Welcome To Wolast

Wolast Technologies is a technology company that offers a wide range of services, including datacenter, cloud, and colocation services, software development, social media marketing, bulk SMS, graphics design, website development, and app development. Our company was founded with the goal of providing businesses with the technology solutions they need to succeed in today's digital world.

Mission:

Our mission at Wolast Technologies is to empower businesses with cutting-edge technology solutions that help them achieve their full potential. We strive to provide our clients with reliable, secure, and scalable technology solutions that enable them to innovate, automate, and grow their businesses.

Vision:

Our vision is to be a leading provider of technology solutions that help businesses thrive in the digital world. We aim to achieve this by consistently delivering innovative and high-quality technology solutions that meet our clients' evolving needs. We envision a future where businesses of all sizes can leverage technology to overcome their challenges and achieve their goals.

Our Story:

Wolast Technologies began as a small web development company in 2018, under the name Cemaxit. The company had a handful of employees, all of whom were passionate about technology and its potential to transform businesses. Despite facing stiff competition in the market, the team worked tirelessly to deliver high-quality web development services to their clients.

As the company grew, the team began to explore new areas of technology, and in 2020, we have launched our brand GOTMYHOST, which focused exclusively on cloud services. The new brand was an instant success, and soon, the company was providing cloud services to businesses across the country.

In 2021, the team decided to expand our offerings further and ventured into colocation services. We have started by partnering with several data centers in Bangladesh, USA, and Singapore, offering our clients secure and reliable hosting solutions. However, they soon realized that the best way to provide the highest level of service to their clients was to have their own data center. So we decided to build their own data center, which they did in Dhaka Mohammadpur. Although the data center was small, it was equipped with the latest technology, and they were able to offer our clients high levels of performance, availability, and security.

In addition to their web development, cloud, and colocation services, the team also started two other brands, XensSMS and IPPhoneBD. XensSMS provided bulk SMS services, while IPPhoneBD offered IP numbers and PBX solutions. Both brands were successful, and soon the company had a diverse portfolio of technology solutions to offer their clients.

Today, Wolast Technologies has grown into a leading provider of technology solutions for businesses of all sizes. The team continues to innovate and explore new areas of technology, all while maintaining their commitment to providing reliable, secure, and scalable solutions to their clients.

Our Services

- ✓ Datacenter Services
- ✓ Colocation Services
- ✓ Cloud Services
- ✓ Website Development
- ✓ Software Development
- ✓ Social Media Marketing

Datacenter Services:

In addition to providing secure and reliable hosting solutions, we are proud to offer our clients access to our own state-of-the-art datacenter in Dhaka Mohammadpur. Our datacenter is equipped with the latest technology and infrastructure to ensure high levels of performance, availability, and security. In addition, we have established partnerships with some of the most renowned datacenters in Bangladesh, the USA, and Singapore, allowing us to offer our clients even more options and flexibility when it comes to hosting their critical applications and data.

Cloud Services:

At Wolast Technologies, we understand that every business has unique needs when it comes to cloud services. That's why we offer a wide range of flexible and scalable solutions that can be customized to meet our clients' specific needs.

In addition, we are proud to offer our clients access to a wide range of dedicated servers and virtual private servers (VPS), available on both monthly and yearly basis. We maintain a large stock of dedicated servers, ensuring that we can deliver servers within 1-6 hours of placing an order. We offer a range of Intel and Ryzen servers, and clients can also request custom servers to meet their specific requirements. Our cloud services are designed to provide businesses with the flexibility and scalability they need to grow and succeed in today's digital world.

Colocation Services:

At Wolast Technologies, we are committed to providing businesses with the most secure and reliable environment to house their mission-critical applications and data. Our colocation services offer rack space, power, and cooling, along with a range of other features to ensure that our clients' data is always secure and available.

We are proud to offer our clients access to redundant power and network connectivity, ensuring that their applications and data are always available. We are connected with multiple Internet Exchanges (IX) in Bangladesh, providing our clients with the fastest and most reliable network connectivity. Additionally, we have 24/7 redundant power backup, so our clients can rest assured that their applications and data will always be available, even in the event of a power outage.

Software Development:

Our software development services are designed to help businesses automate their processes and increase their efficiency. We offer a range of services, including custom software development, software integration, and software testing.

We take pride in our ability to develop software solutions that are tailored to meet the specific needs of our clients. Our team of experienced software developers has already worked with several reputed companies, delivering high-quality software solutions that have helped our clients achieve their business goals. Whether our clients need a custom software solution, or want to integrate their existing software with other systems, we have the skills and expertise to help them succeed.

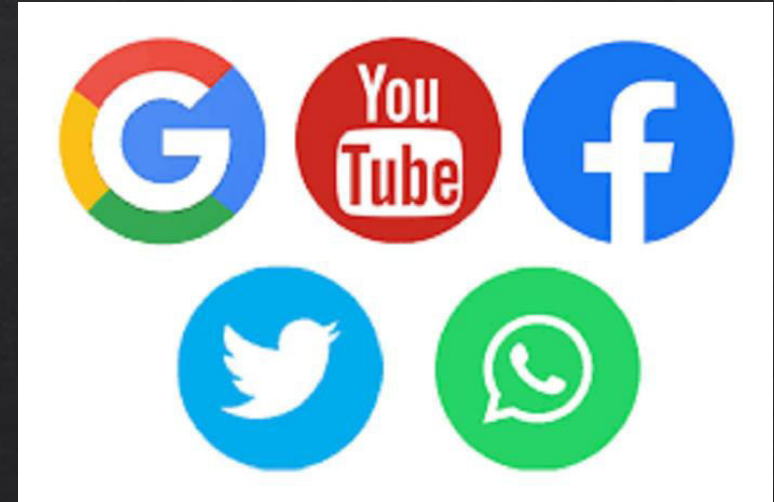

Social Media Marketing:

Our social media marketing services are designed to help businesses reach new audiences and engage with their customers in meaningful ways. We offer a range of services, including social media strategy development, content creation, and social media advertising.

Bulk SMS:

Our bulk SMS services are an effective way for businesses to communicate with their customers and drive engagement. We offer a range of services, including SMS marketing campaigns, SMS alerts, and two-way SMS messaging.

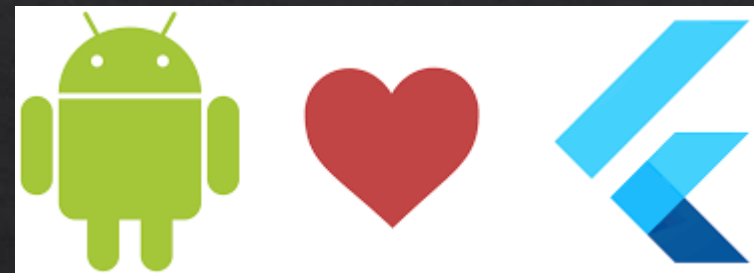

Website Development:

Our website development services are designed to create beautiful and functional websites that are optimized for performance and user experience. We offer a range of services, including website design, website development, and website maintenance.

App Development:

Our app development services help businesses create powerful and engaging mobile applications that are designed to meet the needs of today's mobile-first consumers. We offer a range of services, including iOS app development, Android app development, and hybrid app development.
