UI /UX Design

User engagement represents a significant part of a company's growth. It forms the basis for brand identification, which efficiently monitors the purchase and retention process of our customers. In principles that greatly affect future buyers, experiential architecture plays a key role. The Customer Interface (UX) covers all facets of the relationship between the end -user and the business and its web and other contact platforms, goods and services.

The ultimate objective is to produce continuous constructive feedback, ensuring commitment to customers. For websites and smartphone apps, UX architecture allows easy connectivity and flexibility to customers, which improves brand awareness and its goods and services. Bit Byte Technology offers UX designs services to customers in Bangladesh that allow a business to create a world class UX experience. We emphasize the analysis and design process in order to identify your consumers' desires and wishes, offer a best-in-class approach for your business and create a user-centric website. Over a decade of experience, we have supported the growth and profitability of hundreds of businesses in various branches.

AR / VR

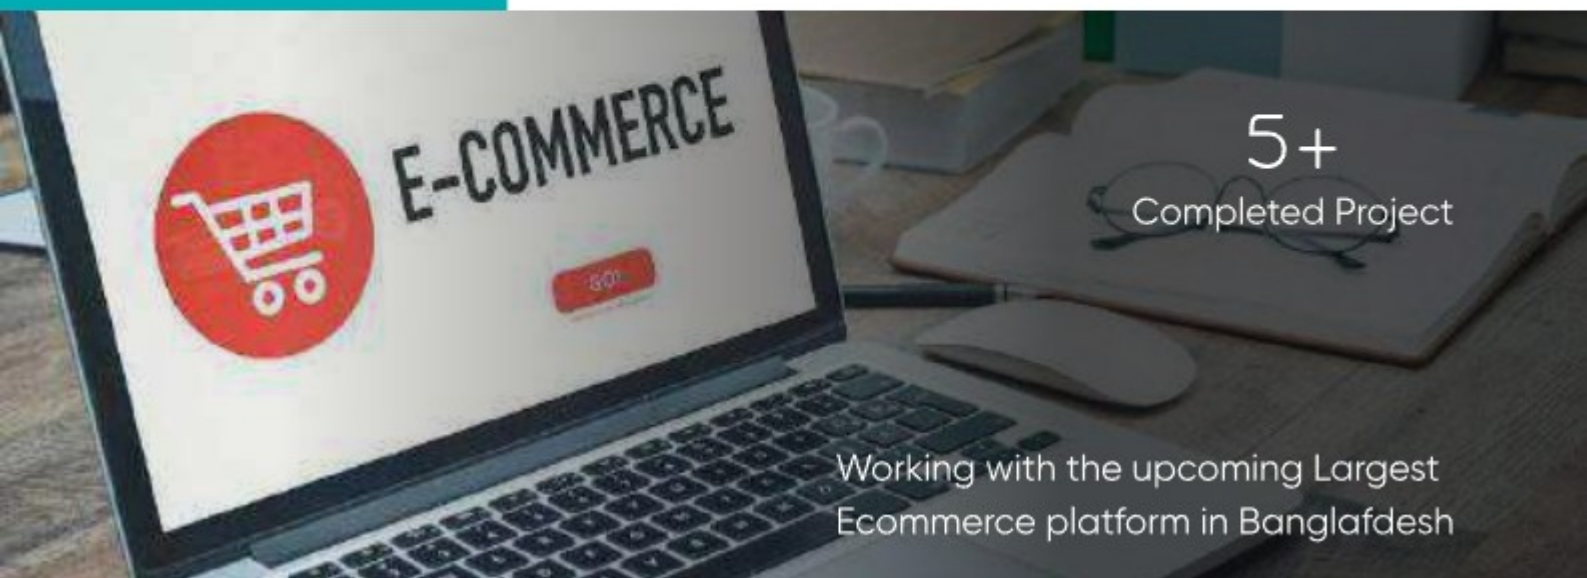

Applications for virtual reality and increased reality alter the way you think traditionally. For your own operating sector, we build individual AR & VR platform apps. Our tools rethink the enterprise exhibition and enhance the client's experience on the basis of practical market insight. We create native end-to-end applications for your industry needs to address your business challenges. We develop state of the art mobile applications for real-estate, furniture, automotive, etc. Creative 3D graphic designer, powerful storyteller, and professional cross-platform developers give you the perfect way to fulfill the AR & VR requirements.

E Commerce

With the appearance of technical economic growth, ecommerce has been an undeniably essential part of the corporate strategy. Start-ups, big brands and even businesses have their own online shop to offer their own goods or services. There's also a lot of companies. The need for eCommerce in the growth economy is unnecessarily wasted of time. Bit Byte Technology is committed to providing a holistic forum to satisfy the organization and consumer's needs simultaneously. In Bangladesh our sensitive concepts, user centric eCommerce solutions for creation of websites and intuitive content management systems will be the first to construct a distinctive digital identity, be it an online store or a personalized booking solution. The completion of our digital experience and fresh ideas allow us a leader in all growth needs for eCommerce. We understand all the desires, and different project lines require various approaches.

With features like inventory management, procurement, production planning, quality control, and financial management, it enables real-time tracking of inventory, seamless procurement, optimized production planning, enhanced quality control, and efficient financial management. This comprehensive solution empowers rice millers to make data-driven decisions, minimize wastage, improve productivity, and ensure consistent quality. By embracing a Rice Mill ERP solution, rice mills can thrive in a competitive market, streamline their operations, and achieve long-term success in the ever-evolving rice milling industry.

