Agile Methode

Based on the client requirement & type of the project we prefer to go with the appropriate project execution methodologies & approach. It helps for development of high-quality IT products that meets or exceeds customer expectations, reaches completion within times & cost estimates.

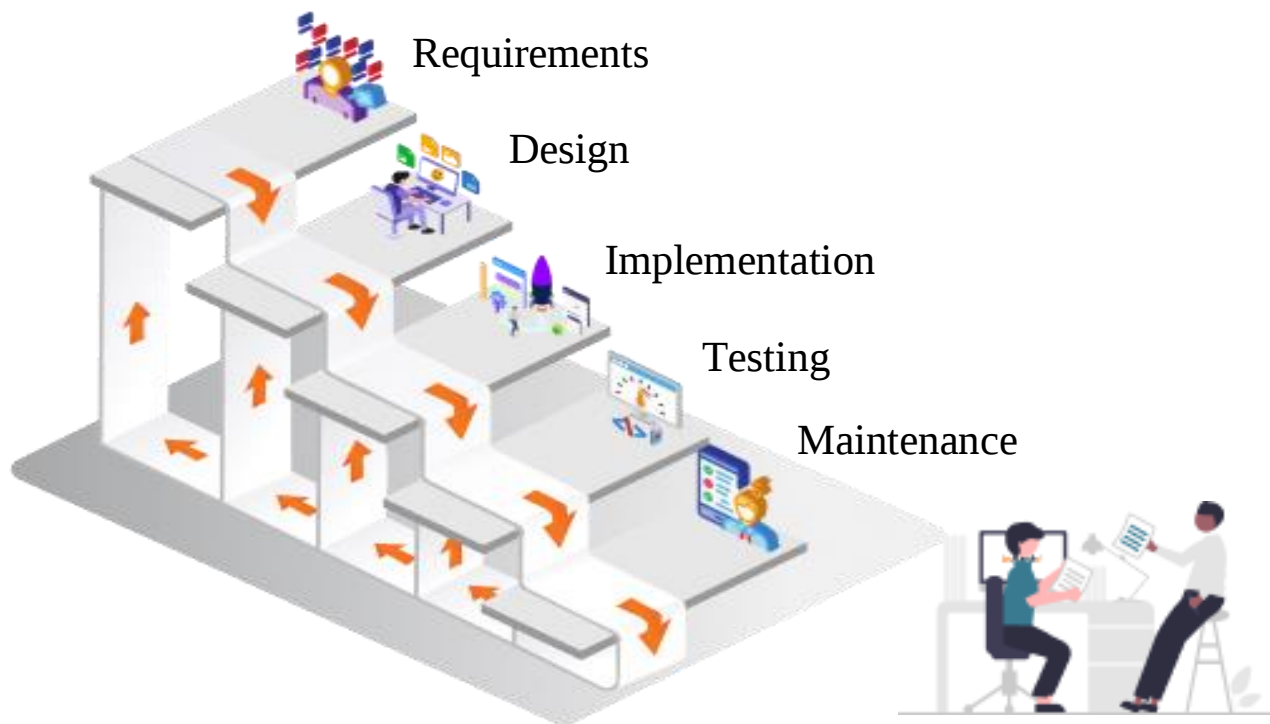

When to Use

- Few Initial Product & Regulatory Requirements
- Lenient Processes in Place
- High Product Owner Involvement
- Innovative product development from scratch
- Short, Flexible Timeline
- Budget with Wiggle Room

Waterfall Method

The Waterfall methodology is the traditional and the most common methodology used for project management. It follows a sequential, linear process which is why it is often described as a “linear-sequential life cycle model.”

