Fakir Technologies at a Glance

Fakir Technologies Limited (FTL) is an upcoming, innovative IT based solution house. We are aiming to become the final destination for systems integration and technology provider, positioning ourselves to provide leading edge intelligent technical solutions and IT based services to businesses, organizations and government. We are aiming to become the most efficient and effective secure access and communication service provider with various heterogeneous information resources and services, anytime and anywhere.

Our Vision and Corporate Motto

Established to deliver leading edge ubiquitous secure technologies, intelligent technical solutions and consulting services to businesses, organizations and governmental bodies, FTL was founded with the vision to enable **“cutting edge technology, data and information for all”**, providing its customers and business partners with robust, extensible and customizable security-enhanced solutions for information sharing, data exchange, services innovation and IT enabled services.

Our Business Activities and Professional Services

FTL's current activities and professional services can be summarized in the following categories:

Quality IT Equipment Hardware

- Providing leading businesses with in-house QC processed hardware sourced from leading IT Hardware organizations of the world
- Looking to expand portfolio to provide premium hardware/accessories to meet national demand priced at competitive ranges

Production System Integration and Custom Software Development

- Design and development of Integrated IT Solutions and Tailor-made Software, utilizing custom software development frameworks and including training, help-desk and software engineering outsourcing activities;
- Design, development, customization, deployment and support of enterprise-driven custom software applications and solutions, e-business (B2B) and e-commerce (B2C) solutions, e-government (G2G, G2B and G2C) and e-health solutions, as well as brand new software products and services.

e-Services and e-Processes

- Design and development of (transactional) portals exposing workflow-based e-services for customers, citizens and businesses;
- Target Organizations: Public Administration and Central Government, Regional and Local Government, and Private Sector.

Technology Provision and IT Consulting

- Combining emerging technologies (like Cloud Computing, Software-as-a-Service, Social Networks, Mobility, Semantic Web, Linked Open Data, and Big Data Management) in order to help organizations to meet their business strategy goals and benefit from the power of technology innovation;
- Definition of the IT Strategy, Infrastructure and overall Enterprise Architecture required for organizations and enterprises to support the efficient and effective achievement of their business objectives, ensuring the end-to-end IT security across the organization;
- Increase of the R&D capacity of business partners, staffing their project teams with the highly qualified and experienced research engineers of FTL who add value and ensure the robustness and success of the research and technological development process.
