Web Design & Development

We are expert of creating appreciable and intact website

Web development services help your company to increase product knowledge, maintain communication between you and potential clients, sell your products or services, generate leads for the business, and increase the popularity of your company and much more.

Website design and development is our core service at Virtuanic Solutions. We are expert of creating great and intact website from scratch to a full furnished product.

Website Registration

We provide 100% domain ownership and control panel for domain management.

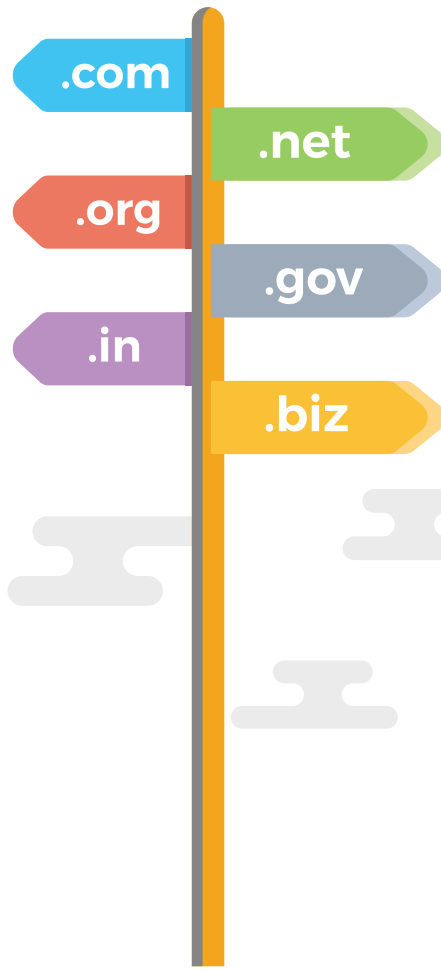

Website registration or Domain registration is the most important aspect in any business. It's where your brand lives and conducts business. Having your own domain name makes your company look professional. More than anything else, a domain name can increase awareness of your brand.

If your domain name matches your company name, it reinforces your brand making it easier for customers to remember and return. It will also be easier to win business via word of mouth because customers will remember your name and pass it along to

friends. Register your website name with Virtuanic Solutions and take advantage of our incredible prices. You can register any Top Level Domain 24/7 from us within few minutes.

We provide 100% domain ownership and control panel for domain management. Every day lots of domain is registered online. You should register

your company domain name as early as possible before someone else register it.

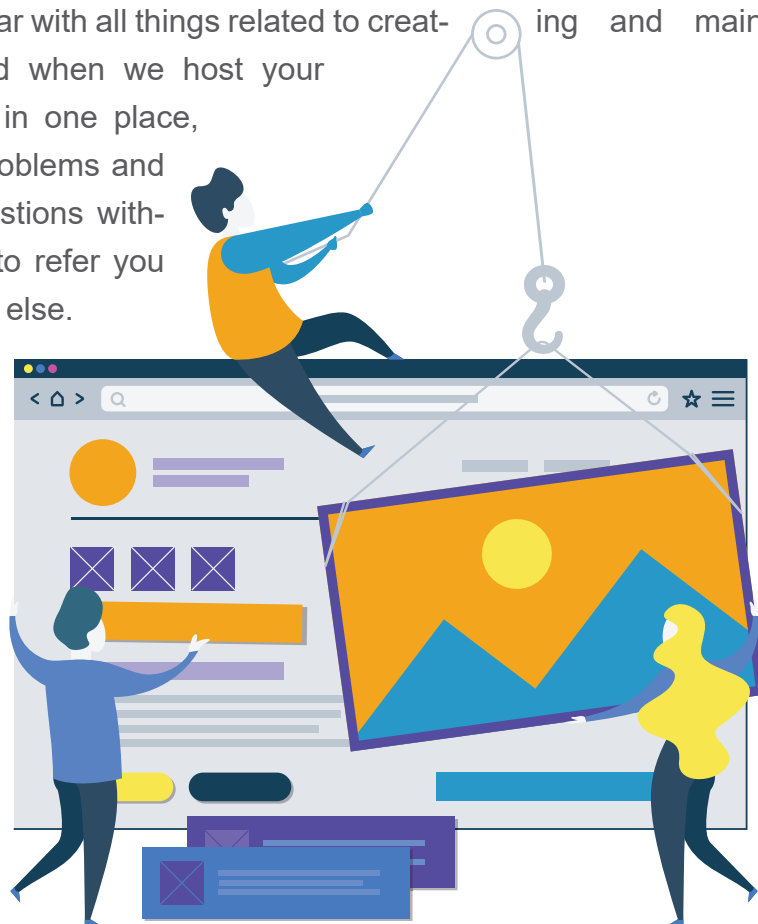

Website Hosting

We solve problems without having to refer you to someone else.