When to Use

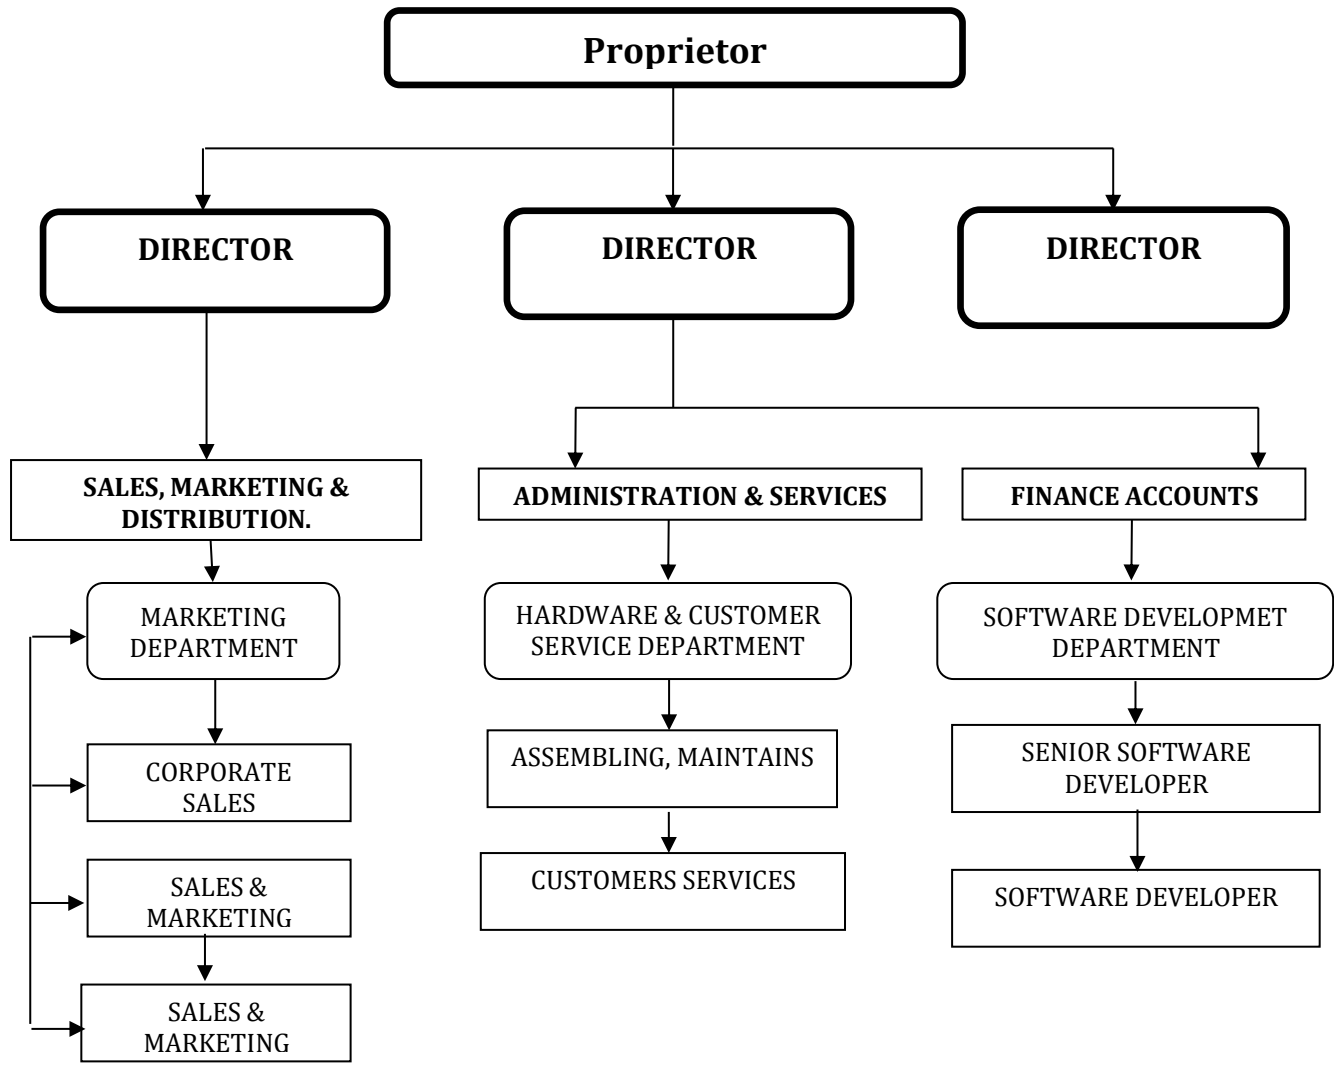

- Many Initial Product Requirements & Strict Regulatory Requirements
- Strict Processes in Place
- Low Product Owner Involvement
- Enhancement to an Existing Product
- Fixed & Firm Timeline
- Fixed, Inflexible Budget

Organization Team

Structure & Our Team

Mansha NEGOCIS proud for its highly trained team of 35 professionals and counting on. We believe without proper planning and execution no project can be completed on time. Our top level management always monitors and get involve directly with the development team to smoothen the entire process.
