Company Overview

OLIVINE LIMITED opened its journey with a mission to use the Information and Communication Technology (ICT) as a main stream of communication and automate the regular business processes. It then extended the services thereby using Internet technologies to enable the fastest, easiest, and most enjoyable software experiences possible. While our customer base and product offerings have grown considerably since our early days, we still maintain our founding commitment to customer satisfaction and the delivery of the most desirable ICT experiences. Today, OLIVINE LIMITED is the place that offers anything you want to automate for your business or individual purposes.

OLIVINE LIMITED is a most resourceful Bangladeshi Information and Communication Technologies (ICT) services and training provider. We operate internationally through our head offices and branch offices. We design, develop, support and promote software ICT applications using integrated, state-of-the-art technology expertise covers:

- MIS for the government sector
- Software Development
- Customized Software Development
- Web Technology
- Business Services (B2C, B2B, B2E, etc.)
- Testing and QA
- E-Commerce Development
- Mobile Application Development
- IT Infrastructure Solution
- Site Migration
- ERP Solution
- Banking Services
- Design & Animation
- Outsourcing Services
- ICT Training for a poverty- free middle income prosperous Bangladesh

National and International Presence

OLIVINE LIMITED undertakes a wide range of national and international projects through local clients and freelancing projects. We are well-known to our customers as a supplier of ICT services to national, international organizations, and the private sector.

Human Capital

OLIVINE LIMITED employs 10 Fulltime, 7 part time and 15 contractual, software Engineers, ICT Skilled Employees and consultants come trainers (around 5% PhD, 40%

M.Sc. and 55% B.Sc. or equivalent). Our staffs are multilingual and multinational with in-depth experience in the delivery of services.

Company Background

OLIVINE LIMITED is a ICT based company that has been successfully present on the offshore software development market for over three years and since that time has grown to become a well-regarded player in this industry and has proven to be a reliable, efficient and trustworthy service provider to the businesses from all over the World.

The OLIVINE LIMITED was established recognizing the potential of the increasing market of the companies, that are or would be looking to make their business processes more efficient by automating them through the use of advanced software solutions and/or to act in response to the current market forces that dictate the necessity of online presence in order to stay abreast with competition.

Since the time it was founded in 2011 and registered in the year 2014, the company has been involved in releasing numerous projects for diverse business spheres ranging from basic websites to highly sophisticated business automation systems. Our proficiency in a wide range of modern computer technologies ensures that the solutions we develop perfectly suit our clients' needs. Besides, our trainees get world class experiences and are leading in the market with very positive impression.

Our Mission

Our creative ideas from young resources and decisions from experienced management ensure the best product delivery and customer satisfaction. Besides, we work for the disadvantaged community to ease their life and created a platform for students to have professional experiences through internship opportunities. Providing our clients with the most optimal, cost-effective and robust solutions, which boost up the increase in the returns and productivity of their businesses and becoming a service provider of choice for our every client by outperforming our direct competition in the quality, efficiency and diversity of the services we offer.

Our Target Market

There are three major target markets that OLIVINE LIMITED operates in:

The first market is companies that are in the business of providing software and Internet solutions to the end clients. They may include companies, which are looking to utilize our skills and experience, such as consulting companies, providing custom software development services, software houses, developing box software solutions or web design companies looking to expand the scope of services they offer. Secondly, the individual

companies that are looking for a professional company to automate their business process and thus set optimal, cost-effective and robust solutions through Olivine limited. Finally, OLIVINE LIMITED is dedicatedly training and working for the establishment of Digital Bangladesh Vision 2021 to move the country towards the status of a poverty- free middle income prosperous country.

Why olivine?

We live with a positive idea in mind: Our Nation is great. We remember that a phoenix rises from ashes. The seed blossoms from dirt. We open our minds for ideas. We set our mind on moving forward and thus we create a better world. When all the creative ideas are lead by adroit, we will be able product the best quality products for our clients. The reasons why we believe that OLIVINE LIMITED is the advantageous choice for training and/or outsourcing your software development are various and few of them are provided just a handful of examples of what sets us apart from the competition:

Value

Our clients benefit significantly from utilizing the professional skills and experience of our ICT team for the fracture of the value the equivalently skilled local professionals would demand. All that while being guaranteed to obtain only the highest quality end results.

