Owner's Statement

I am pleased and excited to present our company's profile.

Our company was established with the goal of offering our clients cutting-edge technological solutions to help them stay ahead of the curve in the rapidly changing digital landscape. We have developed enduring bonds with our clients and gained a reputation for providing high-quality services and goods over the years. Our team of exceptionally talented and devoted individuals is committed to exceeding our clients' expectations with our results-driven approach and to offering outstanding customer service. We have no doubt that our unwavering dedication to excellence and focus on innovation will continue to be the main drivers of our success and expansion as we look to the future. We are committed to taking the lead and are thrilled about the prospects that lie ahead. We are enthused about the potential ahead and are motivated to set the standard in the IT industry. Thank you for your support and for entrusting us with your technological requirements. We look forward to serving you for many years to come.

Md Rashed Ali

Our Service

Car Parking Solution

Real-time Monitoring and Security Protection

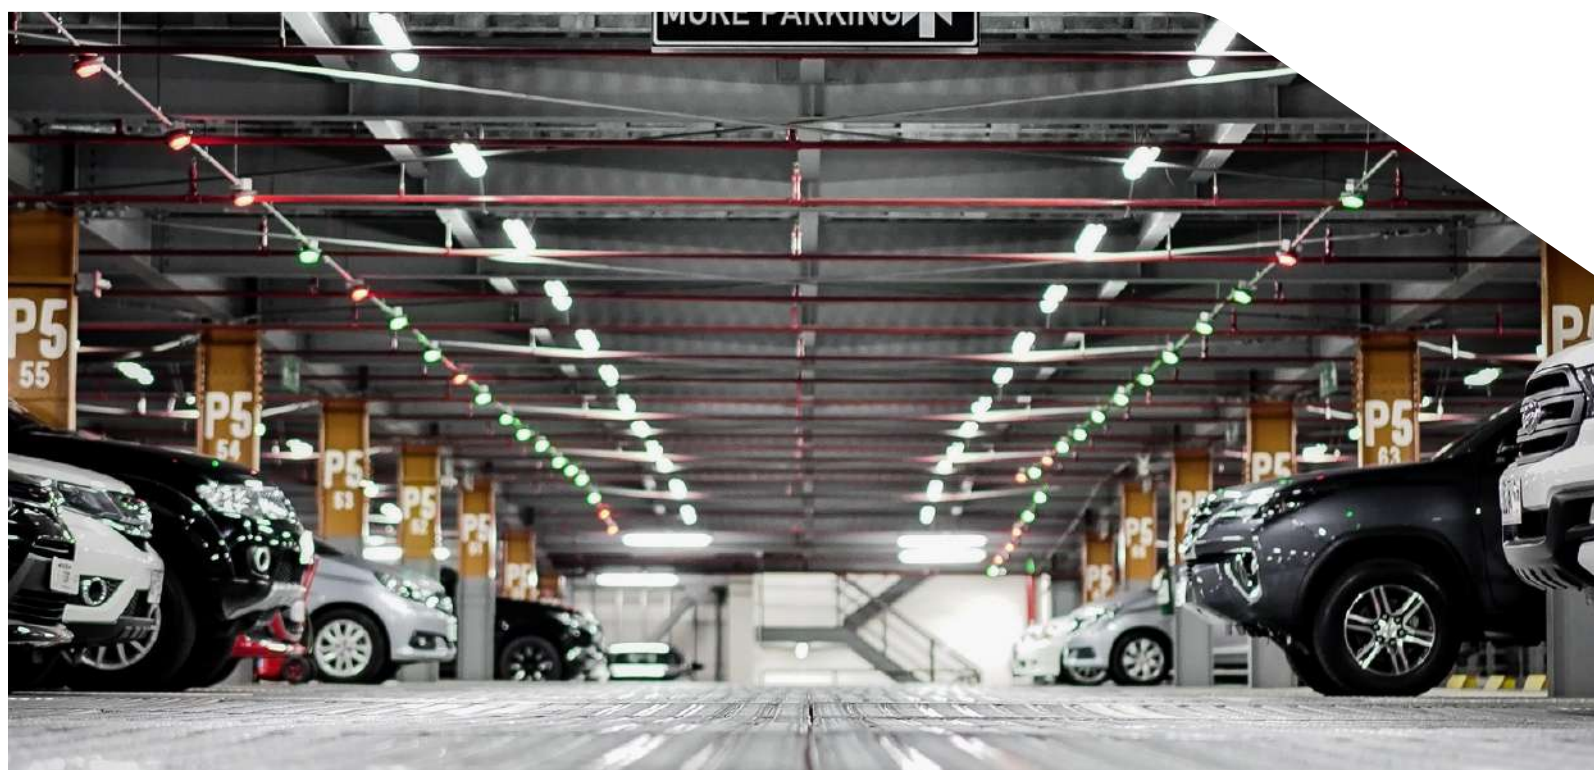

Gigatech5 offers intelligent cameras include high-definition image sensors and advanced image processing technology, resulting in crisp and detailed real-time monitoring footage. The system's advanced motion detection and vehicle identification capabilities ensure the parking area's safety.

Vehicle Recognition and Entrance & Exit Management

Our smart video surveillance system incorporates advanced license plate recognition technology, enabling fast and accurate identification of entering and exiting vehicles' license plate numbers. This automatic recognition technology not only speeds up the passage process but also considerably lowers the need for manual intervention, hence improving access management efficiency. This solution also incorporates a parking entry and exit terminal, RFID card readers, cameras, and barriers allowing contactless access and exit from car parks.

Real-time Data Analysis and Lot Management

Gigatech5's CMS system includes real-time data processing and statistical functionalities, providing full information about parking lot usage. Administrators can view data such as parking spot use, peak hours, vehicle traffic, and more, which provides an accurate basis for parking management decisions. It provides information about available lots and directions to those lots, which we can display at the parking entry.

Our Service

Campus Solutions

Smart Education

The developed digital education solutions address the emerging needs of remote and distance learning, as well as multi-classroom development. Gigatech5 employs powerful AI technologies to speed the creation of digital and smart campuses. Students can also learn more conveniently, pleasantly, and successfully through remote online classrooms when AI-powered remote learning technologies are used. And, with sophisticated on-campus devices, students in schools can have quicker access to a variety of information, while teachers and school administrators can record and share high-quality instructional resources across several schools, significantly increasing the learning and teaching experience.

Campus Security Solution

Gigatech5 provides comprehensive on- and off-campus security systems for school buses, gates, perimeters, buildings, and internal roadways, as well as a wide range of security applications for vehicle, personnel, and alarm management. Gigatech5 can ensure that students, parents, and administrators on the campus have a safe and peaceful learning environment.

Students Attendance Solutions

Gigatech5's student attendance solution, which includes access control terminals and intelligent attendance devices, meets common student participation needs on campus. Efficient and automatic data recording improves the management efficiency of teachers and school administrators.
