Mission:

To provide our customers with world class IT consulting, web and software development- and to have fun doing it. The mission of Winux Soft is to provide professional, high quality software development tools and utilities for various systems, and to provide consulting and technical services to assist clients in developing and maintaining computer-based solutions to meet their business needs.

Vision:

Our vision is to continually expand and improve our software products and mentoring services to enrich, inspire and invigorate product development and marketing teams, enabling them to more successfully compete in a highly dynamic global economy.

We will increasingly enhance the collaboration of cross-functional product development and marketing teams to greatly increase their ability to meet customer needs, thereby implementing more successful product launches.

Who we are?

Winux has established in 1998 at the beginning of this millennium. In accordance with the company's mission and vision, Winux had launched its operation with the highest standards for client-service in Information Management Solution. Within a very short time span, Winux has established itself software solution provider in the field of Information technology. Four major components played key roles behind the outstanding performance track of Winux - uncompromising quality, acid-tested reliability, and utmost confidence with the clients and humane attitude in solutions.

What we do?

Winux Business Systems is a total software solutions and network solutions provider. At the hub of our business is our service and technical issues are performed by our team and supported by fully trained computer and communication technicians and experts. Thus, we can ensure any Information Technology based solution specially customized for you and your business.

Winux is currently offering its services to corporate as well as individual clients in the following areas:

- Project Consultancy for Information System
- Development of Information System
- Development of customized Software
- Development of Web Services
- Provide E-mail Marketing
- Implementation of electronic commerce
- Implementation of Network facilities
- Consultancy for Network Maintenance
- Multimedia Brochure

Web Development:

Winux Soft Ltd. is a leading web design company, is on the cutting edge of creative and technical online ingenuity. Our web site designers are highly skilled and eager to do customize web development for your company! Our web page design team can take your business and ideas to the world with our customized multimedia and flash web design, allowing your customers to reach you at any time of day, giving your company the cutting edge needed to cut through the competition. We are one of the few web page design firms built on the experience of artists, web designers, animators, marketers, and programmers that can provide the level of quality needed to meet any web development challenge. We make it our business to market your business.

Contact us for customized web site design information. Whether it be a personal home web design, or a corporate flash web design requiring complicated programming, numerous pages, and several web services such as animation, real audio/video, or internet site hosting and so on.

Email-based Software Development:

Today virtually all-new solutions are required to have Web interfaces. Our Web team is developing solutions for companies ranging from multi-national Customer Relationship Management (CRM) companies to world's largest ad networks.

Email Marketing:

Email is consistently rated as the most popular and most used application on the Internet. Indeed, some people only use email and do not browse the internet at all.

Email marketing has low cost, high response rates, measurable results, and gives immediate feedback.

It will save you money, drive site traffic, build loyalty, increase brand awareness, create sales, and improves customer service and retention.

HTML Email marketing offers an easy to use, powerful and cost effective Email Marketing service for business and marketing professionals. It can help increase sales revenue and offer better customer services.

You can choose a pre-made HTML Email Template (from a template library). Simple editing allows your company to create an attractive digital catalogue (HTML email or newsletter). No HTML skills required. If you need special template designs just for your company, our customization template service is ready for you.

Copying can create on-line list database and pasting lists from your address book, or by our upload services. You can access and manage your on-line database anytime, anywhere. There is no limitation to your business expansion. A ready to use Web Site Visitor Email List Builder is prepared for your site. Your visitors can subscribe to your newsletter from the email List Builder. Subscriber information will be automatically added to your on-line database. You can now send your subscribers information.

Promotion will be started according to your pre-scheduled date. It will automatically deliver a personalized, attractive HTML email directly to your targeted customers. Response results and ROI will be updated immediately

Winux Soft opt-in mail list is **100% safe**. We do not believe in SPAM. Be very careful to use bulk mail list which may consider SPAM and illegal. Unlike Spam (UCE, unsolicited commercial e-mail), our e-mail is sent to lists of people who authorized us to send the mail and also want to hear from you. Our opt-in list members pay special attention to your messages.

Our strengths

1. High quality product with reliability
2. Justified price
3. 24 Hours /7 Days in a week access to our customer service facilities

Our Clients

By this way we are dedicated to maintain our business relationship with you and your organization.

Service Variety:

Application Design and Development

Our capabilities in designing, developing and implementing new business systems are unrivalled in the industry. These capabilities are the key focus of our company and we have an outstanding track record in delivering them.

IT Architecture and Consulting

One of our key success factors is our ability to design architectural solutions that set quality frameworks for applications to be built upon.

Web Content Management

We have extensive experience in designing and developing websites, be it an internet, intranet or extranet site, and managing robust content management solution for these sites. Our focus is in integrating content management solutions, security aspects of the site, and search engine optimization.

CRM

As an accredited Siebel Partner, Expert can offer CRM solutions 'out of the box', which we will tailor to meet your specific needs. Expert's extensive experience in Enterprise Integration Architecture will ensure that your Siebel solution interfaces to your legacy or back-of-house systems.

Business Intelligence and Data Warehousing

We can assist at any stage of your Business Intelligence and Data warehousing project, from design, development, implementation and support. We have expertise in a range of leading software technologies.

Workforce Planning and Management

Our workforce planning and management solution is a set of flexible and customizable solutions to solve part of, or your complete workforce planning and scheduling needs.

Database Services

We can provide scheduled, proactive and reactive Database Services, or a combination of these, based on the specific needs of your organization.

Where you want to go today?

Ocean of opportunities is at your finger strip. We are ready to support you to make your opportunity into real success. Buying a computer is not your information solution. It is your investment. If you take care of us we will take care of your investment. Our aim is to maintain stable information system what you want or expect.

- **WINUX Customer Support:**
  - We know that our success depends on excellent customer support! In this fast paced world, changes need to be made quickly, communication and information exchanges need to be efficient and customers need easy access to important statistics.

    Winux Soft Ltd has built a solid reputation for providing professional and personal service to our customers. Our customer support department keeps this strength in mind, while trying to increase your productivity by providing you with the proper support and information.