Advanced Communication Skills

At OLIVINE LIMITED, we believe that every client has a unique set of needs to be fulfilled by contracting a software development company. That is why we work closely with each client to gain a full understanding of what those needs are and come up with the solution that serves those best.

Efficient Development Process Organization

During the years of presence in the offshore software development we have achieved outstanding efficiency in organizing the development process (highly experienced project management, automated control over development process and reporting system). As a result, we manage to avoid unexpected overhead expenses and the benefits are passed on

directly to our clients in a form of cost efficiency of their projects realization and obtaining the results within the most optimal timeframe.

Predictable Quality Outcome

Each project, no matter whether it is extensive or undersized, we regard as an opportunity to showcase the high level of expertise and professionalism that we possess. Our developers and quality assurance (QA) specialists work to ensure that our clients can at all

times rely on obtaining a product or solution that will pass the strictest tests on efficiency, practicability, robustness, adaptability to different environments and stability.

Advanced Analytical Skills

The Company's analysts have over 5-25 years of experience in business case analysis (25 years in business), software Engineering, teaching and sales in the wide range of human activities. That ensures that we can easily interpret any requirements we receive from our clients, work out the most suitable development approach and transform them into an advanced cost and performance-efficient technical solution, which takes into account the client's business goals, technical settings, expected frequency of updates and more.

Quality Focus

OLIVINE LIMITED success in satisfying its customer's from its commitment to a consistent methodology, effective project management techniques, quality assurance, testing and dedicated professionals. We follow thorough quality management techniques, which along with our mature development processes ensure that a high quality is delivered in every phase of our software development and maintenance cycles. As part of our well-organized software project development cycle, we have predefined processes for software development life cycle, quality assurance and documentation.

Business Model

We at OLIVINE LIMITED understand that every client has unique needs and different ways are required to fulfill them. We offer several business models for this very reason. Each of the models has been designed to offer maximum benefits to clients. Underneath are the varieties of business models that OLIVINE LIMITED offers to its customers to effectively fulfill their requirements, and eventually add value to the customer core business areas to maximize growth and profit.

The Offshore Model

The offshore model enables clients to utilize the resources, infrastructure and manpower of OLIVINE LIMITED in Bangladesh to execute their projects. To meet its client's aggressive schedules, OLIVINE LIMITED presents the offshore outsourcing process that offers: –

- Resource management, to meet demanding project deadlines.
- Extensive project processes to meet different delivery needs of the customer.
- Extraordinary cost benefits when compared to the cost of an equivalent onsite team.

Additional benefits to the customer in terms of reduced infrastructure required, to seat, connect and manage an onsite team.

The onsite model

Olivine limited provides its software consultants and trainers to carry out onsite services. These resources, as a part of the onsite project team would report to project manager responsible for the project. The onsite model can be a component of the offsite model, where in, olivine limited will send its personnel to the client's side for implementation, testing and support of various projects.

The Offshore and Onsite Combination

OLIVINE LIMITED could also carry entire programming work offshore and then undertake training, implementation and testing onsite at the customer site.

The Virtual 24 Hr Development Cycle

This is another useful concept, which works well under the onsite, offsite and offshore combination. It is useful to customers who are working against very tight deadlines and at the same time are unable to shore up their budget for getting the work done onsite. OLIVINE LIMITED understands that there are certain key factors, like, time to market, ownership of source code and quality of solution which vary in degree from customer to customer, based on which we adopt a model which suits our customer the most.

Services and Areas of Expertise

- MIS for the government sector
- Software Development
- Customized Software Development
- Business (B2C, B2B, B2E, etc.)
- Testing and QA
- E-Commerce Development
- Mobile Application Development
- Web Technology
- IT Infrastructure Solution
- Site Migration
- ERP Solution

- Banking Services
- Design & Animation
- Outsourcing Services
- ICT Training for a poverty- free middle income prosperous Bangladesh

OLIVINE LIMITED has broad experience in the delivery of various ICT and software services. As an indication, services involve the following key domains:

Application & Software Development

Designing and developing applications and software solutions has been a core and continuous activity of OLIVINE LIMITED since its very existence. We have developed for a wide range of national and international organizations some of their most popular and successful applications. We have accumulated extensive experience in addressing the needs and requirements of the government sector and big corporations.