Website hosting is basically where your website lives. Your website's data and files are stored on a remote server, or a host, where your content is made available to you and your customers through a web browser.

If your web hosting and domain service provider is based on the other side of the world, it can present a problem if your site is having technical issues. Selecting the right web hosting company is one of the most important tasks you have to perform when working on your website.

We're familiar with all things related to creating and maintaining your website and when we host your information in one place, we solve problems and answer questions without having to refer you to someone else.

Wordpress Theme Development

We improve to your website's by good themes in addition to being beautiful.

A WordPress Theme is a collection of files that work together to produce a graphical interface with an underlying unifying design for a weblog.

These files are called template files. A Theme modifies the way the site is displayed without modifying the underlying software.

WordPress themes are incredibly powerful. But, as with every web design project, a theme is more than color and layout. Good themes improve engagement with your website's content in addition to being beautiful.

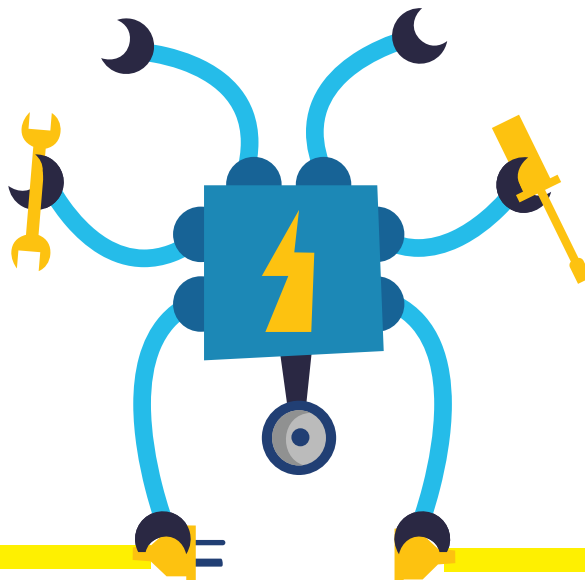

Website Maintenance

We deliver your project on time, on budget and with exceptional customer service.

A well-maintained website attracts new customers and maintains interest levels of existing customers, making your website the most beneficial for all users.

Our website maintenance and website support services can provide you with ongoing, reliable and affordable website solutions, delivered in a timely and professional manner. We deliver your project on time, on budget and with exceptional customer service.

Search Engine Optimization (SEO)

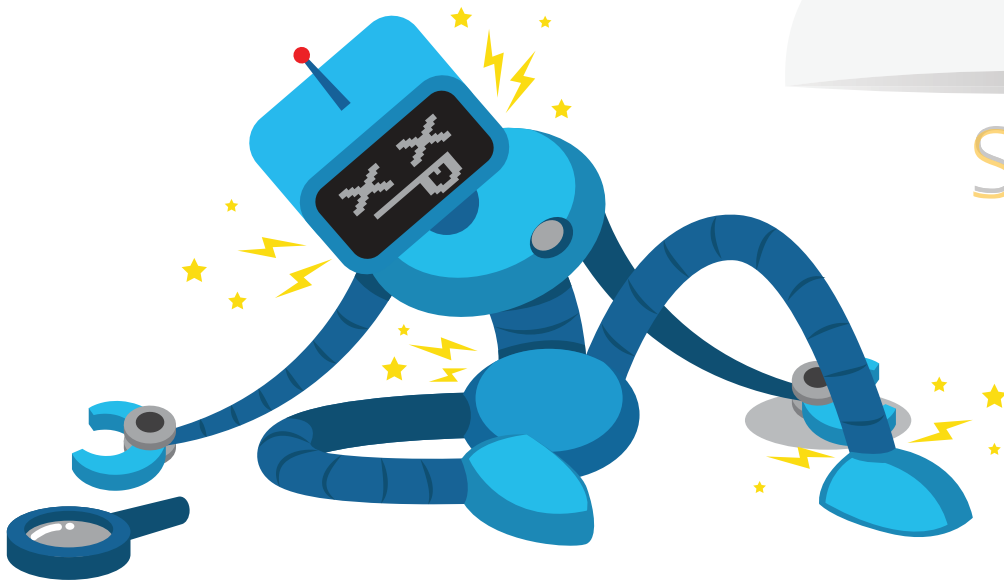

We put together a plan of action to ensure that each website is given a chance to succeed.

