IT consulting

Key directions of software consulting

Since entering the software development market in 1998, ITransition has been guiding businesses toward more effective operations, services, and products with tailored software solutions. As a software consulting company, ITransition sees its mission in helping companies across industries create optimal digital environments aligned with their technical capacity, business requirements, employees' needs, and customers' expectations.

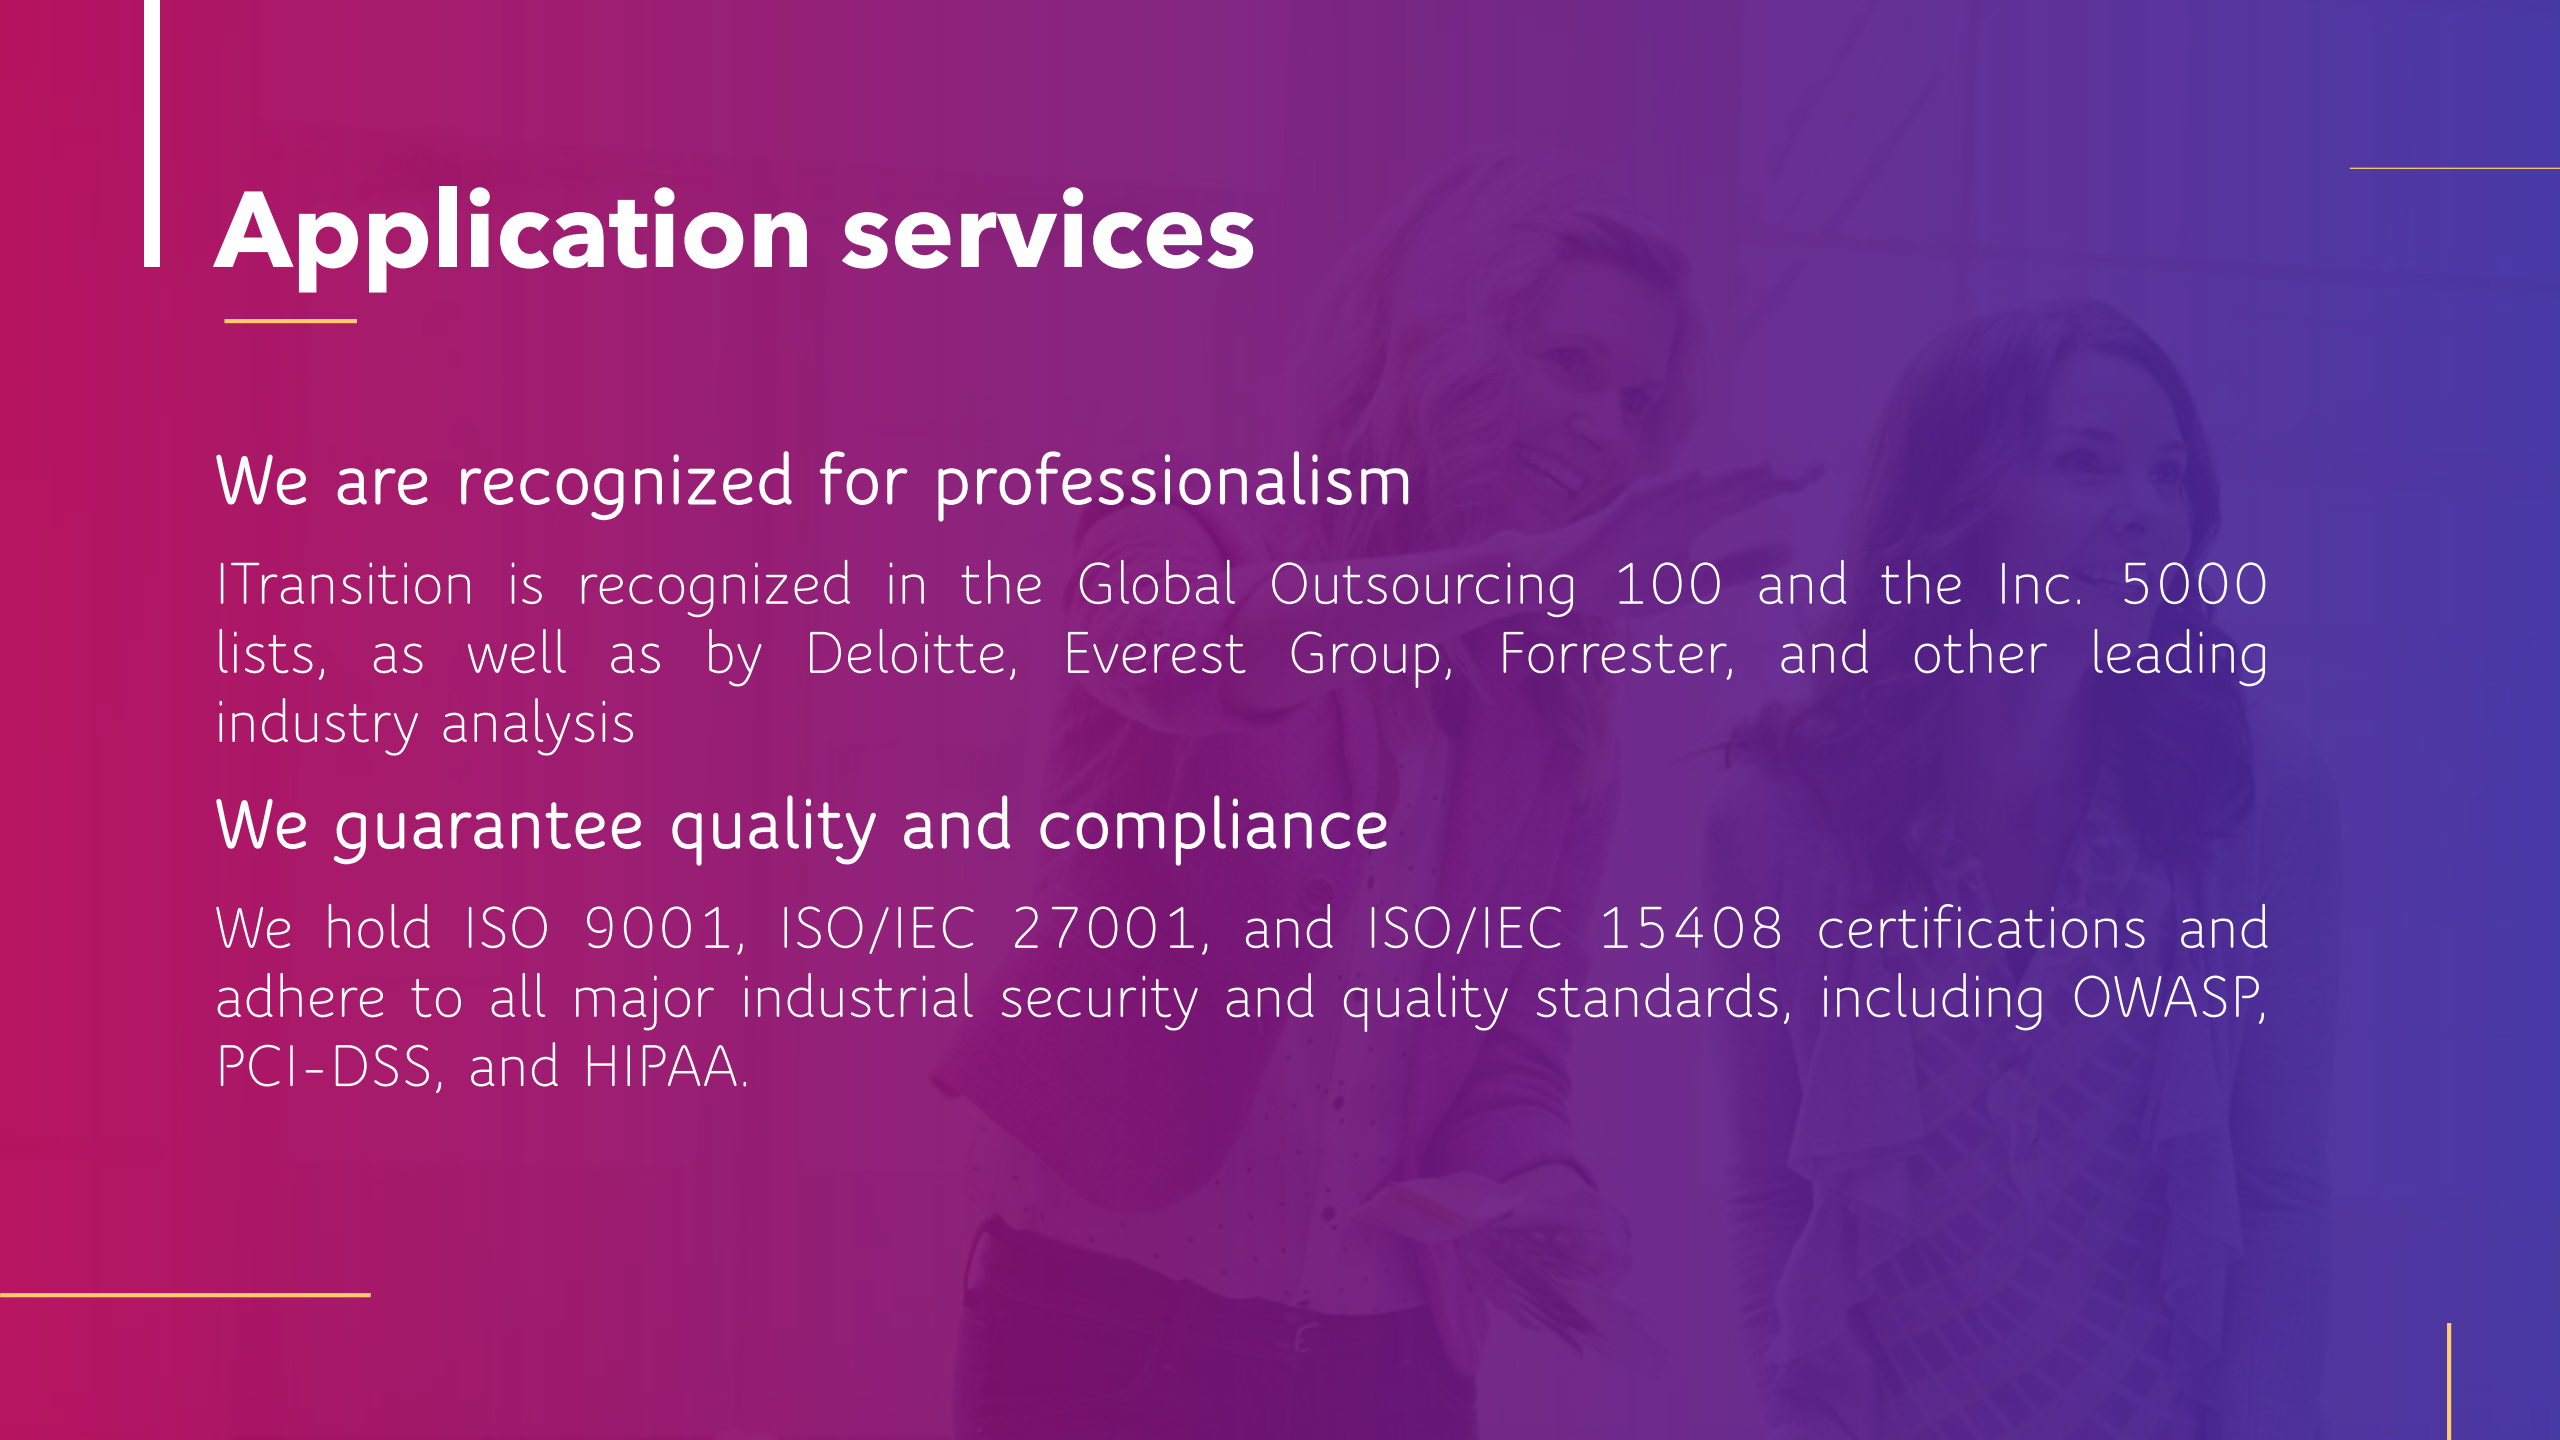

Software engineering

Our software development services

Combining tech expertise and industry-specific knowledge accumulated for over 25 years in the IT industry, ITransition develops custom software for medium-sized businesses and enterprises. Our offering includes full-cycle software development services, meeting our customers' diverse business needs and technological objectives.

