

HOW TWCM WORKS

ADVANCED EDITOR

SAMPLE WEB SITE

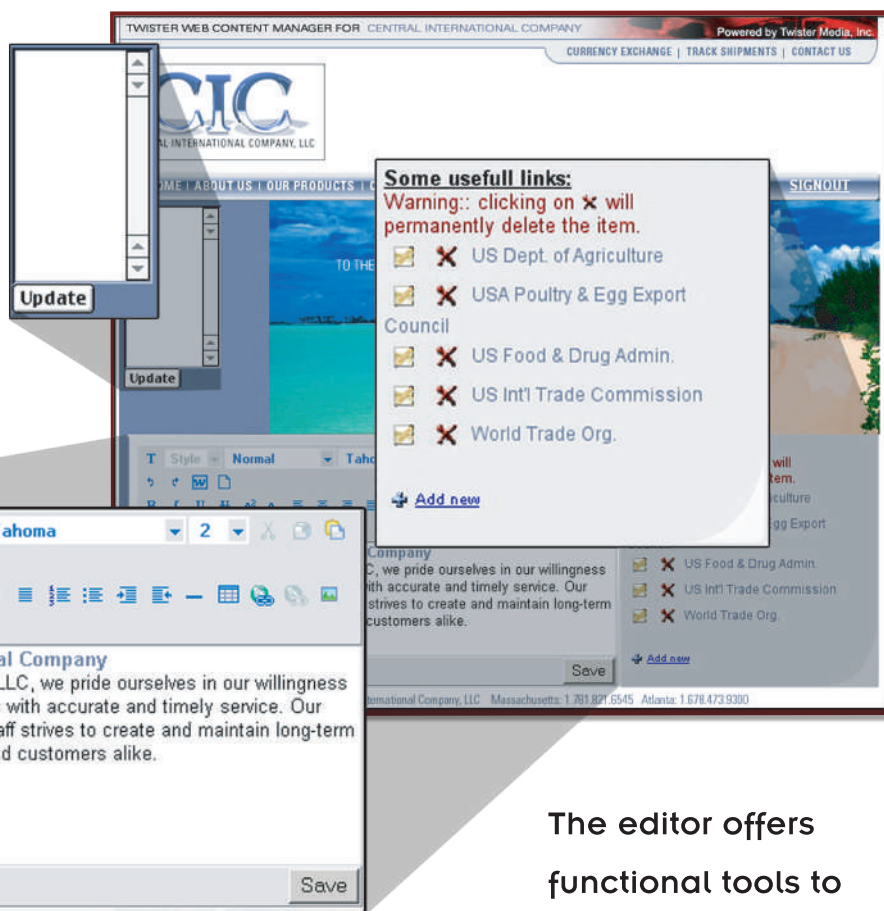

This is a typical database driven site with member/intranet access

SITE'S TWCM

Administrator Panel

TWCM lays out your admin panels the same as your content is. Simplify the editing process - no guessing where your content will end up.

The editor offers functional tools to update your content - if you are familiar with Microsoft Word, this is easier.

- Add links, change the font, size, style, color and position of your text
- Align text and paragraphs, create tables for advanced text layout
- Paste text from Word and other text editors
- Add and manage images, zipped, Word and Acrobat PDF documents