OLIVINE LIMITED provides a wide range of own products, tools and platforms. We also undertake the development and support of tailor-made applications according to clients' needs. Our offerings rely on a wide range of COTS (Commercial off-the-shelf,) tools, as well as Open Source frameworks. We offer the best price/performance ratio and optimal Total Cost of Ownership (TCO) for the client.

Outsourcing - Managed Services

OLIVINE LIMITED undertakes delivery of outsourcing and/or managed services for its clients. Such services are offered in strict compliance to the most efficient methodologies known today in the market (e.g. ITIL) and include support of IT and telecom systems and applications in production; 1st, 2nd and 3rd level support to users and administrators of specific applications; and provision of hosting services.

OLIVINE LIMITED relies on modern and efficient IT and telecoms technology infrastructure comprising a wide spectrum of tools and platforms as well as laboratory and testing environments. Almost all the developed solutions are complex, critical, sensitive and high availability systems, operating under strict SLAs (Service Level Agreements). We follow well-proven and professional working methodologies. They rely on accumulated experience and know-how, software libraries, best practices and constant improvement methods. Moreover, project specific metrics are defined and applied to ensure consistent results of a high standard.

Software Development

OLIVINE offers a completely bespoke business software design service. Sometimes off-the-shelf software packages just don't offer you the right IT solution. You need something that

can be designed and tailored to your needs. At OLIVINE, we can help with every aspect of software development, working with you to understand your needs and to determine the best way to deliver the solution you need. We work with you through prototyping and design and then through staged development and implementation stages. We expect to provide trustworthy and reliable solutions and ensure that our applications deliver now and in the future. We focus on what you see, like ease-of-use, usefulness and quality, and what you can't see, like scalability, security, resilience and the things which make our applications flexible enough to meet your future needs. We have the in-house capability to

come up with innovative solutions that offer best operational practice for your business, with clever user and customer interfaces. Software packages can be designed to link into your other IT systems such as accounts, sales and marketing, CRM, stock control and many more. A bespoke software solution can save you money and offer real ROI benefits. We also have a track record in designing solutions that can in turn lead to further revenue earning opportunities. Additionally, we have the capability to manage your software application as part of our IT support services. This management enables control and monitoring of performance, assisting with user operations, developing updates and ensuring continuity of business critical systems. We can also offer complete management of your licensed software packages, removing the headache for you on volume licensing and helping you to take advantage of the correct licensing opportunities to deliver real value for money.

Customized Software Development

OLIVINE LIMITED is specialized in development of customized ICT software solutions. The solutions provided by OLIVINE so far are well scrutinized as to the client's requirements and featured with scalable and robust solutions, at the same time is remarkably cost effective. The development services are included but not limited to our customized software solutions:

- Site Migration
- Web design, development, maintenance & troubleshooting
- Desktop and web based application development
- Offshore and onshore Software development
- Database design, development & maintenance
- Windows & UNIX/Linux based development
- Embedded software development
- Mobile device programming
- Software to database integration
- Web services development and maintenance

- Multi-user and multi-Level software solutions
- Customized ERP development
- Content Management Systems development
- Technical documentation
- System installation and user guides
- Online Statistical site

Website Design

We create a smart and functional design for your new website or bring up to date with your current business requirements a website you already have. Our capable team would be

happy to discuss your requirements and work with you to develop the most suitable solution. We are proud to work in partnership with only top-quality web designers, who are highly professional in the field and, much more often than not, know what aspects yield the best returns in a particular area.

Web Applications and Websites

We possess vast experience in creating Web applications of various types, levels of sophistication and purpose. All our applications are delivered using the most up-to-date computer technologies and development principles, including Web 2.0. We have been involved in developing such applications as:

- Corporate websites and Personal Blogs
- Business process Automated management systems
- Mobile Applications
- Real Time Trading Systems
- E-commerce Applications
- Content and Knowledge Management Applications
- Internet-oriented systems for Customer Relations Management (CRM-systems)
- Office Automation
- Mailing list management
- Database management applications
- Diverse websites of different level of complexity and sophistication.

Mobile Application Development

OLIVINE Applications offer design and development services for mobile apps. Based on your requirements, OLIVINE Applications produce apps which can be standalone or integrate with other data sources using secure management systems. Our mobile app

development allows for apps to be output for native iOS, Windows and Android platforms. At OLIVINE Applications all mobile apps are developed to deliver content and functionality to users through an intuitive and optimized interface.

