

Business Profile of Mulytic Energy Solutions Ltd.

Mulytic Energy Solutions Ltd., a data analytic company in the energy domain. We intelligently process data into real-time information that generates insights which adds value for our customers. Our customers enjoy the products and services from solutions including deployment of innovative Iot and cloud-based solutions, combined with patented German technologies. We collaborate with various innovative international businesses to provide the best cutting edge energy solutions and cloud operations services globally.

We are proud to live at the intersection of the developed and developing worlds. Our duty is to be a community pillar and unite these worlds so all can benefit.

We are proud to sponsor several programs benefiting Bangladesh and the community — to bring Bangladesh and its immense talents into the world stage so all may benefit.

- The Mobility House
- Universität Siegen
- Mercedes-Benz
- Renault Group
- Daimler
- Coulomb

- Audi
- Arbeiter-Samariter-Bund Deutschland
- Eaton Corporation
- Mortenson construction
- GETEC Energie GmbH

Our Product & Services

1. Charge.AI

Collect and connect to your EV devices across the world in real-time.

Charge.AI uses the latest IoT to instantly connect to your charge points for real-time access, or upload to our Insights solution. Setup is fast and data can be batch or real-time, serving your needs in a consistent, reliable way.

Charge.AI Features:

- ✓ Collect data across your fleet, wherever they are
- ✓ Integrate with existing systems or database in minutes.
- ✓ Connect legacy systems to the cloud.
- ✓ Secure and authentication data transactions
- ✓ Intelligent monitoring to identify and resolve problems instantly.

2. Generation 2 Chargers

Generation 2 (Type 2) Chargers give you fast charging to keep business on the road.

Generation 2 chargers allow for efficient charging, more stable connections, and longer life than previous models – allowing more stable and secure power transfer.

Generation 2 Charging Features:

- ✓ 5-7x faster charging than Type 1
- ✓ 240V compatibility with most homes

- ✓ Avoids manual locking and wear from repeated usage.
- ✓ Durable design for outdoor use in all weather
- ✓ Compatible with Mulytic Energy Charge.AI

3. Hyper Chargers

Charge on-the-go for minimal time and effort.

Hyper charging is for those that need to charge in a hurry, where time is critical and you have minutes, not hours to get back on the road.

Hyper Charging Features:

- ✓ Charge at rate of 4.5 to 30 km per minute (fastest available in market)
- ✓ Ideal for commercial and business uses – many cars charged at the same time.
- ✓ Compatible with most cars and light trucks, easy to install and operate.
