Company Overview

NeosCoder is a comprehensive technology solutions provider offering a diverse range of software and hardware services to meet the evolving needs of modern businesses. As a limited company operating under the AKij Venture LTD umbrella, NeosCoder established in **October 2024**, combines innovation with reliability to deliver end-to-end IT solutions.

With a clear focus on **“Affordable Innovation for Bangladesh and Beyond,”** our diverse service portfolio includes **UI/UX design, web development, mobile app development, game development**, as well as **managed IT services, network infrastructure, maintenance, and consultation**. In addition, NeosCoder develops cutting-edge **SaaS products**, streamlining operations for clients across industries.

We believe in making smart technology accessible to all, guided by our motto: **“Smart Tech. Small Price.”** Whether it’s building intuitive digital experiences or maintaining complex IT environments, NeosCoder serves as a comprehensive tech partner for organizations seeking innovative, future-ready, and budget-friendly solutions.

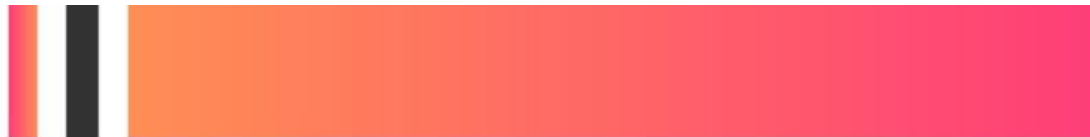

Mission:

To deliver affordable and accessible data-driven software solutions that help businesses and communities in Bangladesh and beyond grow, manage, and thrive—without breaking the bank.

Vision:

To become the go-to tech partner for cost-effective digital transformation, making smart tools available to everyone, from startups to enterprises, with a focus on quality, affordability, and impact.

NeosCoder—where technology meets purpose, and innovation meets affordability.

Area of Business Activity

NeosCoder operates across multiple domains within the ICT and ITES sectors, delivering innovative, scalable, and value-driven solutions. Our key areas of business activity include:

Software Development

Custom software solutions tailored to meet specific business needs across various industries.

Mobile App Development

Development of user-friendly and high-performance mobile applications for Android and iOS platforms.

Web Application Development

Robust, secure, and scalable web applications designed to optimize user engagement and business efficiency.

IT Consultancy

Expert guidance and strategic consultation to help businesses make informed technology decisions and streamline operations.

Managed Services

Comprehensive IT support and infrastructure management services to ensure uninterrupted business continuity.

Managed Network

Comprehensive IT support services, encompassing system monitoring, maintenance, and on-site technical assistance. As part of our managed services, we also supply **essential hardware**—including desktops, laptops, monitors, keyboards, mice, headsets, USB devices, and more—ensuring your workforce is fully equipped for seamless operations.

SaaS Products

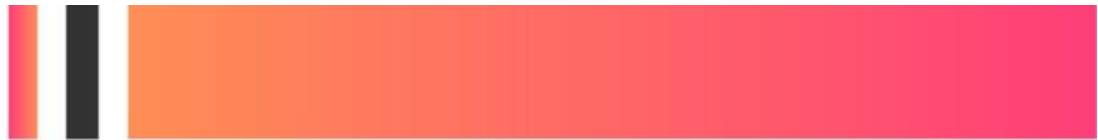

Development and deployment of Software-as-a-Service (SaaS) solutions that provide businesses with accessible, cloud-based tools to enhance productivity and performance.
