easy to understand

01

UX and e commerce

- » Help customers in their search
- » Improve conversions and increase sales
- » Improve user experience
- » Make transaction smoother and more pleasurable

02

03

Help People Navigate

- » Make sure the website content is straightforward
- » Include general, broad categories on your homepage and in your main navigation menu
- » Limit the main menu to about five to seven options

04

05

Avoid Clutter

- » Avoid confusing images and promotions
- » Stick to a more simple and straightforward website design
