

ANAM Research & Development Solution is one of the company do research and develop software. We developed software for local and overseas companies. We do research for different sectors in the industry. We do research mainly on Industry Automation and Mobile Usability Studies. We have Tire 1 Research Papers like Science Direct and Scopus.

Services That We Offer

Software Development: We develop software of your choice that your organization, company, or institution might need. We have professional staff in software development either standalone software or web-based software to manage your day-to-day transactions and activities. We develop inventory systems, point-of-sale software, databases, Electronic Learning systems, and student management systems just to mention a few.

Web Designing: ANAM R&D Solutions is a company that develops world-class websites for your company so that you can expose your brand to the world for wide recognition. We develop static as well as dynamic websites that you may be interested in to meet and suit your needs as our client.

Consultancy Services: We provide ICT-related consultancy services to companies' individuals, Organizations, institutions, and many more.

Augmented Reality Application: We develop content for any books according to the education institute's demand. The books can be on Math, English, Arabic, German, Bangla, or any Language or any Grade. We develop Augmented Reality content for any type of book and subject matter. We do not have any specific books. According to your demand, we will create Applications and Content. We are developing Augmented Reality Mobile Applications for People with Special Needs and children. Our application is running in the New Zealand market.
