About Us

Our mission is to make high-volume image editing work effortless for our clients. As our company logo shows, we make our clients feel relaxed once they outsource the editing work to us – editing work done on time on budget.

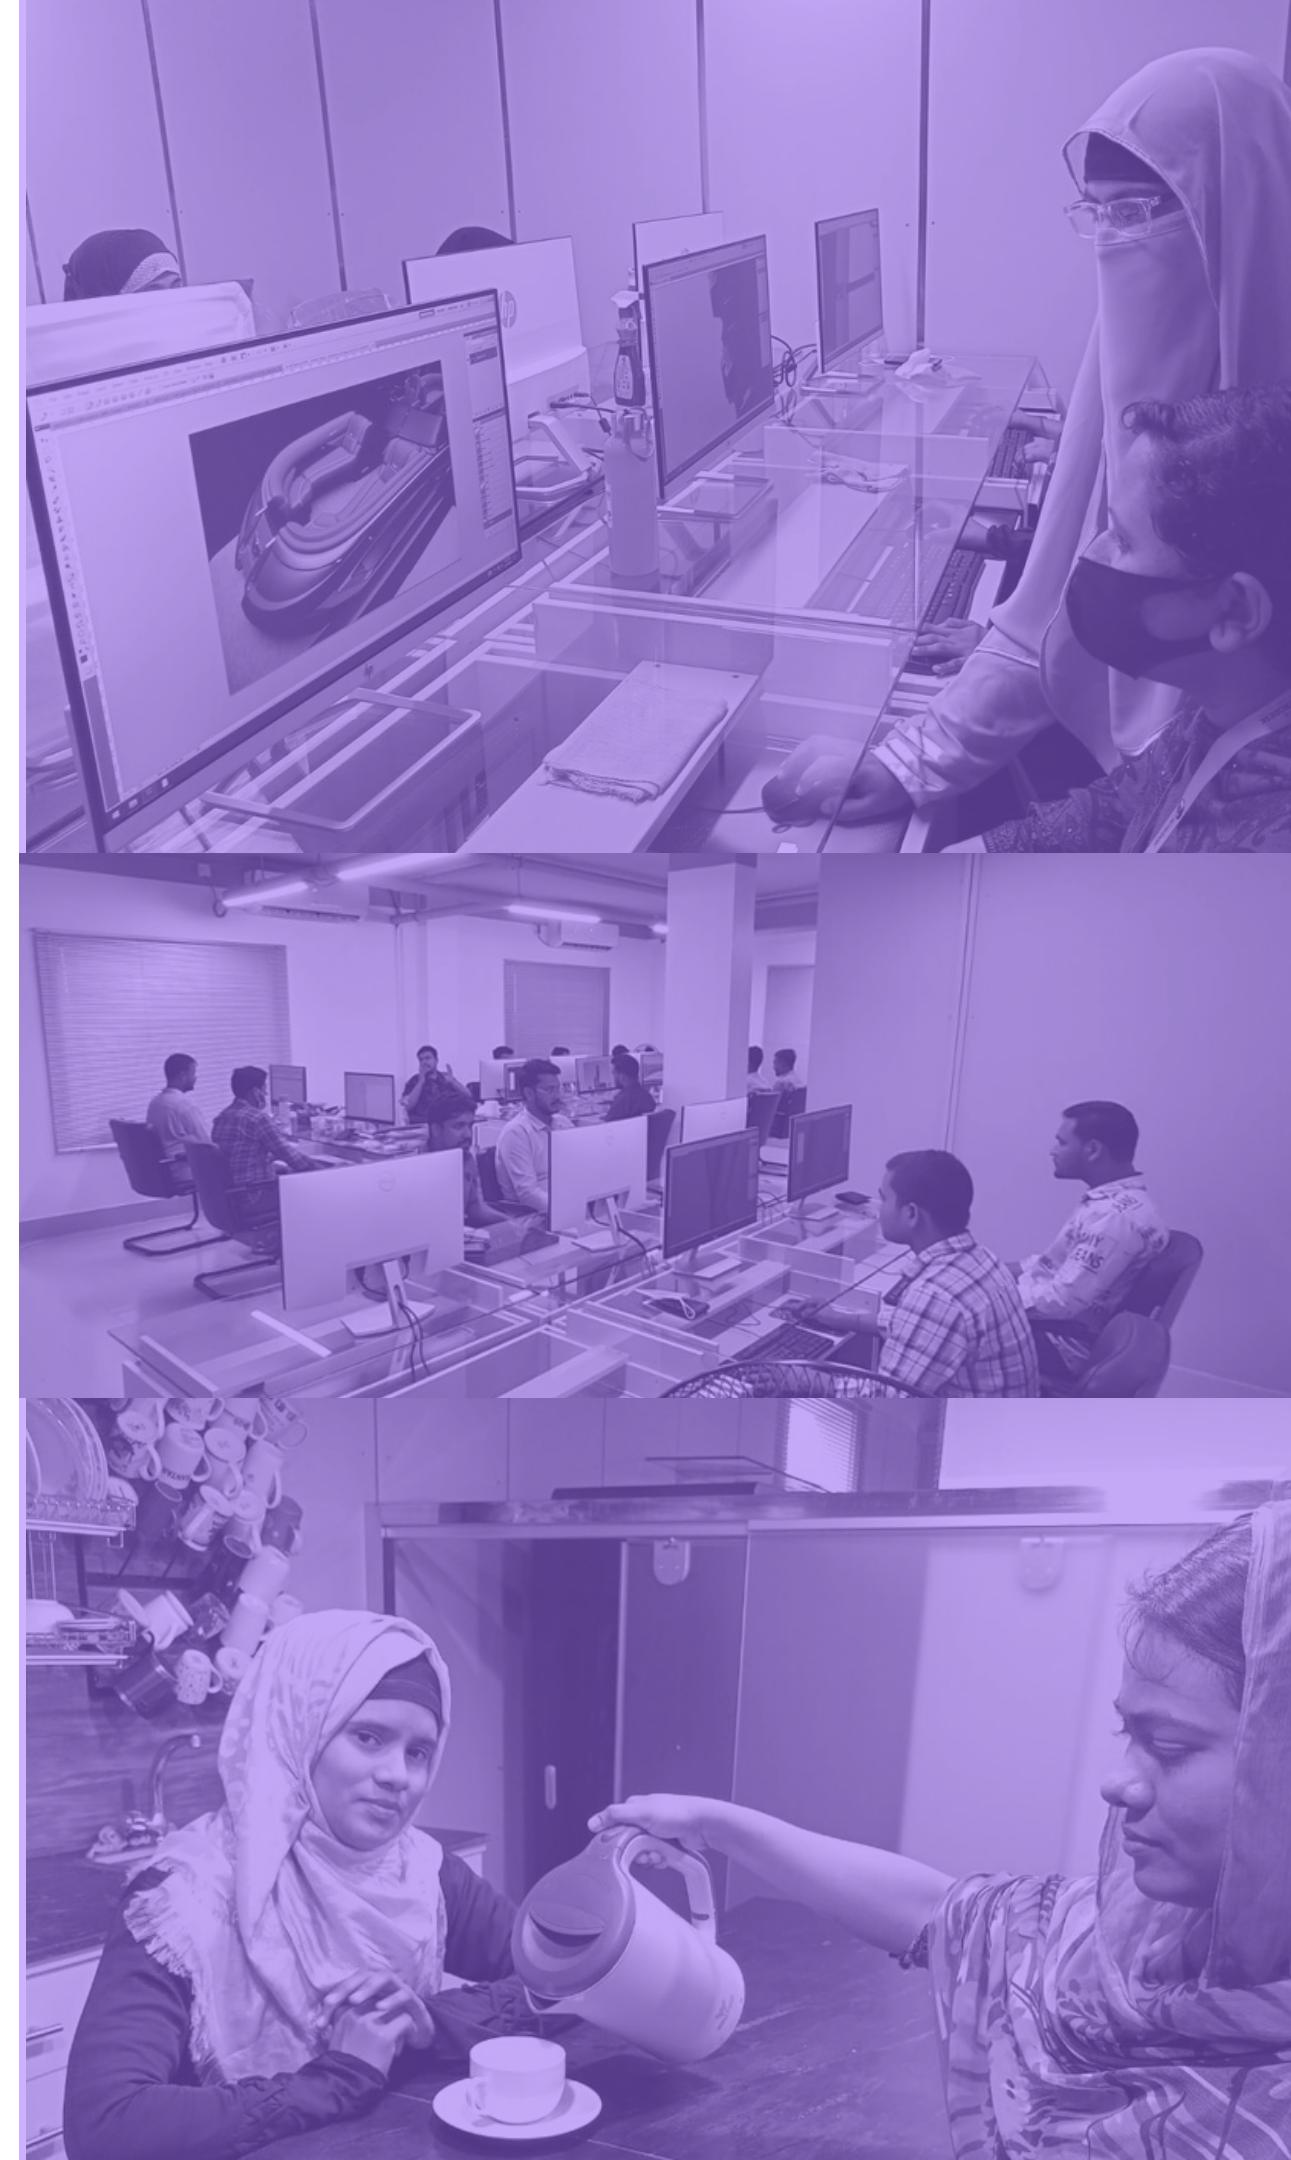

Our values

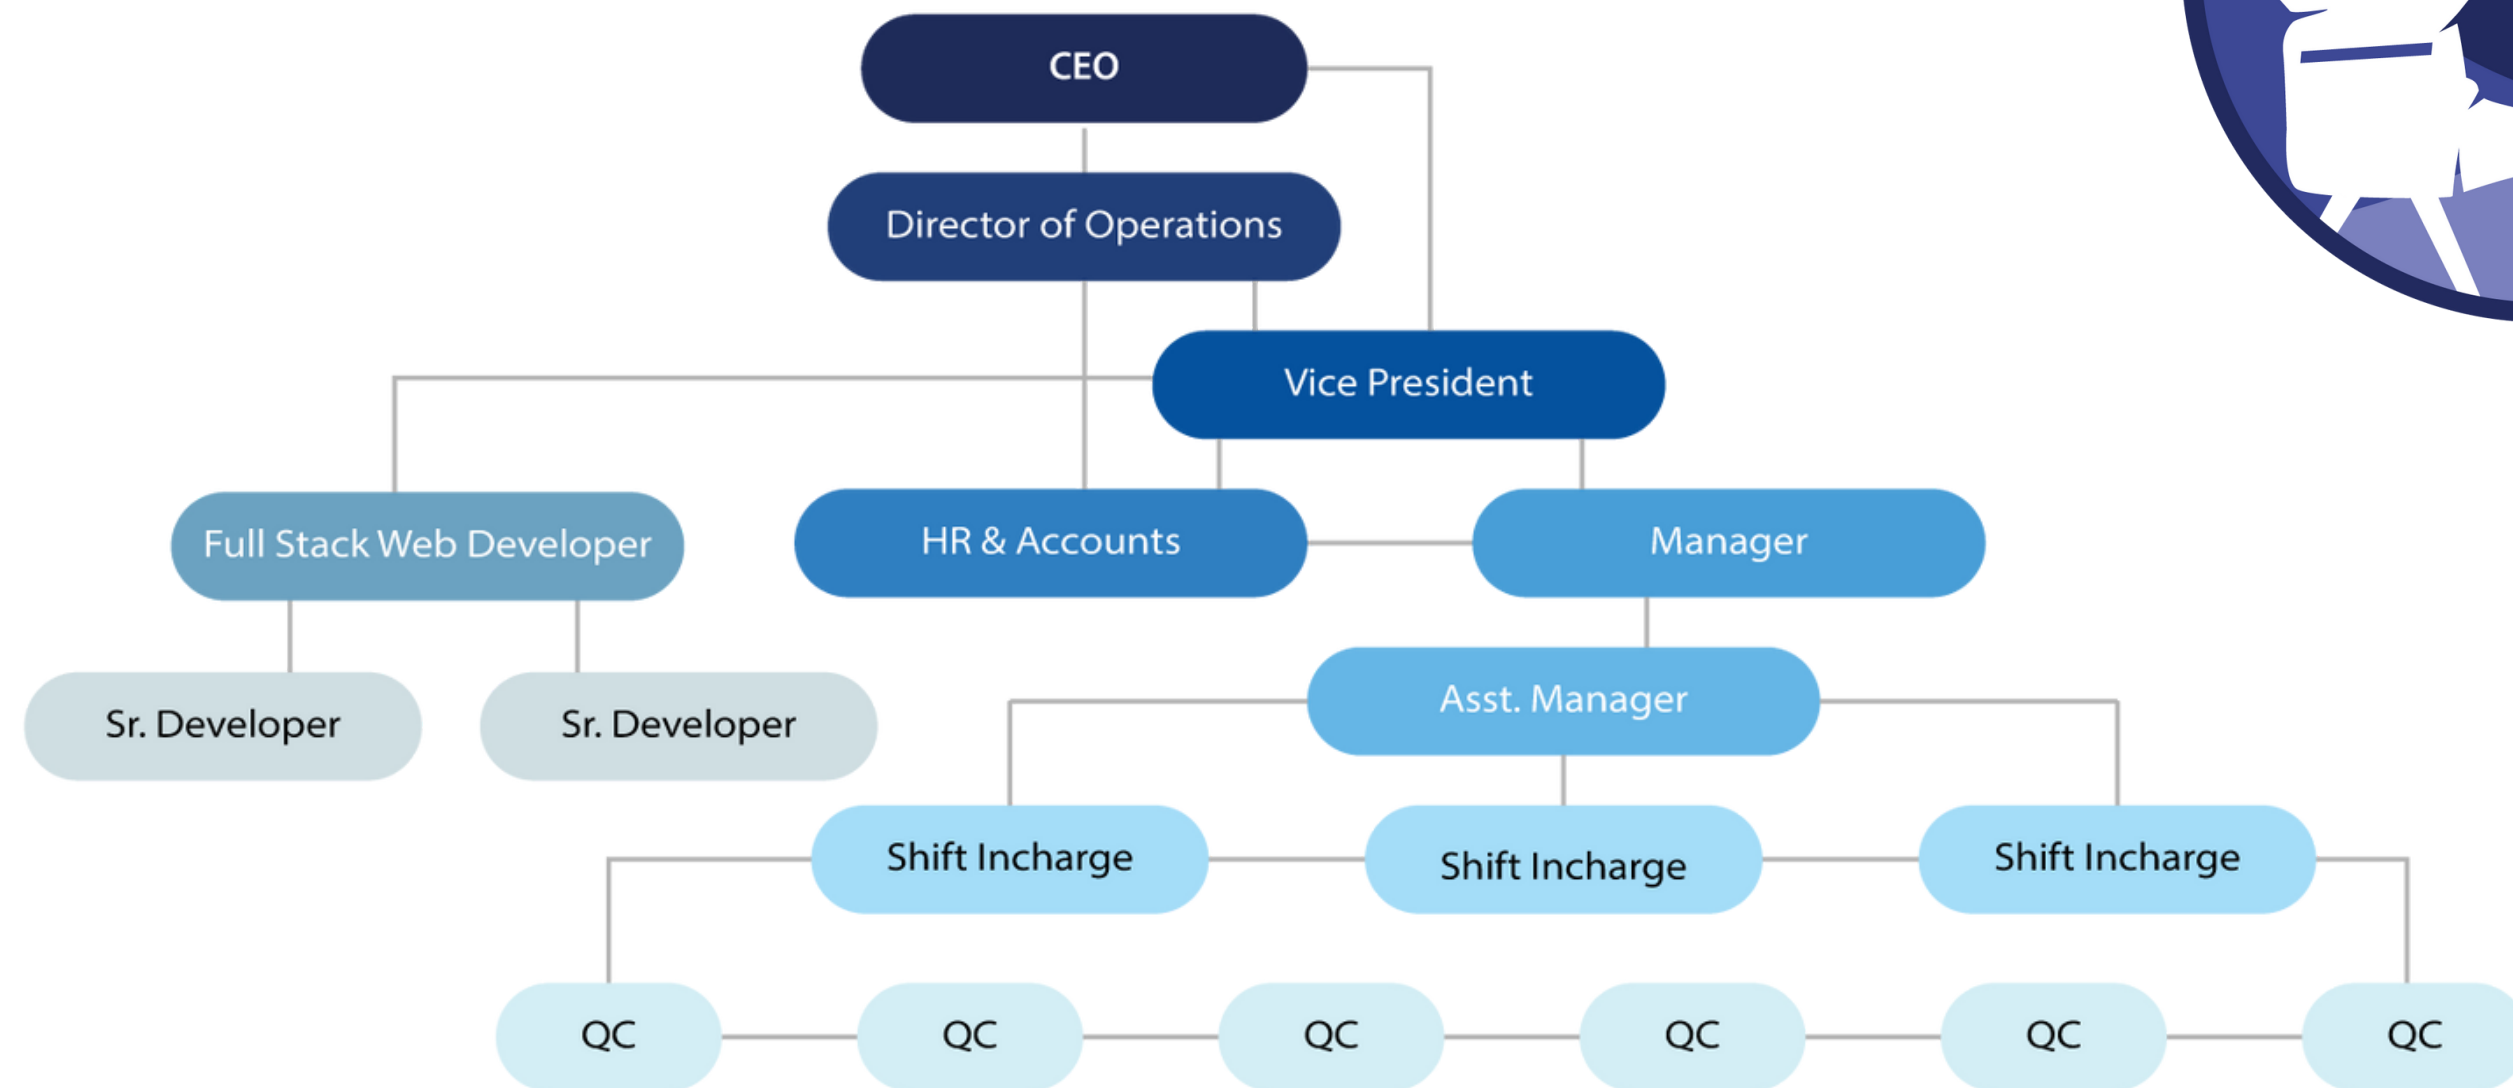

Do the right thing: Integrity is the foundation for everything we do. We are admired and respected for our commitment to honesty, trust, and transparency. We do the right thing – even when no one is watching.

Remember the feeling: Our world can be frustrating, confusing and even scary. We have all been there, so we show empathy and act with humility. We are all human, and therefore, we respect our customers, partners, and coworkers.

Get it done: Every day, customers trust us to edit and retouch high volume of images that are crucial to their success and we take that work seriously. Our team will overcome obstacles, find solutions and deliver exceptional image editing results.

Get It Done

Clipping Path Service

Adobe Photoshop pen tool allows us to create hand-drawn clipping paths for crisp and clean photo cut-outs that you can put on any background, color and setting.

We're incredibly proud of our craftsmanship and offer a 100% satisfaction guarantee on all our clipping path services.

Multi-clipping Path Services

Multi-clipping path separates multiple elements in a photo. It's a complex clipping path with additional paths carefully crafted within the product or shot. Once every path is isolated, you can edit, recolor, or cut out the image individually.

Ghost Mannequin

Ghost mannequin is also known as invisible mannequin service or neck joint service. This editing technique helps us remove mannequins or models and perfectly color match your images to showcase apparel's natural fit and drape.

