

Profile of AloIT Consultants.

Introduction:

AloIT, headquartered in Bangladesh, is a dynamic software development firm specializing in creating Software as a Service (SaaS) products for global markets. Currently, AloIT is dedicated to developing SaaS products for nNur Inc., a Canadian startup based in Ontario, Canada. Our focus lies in crafting enterprise-grade software solutions hosted in the cloud, accessible through a subscription model. This approach allows organizations across various sectors to seamlessly integrate our solutions into their operations, enhancing efficiency and productivity.

AloIT Vision and Objective:

Our vision at AloIT extends beyond business success; we aspire to contribute to a safer and more efficient digital environment globally. By consistently delivering top-quality IT and security solutions, we aim to empower organizations to thrive in today's digital landscape securely.

AloIT Team:

AloIT boasts a team of talented and energetic individuals with a passion for overcoming challenges and delivering high-quality software solutions. Our team's expertise lies in developing solutions that prioritize privacy and security, ensuring that our clients' data remains protected from unauthorized access.

AloIT Product List:

nErim:

- Tailored for companies of all sizes, nErim is an Enterprise Risk Management Software hosted on our SaaS platform. It caters to sectors such as finance, government, telecom, ESG, and more, providing automated risk management solutions.
- The software is available on a yearly subscription basis, coupled with comprehensive support services, and is accessible for live demonstrations to showcase its capabilities effectively.

nIAM:

- Designed to address identity and access management needs, nIAM ensures compliance and security by allowing authorized access only. Its flexible deployment options, including SaaS and hybrid models, cater to diverse organizational requirements.
- Like our other products, nIAM is available for annual subscriptions with ongoing support and live demo opportunities.

nISMA:

- nISMA offers a robust Information Security Assessment tool to evaluate organizations' security postures. It assists in identifying gaps based on established security frameworks, facilitating informed actions to enhance security measures.
- Available under individual or group licenses, nISMA operates on a subscription model with ongoing support and live demonstration options.

nBoard:

- Catering specifically to Company Secretaries, nBoard streamlines and automates board meeting processes securely. It ensures access to necessary information, presentations, and collaboration features within a secure environment.
- Scheduled for release in Q3 2024, nBoard will be available on a subscription basis with comprehensive support and live demo capabilities.

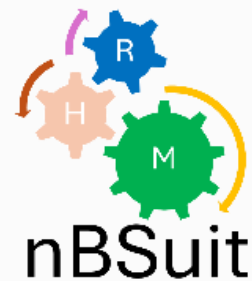

nAMs:

- Catering specifically to Company Secretaries, nBoard streamlines and automates board meeting processes securely. It ensures access to necessary information, presentations, and collaboration features within a secure environment.
- Scheduled for release in Q3 2024, nBoard will be available on a subscription basis with comprehensive support and live demo capabilities.

nBSuit:

- Targeting small to medium-sized enterprises, nBSuit offers cost-effective solutions for managing HR, payroll, accounts, events, and messaging needs. Additionally, a customized subset, nHRM, is exclusively available for Dhaka WASA.
- Scheduled for demo availability in Q1 2025, nBSuit operates on a subscription model with comprehensive support services.

AloIT Service Expansion:

Besides the development of the product, AloIT also provides some IT Related services for any potential customers.

Solution Design and Architecture:

- Leveraging our expertise in system integration and software development, AloIT offers comprehensive solution design and architecture services. We tailor solutions to meet specific organizational needs, considering budgetary constraints and timelines.

Project Management:

- AloIT takes charge of managing software implementation projects, providing regular updates, risk assessments, and recommendations to ensure project success. Our proactive approach minimizes risks and optimizes project outcomes.

Cyber Security Consultancy:

- With a strong focus on cybersecurity, AloIT offers consultancy services to assess organizations' security postures, identify risks, and design robust security execution plans. Our practical expertise ensures comprehensive security solutions aligned with industry standards.

Corporate Training:

- AloIT's pool of experienced trainers conducts regular training sessions to enhance IT and security knowledge among corporate employees. From general cybersecurity awareness to technology-specific training, we empower organizations to bolster their digital resilience.

AloIT Organogram:

AloIT is a very new IT SaaS startup which is very small in size. Currently we have around 6 developers working full time and there are a few working from abroad as consultants. The management team is also very small to reduce the overheads. The management team's short profile is given below:

Md. Shafat Ullah Patwary: An MSc in Cyber Security and having experience of 26 years in IT, Security and Telecommunication, Mr. Shafat took the responsibility of managing the organization from the top. He retired from a leading Telecom in Bangladesh and since then working as Managing Partner of AloIT Consultants. He is a founder director of AloIT.

Mohammad Arif Rahim: Mr. Arif has an MSc in Software Systems from the University of Sheffield, UK and has more than 25 years of working experience in IT and IT Security. He has vast experience in System Management, Operations and Programming. He is also a founder director of AloIT

Md. Asaduzzaman: Mr. Zaman is MCom in Management from Jagannath University coming from a business background in Garments, textile, and packaging industry and has more than 20 years' experience in Garments division. He is also a founder director of AloIT
