

Hawar Information Technology bv is a Dutch company who was outsourcing to ERP Systems Limited, a Bangladeshi company since 2000. After eight years of successful outsourcing we established a new joint venture company since 2008 and ERP Systems Limited renamed to HawarIT Software Services limited. The joint-venture company HawarIT Bangladesh limited established with two production houses- HawarIT Software Services Limited and HawarIT Data Services Limited in Bangladesh with the ambition of delivering quality IT services to international arena.

We believe in commitment, integrity, and long term relationship with our clients. We have earned offshore project management skills through working with different international clients. We measure project as a successful if and only if, the project can add some value to our clients. We have been delivering various successful offshore IT projects since 2000.

Target Customer Segment:

Since our establishment, we have completed successfully several IT and ITES projects. Most of our Senior Developers have visited Netherlands and worked at least 3 months at customer side which builds confidence of both side. So we can offer our customer for onshore and offshore development. We can also support for medium & large software development companies who want to outsource their main software development to concentrate more on business development and implementation issues. We are specialized in **CAD/GIS tools & techniques, dotNET, JQuery, ExtJS** and **Mobile technologies** like **Sencha touch, and Android**. We can run large-scale (100 or more developers) projects through consortium.