Photo Retouching

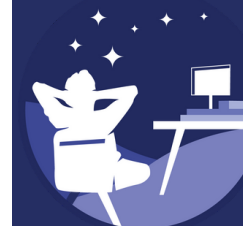

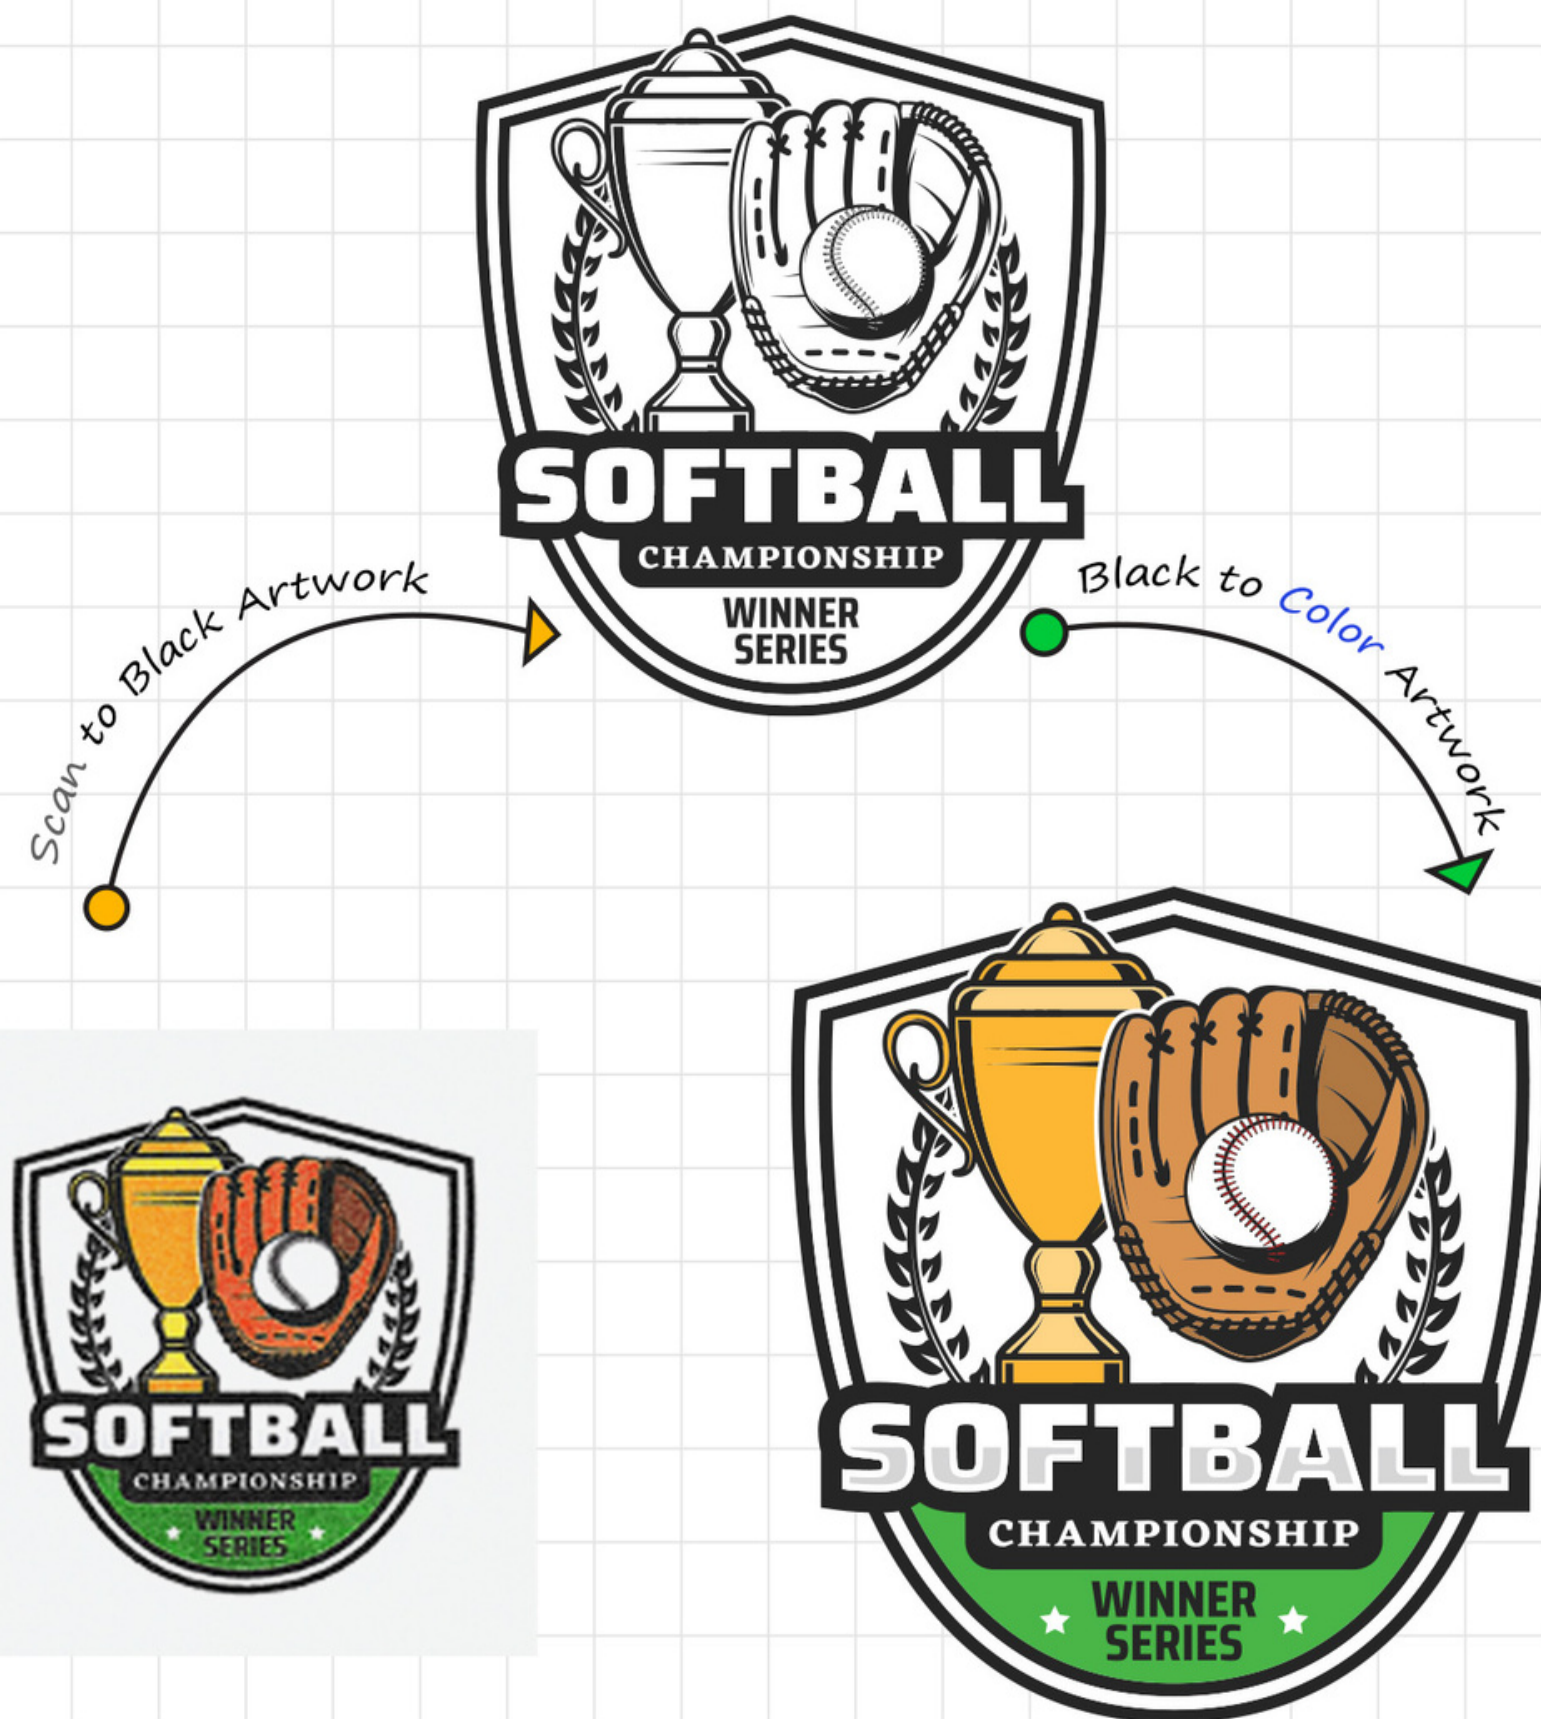

We take your photo retouching jobs seriously for whatever style aligns with your brand. We've spent the last ten years training and building our in-house expert retouching team that can give flawless output – from beauty portraits to hair to watch faces.

Vector Conversion

High-quality vector conversion is the only way out when you need to enlarge logos or blurry images for larger print or bigger screen. Converting raster to vector keeps those fine details, so you get scalable images with razor-sharp clean lines.

Our raster to vector conversion service gives you vector files that you can scale to any size without losing fine detail or quality.

Embroidery Digitizing Service

Our embroidery digitizing service provides you flawless outputs with no thread breaks. We use top of the line machines, applications and software to digitize and process your design for sharp and symmetrical stitch work.

