Our Membership

Kendroo Limited is a BASIS Associate Member (AS-26-02-036) since February 5, 2026, with membership valid until December 31, 2026. This membership reflects Kendroo's active involvement in Bangladesh's ICT industry and its commitment to contributing to the growth of the country's software and technology ecosystem. Through BASIS, Kendroo connects with industry leaders and supports innovation in digital transformation.

Our Technology Partner

Kendroo Limited collaborates with leading technology providers such as Hikvision and Tipsoi to deliver reliable device-integrated solutions. Through these partnerships, Kendroo integrates advanced hardware like access control systems, surveillance devices, and smart security equipment with its software platforms to ensure seamless automation and monitoring. This collaboration enables organizations to enhance security, improve operational efficiency, and build smarter, technology-driven infrastructures.

HEALTHCARE

Kendroo's Hospital Management System is a comprehensive digital solution designed to streamline clinical, administrative, and financial operations within healthcare institutions. It integrates patient records, doctor management, appointments, prescriptions, and billing into a single unified platform. By automating hospital workflows and improving data accessibility, Kendroo enables healthcare providers to deliver efficient and high-quality patient care.

- **Patient Management**
- **Doctor Management**
- **Appointment Scheduling**
- **Electronic Medical Records (EMR)**
- **Prescription Management**
- **Laboratory Management**
- **Pharmacy Management**
- **Billing & Accounting**
- **Nurse & Ward Management**
- **Reports & Analytics Dashboard**

EDUCATION

Kendroo's School Management System is a comprehensive digital solution designed to simplify and automate academic and administrative operations in educational institutions. It integrates student records, attendance, examinations, fee management, and staff administration into a single unified platform. By streamlining workflows and improving data accessibility, Kendroo enables schools to operate more efficiently and deliver better educational services.

- **Student Management**
- **Teacher Management**
- **Class & Section Management**
- **Attendance Management**
- **Timetable Scheduling**
- **Examination & Grading System**
- **Fee Management**
- **Library Management**
- **Transport Management**
- **Reports & Academic Analytics**

MANUFACTURING

Kendroo's Manufacturing Management System is a smart digital solution designed to streamline production, inventory, and operational workflows in manufacturing industries. It integrates production planning, work order management, inventory tracking, machine monitoring, and quality control into a single unified platform. By automating manufacturing processes and providing real-time insights, Kendroo helps factories improve productivity, reduce costs, and ensure efficient production management.

- **Production Planning Management**
- **Work Order Management**
- **Bill of Materials (BOM) Management**
- **Inventory & Raw Material Tracking**
- **Machine & Equipment Monitoring**
- **Quality Control Management**
- **Manufacturing Order Management**
- **Supply Chain & Procurement Management**
- **Maintenance Management**
- **Production Reports & Analytics**

REAL ESTATE

Kendroo's Real Estate Management System is designed to simplify property management, sales, and client interactions for real estate businesses. It integrates property listings, customer inquiries, lease management, and financial tracking into a single centralized platform. By digitizing property operations and improving data visibility, Kendroo enables real estate companies to manage properties efficiently and enhance client service.

- **Property Listing Management**
- **Client Management**
- **Lease & Rental Management**
- **Property Sales Management**
- **Property Inventory Tracking**
- **Contract & Document Management**
- **Commission Management**
- **Property Maintenance Tracking**
- **Payment & Invoice Management**
- **Real Estate Reports & Analytics**

INTERNET SERVICE PROVIDER

Kendroo's ISP Management System is a powerful platform designed to manage broadband services, customer subscriptions, billing, and network operations efficiently. It integrates customer management, bandwidth allocation, billing automation, and network monitoring into a single platform. By automating ISP workflows and providing real-time network insights, Kendroo helps service providers deliver reliable internet services and improve operational efficiency.

- **Bandwidth Allocation Management**
- **Internet Package Management**
- **Automated Billing System**
- **Network Monitoring**
- **Customer Support Management**
- **Service Activation & Suspension**
- **Payment & Invoice Management**
- **Usage Monitoring**
- **Subscriber Management**
- **ISP Reports & Analytics**

FINANCE & BANKING

Kendroo's Banking Management System is designed to manage financial transactions, customer accounts, and banking operations securely and efficiently. It integrates account management, loan processing, payment systems, and financial reporting into a single centralized platform. By automating banking workflows and enhancing financial transparency, Kendroo enables banks to deliver faster, safer, and more reliable financial services.

- **Customer Account Management**
- **Transaction Management**
- **Loan Management**
- **Deposit Management**
- **Payment Processing**
- **Risk & Compliance Management**
- **Credit Management**
- **Financial Reporting**
- **Fraud Detection Monitoring**
- **Banking Analytics Dashboard**

TRANSPORTATION

Kendroo's Transportation Management System helps organizations efficiently manage logistics, vehicle operations, and delivery processes. It integrates fleet tracking, route planning, shipment management, and operational monitoring into a single platform. By optimizing transportation workflows and providing real-time tracking insights, Kendroo helps businesses reduce costs and improve delivery efficiency.

- **Fleet Management**
- **Vehicle Tracking**
- **Route Optimization**
- **Shipment Management**
- **Driver Management**
- **Fuel Management**
- **Delivery Scheduling**
- **Maintenance Tracking**
- **Logistics Reporting**
- **Transportation Analytics Dashboard**

TELECOMMUNICATION

Kendroo's Telecommunication Management System is designed to manage telecom services, customer subscriptions, billing operations, and network performance efficiently. It integrates service provisioning, subscriber management, billing automation, and network monitoring into a unified digital platform. By streamlining telecom workflows and improving service monitoring, Kendroo helps providers deliver reliable communication services.

- **Subscriber Management**
- **Telecom Service Management**
- **Billing & Invoice Management**
- **Network Monitoring**
- **SIM & Package Management**
- **Customer Support Management**
- **Usage Tracking**
- **Service Activation & Deactivation**
- **Telecom Revenue Management**
- **Telecom Analytics Dashboard**