In today's competitive market, SEO marketing is more important than ever. Search engines serve millions of users per day looking for answers to their questions or for solutions to their problems.

We put together a plan of action to ensure that each website is given a chance to succeed. We believe search engine optimization is not a "one-size fits all" situation; each of our SEO campaigns are built specifically with that client in mind.

SEO

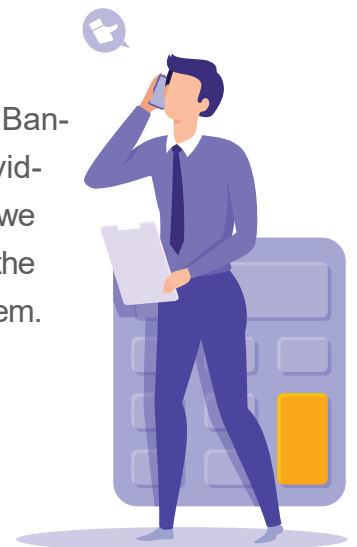

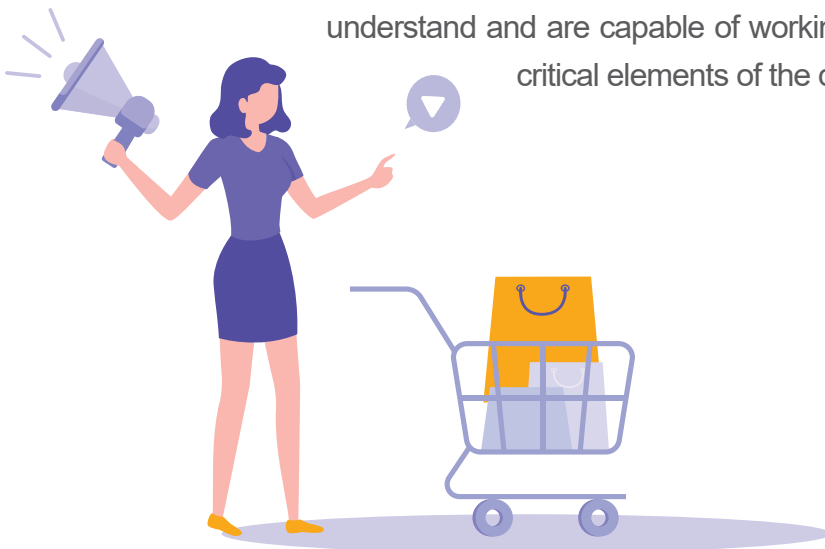

Digital Marketing

We understand and are capable of working on each of the critical elements of the digital eco-system.

Digital marketing is the marketing of products or services using digital technologies, mainly on the Internet, but also including mobile phones, display advertising, and any other digital medium.

A small business needs to save up on its resources before it finally goes into the green zone and starts making profits. Digital marketing gives you the scope to reach out to many customers at the same time and that too within your budget. You can plan your marketing strategy such that you only use modes which lie in your budget.

Virtuanic Solutions is one of the leading IT & Digital companies in Bangladesh- continuously creating value as a 'One-Stop Solution Provider for IT & Digital needs'. What makes us unique- is the fact that we understand and are capable of working on each of the critical elements of the digital eco-system.

Strategy & Consultant

We understand and can lead your through that will help you.

A business strategy consultant helps business owners or organizational leaders with decision making in regards to their business strategy. We understand and can lead you through the processes that will help you determine who you are, where you want to go, how you will get there, and how you will measure success.

