

Cultive8 Technologies Ltd

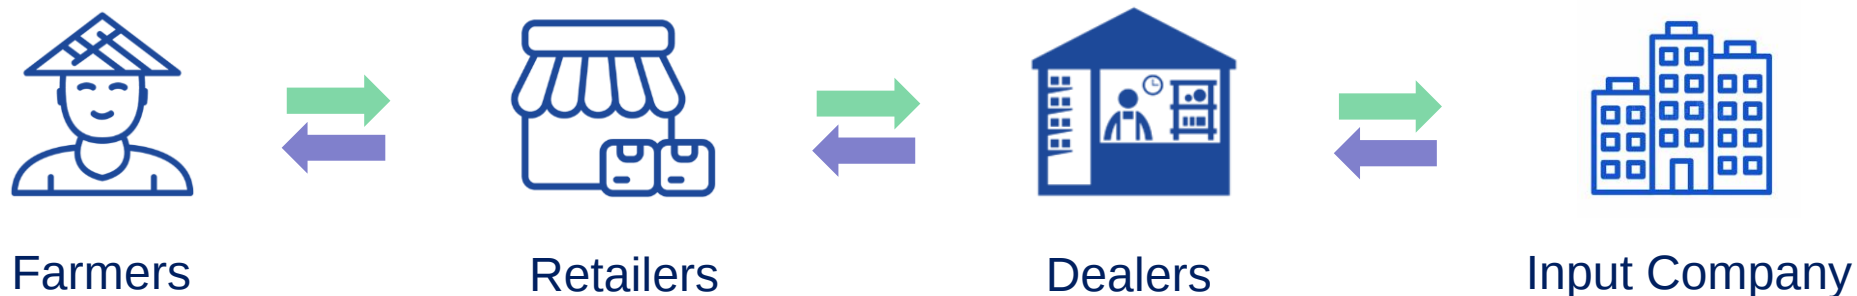

Full Circle Access to Input Market

23 May 2023 @ Dhaka

Cultive8

Cultive8 Technologies Limited aims to address the gap between traditional and modern communication and distribution processes among the stakeholders in Food Value Chain. Cultive8 offers inclusive platforms and applies tech-driven solutions for farmers, retailers, dealers, aggregators and input companies to increase profitability & efficiency.

We have hybrid digital platforms with people deployed on the ground up to Upazilas. We have solution for Payment, Traceability & ERP to provide 360° services to the community.

Cultive8 helps generate, curate & organize demand and orders from producers, distributors, processors and marketers to generate increased demand and completion of efficient fulfillment profitably.

Cultive8 | Core Services

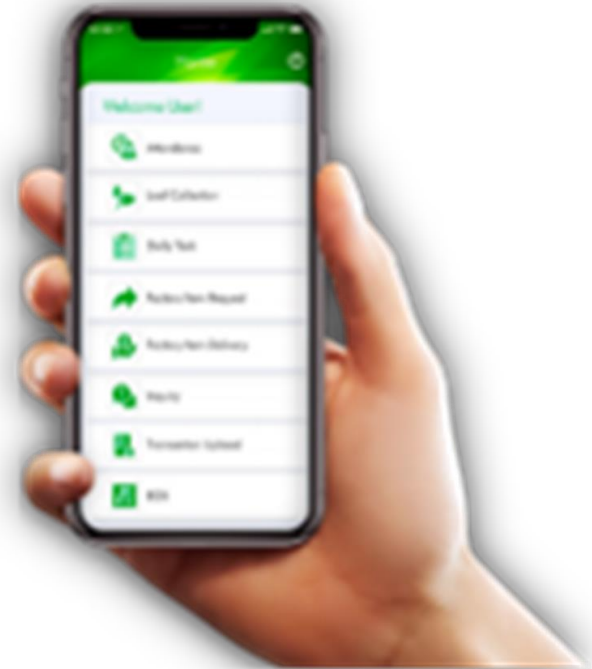

- **Station8** | The Platform for Full Circle Access to Input Market

- Supplier management module for raw material procurement
- Sales and CRM modules
- Fixed asset management & Accounting module
- Management Insights and interactive Dashboards

Gen8 | ERP for Agribusinesses

Human Resource Management module – Manage your staff attendance, performance, performance based incentives and other administrative activities such as Leave management with our simple and easy to use HR module which comes web and mobile application

Manufacturing automation and management modules – Automate your manufacturing activities using our Mobile app based highly customizable platform. Capture from factory sourcing to output while enabling batch wise traceability and cost of production at all stages. Enables clear visibility and improves efficiencies in your manufacturing process

Supplier management module for raw material procurement – Manage your registered suppliers and farmers with 360 view on their performance, payment and churn. Manage sourcing and payment with minimal administrative challenges

Sales and CRM modules – Manage your customers, orders and sales dispatch with mobile app and web based platform. Effectively monitor your sales and dispatch of your goods

Fixed asset management & Accounting module – Simple and easy to use comprehensive cloud base Accounting solution covering all your financial activities, credit management and financial reporting requirement.

Management Insights and interactive Dashboards – Track your business performance remotely with effective monitoring of critical KPI's and data driven decision making capabilities

Tea Procurement Application

Our IOT enabled procurement application is used across several private Tea factories and plantation companies for procurement automation.

