Organogram

Overview

Nerddevs Limited works using cutting-edge technology and is a smart business solutions provider in Bangladesh and Overseas. The company is managed by a group of professionals committed to make a difference in apps development, web application development and Software outsourcing services. We are committed to deliver world-class industry-standard software solutions to our valued customers representing a wide range of social and business spectra, including trading and manufacturing houses, educational institutions and governmental organizations. Nerddevs is building world-class software since 2015. Over the last 9 years, we have helped companies to build a robust and scalable platform to run their business. Our core strengths are messaging and calling solutions. We have helped TestReach to build their platform which now taking exams for ACCA, CIPS etc. One of our mobile apps is handling 4-5 million messages per month. We also started working with chatGPT. One of our developed app got 1,00,00 users in just 3 weeks.

Video Conferencing has always been our core strength. We worked on a web application called Daency, where dance trainers can train their students. The students can enroll to a class where all of them can follow a video along with their trainer by a video conference call. Besides those, we are working on a one-stop solution for POS, accounting, HR, and eCommerce. It is called **Bikribatta**. And we launched several apps such as **DailyStocks**, which is a real time stock notifications app that helps users to get updated about stock price changes. And **AI Mate**, the ultimate companion app powered by the advanced capabilities of ChatGPT and OpenAI's GPT-4. Whether you're seeking intelligent conversation, information, or language learning support, AI Mate is your go-to solution.

Major Focus

Price and Quality Equilibrium - We offer high-quality, technologically effective and cost-effective software development services.

Allocation of Quality Resource - We always focus on high quality solutions. As part of it, we always recruit high quality resources so that we can keep the commitment.

Best Solution to a problem - Our focus is always to provide the best solution to a problem. We have worked with complex and large applications. So our engineers have the capability of providing the best solution.

Easy communication and support - We use proper project management tools like Jira, Asana, Trello etc to provide best communication for a project.

Achievements

In **Second Text**, users sending 5 (five) million messages per month

1

2

In **Second Line**, thousands of calls being made daily

This year British Council started using **TestReach** Online Assessment Solution

3

4

In **Genius AI**, 100,000 of users signed up in just two weeks

Daency helps beginners to learn to dance at the comfort of home, together with anyone in the world.

“Dancers don’t need wings to fly.” The letters “ae” in our brand name resemble a pair of butterfly wings, and symbolize the creativity in a dancer’s mind.

Daency is a platform to support dancers to learn in their own way, and to connect, to laugh and to grow together. Most of the people have taken at least one dance class in their lives but few was able to develop into a level that can they can confidently command their bodies and dance to music they like freely. Most people would appreciate seeing a good dancer and thought, “wow, that looked awesome”.

Online dance classes today should break the geographical constraints for 24/7 availability, and use technology to customize to everyone’s unique ability and taste in their growth trajectory as a dancer.

AI Mate: GPT Chat, the ultimate companion app powered by the advanced capabilities of ChatGPT and OpenAI's GPT-4. Whether you're seeking intelligent conversation, information, or language learning support, AI Mate is your go-to solution.

With AI Mate, engaging in dialogue feels like conversing with a knowledgeable friend, thanks to the cutting-edge AI technology that underpins its chat functionality. But that's just the beginning – AI Mate goes beyond text-based interaction, offering support for image queries and YouTube summaries, making it effortless to find and digest content across various media formats.

One of the standout features of AI Mate is its language learning support, facilitated by voice translation capabilities. Whether you're traveling abroad or simply aiming to improve your language skills, AI Mate is here to assist you every step of the way. The app achieved the milestone of 100K downloads on the Google Play Store with a 4.5-star rating.

The image shows a screenshot of the AI MATE website's landing page. At the top left is the AI MATE logo. To its right are navigation links: "Features", "Pricing", "About Us", and "Contact". A blue "Try Now" button is positioned at the far right of the navigation bar. The main content area has a light blue background. On the left, the text "Meet **AI Mate**, Your Ultimate Intelligent Personal Assistant" is displayed in a large, bold font. Below this, a smaller line of text reads "Experience the future of personal assistance. Powered by ChatGPT, GPT-4, GPT-4o and more". A blue "Try Now" button is located at the bottom left of this section. On the right side of the main content area is a large illustration of a yellow robot head with a blue visor, appearing to interact with a laptop. The laptop screen shows a pie chart and some data. The robot is holding a blue folder. At the bottom of the page is a dark blue footer. It contains the text "Copyright © 2024 AI Mate, all rights reserved" and "Developed by" followed by the "nerddevs" logo and tagline "the best is here".

AI Chat 4.0: Genius 4+

Powered by ChatGPT & GPT-4o

[Alloy Studios](#)

★★★★★ 4.7 • 4.8K Ratings

Free • Offers In-App Purchases

Genius is the ultimate AI chat companion, powered by the latest innovation from OpenAI's team, GPT-3.