Application services

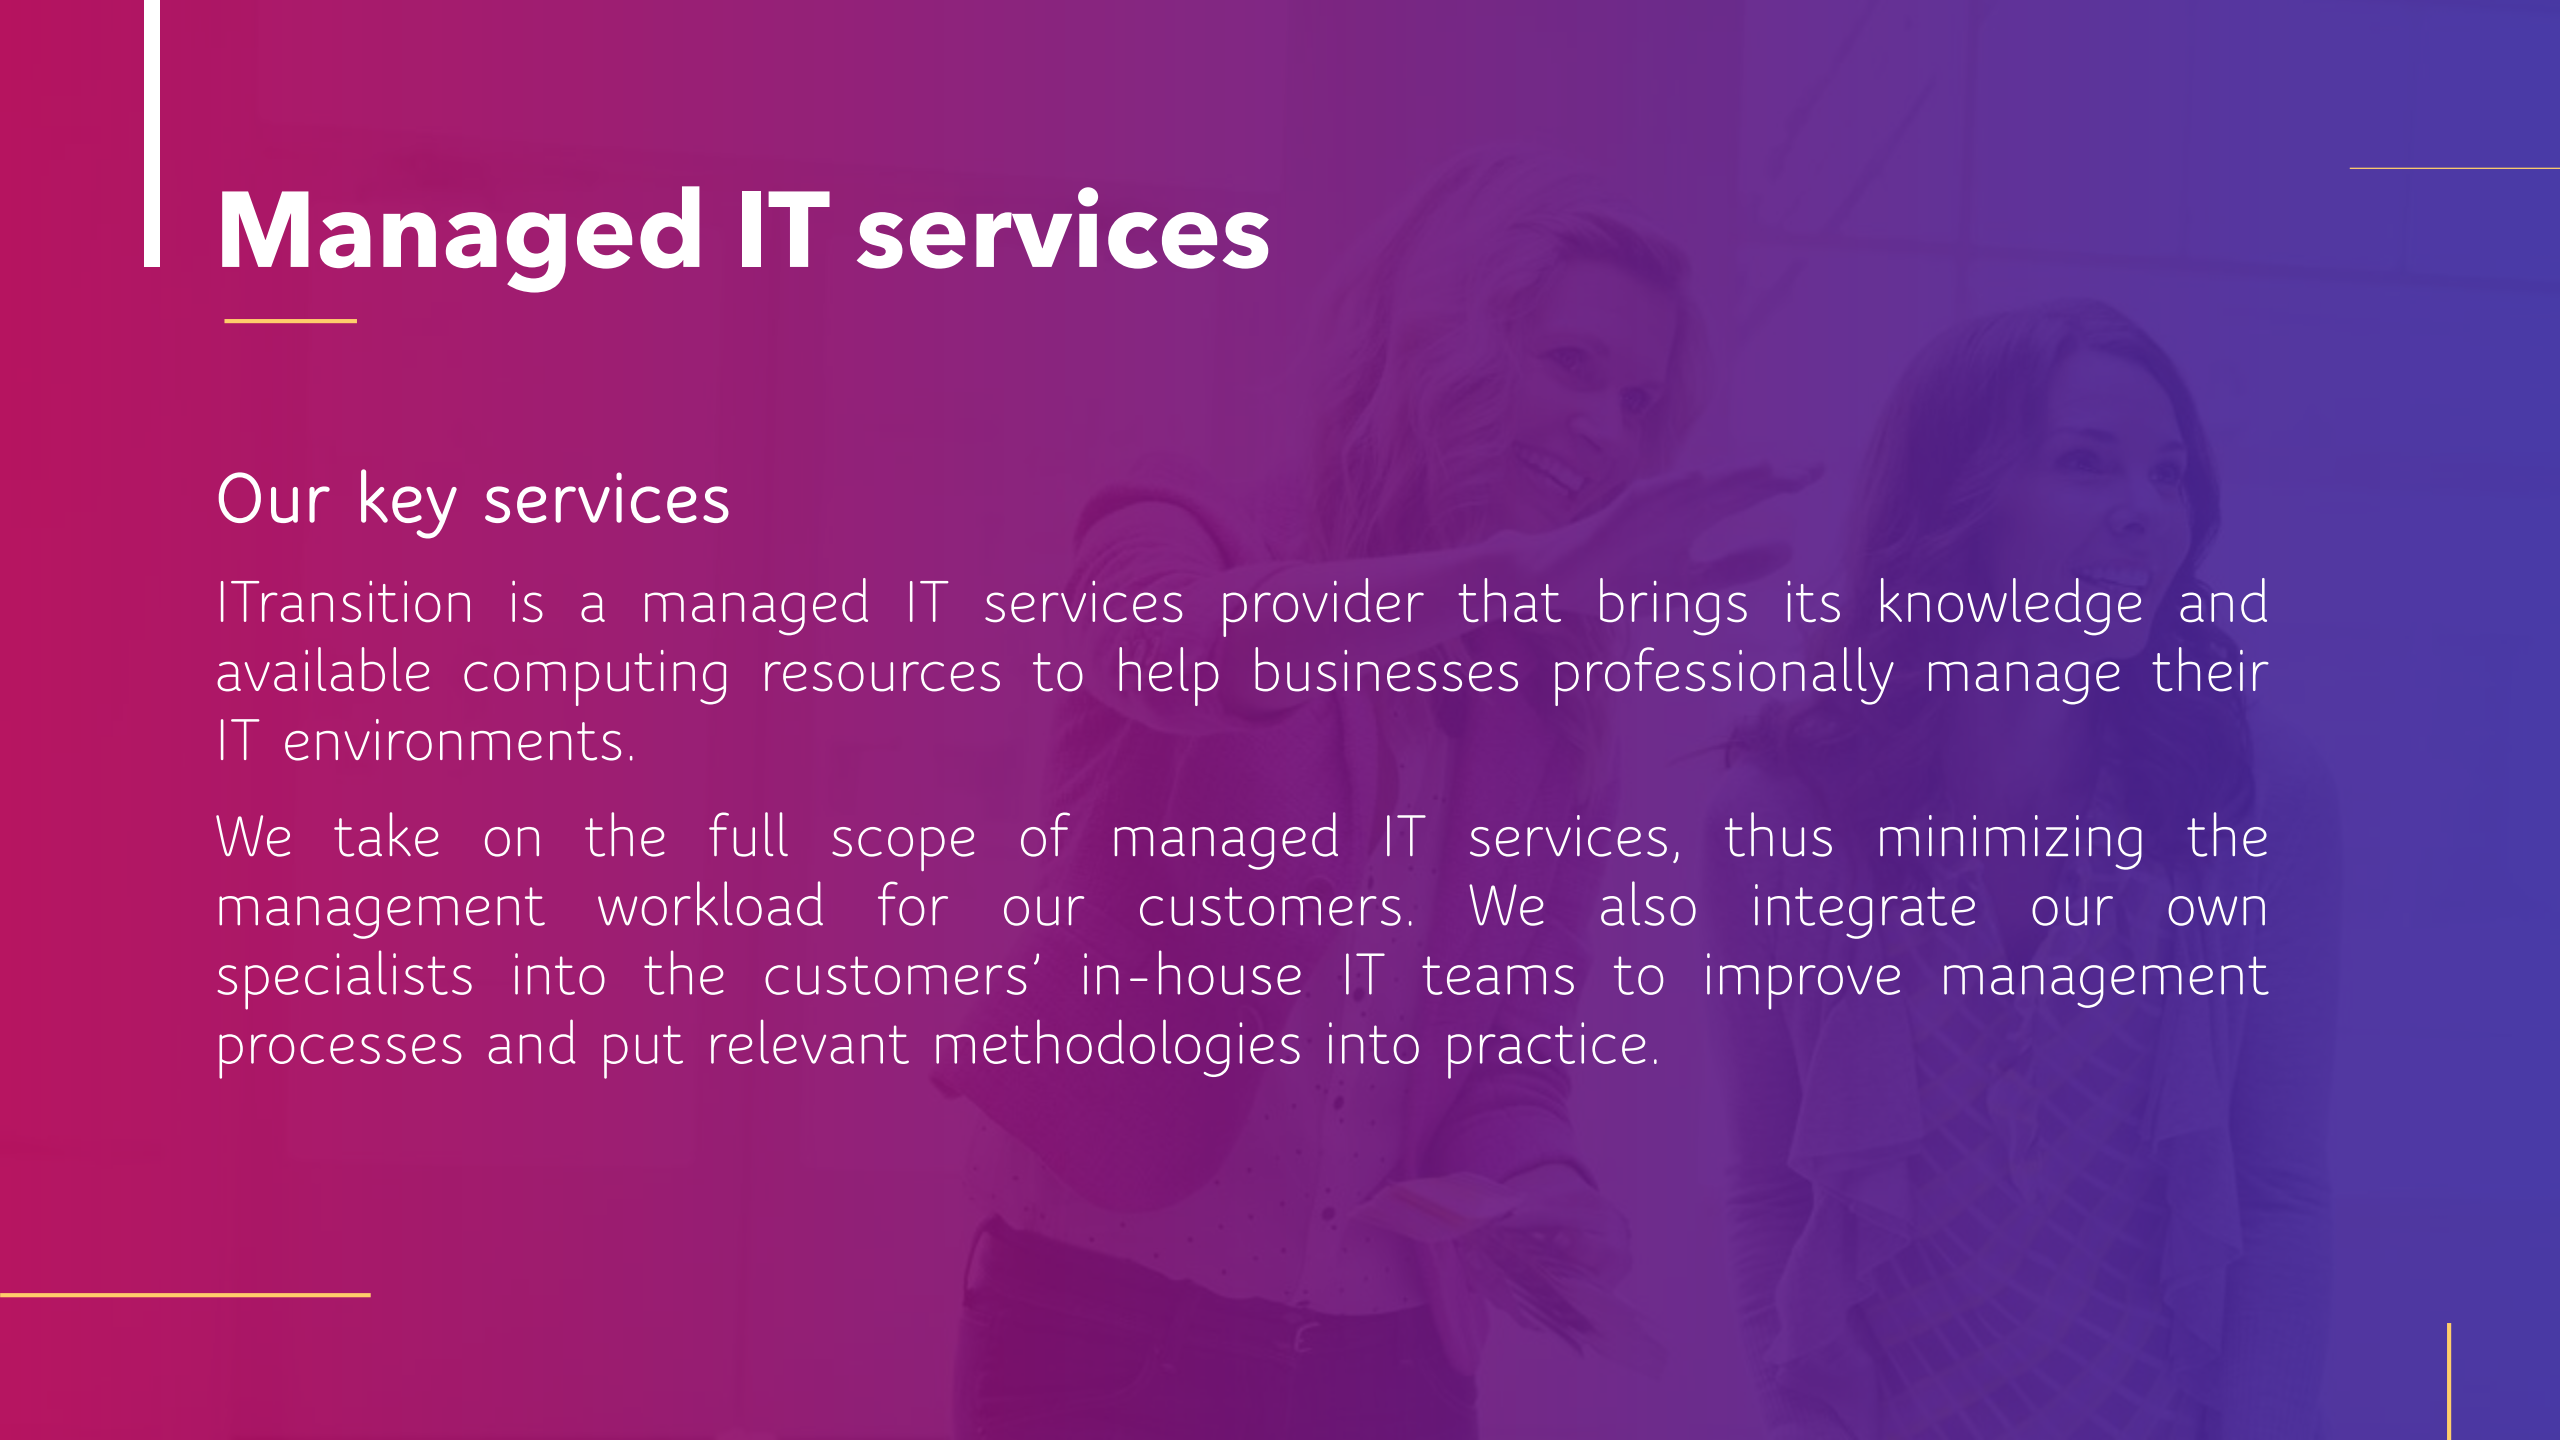

We are recognized for professionalism

ITransition is recognized in the Global Outsourcing 100 and the Inc. 5000 lists, as well as by Deloitte, Everest Group, Forrester, and other leading industry analysis

We guarantee quality and compliance

We hold ISO 9001, ISO/IEC 27001, and ISO/IEC 15408 certifications and adhere to all major industrial security and quality standards, including OWASP, PCI-DSS, and HIPAA.