Our team of experts will work with you to ensure the latest Smartphone features are integrated with your mobile app. At OLIVINE we offer the following mobile applications developments:

- iOS applications development
- Android Applications Development
- Cross-Platform Mobile Apps Development
- Brand SMS & Mobile App

Programs for Pocket PCs, Wireless and Mobile Devices

We actively work to increase our involvement in a new prospective market of software development for pocket, mobile and wireless devices. Our expertise is the usage of the communicative potential of the devices, both when they communicate with each other and while accessing the Internet or a corporate network, however we are looking into broadening the range of our skills for this area.

ERP Solution

Our offer is strictly connected to business environment and requirements of our clients - we are providing IT solutions, services and support for companies. What mark us out is thinking out of the box, using advanced technologies, therefore semantic. Only this kind of connection gives a chance to prepare effective and secure dedicated solutions, which support business. And those are in specific:

Efficient management requires selected tools like ERP and CRM systems, which should help to coordinate strategy and operating activities. Solutions developed by OLIVINE increase productivity, support sales figures and moreover, keep persistent access to company knowledge and resources.

Outsourcing

Advanced technologies, empowered customers, new business models and an explosion of data all are contributing to a dramatic shift in the business landscape. For organizations everywhere, these changing dynamics represent an unprecedented opportunity to deliver new value to customers while capturing new value for the enterprise. A sourcing relationship with OLIVINE IT LTD can help you do both. OLIVINE delivers the combination of deep technological expertise and rich industry insight you need to align your IT and business objectives—designing a transparent, agile value chain that supports your current requirements while enabling you to chart a path to innovation and growth. Leverage OLIVINE's expertise managing business processes, applications and IT infrastructure, truly

global reach, deep analytics capabilities and experience working with many of the world's most successful businesses in order to reap the rewards of an innovative and collaborative outsourcing partnership.

Testing and Quality Assurance

Quality assurance (QA) and software testing can make or break go-live schedules and user adoption of new technologies. Leaders must rely on proven testing processes and technologies to increase efficiency and precision, while reducing risk, costs and cycle times. Through our superior teams of QA professionals, process improvement expertise and

pragmatic approaches to software testing, our QA and Testing Services help you realize the return on investment of your application initiatives. Our capabilities include:

- Process improvement
- Technology consulting
- Assessment
- Automation implementation
- Testing

Software Products for Resale

OLIVINE LIMITED software products development is another prominent direction of our company activities. We realize the entire product development cycle:

Future demand estimation for the developed product including:

- a. Market analysis
- b. Competitors and competing products analysis
- c. Sales forecast.

Preparation for the software product implementation including:

- a. Determination of a range of functions necessary for the product
- b. Variety of the product's versions to suit particular requirements
- c. Creation of the technical documentation and user manuals
- d. Implementation process mapping

Release of the new versions, including

- a. Design
- b. Programming
- c. Testing and fine-tuning of a software product

Sale and after sale services, including

- a. Publication of the information about the product on the internet
- b. Creating a promotional website for the product
- c. Conducting advertising campaigns

- d. User support
- e. Feedback processing and analysis

We are open to collaboration in the field of co-producing box software for the future retailing of the resulting product on the market.

Contract Programming

OLIVINE LIMITED highly skilled and experienced personnel possess knowledge of most of the computer technologies and languages available and we always keep up to date with the latest developments in this area.

Project Management and Business Analysis

Years of hands-on experience from the specialist team and the time-proven Project Management Methodology, which has been created to incorporate all the specifics of our company development process, guarantee that our project managers can successfully plan, oversee and guide virtually any project, no matter how large and challenging, that comes their way. Our project leaders possess strong technical skills, allowing them to take on an active technical management role as well as their Project Management role.

Moreover, it is vital that clients' business needs are correctly identified so that appropriate solutions to their business problems could be worked out. Our managers possess solid analytical skills and will work with you to achieve sufficient understanding of the structure and the dynamics of the organization in which a system is to be utilized and derive the system requirements needed to support the business goals of the target organization.

Technical Support and Maintenance

We provide technical support to all the applications that we have been involved in development of. OLIVINE LIMITED technicians are available to provide 24/7 support and maintenance when so required.