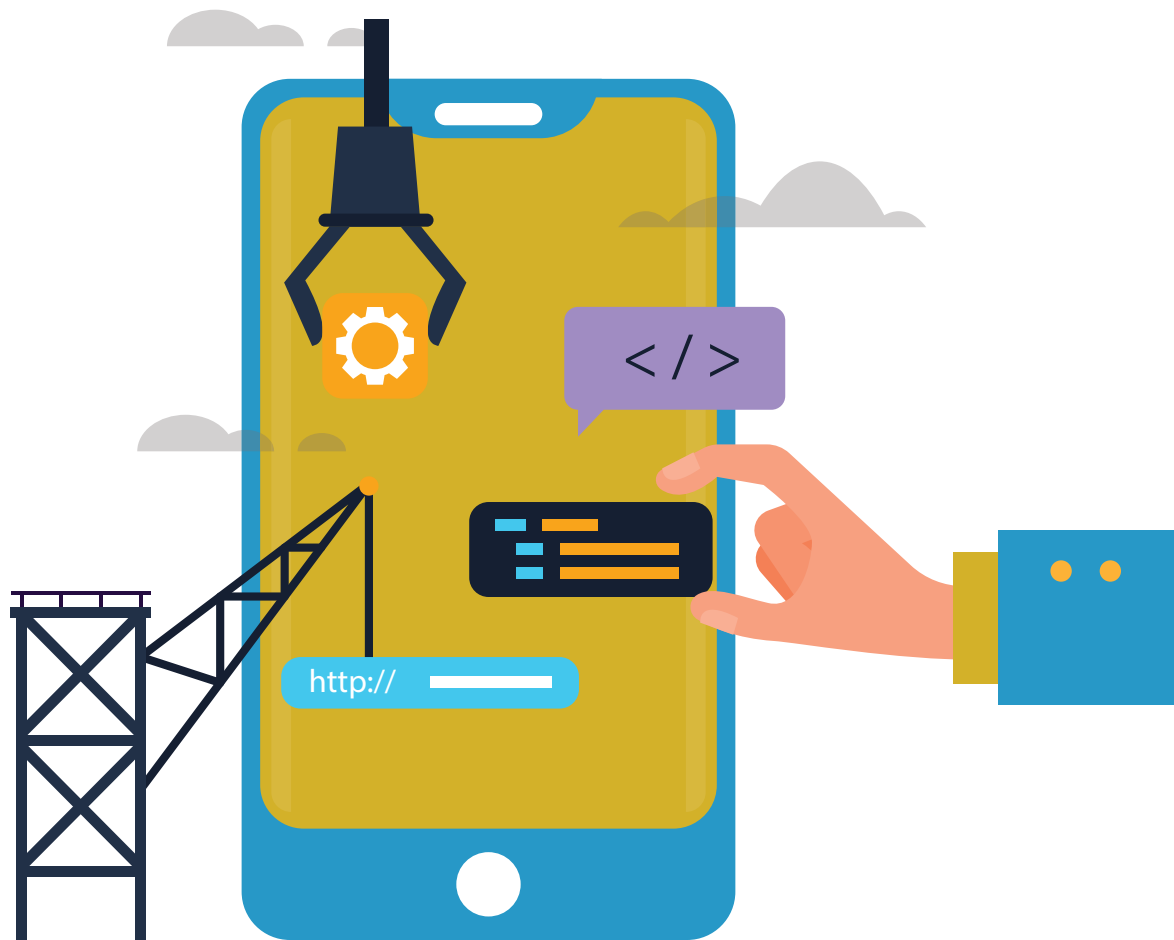

Mobile App Development

We do strategy, design, and development for iPhone apps and Android apps.

A mobile app is like a blank billboard sign. You can do what you want with it; you can make it stylish, hip, functional, shocking, or informative.

We do strategy, design, and development for iPhone apps and Android apps. We work for startups and enterprise alike. We also know a thing or two about branding, websites, and blockchain development.