With its advanced AI capabilities, Genius understands and communicates with you in a natural, human-like manner. Whether you need assistance with writing, research, analysis, coding, or problem-solving, Genius has got you covered. But Genius doesn't stop at text-based interactions. With GPT-4 Vision, you can send photos to Genius to analyze. From object recognition to image captioning and visual question answering, Genius has remarkable visual understanding capabilities.

Genius can also understand and respond to a wide range of topics, from politics to personal anecdotes. It can also help you research complex topics, come up with new rap lyrics, write code, conjure up new recipes and more. Using GPT, Genius can understand and write like a person. There are some predefined templates to start with. So, you don't have to think about how to ask. You can just write whatever you want, and our intelligent backend can process it smartly. You can also have open ended chat where you can talk about anything you want. The app was released on the last week of January. 1,00,000 users signed up in just 3 weeks.

Reasons why Genius is great:

- Personalized AI assistant powered by ChatGPT and GPT-4
- GPT-4 Vision for advanced image analysis and understanding
- Writing assistance, research, analysis, coding, and more
- Intuitive and user-friendly interface

Second Texting Number 4+

Private Text Message App Now

Alloy Studios

#59 in Social Networking

★★★★★ 4.6 • 26.1K Ratings

Free • Offers In-App Purchases

Protect your privacy by sending texts from a new number. Send and receive photos to anyone with a US phone number. Unlike many other texting apps available, Second Texting Number does not have any annoying or obtrusive advertisements. We've received countless reviews for our top notch reliability, ease of use, and customer service!

Your recipient will receive texts from your new number. You can use your number to receive short codes for account verifications as well. Customize your number with any available area code by signing up for Unlimited. If you no longer like the phone number you chose, you can get a new one at any time.

Features

- Send texts to any US number
- Customize your phone number
- Send and receive photos
- No annoying spam calls or texts
- Fast and reliable customer service

Second Line 2nd Phone Number 4+

Calling & Texting for Business

Alloy Studios

#109 in Business

★★★★★ 4.5 • 1.4K Ratings

Free - Offers In-App Purchases

UNLIMITED TEXTING + HIGH QUALITY CALLS

Send and receive unlimited text messages, including photo messages.

CUSTOMIZABLE PHONE NUMBER

You get to choose your number with Second Line. Choose from hundreds of unique numbers from our large inventory of local phone numbers.

CARRIER LEVEL RELIABILITY

Gone are the days of poor call quality. With Second Line, your new number is just as reliable as your first.

SCHEDULE MESSAGES

Need to follow up with a client at a later point? Schedule messages through the app to automatically send texts at a certain time. You'll receive a push notification once your message has been sent.

BUSINESS HOURS

Set the hours when you want to get calls through business hours. Calls received outside the business hours will be sent to your business voicemail.

SEPARATE CONTACTS

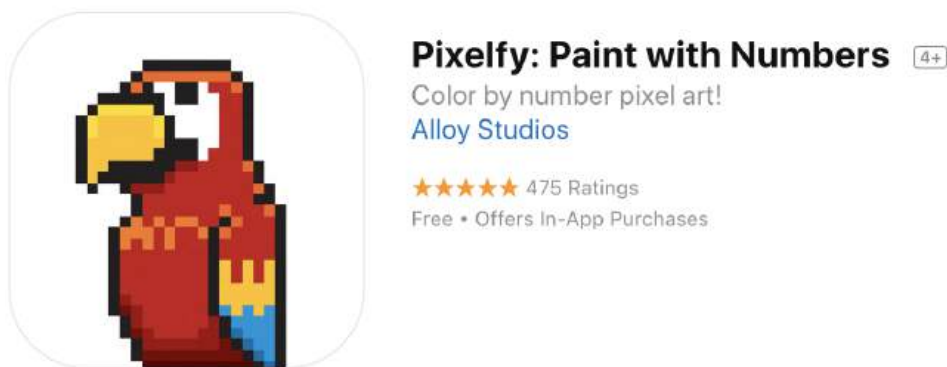

Unlike many other apps, your contact book in the app is completely separate from your iPhone's contacts.

REAL TIME CALLER ID

Know when you're getting a business call. You won't have to guess whether or not you're receiving a business call.

ADVANCED TEXTING TOOLS

Second Line was designed to make your life easier. Use Quick Response to easily respond to commonly asked questions. Enable Auto-Reply to automatically respond to missed calls or texts.

Create amazing pixel art by following the numbers! Simply follow the color palette and relieve yourself from stress. Tons of different art to color, including animals, landscapes, people, and more!

Awesome Features:

- Fun and easy coloring
- Large selection of images for you to color
- Share your art with friends
- Free images posted daily
- No annoying ads
