1.2 Background of the Nextech Training Program.

Bangladesh growing faster in digital transformation where skill workforce is needed. IT Education has been identified as an important determinant of digital economic growth. Government has taken initiative and made the ICT learning compulsory from the early age schooling in our country. Higher levels of ICT educational attainment lead to a more skilled and productive workforce, producing more efficiently a higher standard of goods and services, which in turn forms the basis for faster economic growth and rising living standards. Moreover, to meet the challenges of 4th Industrial Revolution country need more skilled workforce in IT specially in advanced technology like **Website Design, Bigdata, IOT, Block Chain, Android Apps Development, Machine Learning and more.** Considering the market demand Nextech Limited keep their step ahead and initiated its training wings in the year of 2010. The company has the both onsite, off site and online training facility since along. Starting with the programming course the company is now very much concern about the advance technology to trained.

We offer training and learning lab that are tailored to provide solutions to help increase the productivity, performance and profitability of the web applications, software development, graphics design, freelancing, mobile apps, web development, digital content management and services related businesses and organizations.

We believe in customizing and developing specific solutions through a collaborative process designed to identify a client's needs, requirements and objectives.

The unique approach combined with the strong faculty of experts, competent trainers, and multilingual facilitators puts our lab in the position to spur the progress of establishment.
