

Company Profile

Introducing TechnoNext

TechnoNext Limited is a Fintech & Software Development company that specializes in providing Payment Gateway solutions to businesses of all sizes. It is a sister concern of the US-Bangla Group, a leading business conglomerate based in Bangladesh. TechnoNext is fully customizable and can be tailored to meet the unique needs of its clients. It offers a variety of payment options, including credit cards, debit cards, net banking, and mobile wallets. It is committed to providing excellent customer service and support and is constantly innovating and improving its services to ensure that its clients have access to the latest payment processing technology and software solutions.

Background Of TechnoNext

TechnoNext is a Fintech company that is a sister concern of the Us-Bangla Group, a leading conglomerate based in Bangladesh. The Us-Bangla Group has a strong presence in a range of industries, including aviation, real estate, and hospitality, and has a reputation for excellence and innovation.

As a Fintech company, **TechnoNext** leverages the expertise and resources of the Us-Bangla Group to provide a reliable and secure payment processing solution to merchants in Bangladesh. Our payment gateway system offers a range of features, including easy integration with merchant systems, advanced fraud detection, and support for multiple payment methods.

At **TechnoNext**, we are committed to providing exceptional customer service and support, ensuring that merchants can easily onboard and start accepting payments quickly and efficiently. Our team of experienced professionals is dedicated to ensuring that our payment gateway system is secure and reliable, providing merchants with the peace of mind they need to focus on growing their business.

With the backing of the Us-Bangla Group, **TechnoNext** is well-positioned to become a leading payment gateway company in Bangladesh and the wider region, offering merchants a secure, reliable, and user-friendly payment processing solution that helps them to increase sales and improve customer satisfaction.

US-Bangla Group

TechnoNext Management

Dilruba Parvin
Managing Director (TechnoNext LTD.)

Dilruba Parvin is a prominent businesswoman and the Director of the **Us-Bangla Group**, a leading conglomerate in Bangladesh. She completed her education in B.S.C (Honours) and obtained the degree of Master of Science in Applied Chemistry and Chemical Technology and Placed in 1st class.

Dilruba Parvin started her career with the Us-Bangla Group in 2010 and has since played a key role in the company's growth and success. She has been involved in various aspects of the group's operations, including finance, marketing, and human resources.

Under Dilruba Parvin's leadership, the Us-Bangla Group has expanded its business interests to various sectors, including aviation, hospitality, real estate, education and leather goods. The company has also achieved significant milestones, such as becoming the largest private airline in Bangladesh and establishing a network of international destinations.

Apart from her role in the Us-Bangla Group, Dilruba Parvin is also actively involved in various philanthropic initiatives, including supporting education, health, and community development projects in Bangladesh.

Dilruba Parvin is a well-respected business leader in Bangladesh and has received several accolades for her contributions to the country's economy and society. Process Flow Of TechNonext

General Analysis and Requirements Gathering

General Analysis involves a high-level review of the project goals, constraints, and opportunities, Requirements Gathering is the process of collecting and analyzing information about the project requirements.

1

Testing & Deployment of the Product

Testing and Deployment are the final stages in the software development process where the software is evaluated for quality and prepared for release. Testing involves executing a series of tests to validate that the software meets its functional and non-functional requirements and identifies any issues that need to be addressed. Deployment involves the release of the software to the production environment, where it will be used by end-users.

3

2

Product Design and Coding

Product Design and Coding are two key stages in the software development process, where the software is transformed from a concept into a functional product. Product Design involves creating a visual representation of the software and defining its functionalities, user interfaces, and user experiences. Coding involves writing the actual code for the software, using programming languages and development tools.

4

Product Delivery and Maintenance

It involves ongoing efforts to improve, enhance, and maintain the functionality and performance of a software product after its initial release. This can include fixing bugs, adding new features, improving performance, and addressing security concerns, among other things. Product Maintenance is critical to ensuring that the software remains relevant and effective over time and that its users continue to have a positive experience.
