About Us

Well, it isn't about us, it's about you. And we help bring value to your business needs.

Cloudly is the cloud-native services company, leading the most complex technology projects in the world. We leverage the innovative capabilities of the cloud to help customers build new revenue streams, increase efficiency, and deliver incredible experiences. As a Consulting Partner, our unmatched expertise with AWS means we've been there, done that, and bought the t-shirt. We focus on results (not PowerPoints) as we help our customers uncover new possibilities to put them on the leading edge of innovation in their industry.

Our Cloud Services

The cloud is a managed service, but it isn't managing itself. Elevate your cloud to new heights with services built for the complex multi-cloud world. Our integrated approach to cloud data management and storage helps you get the day-to-day tasks right and take charge.

DevOps Services

A successful DevOps model is based on four key building blocks Develop, Build and Test, Deploy, Operate and Monitor.

Cloud Integration

Companies who use cloud integration have synchronized data and applications, improving their ability to operate effectively and nimbly.

Managed Services

A perfect cloud-managed service provider can address the above, and many such concerns required for effective cloud infrastructure management.

Cloud Modernization

we'll help modernize your application that improves agility while reducing costs and tech debt.

Industries We Serve

Cloudly is the cloud native services company, leading the most complex technology projects in the world. We leverage the innovative capabilities of the cloud to help customers build new revenue streams, increase efficiency, and deliver incredible experiences. We have served different industries with different cloud solutions.

Healthcare

Education & E-learning

Retail

Software Companies

Media & Entertainment

Banking & Finance

Our Clients

We Have Worked With Some Amazing Companies Globally

We deliver exceptional technology solutions for world-class businesses in every business industry from dynamic startups and SMBs to Fortune 500 companies. You can see some of our clients here.

Our major USPs are:

- 750+ Successful projects
- 97%+ Customer satisfaction rate
- 250+ Global clients
- 50+ Cloud Engineers

DevOps Services

Application Delivery and Operational Efficiency at High Velocity

DevOps helps organizations align development and operations teams to improve the quality of code, undertake continuous integration, and deliver faster. Cloudly, a leading DevOps consulting company, can enable continuous delivery pipeline across the cloud platforms for faster time-to-market at reduced costs.

www.cloudly.com.bd

Fast and speedy execution

DevOps enables rapid development, testing, and release. It also automates workflows, hence, develops with an exceptional edge and incredible speed.

Improved effectiveness

DevOps consulting companies help you with the automation of deployments and testing, and also add greater values to your business.

Efficiency in operations

DevOps speeds up release cycles by identifying and eliminating wasteful processes. This speeds up the flow of value, having a positive impact on costs.

DEVOPS BENEFITS-

Increased Agility - Deploy 200x more frequently with 2,555x faster load times.

Reduced Effort - Save 22% time on unplanned work and rework.

Enhanced Security - 50% less time spent on remediating security issues.

Stability - More stable operating environments.

Managed Services

Manage, Optimize and Enhance Cloud Efficiency

Cloudly offers a customized, cost-effective, and sound business strategy to help you stay relevant in a highly competitive market. we help you develop a fresh perspective and adapt an organizational mindset for establishing critical business applications and meeting business objectives.

WHY CLOUD MANAGED SERVICES?

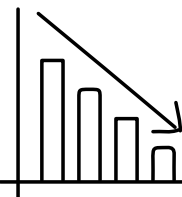

Rise of operational risks

Finding the right fit while choosing a Cloud MSP is important – Any failure in this aspect can cause serious operational risks in your processes working on cloud infrastructure and halt the functioning of revenue-generating models such as sales and supply chains.

Rise of security risks

Applications running on the public cloud pose more vulnerability to cloud-security risks. Considering this fact, it is essential to have the right security strategy in place to avoid such risks.

Less Value

Lack of the right service support can make your cloud shift expensive and may often take more time than expected resulting in additional costs.

MANAGED SERVICES BENEFITS–

- **Robust Infrastructure**
- **Service Level Agreements (SLA)**
- **Quick Response Time**
- **Planned Investment**
- **Timely Updates**
- **Centralized Services and Applications**
- **Data Safety and Recovery**
- **Interfacing**
- **Maintenance**
- **Integrated Services**

Cloud Integration

Rethinking people, Processes, Technology and Architecture

Integrate public cloud and on-prem storage, easily, without additional software layers. Whether your objective is DR in the cloud, archival storage in the cloud, or content distribution, Cloudly makes it simple. With the industry's most compatible S3 API and multi-cloud support for AWS, Google GCP, and Microsoft Azure, you can manage and search a single view of information that spans your cloud and on-prem environments.

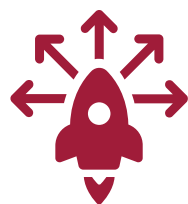

Solve hybrid or complex integration

Solve hybrid or complex integration issues and connect any combination of on-premise or cloud applications within or across your organization.

Lower integration costs & Enable auto-scalability

Lower integration costs, with no hardware, maintenance, or overhead costs. Enable auto-scalability to swiftly meet expanding demands, both horizontal and vertical, with minimum infrastructure and storage.

Strengthen data management & Deploy quickly

Strengthen data management to effortlessly eliminate manual processes during validation and enrichment of the data. Deploy quickly to achieve ROI faster by enabling short development and deployment cycles.

www.cloudly.com.bd

CLOUD INTEGRATION BENEFITS-

An end-to-end solution - Use a low-code platform and an easy interface, with readily available connectors to reduce the time for development, implementation, and deployment.

Unrivaled cost savings - Leverage a cloud hosting model for enabling cost reductions at short timeframes, with auto scalability to better manage resources during peak or slow periods.

Seamless onboarding - Accelerate partner and vendor onboarding while streamlining data exchange to reduce the cost of operations and make the collaboration more effective.

Accelerated business delivery & Self-service facility - Enable accelerator-based development and boost your go-to-market efficiency through multiple integrations in a hybrid environment. Make your business users more efficient through automated workflows and reusable data management processes, as well as cutting-edge BI tools for smarter decision-making.

Cloud Modernization

Agility, Cost optimization and faster time-to-delivery with Cloud Modernization

Go beyond tactical solutions to create a proven and lasting strategy for your application migration. Pivotal Labs teaches you how to modernize your most business-critical apps first and rapidly make impactful architectural improvements. We'll help you start small, and scale fast.

5x Increased Cloud Adaptability

Cloud Adaptability allows your employees to be more flexible – both in and out of the workplace.

70% increase in ROI

Cloud computing allows your business to easily upscale or downscale your IT requirements as and when required.

Protecting your revenue and reputation 24/7

Just After Midnight specializes in providing full-stack 24/7 and out-of-hours support. Covering your infrastructure, application, and 3rd party integrations. Support calls are always answered by real people and we provide resolution and post-incident reporting.

CLOUD MODERNIZATION BENEFITS–

Start small – We'll get to work using targeted analysis to determine an ideal set of apps with low technical risk and high business value to start with.

Learn sustainable practices – As we move those refactored apps into production, you'll build a cookbook of patterns to streamline and accelerate future migrations.

Break down big apps – Transition monolithic systems into microservices that can boost feature velocity across your development organization.

Automate everything – Identify waste in your development workflow and replace manual processes with automation to improve outcomes.