Managed IT services

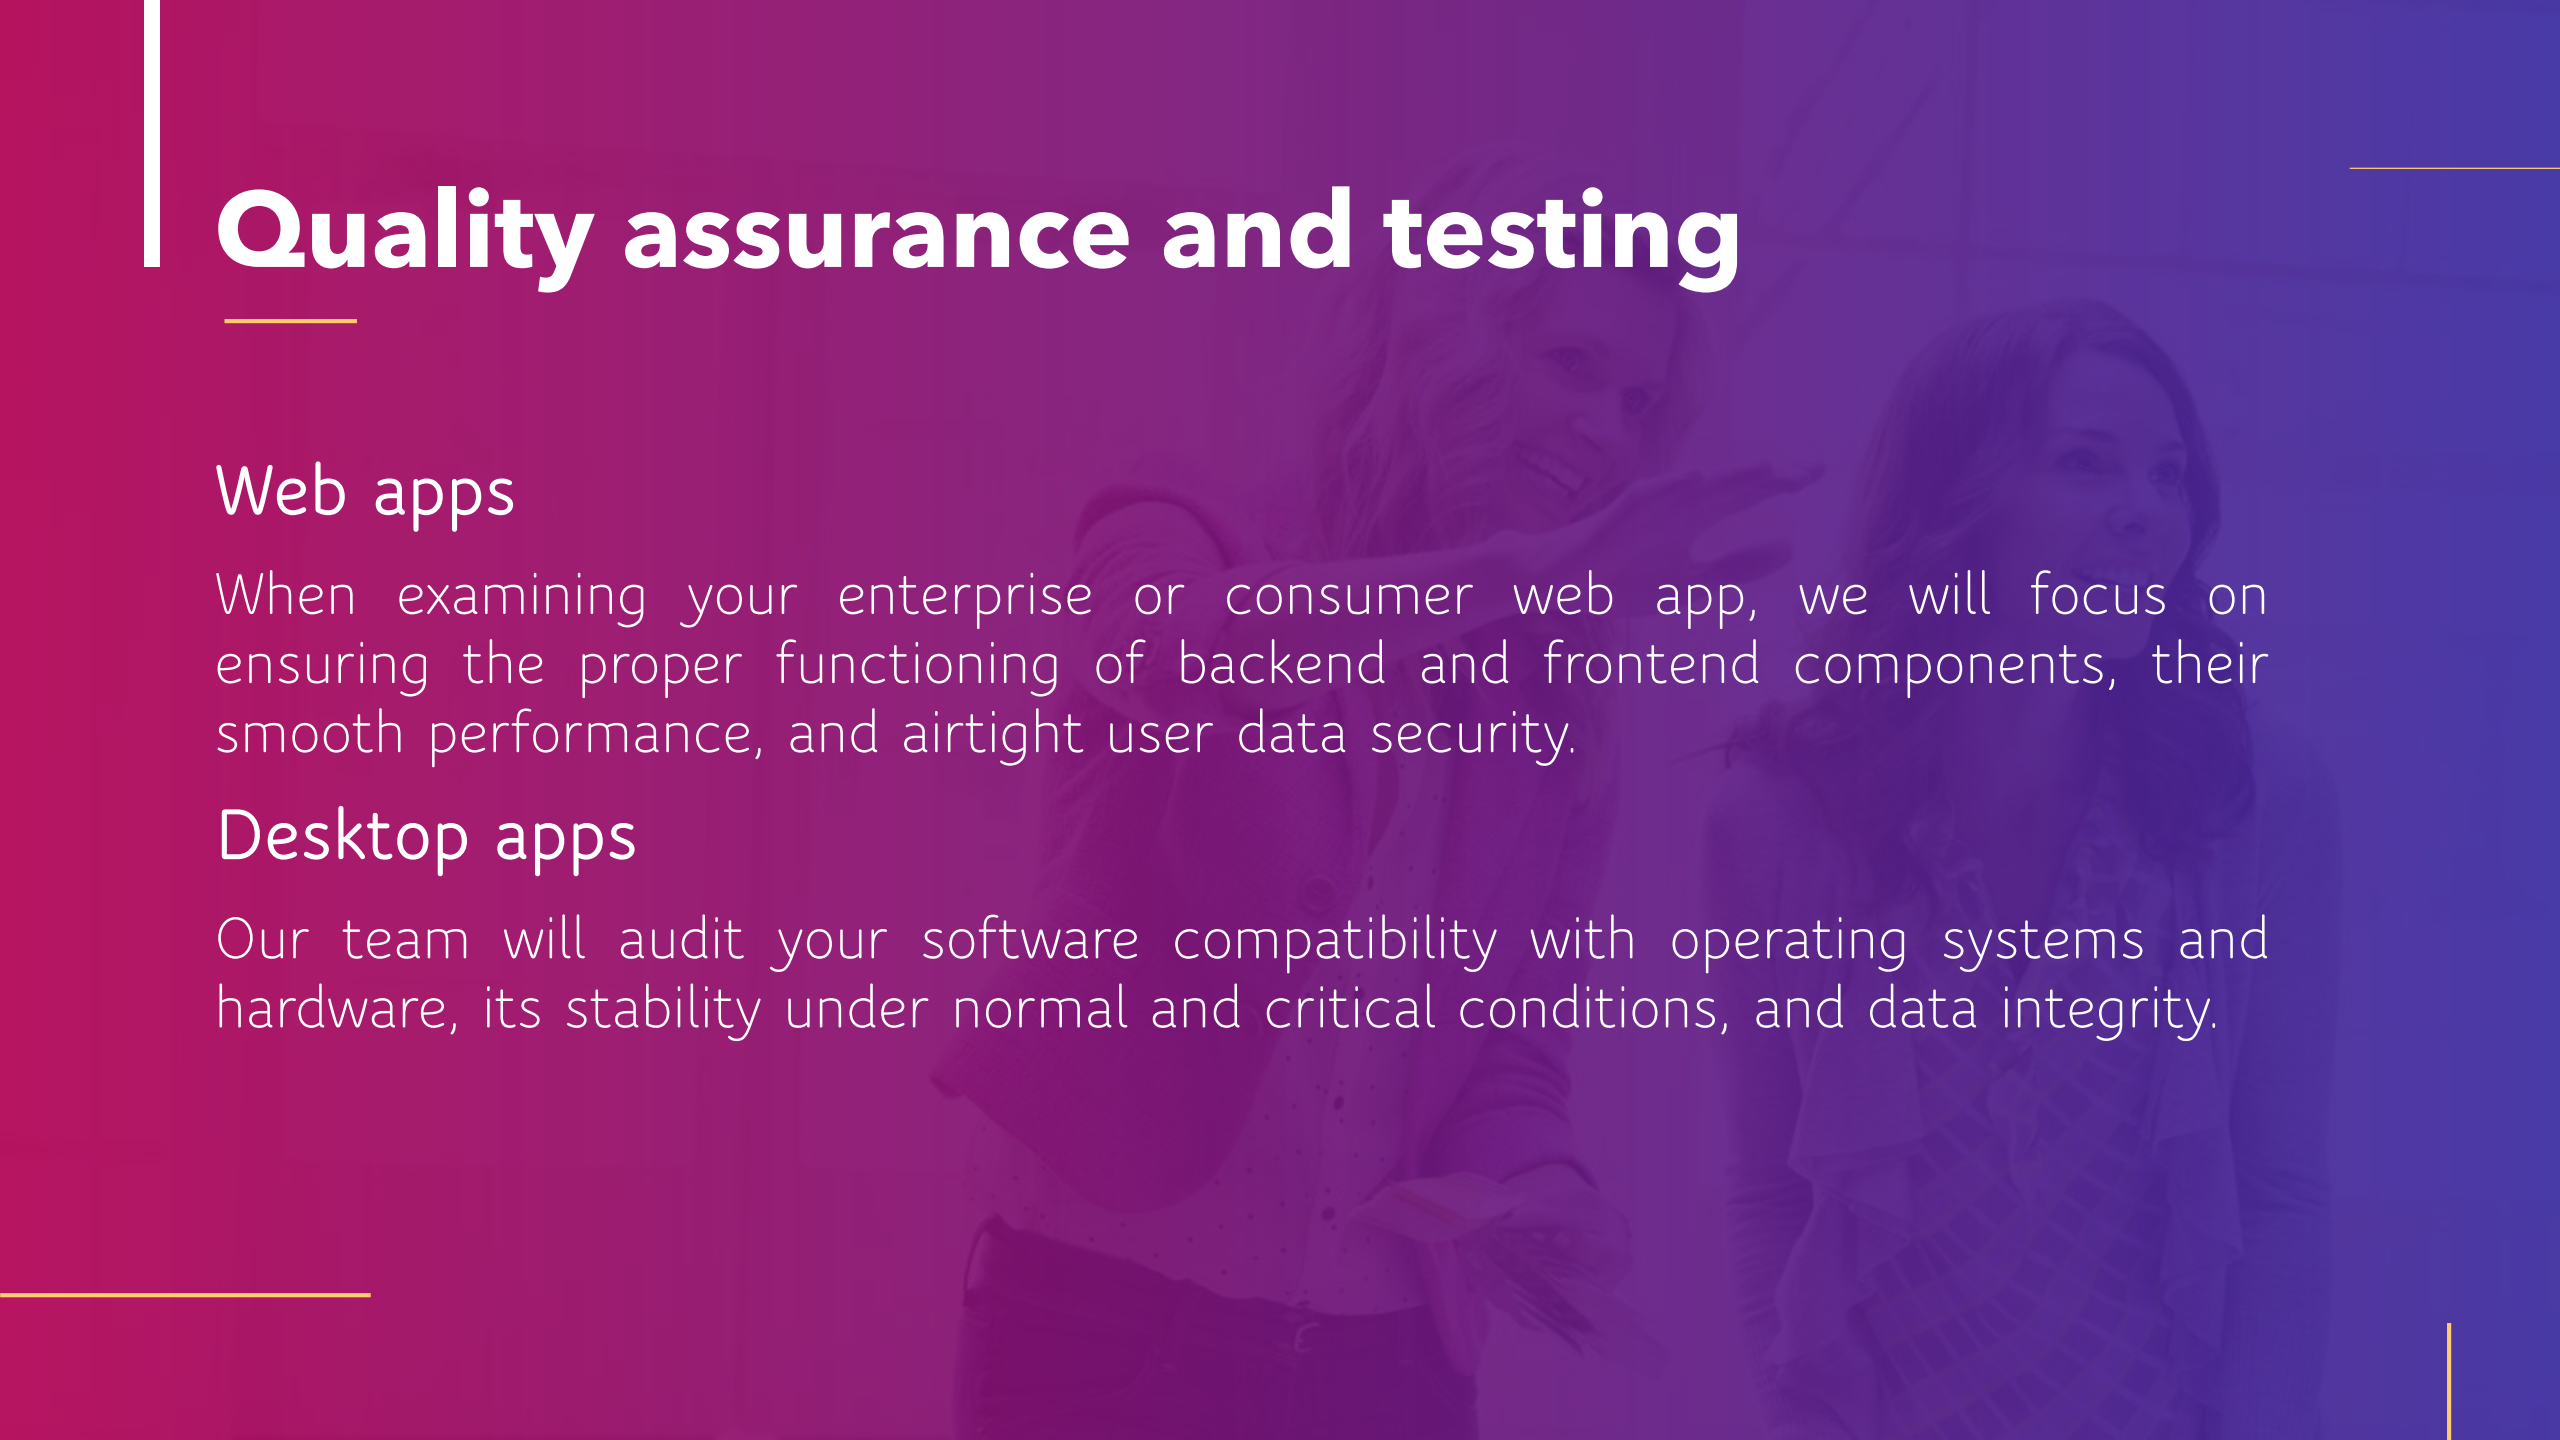

Our key services

ITransition is a managed IT services provider that brings its knowledge and available computing resources to help businesses professionally manage their IT environments.

