

Company Overview

At Daisen Technology, we are a team of seasoned professionals with a collective experience of over a decade in the technology business. Our passion for innovation and our expertise in software development, system development, and IoT services drive us to create cutting-edge solutions for our clients.

With the rapid advancement of technology, businesses today face ever-evolving challenges that require adaptable and forward-thinking solutions. That's where we come in. We understand the complex and dynamic nature of the technology landscape, and we strive to stay ahead of the curve, embracing emerging trends and technologies to deliver the best outcomes for our clients.

Our team consists of highly skilled software engineers, system architects, and IoT specialists who are dedicated to providing customized and reliable solutions tailored to your unique business needs. We believe that technology should empower businesses to achieve their goals efficiently and effectively, and we work closely with our clients to understand their objectives and deliver innovative solutions that exceed their expectations.

Whether you are looking to develop robust software applications, build scalable systems, or harness the potential of IoT to optimize your operations, Daisen Technology has the knowledge, experience, and passion to turn your ideas into reality. We pride ourselves on our attention to detail, commitment to quality, and ability to deliver projects on time and within budget.

Vision

Our vision is to deliver cutting-edge software & IoT based solutions and offshore outsourcing services that address the evolving needs of businesses in a rapidly changing digital landscape.

Mission

Our mission is to build long term relationships with our client's, to provide exceptional services that exceed expectations, by pursuing business through innovation, advanced technology and adding value.

Core Values

Daisen Technologies Ltd. believes in sustainable growth through innovation, creativity and competence. We also believe in treating our customers with respect. We value honesty, integrity and ethical business practices.

Services Portfolio

IOT Services

We provide solutions for embedded system, firmware and hardware design, Cad design and prototyping analysis to small volume production. We design customized hardware with low energy and reliable connectivity for (process) automation.

- Healthcare IoT
- Industrial IoT
- Consumer IoT
- Wearables
- IoT Application Migration
- Industrial IoT
- Smart Homes
- Automotive IoT
- IoT Consulting Services

Software Solutions

From concept development, business case discussion, user experience to Efficient coding to minimize resource utilization, we provide complete solutions for your business and process automation.

- Business Automation
- Cloud Based Applications
- Micro Service Based
- SAAS Applications
- AWS, GCP Engineering
- API Development
- e-Commerce Applications
- Cyber Security Services

Mobile Apps Development

From concept development, business case analysis, user experience to Efficient coding to minimize resource utilization.

- Educational Apps
- Business Apps
- Healthcare Apps
- e-Commerce App
- Lifestyle Apps
- Mobile Games
- Social Media Apps
- Entertainment Apps

AI (Artificial Intelligence)

From consultancy to solution towards your AI journey. Integration of Artificial intelligence to your business can boost business efficiency by many folds. We provide robust solutions to maximize your efficiency.

- ChatGPT Integration
- BI (Business Intelligence)
- Big Data analysis based on
- Machine Learning for

Product Portfolio

We invite you to explore our portfolio and witness firsthand the impact we have made for businesses of all sizes and industries. From startups to enterprise-level organizations, we have collaborated with a diverse range of clients, helping them achieve their goals and stay ahead in the ever-evolving digital landscape.

Sentry - Gas Leak Detector

Sentry is not an ordinary gas leak detector that you get in the market. With its advanced software and firmware, sentry can detect the slightest of gas leakage at your premise and alerts you of leakage. By sending alarms to your phone and shared devices, Sentry protects your family so you can enjoy your time peacefully. All flammable gasses, such as butane, methane, and propane, are detected by the flammable gas detection system. An online-based gas leak detection device. In the event of a gas leak that is more dangerous than expected, the Sentry device will immediately raise an alarm. It can identify gas leaks in both lines and cylinders. Users of the smartphone app will receive immediate notifications. The variation in gas levels can be observed in addition to seeing all previous data.

Online Biometric Attendance

Easy Connectivity: Our devices have Wifi, LAN and GPRS connectivity. They connect directly to our server and hence no need for local PC. Attendance/access data are updated within few moments.

Hassle Free Installation: Stellar devices don't need IT experts to install or replace. A new device can be added or an old device can be replaced with just few clicks from a mobile device/PC. Hassle free.

Integrate Easily to Existing System: We provide Web platform and APIs that allow you to seamlessly integrate the devices to your current software with just few clicks.
