ABOUT US

An early stage Agricultural ecosystem development startup based in Bangladesh Agriventure Limited is focusing on creating an inclusive agricultural ecosystem in Bangladesh through collaboration, acceleration, incubation and tapping all the important segments/sectors for agri-entrepreneurs, farmers, contributors and stakeholders.

Since its inception, we are working with the local, and marginal community agri-entrepreneurs, farmers, retailers, and stakeholders to design an inclusive and sustainable ecosystem. We are providing mentorship, advisory and agri management services that is focused on empowering Entrepreneurs, Farmers and Stakeholders on Business Development, Farming Management, Product Supply Chain Management and Development. We are providing End-to-End Sustainable Farming, Produce and Input safety Management training and advisory to the farmers.

We are collaborating and working with renowned national and regional established partners and contributors to provide a hassle-free, sustainable, traceable and a strong network, enabling a smooth and feasible Access to Finance and Market for the ecosystem where the conditions, accessibility, and opportunities are favorable to the development of the ecosystem.

Our Initiatives, Advisory and Service development are focused and initiated through careful planning, data analysis, risk aversion, technology applications, and long term impact-making, therefore the ecosystem is established as such that will play an important role in developing the society and economy from the agricultural and other influenced sectors.

VISION

Becoming an accelerator and practitioner of Innovation, Entrepreneurial, Sustainable and Modernized farming and business that will penetrate and will tap the jotting points of the agricultural industry, enabling growth and sustainability for the foreseeable future.