We take on the full scope of managed IT services, thus minimizing the management workload for our customers. We also integrate our own specialists into the customers' in-house IT teams to improve management processes and put relevant methodologies into practice.

Quality assurance and testing

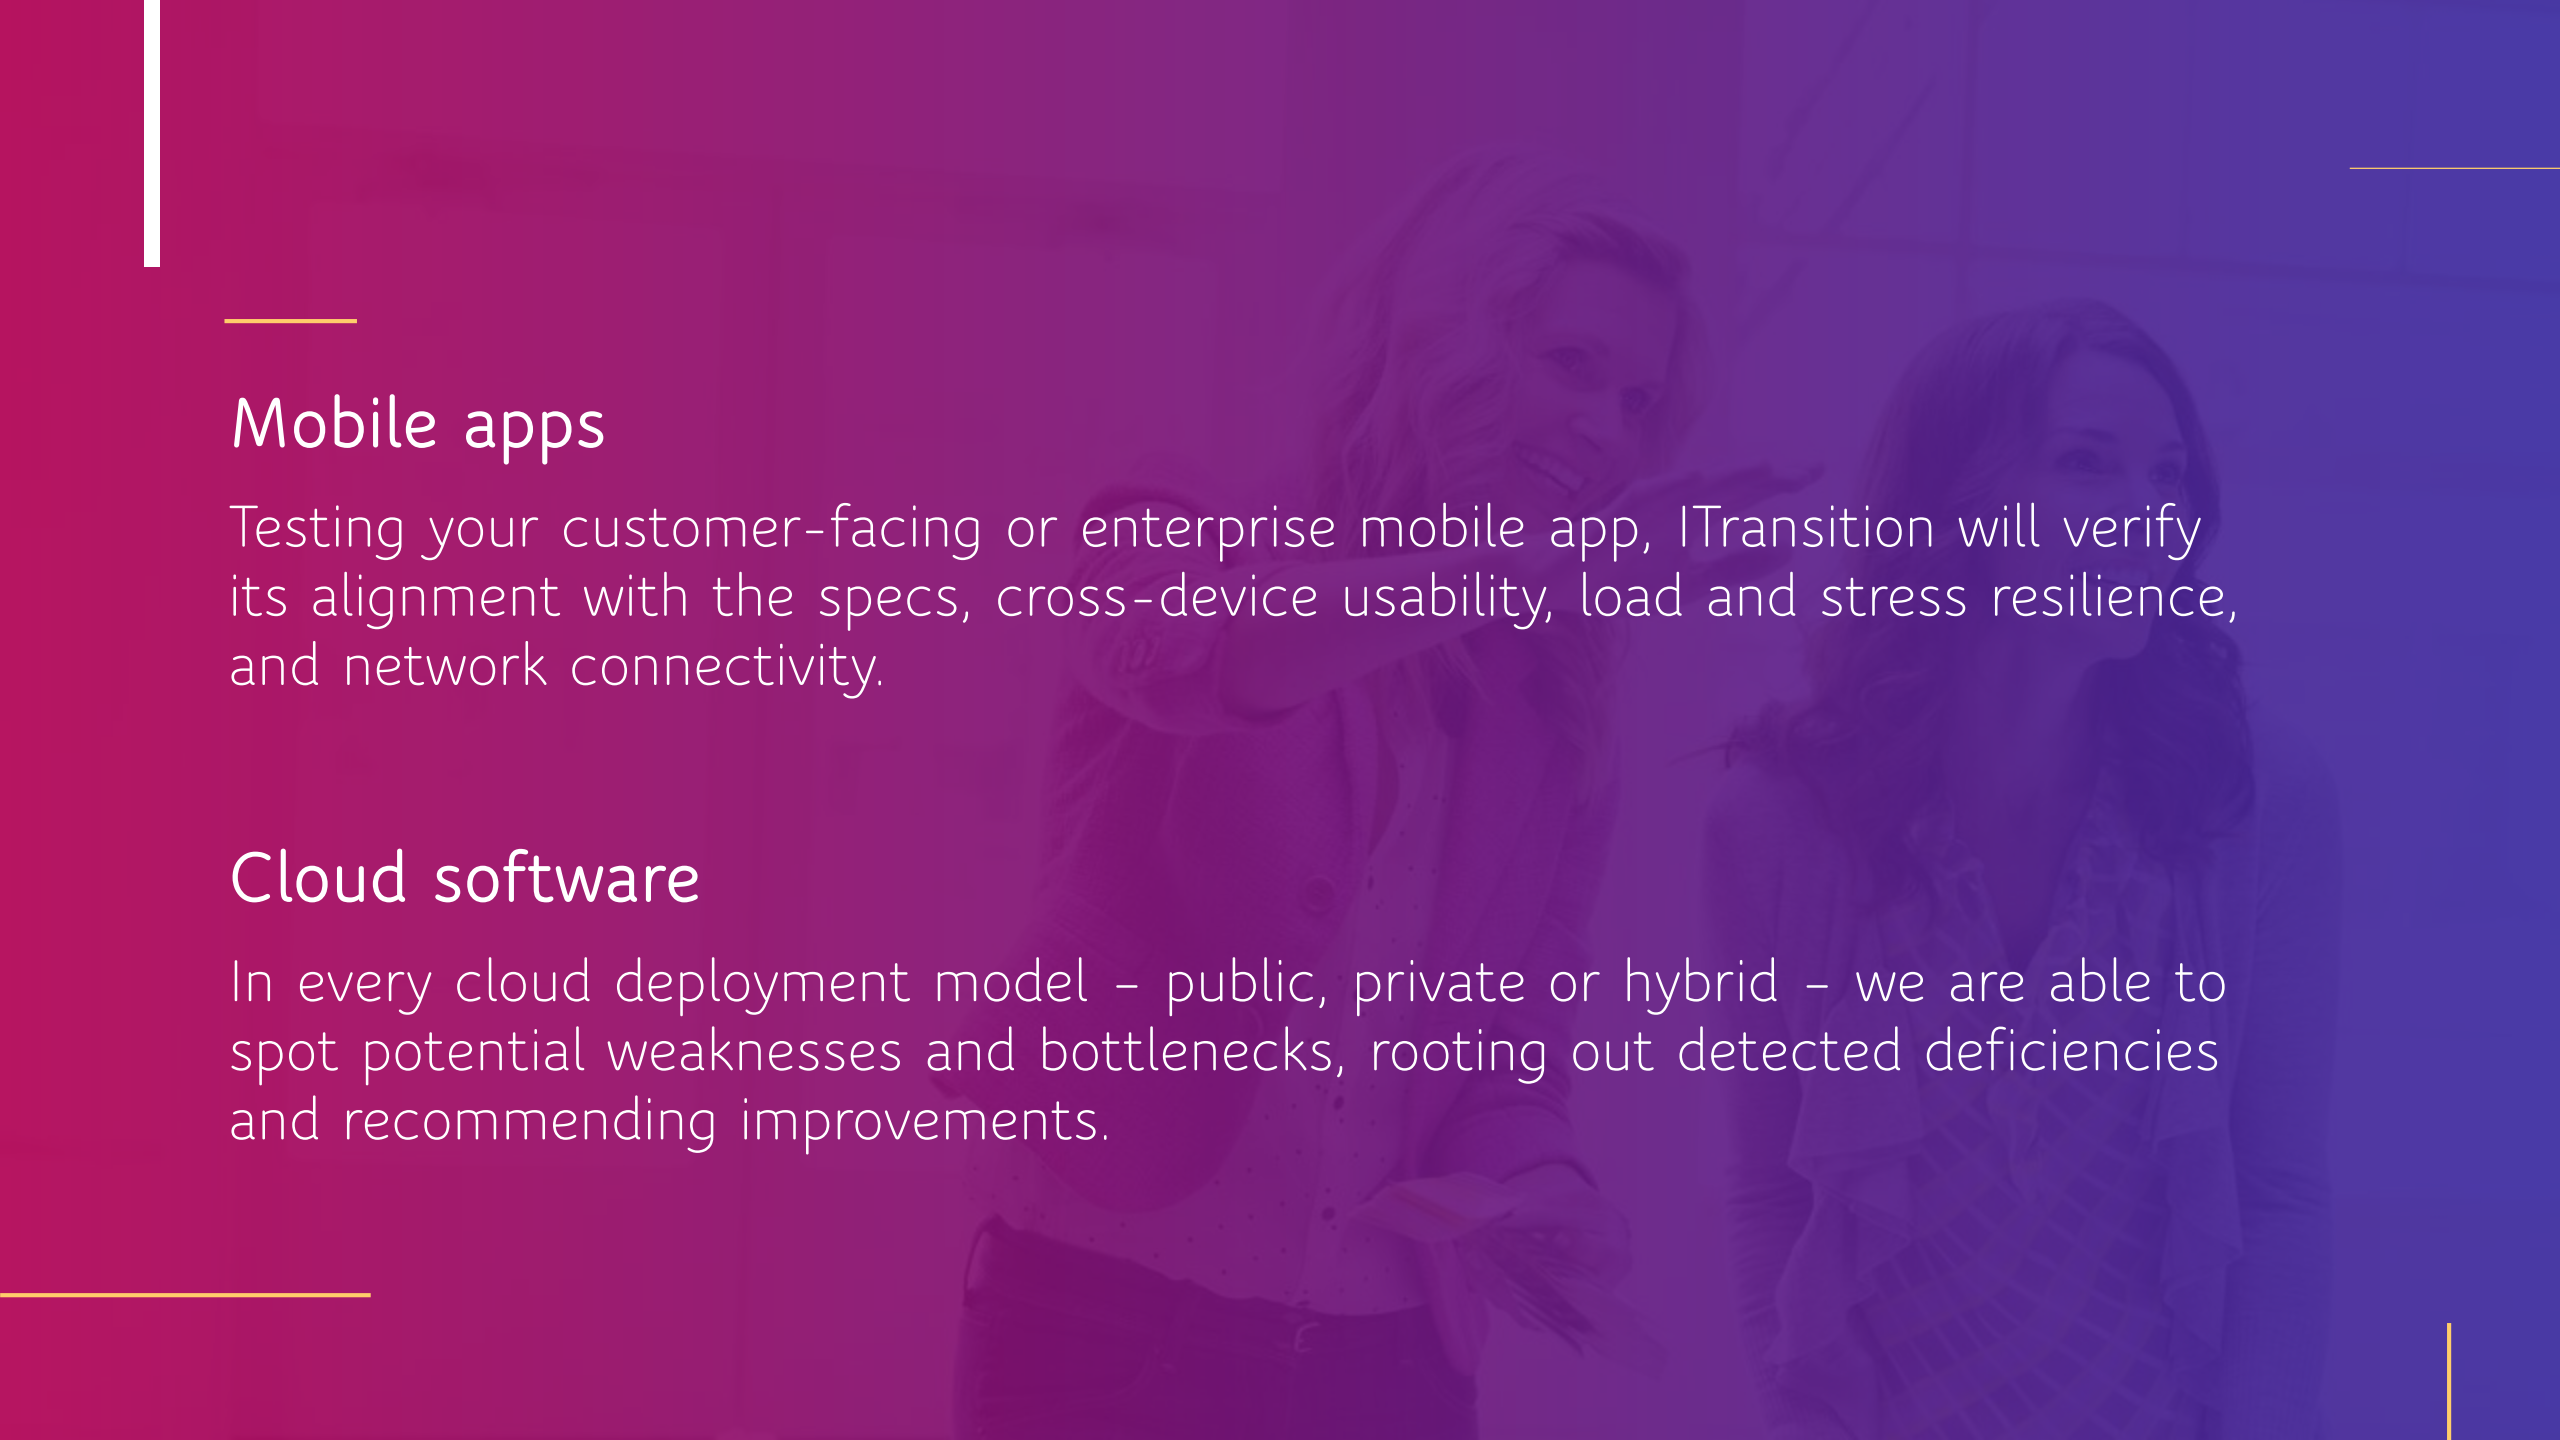

Web apps

When examining your enterprise or consumer web app, we will focus on ensuring the proper functioning of backend and frontend components, their smooth performance, and airtight user data security.

Desktop apps

Our team will audit your software compatibility with operating systems and hardware, its stability under normal and critical conditions, and data integrity.

Mobile apps

Testing your customer-facing or enterprise mobile app, ITransition will verify its alignment with the specs, cross-device usability, load and stress resilience, and network connectivity.

Cloud software

In every cloud deployment model – public, private or hybrid – we are able to spot potential weaknesses and bottlenecks, rooting out detected deficiencies and recommending improvements.

Quality Assurance (QA) services

Functional and UI testing

DevOps

The background of the slide features a photograph of two women in an office environment. The woman on the left, with blonde hair, is pointing her right hand towards the right side of the frame. The woman on the right, with dark hair, is looking in the same direction. They appear to be engaged in a collaborative work activity. The image is overlaid with a semi-transparent purple gradient.

We align Devs with Ops

ITransition provides DevOps services to automate end-to-end software delivery and ensure the scalability and security of infrastructures in companies of all sizes.

By consolidating development and operations, we help businesses establish transparent and quick software delivery cycles, along with improving the quality of implemented solutions and setting up collaboration-driven, cross-functional teams.

Software maintenance and support

At a glance

We assist enterprises with maintaining their IT infrastructures fully operable, flexible, and secure, helping them to continuously optimize total cost of ownership. As practicing engineers, we provide IT support services for software of all types and scale, including corporate systems and customer-facing applications. Our maintenance activities cover every level, from meticulous pre-support audit and 24/7 software upkeep to transformative redesign.

Multi-tier software support services

