Who we are: IT Solution Company

N2sys is an IT Solution Company formed in the year 2003 built on a strong reputation for quality service delivery in the IT sector. N2sys is dedicated to building long-term relationships with customers through quality training and customer support and wants to be recognized as the leading IT Company not only in Bangladesh but also in Asia. Our success lies in our unwavering commitment of never stopping to deliver innovative & dependable products; provide responsive & reliable service; doing whatever it takes to satisfy our customers need.

We have worked closely with professional institutions providing extensive business solutions, from supplying them with computers, networking and building business software customized to their individual specification.

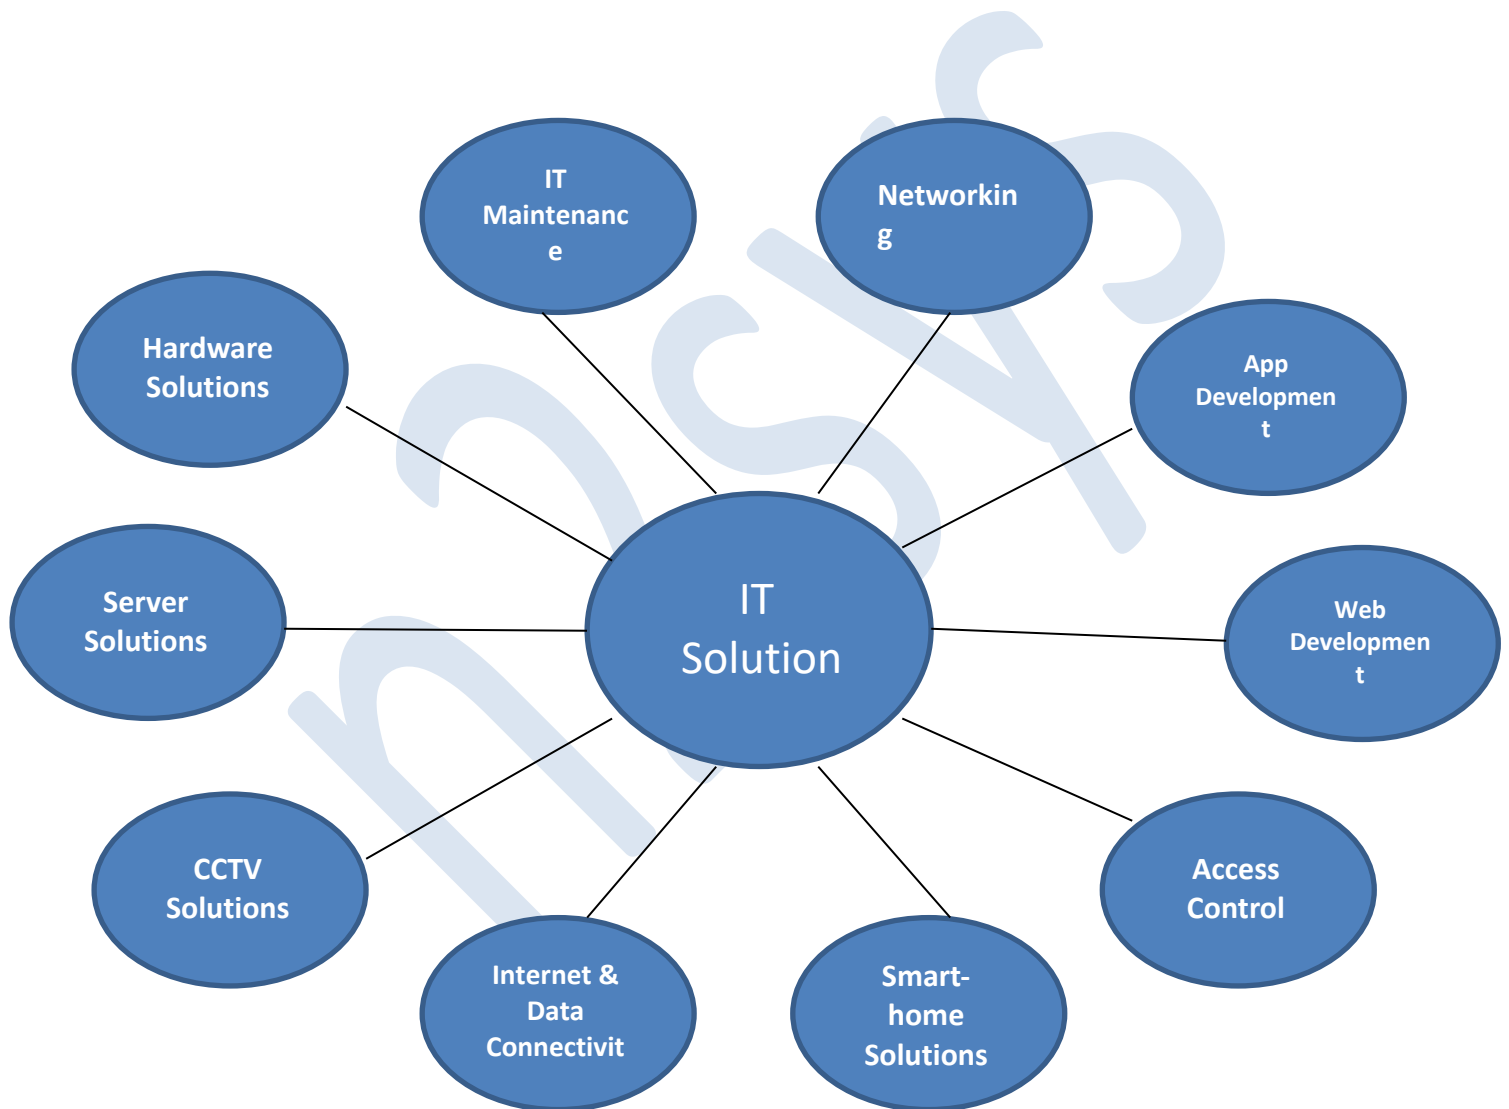

What we do: We do Amazing Things

We take responsibility to automate your organization. To atomize your organization we do whatever the requirement comes from the business analysis to best fit your budget, organization and business. Our IT support and Maintenance service proved us outstanding in the market.

CCTV Solution

Closed-circuit television (CCTV), also known as video surveillance, is one of most advanced security system of modern technology. CCTV is commonly used for a variety of purposes, including crime prevention, industrial processes, traffic monitoring, transport safety and management of any institutions. Ensuring that your CCTV system operates as a profit center for your business is foremost in our mind. Therefore our team will design & install a system that provides you and your business with the benefits you need to enhance your profits while protecting you against loss and potential loss.

Access Control

In the fields of physical security and information security, access control is the selective restriction of access to a place or other resource.

N2sys always delivers best assistance and guidance to the customers and our access control solutions range from single door stand-alone system to a multi door access system or fully-featured integrated solutions for controlling access to multiple facilities with complex requirements. We deliver every type of access control system including biometric.
