ZeuZ Architecture

ZeuZ Features:

- No Code so your Manual Testers can develop automation tests with 4 hours of training
- Over 340+ actions and commands
- End-to-End (Manual, Automation, Bug, Task, Req, Report)
- Private Cloud-based Software Management / Test Execution
- Web, Mobile, APIs, Desktop, other hardware
- 100s of Sample Test cases and Built in Help
- 70% faster than manual
- Easy to use, simple UI with advanced configuration
- Script less or Custom Automation
- Re-usable templates
- Image comparison
- Guide to migrate manual tests to automated
- Predictive Intelligence (Auto Suggest test to execute)
- Batch update items (Step data / Results / Assigned Users and many more...)
- Dynamic test data
- Root cause analysis with logs
- Advanced search and Folder view
- Debug panel

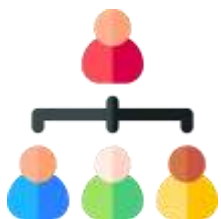

ZeuZ Features Continue:

- Screen Capture
- Drill Down Reporting Summary
- Notification and triggered results
- Performance / Benchmark Testing
- Complex workflows supporting sequential device test automation
- Multiple Views (Kanban / Board / Unified)
- Support for various type of tests: Sanity, Regression, Security, Stress and Load, End-to-end testing
- Multi-role and permission based
- Distributed test execution / multi-node and on demand hardware deployment
- Regional and multilingual test data
- Rich Text Documentation (add your own FAQs)
- Integrate / add any tools of your choice
- 3rd-Party Integration (JIRA, GIT, MKS, MQC etc)
- Continuous Integration (API available for any Build System)
- Designed from the ground up based on manual and automated best practices
- Go-Live Implementation, training and support,
- Optional ZeuZ Test Automation Developers located in a cost-effective region

Case Study 1: Project in progress

Client: One of the top 3 Telecommunication Providers in **Canada**

Business Challenge: Improving performance of the online buying process

Engagement Type: Managed Services

Results

- Critical customer journeys automated
- Automated buying process is scheduled to run 24x7
- Data collected and integrated within client's dashboard
- Automated notification & reports
- Client is able to identify trends, outliers and make changes in the business process

Telecommunication Industry

Case Study2 : Project in progress

Client: Fast growing technology company with a disruptive product (Singapore)

Business Challenge: Quality challenge is impacting time to market

Engagement Type: Staff augmentation + Consulting

Results

- Critical test suite (Sanity) is automated, rest are in progress
- In the process of integrating test runs into CI/CD pipeline to detect the issues earlier in the lifecycle
- Working directly with the dev team in their time zone (India)
- Client is getting quality assessment from Automation Solutionz

**Disruptive Ai technology in HR
Performance Development**

Case Study 3: Project in progress

Client: Cloud-based rental platform to increase productivity (**Canada, US, Germany**)

Business Challenge: Cost effective solution to improve quality & reduce release cycle

Engagement Type: Multiple (Based on the respective department's needs)

Results

- Mobile test suite automated and maintained with minimal effort
- Functional tester is supporting the scrum team in the same time zone where the dev team is located
- Supporting “Live validation” (AI) complementing client's team in Mexico
- Developer augmentation

Cloud Based Rental Platform

Case Study 4: Project in progress

Client: Leading **Canadian** financial services company (Publicly traded)

Business Challenge: Long testing cycles, Fragmented tools/processes, Primitive test coverage, Lack of testing resources (Attrition)

Engagement Type: Varies and progressing towards tighter integration

Results

- Testing cycle shortened from 4 weeks to 1 week
- Nontechnical members are engaged in testing lifecycle including test management
- Attrition had little to no impact (Automation tester positions were repurposed)
- Intermediate releases are managed with little effort
- Performance testing process established

Financial Industry

"Fantastic software at a great price"

Overall: Zeuz has helped and is helping us transform our testing capabilities from a fully manual set up to an automated approach. This helped us improve the quality of our software and save valuable resource time on other tasks. Zeuz also provides fully trained testing experts at an additional cost that is definitely worth it as the resource is highly capable and provides great extra coverage to our testing needs. The product is very easy to use and best of all it can do so much - it really is a comprehensive tool that can cater to all possible testing needs of a company.

Pros: - wide range of features/uses - built to be used in the most smart/efficient way - lots of integrations and possibilities - works for web, mobile and native apps - extremely competent staff

Cons: The software keeps improving and I've seen several updates whilst working with Zeuz already.

"Finally found an end to end solution "

Pros: Our software products have web applications plus native iOS and Android that all need to talk together. We struggled to find a tool that would integrate across the entire stack until we found zeuz. We've been using it for two years and found their service to be very good, and when we evolved our products and needed new functions they helped us find them or worked with us to add them. Have and would recommend trying zeuz if you want to harness the power of automation in your QA team.

Cons: As we were new to automation we struggled at first but I don't think that was the fault of the tool.

Reasons for Choosing ZeuZ: Best solution that fit all of our needs.

"Except, reliable and creative partner"

Overall: Overall the experience was wonderful and would highly recommend ZeuZ for all your testing automation needs.

Pros: Loved the solution flexibility to be able to integrate various systems and create scale to automate complex test cases scenarios. The technical and leadership team their is very engaged and committed to delivering business results through automation. Excellent experience and partnership

Cons: Nothing. There is really nothing that I can think of

Client Testimonial: Spaenaur

SPAENAUR
Fasteners Right Now.

"I was faced with launching a new e-commerce website for an organization that was new to e-commerce. We built the site and planned on testing it internally with our employees before launching it to our customers. We felt the need to test the site thoroughly, considering it was our first e-commerce site, and we didn't want to negatively impact our customers.

Like many companies, we didn't have professional testers in-house, and that's where Automation Solutionz came to the rescue. Their automated testing platform, 'ZeuZ,' was able to develop automated test scripts that examined every aspect of our site and provided valuable feedback. This feedback helped us make the necessary changes to deliver a site that would meet and exceed our customers' expectations.

The team at Automation Solutionz is incredible. We initially sought a company to thoroughly test our site, but we ended up with a partner on our journey to becoming an industry-leading e-commerce solution in our field. I'm not sure how we would have achieved our goals without their timely assistance!"

Andre James
Customer Experience Director at Spaenaur
