Our References

Engineering a Cutting-Edge POS System for Restaurants

We developed an innovative POS system for restaurants, integrating advanced AI features and promotional campaign capabilities. Our solution streamlined operations and enhanced customer engagement, meeting the needs of a rapidly evolving market.

We continue to add new features, including AI-driven analytics and personalized customer experiences, while maintaining a cohesive design across all digital touchpoints.

Image recognition used in a style search & social media app

By using Google's Cloud Vision image analysis and applying the image recognition technology to clothes, a mobile app, was developed. It allows users to upload photos of clothes and be matched with similar styles from the site. The app also functions as a social media platform.

Throughout the process, our client will identify similar garments from the vendor and purchase items immediately through the app.

Scaling Global Operations: Monstarlab's Successful 12-Entity Oracle NetSuite Implementation in Just 6 Months

Monstarlab, a global leader in digital transformation and development, faced the challenge of efficiently managing its rapidly growing global entities. With operations spanning multiple regions, the company required a robust and scalable solution to centralize and streamline business processes across all its entities.

Within just 6 months, we successfully implemented Oracle NetSuite for 12 of Monstarlab's global entities. This comprehensive ERP solution has enhanced their financial consolidation, improved cross-border reporting, and facilitated better control over operational workflows. The rapid and seamless implementation empowered Monstarlab to centralize operations, enhance real-time data insights, and foster better collaboration across teams worldwide. With Oracle NetSuite, Monstarlab now enjoys streamlined operations across regions, preparing the company for continued growth and ensuring global scalability with efficiency.

Empowering Agri-Business Growth: How iFarmer Optimized Operations and Maximized Profits with NetSuite

iFarmer, a company dedicated to supporting small-scale farmers and Agri businesses, was facing challenges in managing its growing operations and ensuring seamless business processes. To address these challenges, we implemented NetSuite—a comprehensive cloud-based ERP solution that has significantly transformed their business operations.

With NetSuite, iFarmer has streamlined inventory management, improved financial reporting, and gained real-time visibility into their entire supply chain. The solution has enabled them to better track investments, reduce operational inefficiencies, and support their mission of helping farmers maximize profitability.

By integrating NetSuite, iFarmer is now equipped with the tools needed for scalable growth, offering their team enhanced collaboration and data-driven decision-making capabilities, all while contributing to a more sustainable agricultural business model.