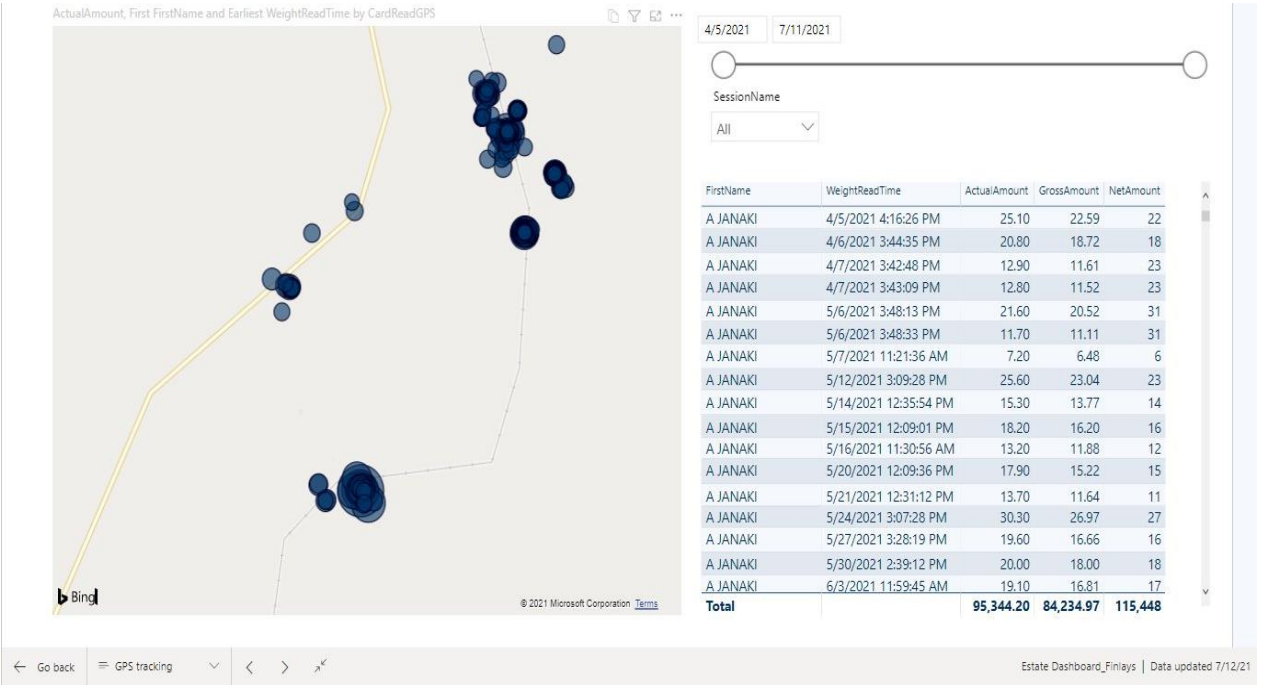

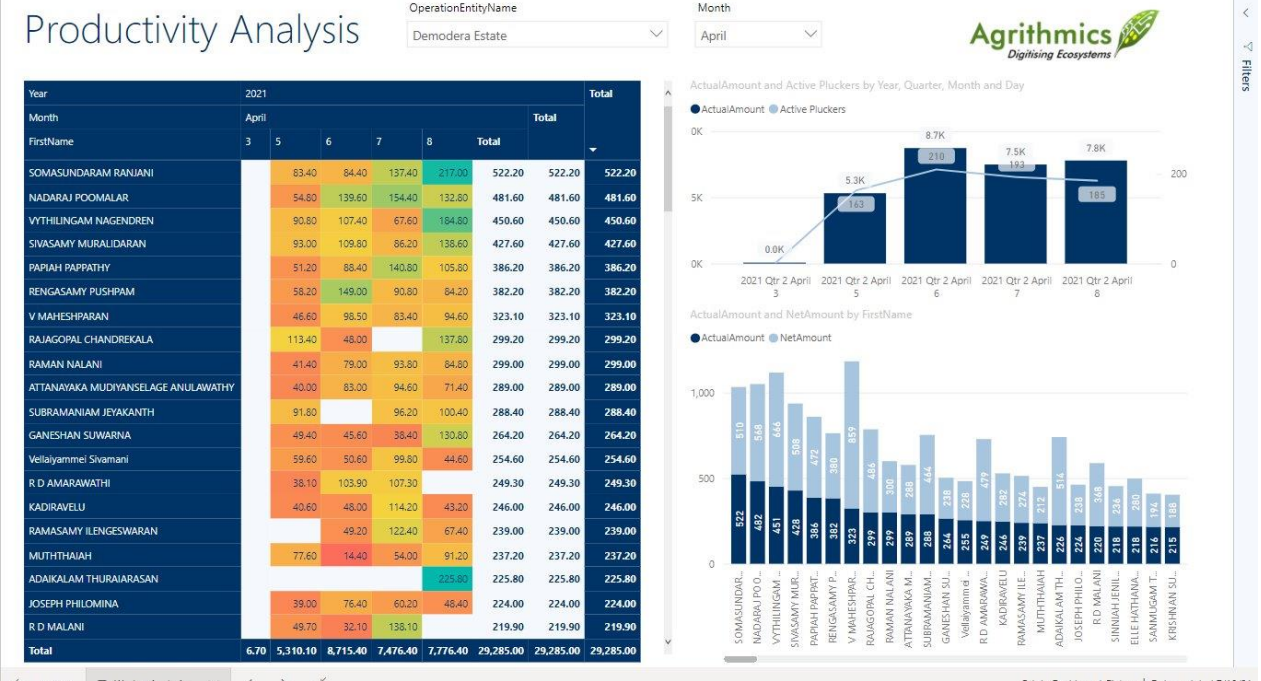

The technology has enabled factories to reduce significant cost, improve efficiencies and also create trust among the farmers

The product enables to digitally track the farmer transactions, maintain records, manage payments via mobile money and many other features that benefits the farmers and business.

Real time management dashboards and back end systems

With a combination of Mobile and web applications we gather every possible data point in field for Agri-businesses to provide clear visibility and management insights while eliminating pilferage and malpractices