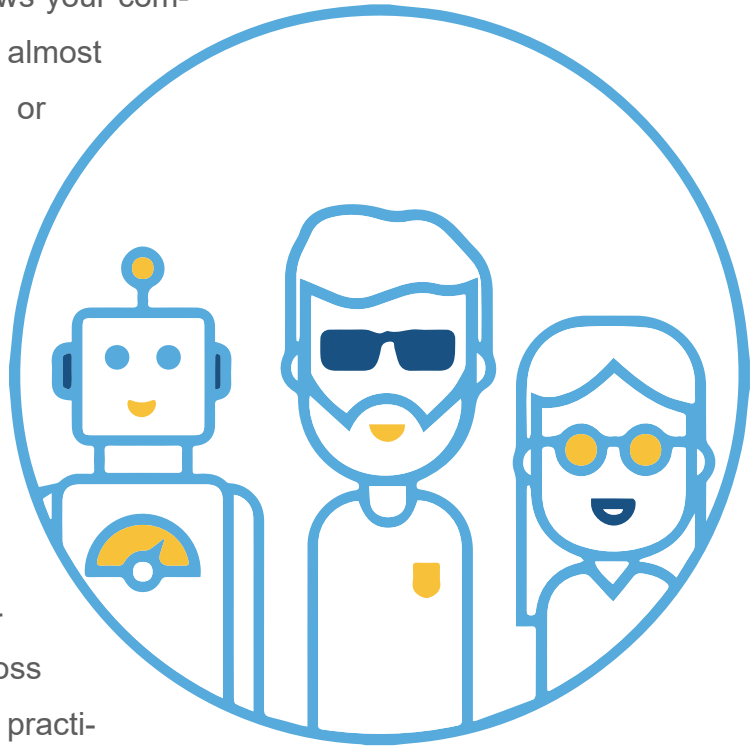

Software Development

We provide practical, pragmatic and powerful solutions to address those challenges.

Software development brings your business to new heights of integration. It allows your company to be accessible from almost anywhere via smartphone or computer.

We offer software development and content management services to international customers across multiple industries. We understand the challenges that our customers face within and across these industries. We provide practical, pragmatic and powerful solutions to address those challenges.

Creative Design

We have an uncompromising commitment to provide you.

First impressions are everything. Technology has granted businesses with multiple avenues for brand exposure making the emphasis on good design more important than ever.

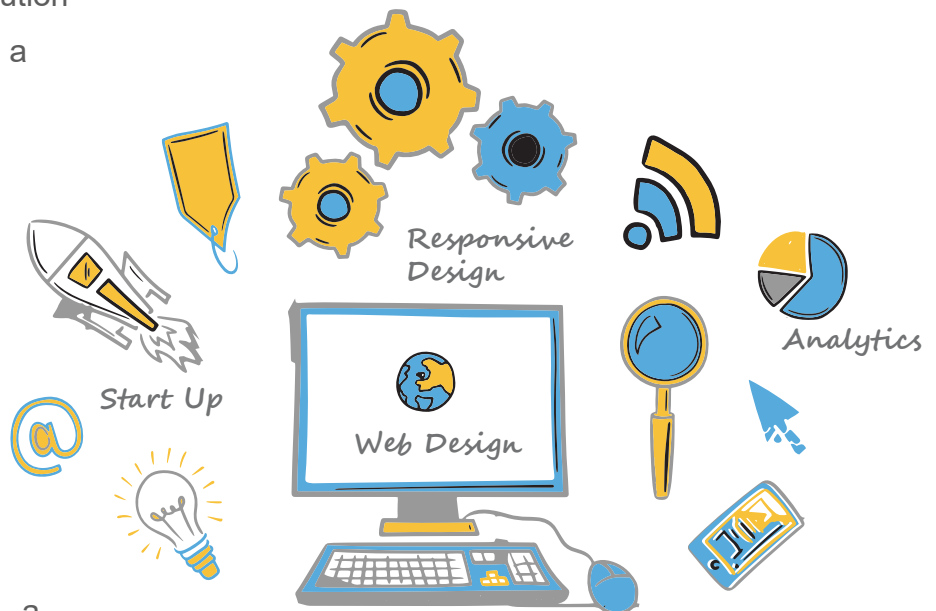

We have a highly skilled team of experts who are professionals in graphic design. Your satisfaction is our highest priority. We have an uncompromising commitment to provide you most quality work and services.

IT Solutions

We always eagerly wait for you to provide our best services and here we go.

IT solution is a solution which is a product, a combination of products, services, or a mix of products and services that a vendor, service provider or value added reseller (VAR) will offer to their client. In almost every case, a solution is provided to address the client's specific business problem or other need.

An information technology (IT) solution is a set of related software programs and/or services that are sold as a single package.
