

BUG RESISTANCE

Software Testing Firm

| Who We ARE

Quality Begets Quality

Bug Resistance is an established and strong working environmental software testing firm in Bangladesh.

We provide software QA and testing services with one thing in mind – your success. From our professional testers to our experienced management – everyone strives to make your product bug-free and wildly successful. We deliver services on time and on budget. No surprises and no black holes. We are your partners – not just contractors.

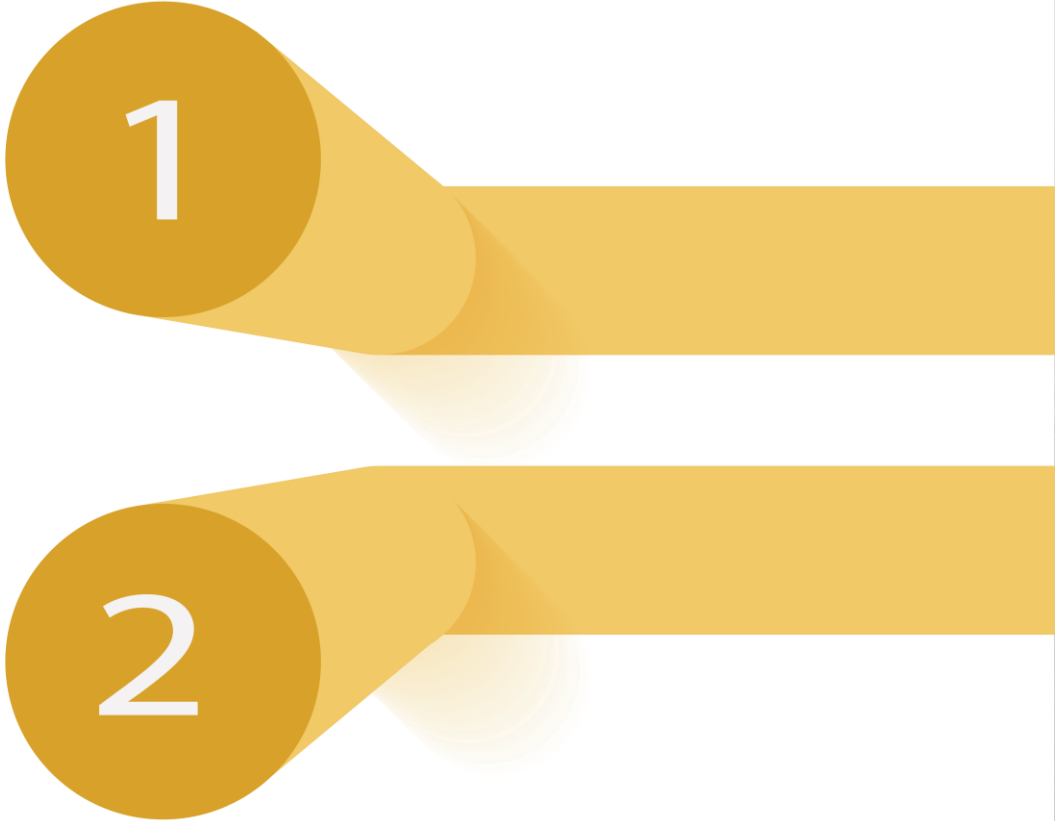

| Our Mission & Values

We believe quality and success
go hand in hand.

Our mission is to provide our customers with distinctive, lasting, and effective improvements to release to the market great products that attract, excite, and retain users and potential business partners. We are called to never stop improving both software quality and our own competence. We reimagine QA and testing to build more fulfilling and lasting quality.

We aim at improving businesses with the help of QA services that enable development, delivering products and solutions of the high quality and profit growth. We consider quality the high form of value.

Business Model

Software Testing Course Bug Resistance provides comprehensive software testing courses to individuals who are interested in developing their skills and expertise in the field of software testing. These courses are designed to cater to both beginners and experienced professionals who want to enhance their knowledge and proficiency in software testing techniques and methodologies.

Software Testing Services Bug Resistance also offers software testing corporate services to businesses and organizations that require professional testing expertise for their software applications. This service is designed to help clients ensure the quality, reliability, and functionality of their software systems.

1. OUR SERVICES: Corporate Services

We conduct more than services but opportunities for your project

Web App Testing

To ensure the full functionality of the software, we check the system for compliance with functional requirements/specifications

Mobile Testing

To verify whether a system operates according to the specified requirements, we confirm that a recent program or code change has not adversely affected existing features

GUI Testing

To prevent any user issues and negative experiences, we check the Graphical User Interface

Automation Testing

To objectively assess system operation speed, scalability, and stability, we evaluate system performance under a particular workload

Performance Testing

To ensure that solutions for various industries operate flawlessly under different conditions, we verify whether a solution works properly in different browsers, operating systems, networks, devices, etc.

Big Data Testing

QATestLab offers test automation services that help to accurately check the software, prevent human error, speed up testing, increase test coverage, and get a higher return on investment (ROI) in the long run.

2. OUR SERVICES:

SOFTWARE TESTING COURSE

Bug Resistance was created in 2022 to help as many tech enthusiasts as possible to become professional QA engineers, get their first tech jobs in IT, and become leaders in the tech industry via **Online Live Class**.

The Center currently offers training courses to help you master the following specializations: General QA and software testing, test automation of web applications, game testing, and IT sales.