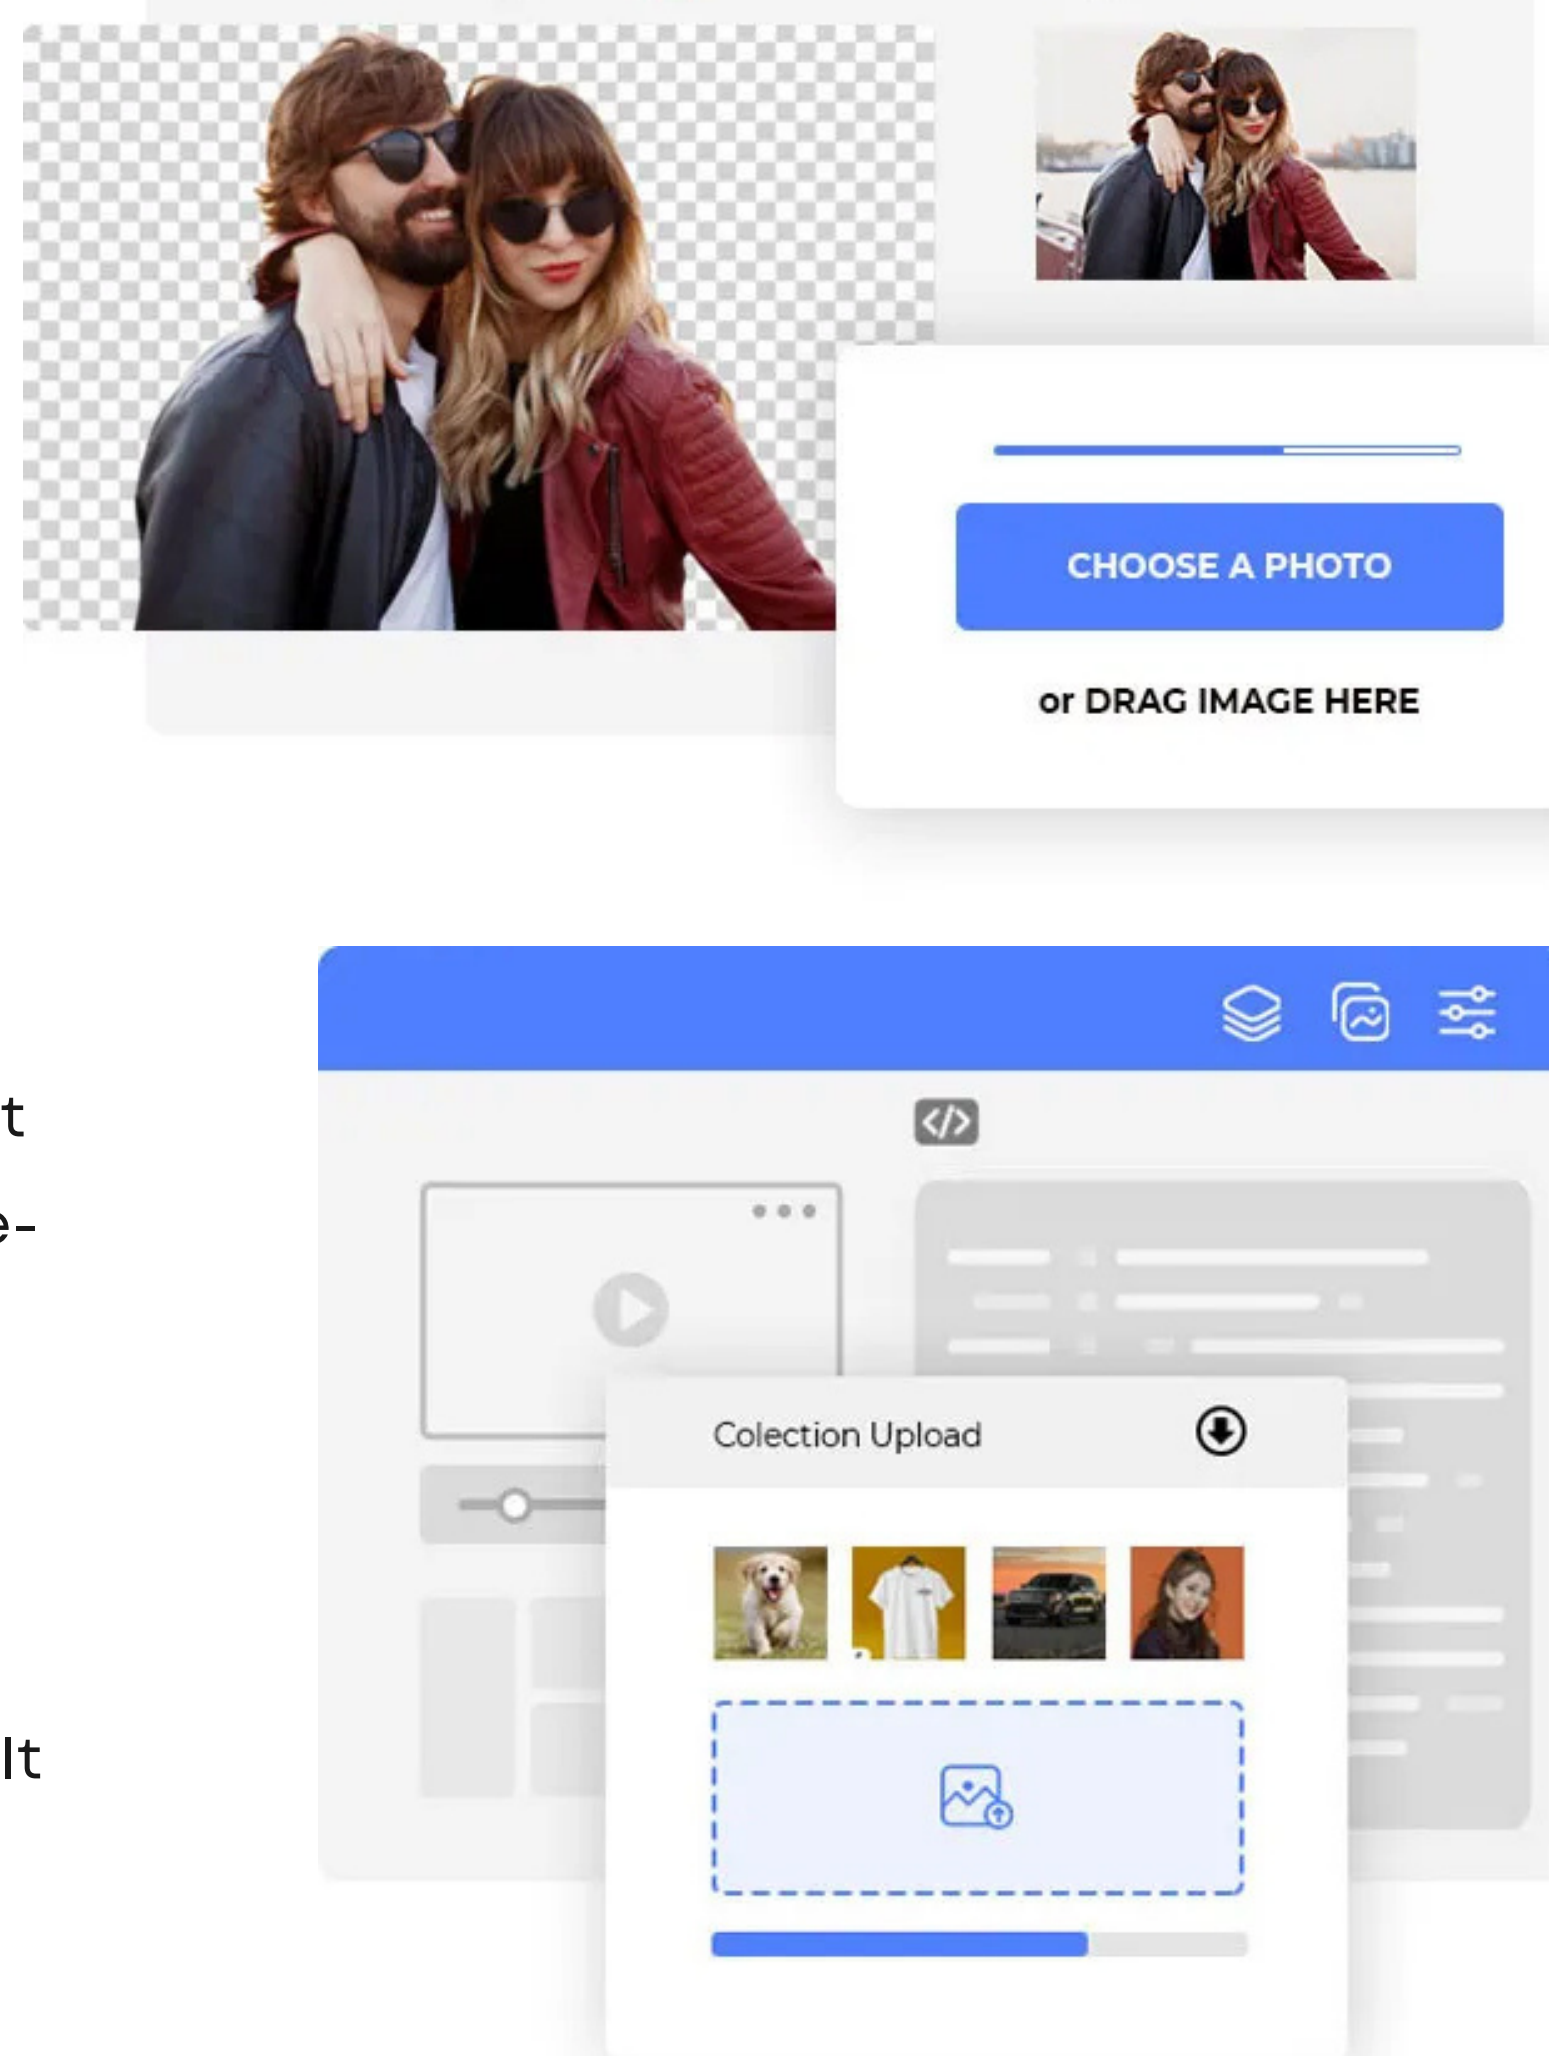

We have a highly-skilled embroidery digitizing team capable of handling even the most challenging and complex embroidery digitization jobs.

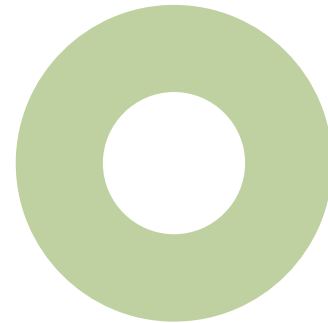

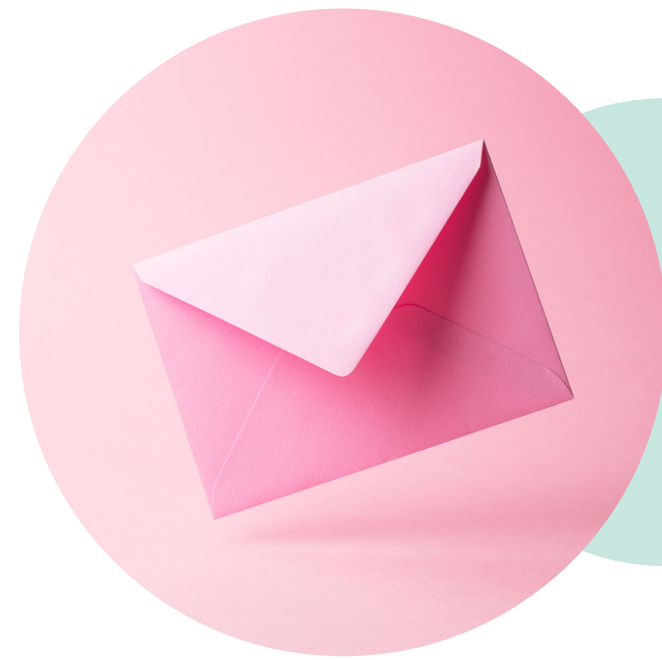

"Software" artificial intelligence Development

Studio Metrodesk artificial intelligence software development team is building Automatic Background Remove tool for the e-commerce marketplace Shopify & BigCommerce.

Our web-app Remove the background from images with artificial intelligence in seconds. Our AI is tuned to recognize products and people, automatically erasing the background. It will help e-commerce stores, marketing agencies, and other organizations automate background removal.