VALUES

COLLABORATIVE

INCLUSIVITY

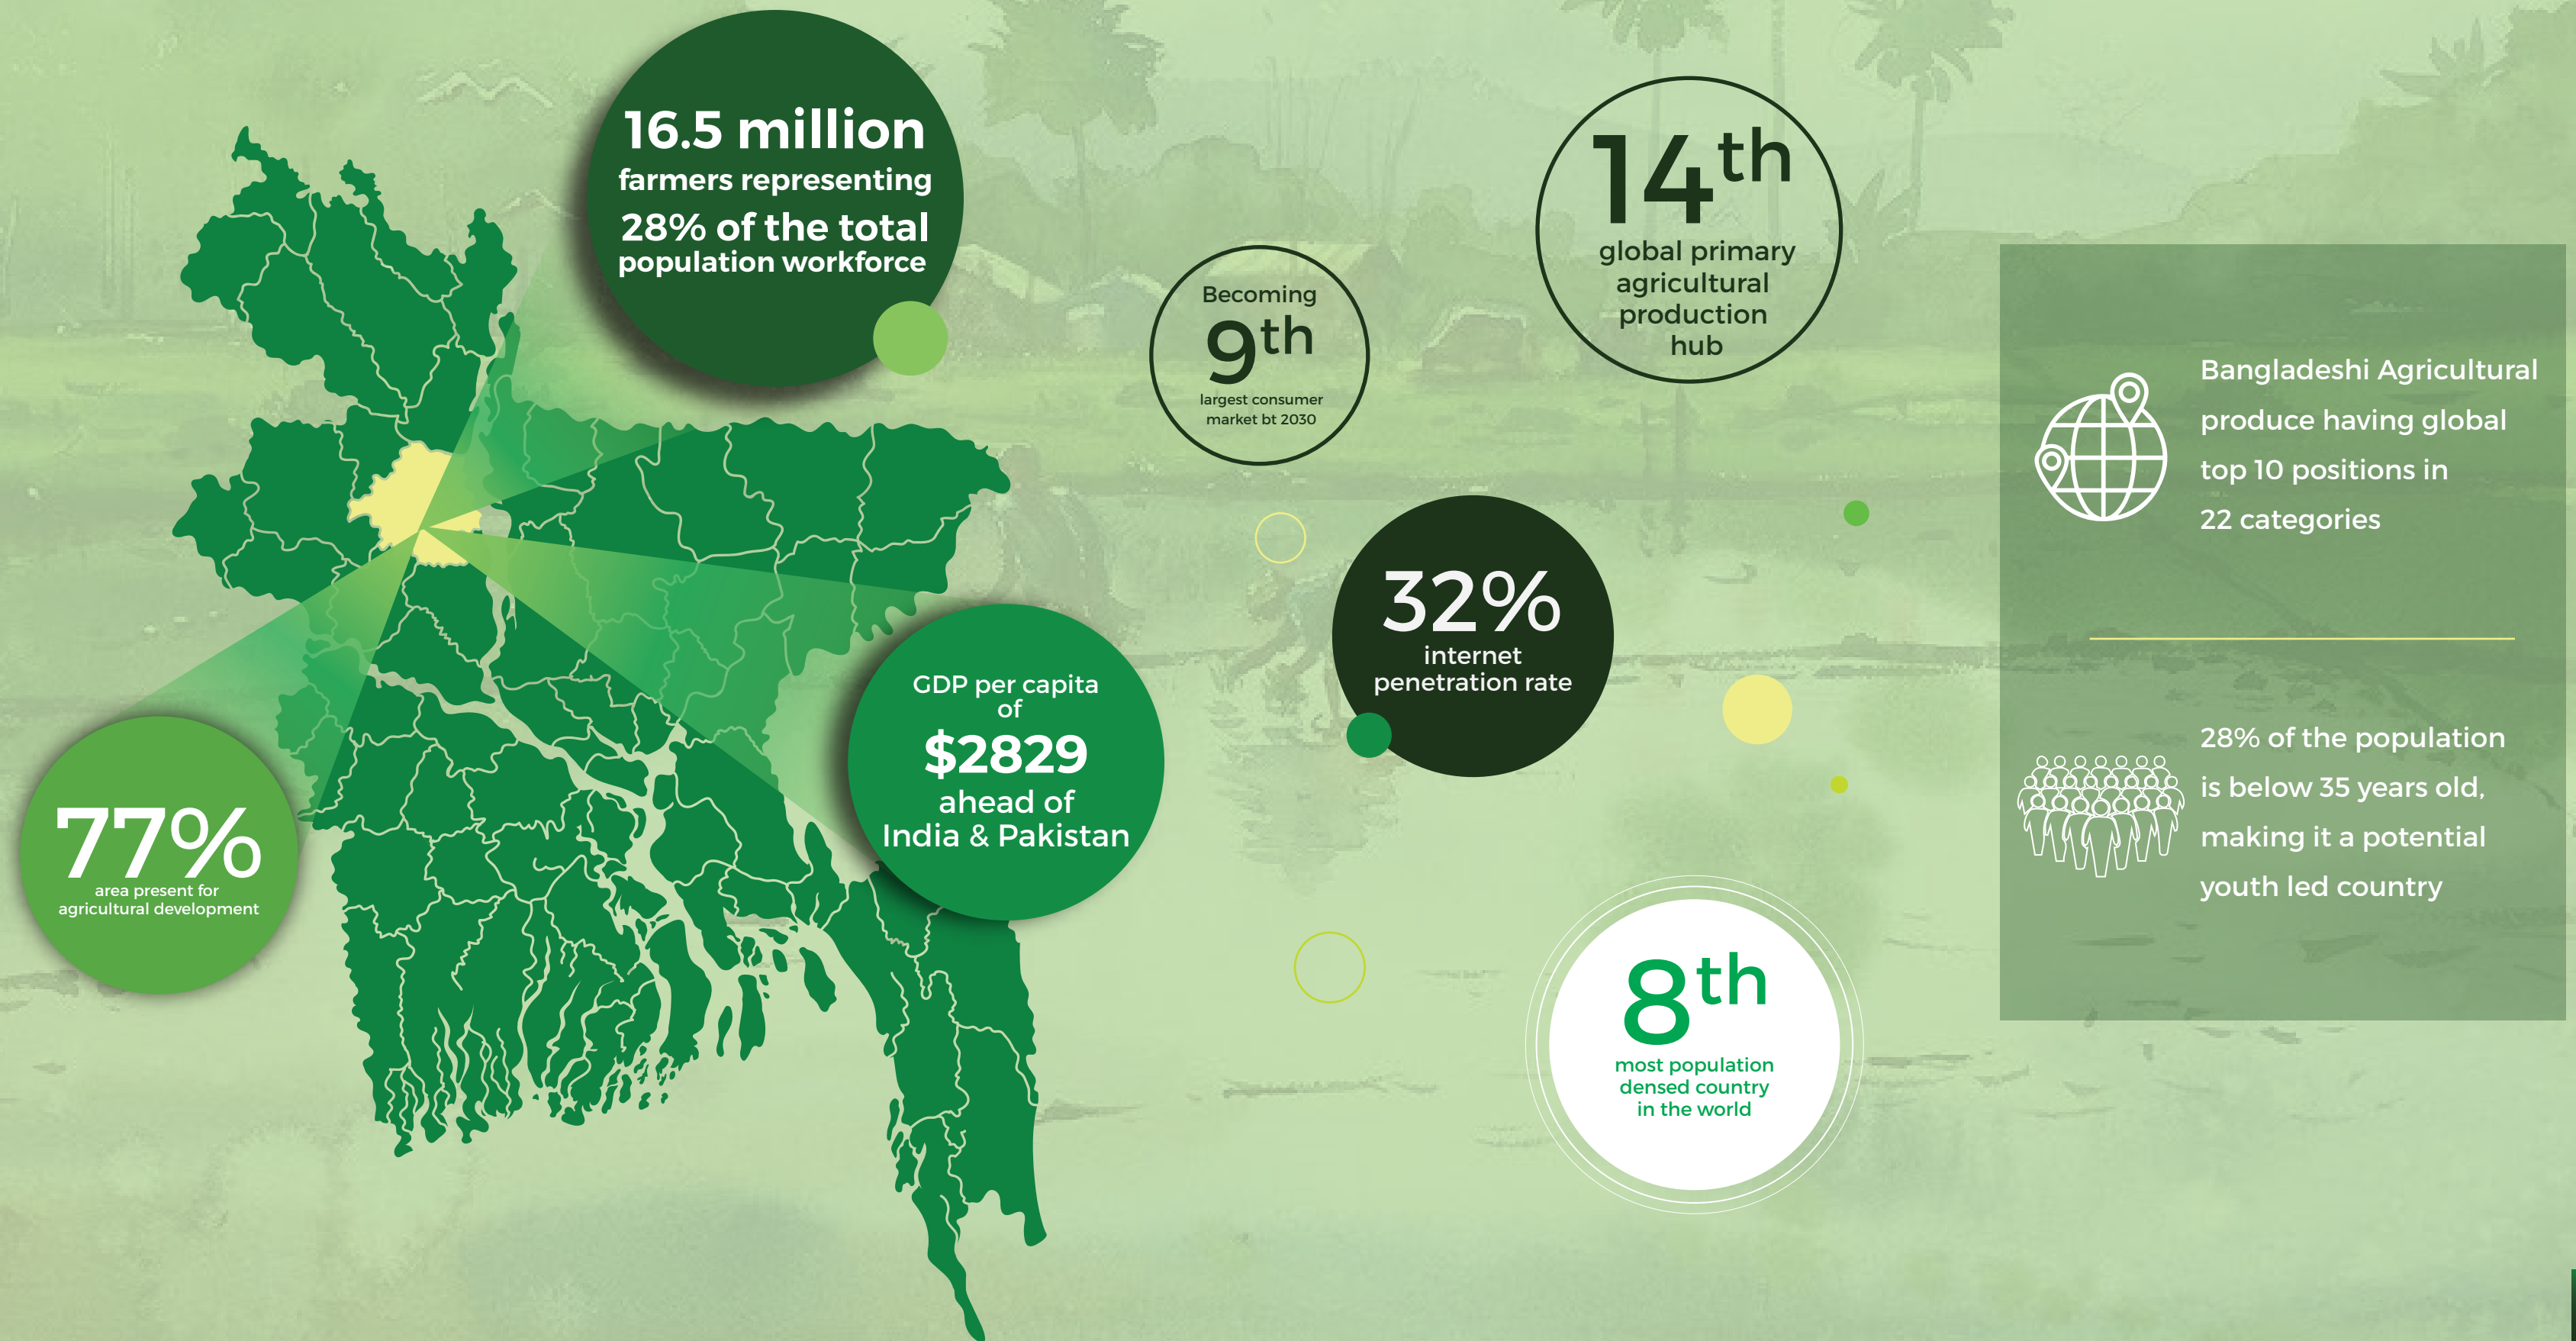

DATA-DRIVEN

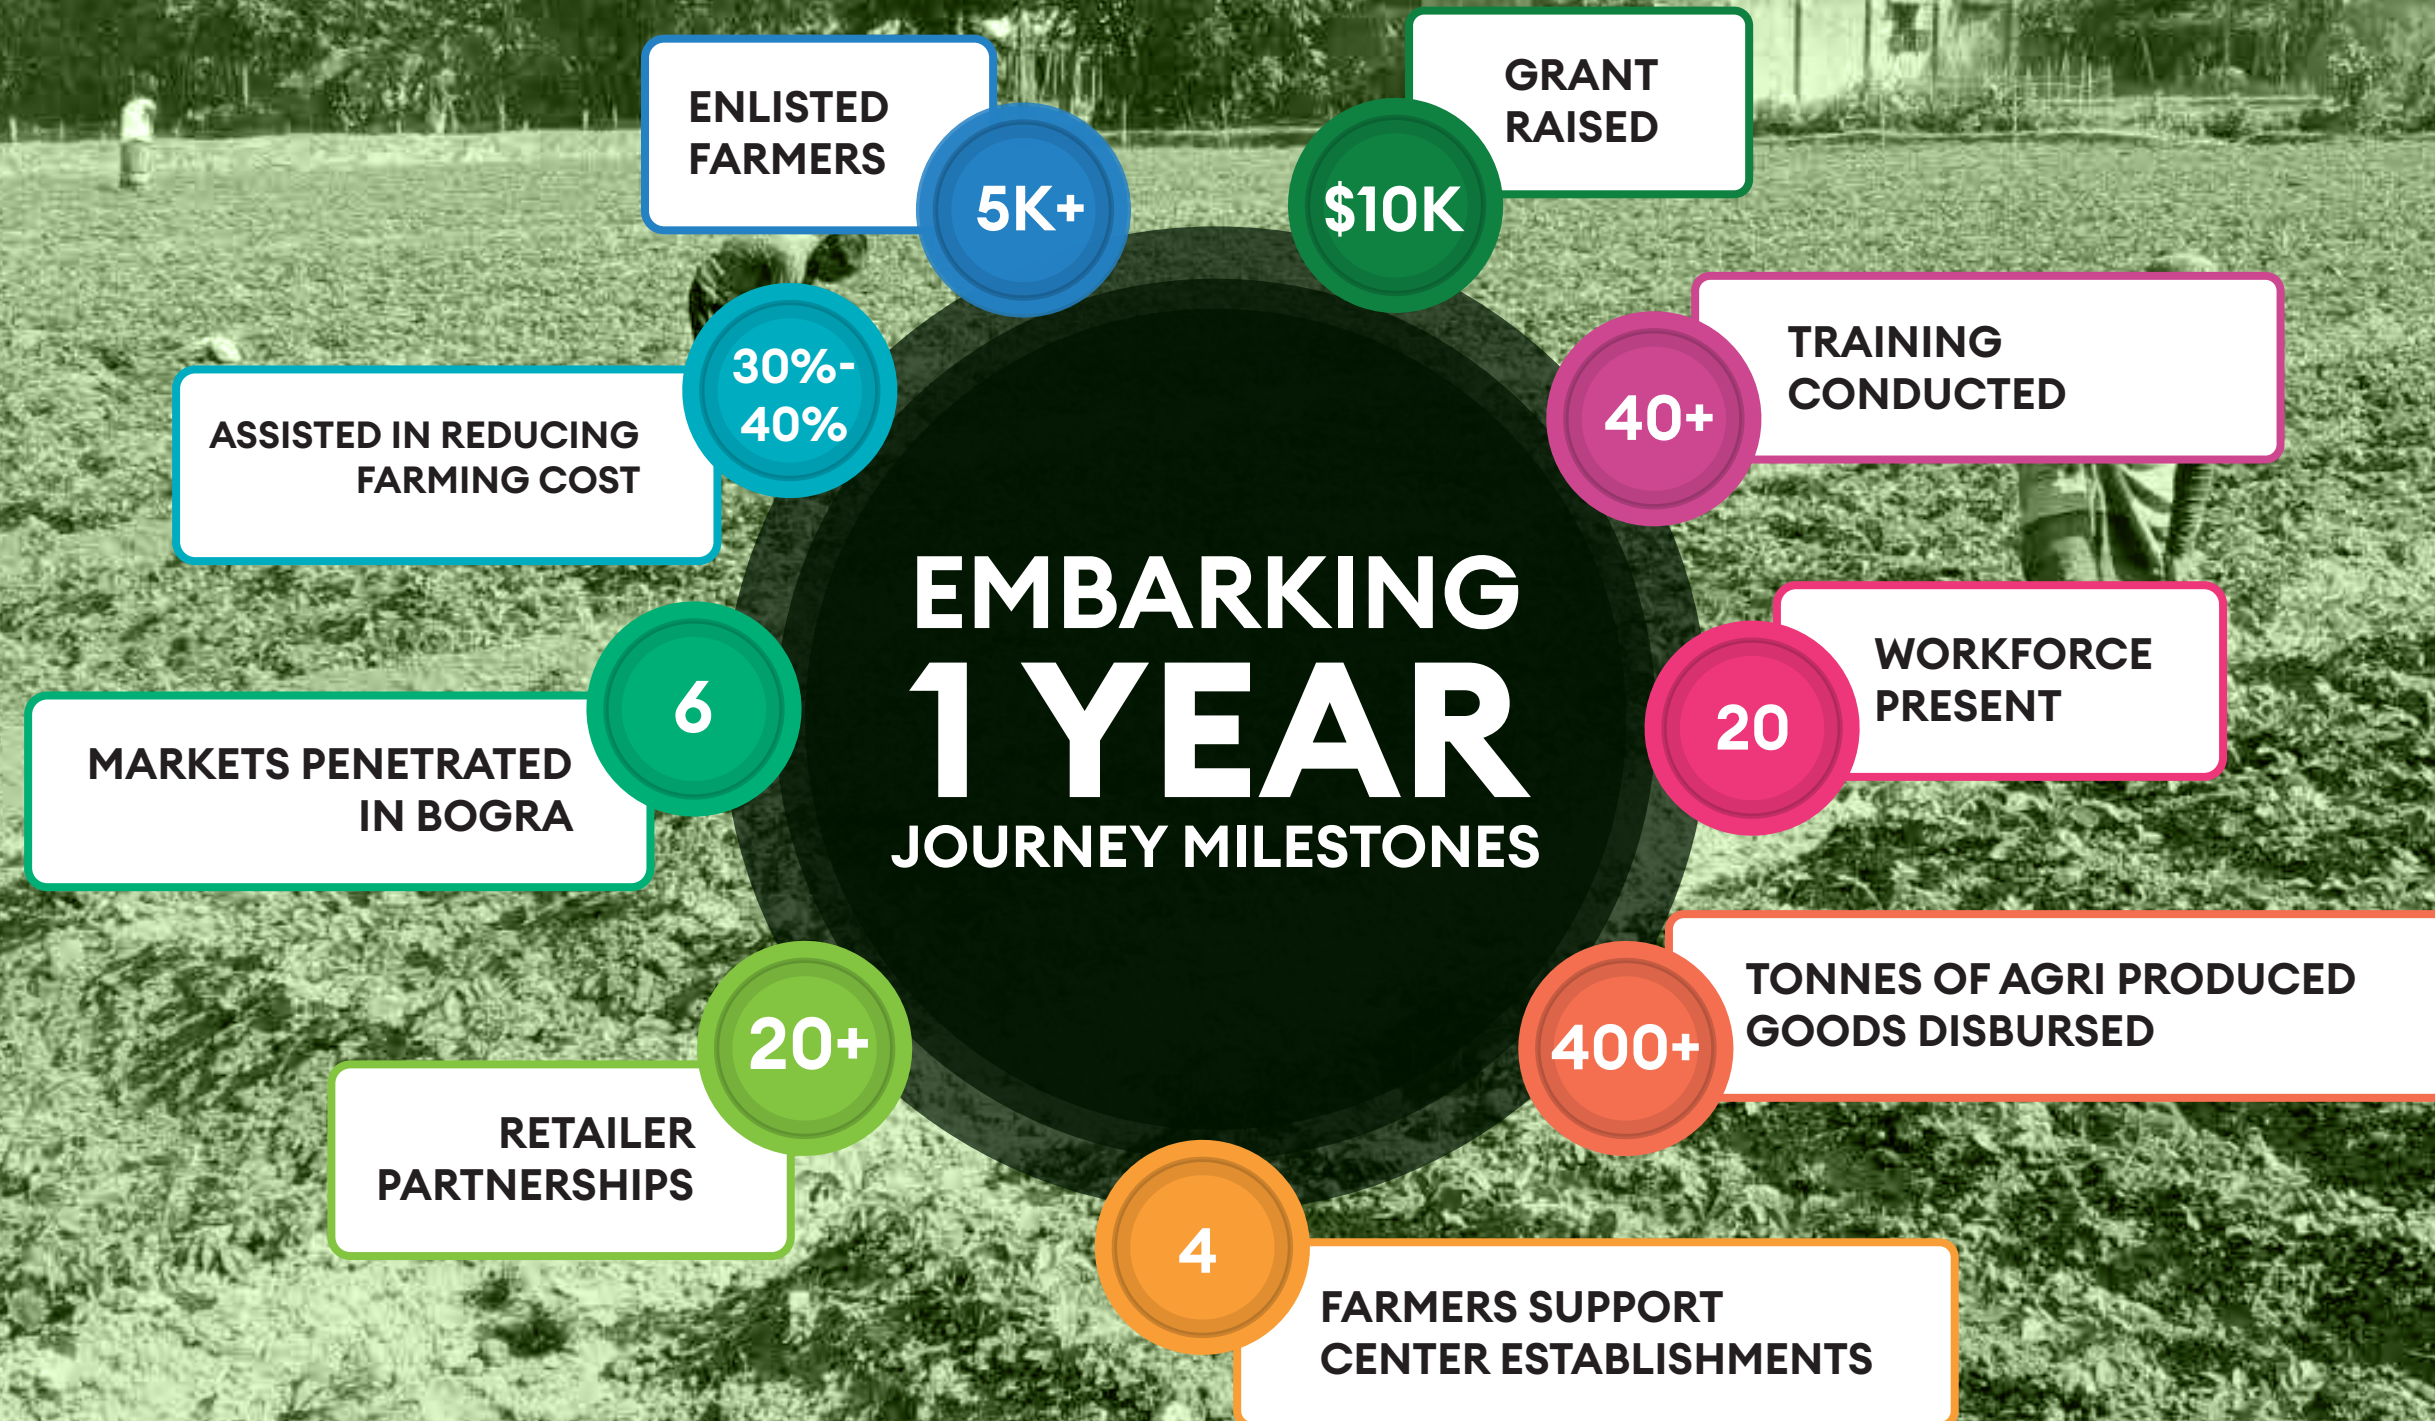

INTEGRITY

BANGLADESH AS AN AGRICULTURAL NATION

FACTS AND FIGURES

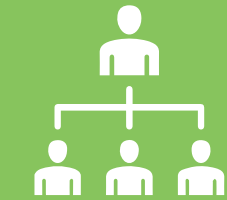

PROBLEMS WE ARE WORKING WITH

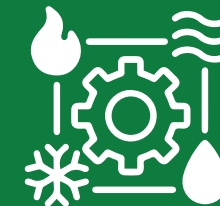

FINANCIAL ACCESSIBILITY

- 70% of the farmers do not have any banking knowledge nor access
- 18%-34% Interest rates for farmers to bear when disbursed via secondary channel

FORMAL STRUCTURING