Clients

Working for our clients' success and making sure they obtain tangible benefits from cooperating with OLIVINE LIMITED are the goals we endeavor to achieve first and foremost. When working with us our clients expect to be dealt with professionally, responsibly and constructively and our team works as one to make sure these expectations are always met or, better still, exceeded. What is more, we believe that trust is one of the key factors to successful and long-lasting cooperation, so we work hard to establish and uphold trustworthy relationships with our each and every client. During the years the company has been operating, we have managed to attract clients from all over the world, including the Bangladesh, Hong Kong, USA, United Kingdom, Netherlands and more. We are

proud to say that we have over 85% client retention rate and the majority of them opt to have OLIVINE LIMITED as their preferred service provider and cooperate with us on a regular basis. The references that our clients provided us with support our claim that we are fully capable of delivering top-quality end results while complying with the strictest business standards and ensuring seamless and efficient communication process. Details of each client:

<u>Client Name</u>	<u>Project Details</u>
Client: Mr. Mohd Abdullah, Member of Parliament Project URL: www.mpabdullah.com	Personal Portfolio Solution: Personal Portfolio is a web-based system where one can know about a person with details of what he can do or already did. It is more like a living and changing collection of records that reflect ones accomplishments, skills, experiences, and attributes. It highlights and showcases samples of some of the best work, along with life experiences, values and achievements of the person.
Client: NASSA Construction Project URL: www.nassaconstruction.com	Construction Management Solution: This is a web-based system where one can know about a company with details of what the company can do or already did. It is more like a living and changing collection of records that reflect a company's accomplishments, bilateral relations with other companies and attributes. It highlights and showcases samples of some of the best work, along with life experiences, values and achievements of the key persons of the company. A Company website does not take the place of a brochure or pamphlets, but it can accentuate the company profile and what it can offer in the chosen field.

Client: A.F. Textiles BD Project URL:www.aftextilesbd.com	Buying House Management Solution:Buying House Management System (OBHMS) which is virtual buying house management software which will provide a corporate system with some wonderful features that let one work easy and comfortable. The best part of this software is that it will provide a virtual office, where within a click one can get all the information at a time. This software manages product information; make order, ship order, track currency rate and so many features that allow one to make the business easy.
Client: JOGAJOG NGO Project URL:www.jogajogngo.org	Organization Portfolio Site: This is a web-based system where one can know about a company with details of what the company can do or already did. It is more like a living and changing collection of records that reflect a company's accomplishments, bilateral relations with other companies and attributes. It highlights and showcases samples of some of the best work, along with life experiences, values and achievements of the key persons of the company. The information that a company incorporates in the website can greatly reflect on a company's abilities as well as become a useful tool in marketing to clients, corporations and to employees. A Company website does not take the place of a brochure or pamphlets, but it can accentuate the company profile and what it can offer in the chosen field.
Client: N2S Limited – Bangladesh Project URL:www.n2sbd.com	Factory Management Solution: This management system is such software that helps innovative companies to reduce chaos by using our customized software. When compared to different workflow management software, OFMS is very simple and easy to use. For any businesses where workflow processes often change dynamically, implementing internal workflow automation software is often challenging. . OFMS is used to execute, manage, and optimize all the processes of product order to delivery, what makes the business truly stand out. It consists of various features which increased efficiency and accuracy of workflow.

Client: AB Foods
Project URL: www.abfoods.com

Industrial Management Solution: AB Food (Factory Management System) is such software that helps innovative companies to reduce chaos by using our customized software. OFMS is used to execute, manage, and optimize all the processes of product order to delivery, what makes the business truly stand out.

The Team

We are well aware that the success of any software product depends significantly on the qualities of a development team. That is the reason why we pay much attention to organizing a solid professional collective.

All OLIVINE LIMITED personnel is highly educated and experienced in what they do. Every member of the development team has as a minimum a bachelor degree in computer science and/or business from the two best UK and Australian Universities. Moreover, they possess decades of professional experience combined in software development and programming.

The experience, advanced English skills and the potential of our managers and developers allow us to successfully perform tasks of practically any kind and complexity in the fields of creation, testing, and modification of software products. In case there is a need to realize a really considerable project under the strict time constraints, we can draw on additional quality resources and put together an efficient work-team, which will include sufficient number of skilled professionals.