To address your software issues more efficiently, Itransition offers three distinct packages differentiated by their coverage and spanning L1, L2 and L3 tiers of technical support.

Smart teams

Our dedicated development team models

ITransition builds dedicated development teams for businesses that need to create a product with minimal overhead, to scale rapidly, or to augment their team with highly qualified professionals. We provide our partners with access to our technological, business and infrastructure resources, adjust our development processes to the requirements and methodologies in place, and assume complete responsibility over every aspect of the development process.

Our Partners

Microsoft Partner

Gold Application Integration
Gold Data Platform
Gold Application Development
Gold Collaboration and Content

Microsoft Solutions Partner

ITransition currently holds the Microsoft Solutions Partner status in Data & AI and Digital & App Innovation designations. A partner of Microsoft since 2008, we've applied Microsoft technologies across multiple projects and evolved our expertise and partnership statuses. ITransition's Solutions Partner designations showcase our proven skills and ability to deliver customer success in data management and AI-powered analytics as well as application development and management in different environments.

Atlassian Gold Solution Partner

ITransition successfully completed the Atlassian certification and accreditation process and achieved the Atlassian Gold Partner status to confirm we are highly trained and committed to deliver value to our customers. As a Gold Solution Partner, we are continuously investing into expanding our expertise to provide advanced Atlassian product knowledge, product configuration and customization, implementations and support services for the entire Atlassian stack.

Gold Solution Partner

FOSSA

Odoo Silver Partner

In 2020, ITransition proudly became an Odoo Ready Partner, which was a logical next step in developing our ERP Center of Excellence. Within the framework of the Center's activity, we have been continuously investing in generating relevant expertise and sharing accumulated knowledge on Odoo and other ERP platforms company-wide.

FOSSA Partner

ITransition became a partner with FOSSA, a provider of tools for end-to-end and real-time governance of third-party open-source code. FOSSA is truly developer-native and fully integrated with CI/CD pipelines thus providing complete visibility early in the SDLC and enabling us to deliver customer value faster.