The country's overall agricultural practice is mostly influenced by a hand few number of market access and few personalities that is controlling the market movement and influencing the pricing and most importantly, the demand and supply of the agri produces in the country.

CLIMATE PRONE

Bangladesh's geographic location and the rise of global warming with climate adjustments is moving ahead which is and will hurt the farmers' productivity that could drop the production level by 15.6% by 2050

AGRI INPUT CONCERN

A lack of quality backed, counterfeit inputs option that is halting the overall growth of productivity, quality and nutritious infused agri produce.

**OUR
SERVICES**

AGRICULTURAL ECOSYSTEM MANAGEMENT

01

Penetrating and curating 6+ markets in Bogura, Bangladesh with sustainable and feasible solutions and approaches, enabling a transparent and impact focused agricultural value chain establishment from collection to market place.

AGRI PRODUCT MANAGEMENT

02

Managing a 40+ portfolio of agri produce via quality assurance, storage, disbursement to the farmers.

BLOCKCHAIN ENABLED SUPPLY CHAIN MANAGEMENT AND CIRCULAR AGRICULTURE

03

Nurturing and improving the channel into a simplified, trackable and tech enabled supply chain management which facilitated a smooth disbursement of 400+ tonnes of agri produces and/or inputs Blockchain-powered platforms for transparent food traceability. We have developed a closed loop system where waste from one stage becomes input for another.

AGRICULTURAL ENTREPRENEURSHIP ECOSYSTEM DEVELOPMENT AND MANAGEMENT

04

Crafting a niche and unique market and business model that will enable and facilitate scope for investment, business development and establishment, operations and process management, supply chain management, investment readiness and market access consultancy, ensuring that a significant number of trained farmers opt for entrepreneurship.

AGRICULTURAL TRAINING AND DEVELOPMENT

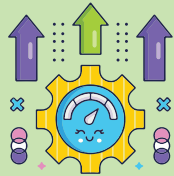

05

Designing and conducting the training and learning module for 3000+ farmers with the aim to inject innovation, financial and business literacy, entrepreneurship pros and impact enableness and establishment.
