Point of View

EEB

EasyEBilling Is the confluence of the art and science of Application Development

ART

Software creation is an art. The art of creating a system that meets the aspirations of the users.

SCIENCE

Software development is a science. The science of ensuring availability, performance, and accuracy of a system.

With

EasyEBilling translates the relevant software development technologies into the most innovative and effective software applications that a business/organization needs.

Monthly Bills are Collected in Different Ways

ABOUT US

EasyEBilling.com was founded in 2010 that develops and provides customized software, applications, and ready-to-use software in order to fulfill our client's requirements. Our development team delivers customized software with perfection and accurate time, thus satisfying our clients. We develop all types of application software at a cost-effective rate so that our clients can easily avail of this software. We focus on converting our client's dreams into reality. Our professional team includes experienced software developers, designers, content writers, SEO optimizers, and marketing executives who will help you provide the best software per your business requirements. We provide demonstrations for all the software we develop. It is an innovative, trusted, and competent software company with a single-minded vision - Empowering Enterprises to Leverage the Power of Information Technology.

WHY US?

We listen, understand, and then suggest or design a system that meets the current and future requirements. We anticipate additional features that customers may require and help to create a system that is not just bug-free but also flexible to embrace the future. We believe in documentation and process. We lay out clear milestones that engage customers at each stage. We are empathetic and open to suggestions at each stage and have an unceasing desire to exceed expectations.

Software & Application

EasyEBilling

OUR SERVICES

Full-cycle servicing that covers every aspect of app production and implementation.

CATV Billing Software- This service is only for those sorts of businessman who have Cable Tv Business. Our CATV Billing system lets the cable operators to manage their digital & analog service clients simultaneously. Digital service synchronization via API, Digital box stock management are some of the star features of this software. The programming and data security are maintained by USA Programmer team.

Sales
Inventory
Accounting

ACCOUNTING - INVENTORY – INVOICE It's an advance Sales & Inventory software with all the account features. Our software provides correct Debit & Credit balance which reflects in our Trial Balance, Balance Sheet, Profit & Loss.

ISP Billing Software- We provide fully automated ISP billing software which enables ISP's to manage their clients through Network equipment synchronization & robust billing facilities. SMS Notifications, Online Complain & Ticketing feature adds an extra layer of perfection to the software.

House & Apartment Rent software- EasyEBilling offers Home & Apartment owners an easy way to manage Tenants rent transactions & utility charges.

**Clothing &
Accounting**

Clothing Business- EasyEBilling provides smart sales & inventory solution for Clothing/Boutique showrooms.

**COMPUTER
Products**

Computer Product- Computer accessories business require some unique features unlike any other business. Keeping that in mind EasyEBilling implemented features such as Warranty/Non-Warranty product sale, Buy & Sale products via Barcode/QR Code, Product Database etc.

**DOCTOR &
PRESCRIPTION**

Doctor & Prescription Software- EasyEBilling Doctor & Prescription software digitalizes mainstream hand written prescriptions. It enables doctors to keep patients records in a database & provide printed prescription.

Electronics & Home Appliance- Now days manually managing an Electronics & Home appliance showroom is quite a Hassel. EasyEBilling provides all the relevant features for this kind of businesses. “Sale by Installment, Warranty Products are the most sought-after features of this software.

Manufacturing Business- Manufacturing Business requires completely different kind of inventory system as opposed to mainstream inventory environments. Because here the system needs to keep track of the consumption of the raw materials & also the production rate of the finished goods. When a system can keep track of these values only then it can provide correct outcome. EasyEBilling ensures these features 100% accurately.

Pharmacy Business- Pharmacies operate somewhat differently than the other stock or inventory related businesses. Often run out of medicines, frequent purchase orders and many more common phenomena. Our software tackles these issues with perfection.

Community- Our software provides features for the communities to keep track of members contribution, members database, new membership forms, community assets etc.