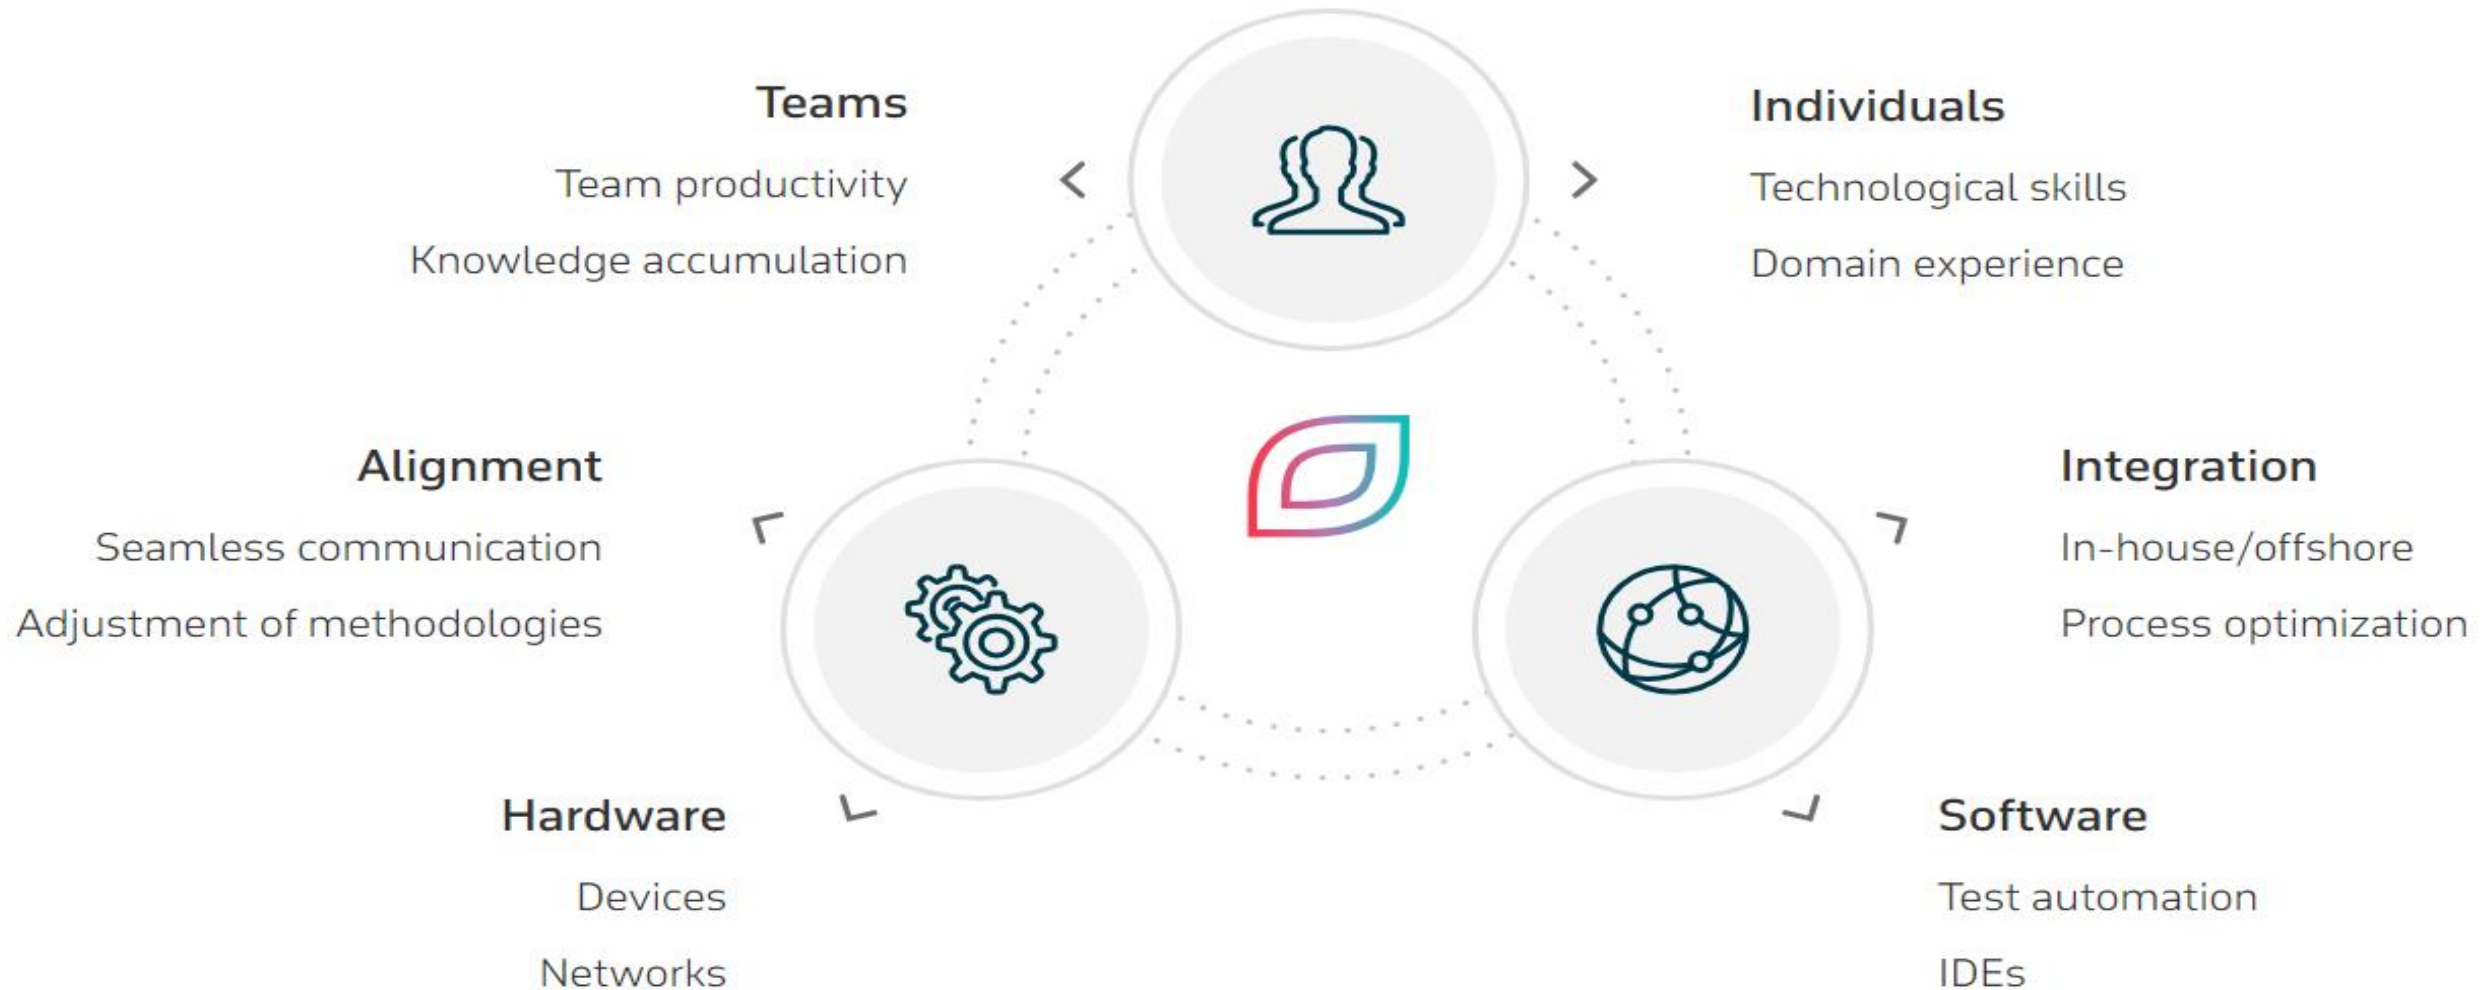

APN Advanced Consulting Partner

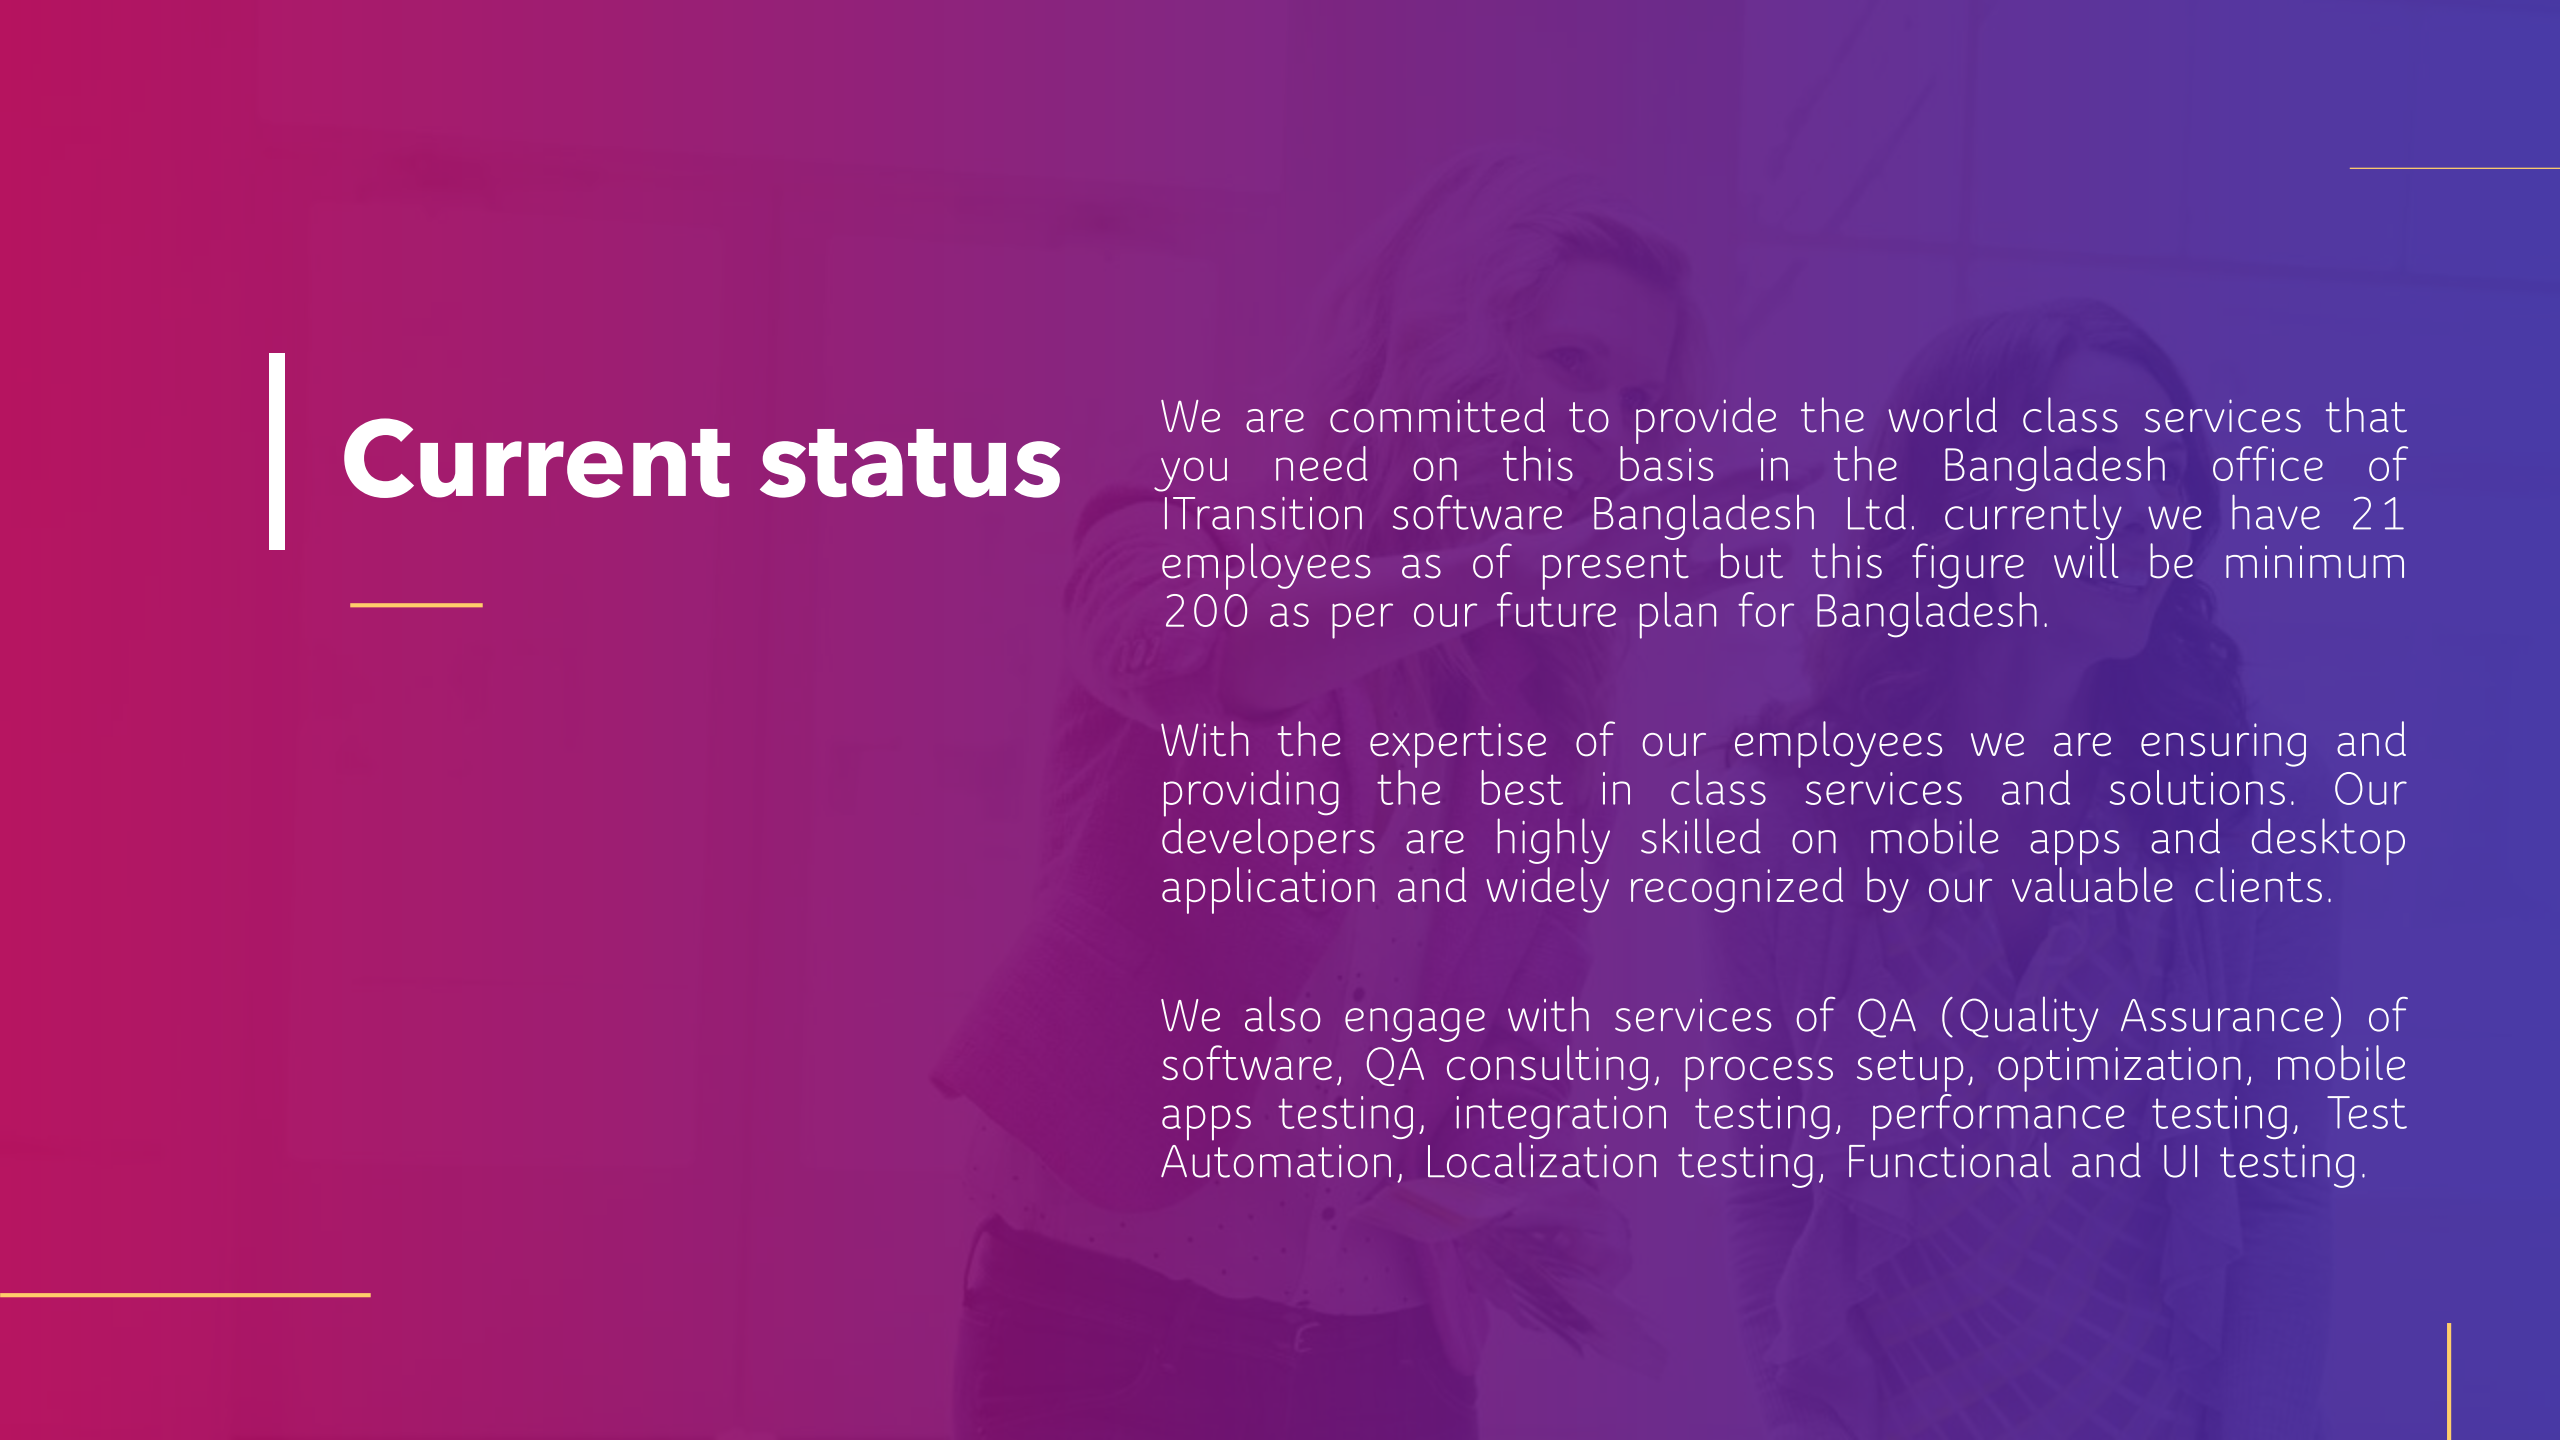

Delivering AWS-based solutions since 2008, ITransition is officially recognized by AWS as a vendor of Amazon services focused on strategic/IT consulting, cloud migration, and application development for various industries.

Salesforce Partner

ITransition holds the status of Salesforce Partner which confirms the company's experience in Salesforce implementation and custom workflows development, as well as Salesforce integration with other business software.
