COMPANY PROFILE

2023

We code sustainable software and automate technological operations.

Just after COVID-19, with a group of 3 members, the journey of Devs Core started to help the software industry of Bangladesh. Since 2022, we have grown into a 22-member company helping businesses & industries in 5 countries. Our business understanding & technological expertise are our most valuable assets in this endeavor.

Devs Core solely focuses on custom software development. Our priority is industrial automation using software that will empower businesses to gain more. We are a maintenance-focused software company as software sustainability is a concern for us. Our AI-adopted software maintenance practices have helped our clients gain 30% more longevity in their software lifetime. We build software for the future and will keep this commitment.

Mohammad Ashraful Islam

CEO - Devs Core

A Brief Story About The Company

Devs Core

ABOUT US

Devs Core is a maintenance-focused software company that provides enterprise software and solution for managing business operations and customer relations.

In this technological era, TIME is the most valuable object. Our automation services help you to save your time from the things that can be handled efficiently without your involvement. Thus, you can spend your valuable time on the people and topics that really matter. Get A Life, and leave these struggles to technology.

Devs Core is a Maintenance Focused Software Company. We make sure that your project has high efficiency and security. With our creative designers, we give the user interface a touch of perfection. Let's bring perfection to your business.

VISION

At Devs Core, we envision a future where businesses and organizations in the industrial sector can harness the power of cloud software to unlock their full potential. We are committed to becoming the go-to provider of innovative, reliable, and user-friendly solutions that help our clients streamline processes, increase efficiency, and drive growth.

MISSION

01

Build sustainable & maintainable software for businesses.

02

Collaborate with brands to provide 360 facilities for our clients.

03

Create a well-documented industry research targeting use of software.

04

Encourage the use of Cloud Software in managing business operations across industries.

KEY FACTORS

Things that keep us energetic

01

Communication

We love to discuss business problems & provide technological solutions

02

Time Management

We never miss deadlines. Our team is trained on Agile Methodology to deliver commitments on time

03

Relations

A strong business relation is crucial for us. Because we always focus on retention & serving our current clients with better experience

04

Creativity

Our most creative part is our design team. We build design-first software which enables us to articulate requirements & outlook at the beginning phase perfectly

05

Development

We love to code sustainable software. Our team maintains architectures for easy future maintenance

06

Maintenance

We have a strong maintenance team that takes away the burden of future software issues. Our AI-adopted maintenance practices lets us monitor & solve bugs 10x faster

PROBLEMS

A Brief Story About The Problems

Most businesses face bad experiences with custom software development due to - miscommunication, commitment issues and maintenance. The root of this problem is the lack of business understanding among the software teams. And we aim to change this.

Miscommunication

Software team doesn't understand why exactly the client requires this software

Commitment

Software team commits to a timeline and solution that they are not capable of delivering

Maintenance

The coding practices are not maintainable for the long term. This becomes a burden for the businesses

SOLUTIONS

Software Team with Business Knowledge

Our Project Managers are skilled in both technology & business understanding. This bridges the communication between businesses and us smoothly.

Remote Software Team

Having a remote software team enables us to onboard disciplined talents from developed countries. This creates a sense of discipline & responsibility among the team which encourages them to keep commitments.

Sustainable Software

We have adopted AI-driven practices to document our development architectures & after-deployment services. This makes us 10x faster in monitoring & fixing technological issues.

OUR SERVICES

Website

Development

1. Custom Websites
2. WordPress Based Websites
3. WebFlow Based Websites
4. Magento Based Websites

Mobile Application

Development

1. Native Android Application
2. Native iOS Application