Pro Project Solution

The importance of Pro Project Solution in organizations can't be overstated. It helps every part of the business run more smoothly. It allows your team to focus on the work that matters, free from the distractions caused by tasks going off track or budgets spinning out of control. It empowers them to deliver results that actually impact the business's bottom line. And it enables your employees to see how their work contributes to the company's strategic goals.

Custom E Commerce

Building flexible models for developing eCommerce is not as straight forward as entering the business community. There is a lot to take into account, such as stability, usability, speed adaptation, upgrading and so on. All of this depends on the technologies and languages used during e-commerce developments, APIs, extensions and SDKs. Our solution and its modules are highly used for the production of ecommerce as they are compatible with less time and effort for nearly all tech and craft applications.

Travel Agency Management Solution

A Travel Agency Management solution is a powerful tool that empowers travel agencies to streamline their operations and provide exceptional services to their clients. This comprehensive software system offers features such as booking management, itinerary planning, customer relationship management, and financial tracking. With efficient booking management, seamless itinerary planning, robust customer relationship management capabilities, and accurate financial tracking, travel agencies can optimize their workflows, enhance customer satisfaction, and maximize profitability. By adopting a Travel Agency Management solution, organizations can automate processes, improve efficiency, and offer personalized experiences to clients, leading to increased customer loyalty and business growth in the competitive travel industry.

Manpower Recruitment Management Solution

Manpower Recruitment Management solution is a valuable tool for organizations looking to enhance employee engagement and boost productivity. This comprehensive software system offers features such as activity planning, scheduling, registration, and attendance tracking. With streamlined activity planning, efficient scheduling, seamless registration processes, and real-time attendance tracking, businesses can provide employees with

Manpower Recruitment Management Solution

opportunities for recruitment and relaxation. By adopting a Manpower Recreation Management solution, organizations can create a positive work environment, improve employee satisfaction, and promote work-life balance. This, in turn, leads to increased employee productivity, reduced stress levels, and a more harmonious workplace, ultimately contributing to the overall success of the organization.

Export-Import Management Solution

An Export-Import Management solution is a vital tool for businesses engaged in international trade, empowering them to streamline their global trade operations and achieve success in the competitive global marketplace. This comprehensive software system offers features such as order management, documentation management, customs compliance, and shipment tracking. With centralized order management, efficient document handling, seamless customs compliance, and real-time shipment tracking, businesses can enhance their export-import processes, minimize errors, and ensure timely delivery. By embracing an Export-Import Management solution, organizations can optimize their global trade operations, reduce costs, and expand their market reach, driving growth and profitability in the global business landscape.

LC Management Solution

An LC (Letter of Credit) Management solution is a powerful tool that simplifies and streamlines trade transactions for businesses engaged in international trade. This comprehensive software system offers features such as LC creation, document management, compliance checks, and reporting. With automated LC creation, centralized document management, rigorous compliance checks, and insightful reporting capabilities, businesses can expedite their trade processes, reduce errors, and ensure regulatory compliance. By adopting an LC Management solution, organizations can enhance efficiency, mitigate risks, and ensure smooth trade transactions, leading to improved customer satisfaction and successful international trade operations.

Transport Management Solution

A Transport Management solution is a crucial tool for businesses involved in logistics and transportation, enabling them to optimize their operations and enhance delivery performance. This comprehensive software system offers features such as route planning, vehicle tracking, load optimization, and delivery scheduling. With real-time visibility into vehicle location, optimized route planning, efficient load management, and streamlined scheduling, businesses can improve delivery efficiency, reduce costs, and meet customer demands promptly. By embracing a Transport Management solution, organizations can streamline their logistics processes, minimize delays, and enhance customer satisfaction, ultimately gaining a competitive edge in the transportation industry.

HRMS & Payroll Management Solution

An HRMS & Payroll Management solution is a comprehensive tool that streamlines human resources and payroll processes, ensuring efficient and accurate management of employee data and payroll calculations. This powerful software system offers features such as employee onboarding, attendance management, leave tracking, performance evaluation, and payroll processing. With real-time access to employee information, automated attendance tracking

HRMS & Payroll Management Solution

An HRMS & Payroll Management solution is a comprehensive tool that streamlines human resources and payroll processes, ensuring efficient and accurate management of employee data and payroll calculations. This powerful software system offers features such as employee onboarding, attendance management, leave tracking, performance evaluation, and payroll processing. With real-time access to employee information, automated attendance tracking

Accounting Solution

1. An Accounting solution is a vital tool for businesses seeking to streamline their financial management processes and ensure accurate reporting. This comprehensive software system encompasses key features such as general ledger management, accounts payable and receivable, financial reporting, and tax management. With real-time access to financial data, automated transaction processing, streamlined invoicing, and robust reporting capabilities, businesses can improve their financial accuracy, enhance compliance, and make informed decisions. By embracing an Accounting solution, organizations can efficiently manage their financial operations, reduce manual errors, and focus on strategic planning to drive growth and achieve long-term success.

Asset Management Solution

An Asset Management solution is a powerful tool that enables businesses to effectively manage their assets, ensuring optimal utilization and maximizing returns. This comprehensive software system offers features such as asset tracking, maintenance scheduling, lifecycle management, and reporting. With real-time visibility into asset location and condition, streamlined maintenance processes, optimized asset lifecycle planning, and insightful reporting, businesses can enhance operational efficiency, reduce downtime, and extend the lifespan of their assets. By embracing an Asset Management solution, organizations can make informed decisions, improve asset performance, and achieve long-term success in their respective industries.

Inventory & Stock Management Solution

An Inventory & Stock Management solution is a vital tool for businesses looking to optimize their inventory processes and maximize profitability. This comprehensive software system offers robust features such as real-time inventory tracking, demand forecasting, stock replenishment, and reporting.
