COMPANY OVERVIEW

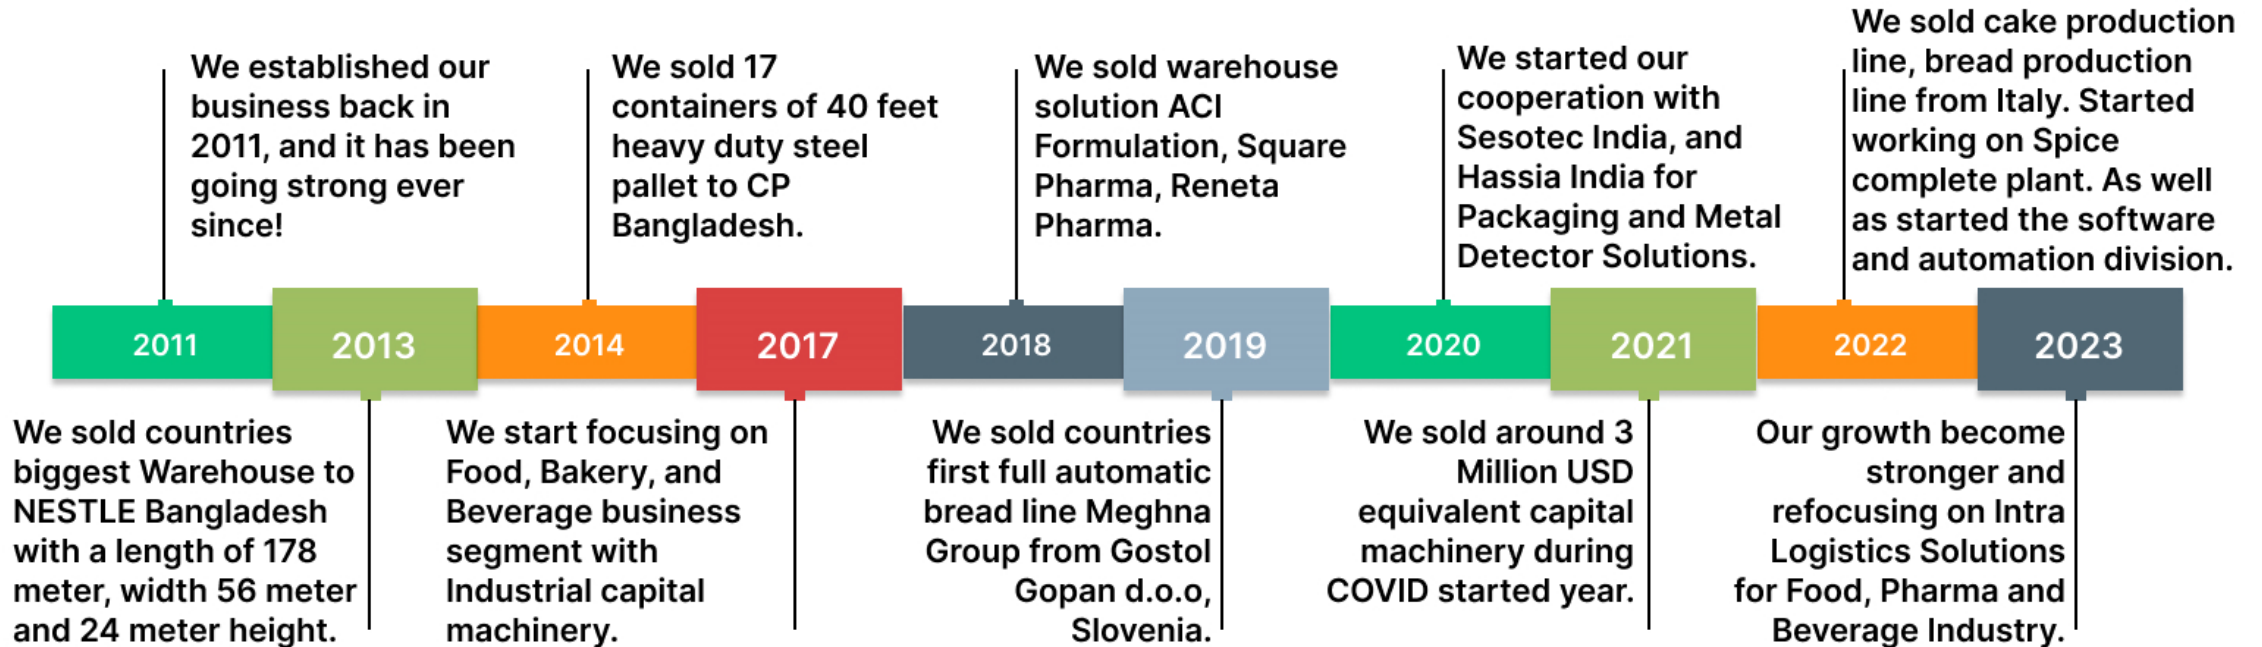

We started our journey in 2011, providing solutions to Automatic Storage for finished goods and Forklifts for finished goods handling. We provide the country's biggest storage solutions to Nestle Bangladesh. We shifted our focus from Storage Solutions to Food Industry Machinery in 2017 after the Gov't increased 50% of the import duties on imported steel.

Since 2017, we have been focused on the Food & Bakery Industry and doing very well, with a year-to-year increase in Revenue to 5.5 Million USD. During COVID we started to diversify our portfolio with machinery which is suitable for both the food and pharma industry and make great progress.

We started our software development and reselling business segment in 2022 with new company formation named Avant Technological Solution. We started developing web application, cross platform mobile application as well as enterprise software solutions.
